Subject: Comments

I am writing because I am concerned about Monsanto's policies and have been for a long time.

They are monopolizing farmers, creating seeds that are genetically modified, and encouraging pesticide use with Round-up Ready seeds. This is the wrong direction!!

I buy only organic, sustainable, mostly local produce for my family and it infuriates me that Monsanto's GMO seeds can infect nearby organic farmers and that we have let this enourmous "Cat" out of the proverbial bag. Shame on us! Shame on Monsanto!

Money above everything.

Thank you for giving me the opportunity to comment.

Sincerely,

Sarah Ford
