Subject: e-book price fixing

The recent e-book price fixing lawsuit will hurt independent booksellers, publishers, authors and readers. Publishers should be able to set a price on their own product in order to cover their costs in order to pay authors, artists, editors, and publicists. Amazon has encouraged this lawsuit and wishes to be able to continue their war against independent booksellers by selling ebooks at a fraction of their cost as a loss leader so they can sell their other products.

Thank you
