Introduction to PeopleSoft

- What Gartner Says
- Strengths and Weaknesses
- What to Expect

Sales Process Strategies

- Selling Against PeopleSoft

Product Strategies

- Generic Areas you can Attack
- Specific Financials Areas you can Attack

Q & A

ORACLE

Oracle Corporation, Private and Confidential

HIGHLY CONFIDENTIAL

What Gartner says...

ORACLE

Oracle Corporation, Private and Confidential

ORLITF0045385

Gartner PSFT SWOT analysis Financials*

Strengths

- Depth and breadth of financial offering
- Financials leader in Financial Services Industry
- Moving up in mid-market

Weaknesses

- Product globalization
- Global mindshare as market leader

Opportunities

- Leverage their HCM (Human Capital Mgt) client base
- Vertical markets

Threats

- Greenfield services organization
- Regional squeeze

*Source: Gartner Symposium October 2002

ORACLE

Oracle Corporation, Private and Confidential

Gartner PSFT SWOT analysis CPM (Corporate Performance Mgt)

Strengths

- Data warehouse strategy
- Scope of product offering
- R&D investment

Weaknesses

- Limited functionality vs. BoB
- Scope beyond finance function

Opportunities

- Penetration into current client base
- Verticalization

Threats

- Limited opportunity outside of PSFT shops
- Momentum of BI apps vendors

*Source: Gartner Symposium October 2002

ORACLE

Oracle Corporation, Private and Confidential

Gartner PSFT SWOT analysis SCM*

Strengths

- Functionality in fundamental process in targeted industries
- SRM as a component of SCM

Weaknesses

- Very low penetration in MFG
- Follower rather than a thought leader

Opportunities

- Midmarket penetration
- Leverage SCM/SRM integration
- Deeper industry functionality in targeted industries

Threats

- Upgrade cycles to v8 cause timing challenges

*Source: Gartner Symposium October 2002

ORACLE

Oracle Corporation, Private and Confidential

Gartner PSFT SWOT analysis HCM (HRMS)*

Strengths

- Depth and breadth of product
- Market leader and innovator
- Established and satisfied customers

Weaknesses

- Client support issues
- Missing non-key functionality but adding it

Opportunities

- Leveraging current customers
- Creating new services tied to applications

Threats

- Upgrade cycles to v8 cause timing challenges
- Competitors are aggressive

*Source: Gartner Symposium October 2002

ORACLE™

Oracle Corporation, Private and Confidential

Gartner PSFT SWOT analysis CRM*

Strengths

- Strong integration story
- Acquisition of Vantive provided easier market entry
- Architecture

Weaknesses

- Missing key CRM functions (1)
- Unproven large scale implementations
- Can only deploy browser based applications

Opportunities

- Verticalizing product
- Integration and leveraging of strong analytics

Threats

- Stronger vendors already in market
- Time to market

*Source: Gartner Symposium October 2002

ORACLE

Oracle Corporation, Private and Confidential

PeopleSoft: Strengths

PeopleSoft is 'Applications focused'

- Focused and knowledgeable sales force
- Single applications focused marketing messages
- Hundreds of applications white papers and collateral pieces

PeopleSoft is a 'Marketing Machine'

Presence at/in 'the right' tradeshow

HRMS product is strong and has large, loyal North American customer base

Use technology partners to sell (eg. BEA, Microsoft)

PeopleSoft plays analysts and press like a symphony

PeopleSoft Sales teams generally do a good job of 'Sales 101'

ORACLE

Oracle Corporation, Private and Confidential

PeopleSoft: Weaknesses

Poor coverage in the small/medium markets
Removal of the 'Customer Service Representative' for all but a handful of large accounts has led to service issues. This used to be a core of PeopleSoft's offering.

PeopleSoft '4 Pillar' (1xCRM, Fins, SCM, HRMS sales rep for every account) sales team leads to fractured, complex approach.

Increasing size/aggressiveness of PeopleSoft consulting (Professional Services Group) is putting strain on the relationships with some integrators in the larger markets

Demos are poor if pushed outside of the 'canned' or pre-scripted demos.

ORACLE

Oracle Corporation, Private and Confidential

What To Expect

A tremendous amount of FUD

Senior Executive Participation

Strong brand recognition & 'grass roots' support

A 'white paper' or 'industry study' for everything

A 'slick' but highly scripted demo

Reps/RM's 'demo' early using limited PC based systems

An applications knowledgeable sales rep

A prospect friendly, accommodating sales team

'Name Dropping' early and often

'PeopleSoft is not tied to any one RDBMS'

ORACLE

Oracle Corporation, Private and Confidential

What To Expect (cont.)

