Subject: Seed Competitive Issue (2nd send)
Attach: GMO letter.doc

Dear Sirs:

I hope this is still in time for your consideration. I noticed my first email was not delivered to you so I am resubmitting today.

This is much larger issue then just who has control of the traits. It is how they are using them to control destroy competition and choice. It is also how they have not done the proper research to back up their claims. It is how they have used political pressure to gain approval the traits. It is why for a safe food supply we need fully funded public research. It is about getting the fastest buck profit without concern for how the traits really change the food value and health effects on the consumer. It is about the future of agriculture in the United States.

Thank you

Daniel Hiller
