Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

I am tired of lobbyists controlling the food I feed my family! Agro-businesses have been allowed to control seeds and force genetic modification and pesticide use. Small organic farmers should be allowed to produce our food. We would be healthier and our environmental problems would be reduced.

I want to know what I am eating. If business can fill our super market shelves with unhealthy products, at least make them label the ingredients so I can opt out of buying them. It should be my choice.

Thank you for giving me the opportunity to comment.

Sincerely,

Ann Mazeau
