Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

I live in a town, Boulder, CO, that is the leader in natural and especially organic food production. Obviously, being more aware of the problems in our food industry on so many levels. Being a mother and grandmother has raised my concerns over the continuation of these practices and the ignorance of our own government in their laissez-faire approach to addressing what is already known. The EPA and the FDA need to join forces in knowledge and expertise to begin to address the issues.

Please be aware that many many people in this country are wondering what its government is doing and why. Or to the point, NOT DOING and WHY?

Thank you for giving me the opportunity to comment.

Sincerely,

Julie Robbins
