U S Dept Justice
Anti Trust Division

I would like to take this time to support and encourage your stewardship of the soil, farm land, agricultural business and food supply in the U.S.. C.A.F.O.'S and factory farms do not, in some cases, produce safe, healthy products and can greatly degrade surrounding environments and watersheds through (degradation and contamination). If not already, these problems could potentially become rampant throughout the country. Smaller and better-balanced agribusinesses in many cases can not function or compete in this kind of system. Thank you for your thoughtful consideration in this matter.

Sincerely

Bruce Lytes