The PeopleSoft 'Tree Manager'

'Date effectivity'

Ethical on the surface but ruthless underneath.

- 'Doctor'd' or 'Out of Context' Analyst Reports/Quotes
- Official looking documents attacking Oracle
- Negative references

PeopleSoft portrays their weaknesses as strengths early to avoid getting into details later

Plays word games 'Mobile', 'Integration' etc.

Many ex-Oracle Reps, Managers, Developers and Sales Consultants

PeopleSoft knows us well...change the game

ORACLE

Oracle Corporation, Private and Confidential

Selling Against PeopleSoft

	ORACLE -business	PEOPLE Soft

Education		+

ORACLE

Oracle Corporation, Private and Confidential

HIGHLY CONFIDENTIAL

Sale Process Strategies, Sales Tactics you can use...

ORACLE

Oracle Corporation, Private and Confidential

ORLITF0045396

but first...

Selling Applications is a battle. Don't lose before you start!

PeopleSoft has no magical product, they have bugs, product deficiencies, demo disasters, resource and morale issues, account losses horror stories in the press to deal with, just like we do.

You must believe in yourself and our solution, do the basics right and find a way to position Oracle's relative strengths. If you do this you can win.

ORACLE

Oracle Corporation, Private and Confidential

Selling Against PeopleSoft

Raise the Importance of areas where Oracle has strength. It's all about getting these things included in the decision weighting factors.

If possible, areas outside of core Financials/HRMS (SCM, Exchange, eAM, Service etc.) or...

Within the general Financials space highlight Oracle's strengths in the areas of

- Property Management
- Revenue & Receivables Management
- Trading Community Architecture
- Wireless Financials
- more on this to come...

ORACLE

Oracle Corporation, Private and Confidential

Selling Against PeopleSoft (cont.)

Sales 101 is important

Get executive involvement

Perform good discovery

Map Oracle's solution to the needs of the prospects

Develop a good relationship with the prospect
(PeopleSoft paints Oracle as unfriendly and uncaring)

Be 'easy to do business with'

Be friendly and accommodating (speak with attendees during breaks, sit with them while eating, save all 'Oracle only discussions' until after you have parted)

Know where you really stand in the opportunity

Use your resources wisely

If you have not been involved in writing the RFP, someone else probably has...

ORACLE

Oracle Corporation, Private and Confidential

Selling Against PeopleSoft (cont.)

Set the Stage (demo first whenever possible)

Be proactive, not reactive

PeopleSoft does simple demos as part of the lead generation process (Reps demo early)

Lay landmines and undermine PeopleSoft's credibility

Use web-demos, informal demos, and multiple discovery visits

Provide references early

Portray PeopleSoft as the 'Wolf in Sheep's Clothing'

ORACLE

Oracle Corporation, Private and Confidential

Selling Against PeopleSoft (cont.)

Keep it Simple

Keep your presentations/demo/contracts simple, straightforward and truthful

Don't give three alternatives when one would suffice

Answer with clear 'yes' or 'no' answers

Ask for feedback after each action, get positive reinforcement to shut-up the PeopleSoft Bigots.

Make sure your demo flows are clear and simple

Have as few people as possible do the demo

Personalize menus, windows, portals and slides to be as simple as possible. The one nice thing about PeopleSoft's user interface is its simple looking screens

ORACLE

Oracle Corporation, Private and Confidential

Selling Against PeopleSoft (cont.)

A word about the 'Applied Technology Workshop'

Oracle usually has good success with a well planned and executed ATW session

Reps must sell the concept early and hard

Topic must include

- Applications Flexibility (see Demo Slides)
- Technology Stack
- Workflow
- Applications Technology (Alerts, System Admin etc.)
- Forms and Reports
- Use of the RDBMS
- Discoverer

ORACLE

Oracle Corporation, Private and Confidential

Selling Against PeopleSoft (cont.)

Pricing

PeopleSoft is trying to force existing customers to pay a re-licensing fee to upgrade from PS7 to PS8

PeopleSoft price based on;

- Per Module Charge (\$85,000 – \$2.5 Million) Based on the Business Metrics (eg. Revenue/Employees/Assets etc.)
- + maintenance at 20% (Premium=22%, Platinum=27%)

PeopleSoft uses a 'black box' for pricing which is never shown to customers – just the results.

PeopleSoft has a 'Relationship Level Discount' of 5-15% for existing customers of >24 months.

