Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. Just one company, Monsanto controls the vast majority of corn and soy seeds in the US.

Monsanto produces genetically modified organisms, and the safety of such products have been questioned by many scientists and experts. There should be laws requiring GMOs to be labeled, so consumers can make their own decisions whether they want to eat GMO food or not.

Thank you for giving me the opportunity to comment.

Sincerely,

Susan Asato
