Re: Top 25% AT Accounts

Attached is a current listing of our largest 7.5mg accounts. The list was organized without respect to sales force alignment or class of trade (other than the requirement that they be an "AT"). Additionally, purchasing groups or other similar situations where omitted since hard data on group members is not available.

As we head into the waning months of 1995 and the challenges of integration, DPS and 3-month loom ever larger, I wanted to ensure these accounts where identified to you to help ensure continued business through these challenges.

Re: Top 25% Direct to Doctor 7.5mg Accounts

Attached is a copy of my top 25% direct to doctor 7.5mg Depot account analysis you had requested. There are 6,374 "AT" classed accounts that have purchased 764,965 units of 7.5mg Depot for $347,867,889 from August, 1994 to July, 1995. The top 25% of these, 1,602 accounts, have purchased 764,965 units for $261,993,507 for the same time period. The top 25% accounts represent 76.4% of the total 7.5mg unit sales and 75.3% of the total 7.5mg dollar sales to all "AT" classed accounts. The average selling price for all "AT" accounts is $347.37 translating into a 9.1% effective discount. The average selling price for the top 25% accounts is 342.49 translating into a 10.3% effective discount. The top 25% also represent 53.6% of the total domestic 7.5mg unit sales for the same time period. The average top 25% account purchased 478 units for $163,541.51.

If you have any questions, let me know.
