Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

I do not want to eat food treated with pesticides like roundup and made from modified genes...UGH!!

Monsanto and GM food are our nemesis.
What's in our food, anyway?
And why aren't there decent labels telling you where it grew, what chemicals are on it, and if it's genetically modified?

Food is grown and raised in ways that are terrible for the environment, with methods that pollute the water, poison the soil, and threaten our long-term food security.

Prices are rising at the supermarket, but you've heard that farmers are struggling -- and big food companies have made record profits this year.

Monsanto isd a bully...in the US and worldwide...they must be stopped!

Thank you for giving me the opportunity to comment.

Sincerely,

Merrill Kramer
