Meeting is to continue to discuss our CDF funding strategy. Bil has had a follow CDF and new information to discuss regarding the other Donors commitments and our current roll over patients that need will have a dollar shortage in the beginning of the year. Additionally, we would like to establish and agreed upon estimate number of injections a patient would ideally receive in year 2 or as they continue on therapy. Is it the numbers in our clinical trial or other market research numbers? This will appropriately help us inform them on how we come up with our funding strategy.