PeopleSoft has a volume('Transaction') discount which ranges from 25% to 50%

Reps can further reduce by 10%

ORACLE

Oracle Corporation, Private and Confidential

Selling Against PeopleSoft (cont.)

Pricing

Additional discounting is accomplished through executive management

As the business grows PeopleSoft reserves the right to come back, audit them and charge more under an 'Expansion Rights' clause in the contract

Bottom Line

PeopleSoft can come in low from the start, especially with existing customers.

PeopleSoft has no 'Price List', just a 'black box' which generates numbers. Create FUD around this lack of transparency.

Scare prospects with FUD around the Expansion Rights 'Tax'

ORACLE

Oracle Corporation, Private and Confidential

For more on Pricing

There is a great new document called
'PeopleSoft: Product Pricing Overview' by Scott
Swanson, Director of Pricing Intelligence. Get it
and Read it.

- PeopleSoft
- Pricing

ORACLE

Oracle Corporation, Private and Confidential

How You Lose

Don't follow the 'Sales Blueprint'
Be perceived as being difficult
to work with

Seem 'complicated'

Underestimate PeopleSoft

Do not 'know thy enemy'

The customer believes PeopleSoft's
marketing = PeopleSoft's reality

Come into the process late ('Hail Mary's' almost never
work against PeopleSoft)

No chance to position Oracle's Technology or
Functional Strengths

ORACLE

Oracle Corporation, Private and Confidential

Product Strategies

Specific ways that Oracle can
ATTACK PeopleSoft...

ORACLE

Oracle Corporation, Private and Confidential

General points

Areas of advantage which you can use to proactively attack PeopleSoft in Financials opportunities.

User Interface designed for Productivity

Configuration without Customization

Open, Single, Data Model

Daily Business Intelligence

Globalization

Lower TCO

Use of Database

Performance/Scalability

ORACLE

Oracle Corporation, Private and Confidential

HIGHLY CONFIDENTIAL

**Let's take a more detailed look
into each of these generic
points...**

ORACLE

Oracle Corporation, Private and Confidential

ORLITF0045409

User interface designed for productivity

Oracle's e-business suite delivers a user interface that was designed to increase the productivity of all users. PeopleSoft provides a simplistic user interface which decreases user productivity by increasing the number of required keystrokes, wait periods and

.....Let's take a look.

ORACLE

Oracle Corporation, Private and Confidential

HIGHLY CONFIDENTIAL

PeopleSoft User Interface Demo

ORACLE

Oracle Corporation, Private and Confidential

ORLITF0045411

For your own personal PeopleSoft Demo...

Use the following website to register and view
your own private, fully narrated demo.

Choose from:

- Sales and Marketing
- HRMS
- Financials
- Manufacturing
- Distribution
- Procurement

ORACLE®

Oracle Corporation, Private and Confidential

Anemic user interface

PeopleSoft's 'Pure HTML' interface is suitable for casual 'self service' users only (expenses, benefits etc) but is unproductive for professional users.

Single Screen at a time

No Drag and Drop or Graphical Elements

No Flexibility for users

No 'Type Ahead' or 'Autofill'

No scrolling regions, no 'Query Cache'

No Export

Query only in specific 'Query' forms

More mouse clicks required for screen navigation

ORACLE

Oracle Corporation, Private and Confidential

User interface designed for productivity

ORACLE
-business

Provides all users with a highly productive interface

Folders for screen layout (Prompts, Field Orders, Size etc.)

Navigator (Top 10, Documents, Process Navigator)

Export to Excel

Multiple Windows Open at one time

'Workbenches'

'Autofill' and 'Type Ahead'

Field Level Update/Validation (without 'save' or 'Update' operations)

Alternate and Scrolling regions with 'Query Cache'

Drag and Drop

Graphical Elements (e.g. 'T' Accounts, Graphs, Diagrams)

Query in all forms

'Right Mouse' click (row copy etc.)

ORACLE

Oracle Corporation, Private and Confidential

Demo Points

Be sure to demo all of the following things. Embrace the difference between 'Casual' and 'Professional' users

Show the 'Self Service' Interface (use Internet Expenses)

'Top Ten' list

Process Navigator and Documents function (Navigator)

Multiple Windows Open at one time

- Show how windows are 'linked' I.e. PO Headers, Lines, Shipments and Distributions.

'Workbenches'

Folders for screen layout (Prompts, Field Orders, Size, Add and Remove Fields, use Queries to filter, Saved Folders)

Attachments & Export to Excel

ORACLE

Oracle Corporation, Private and Confidential

Demo Points (cont.)

'Right Mouse' for special functions

'Autofill' and 'Type Ahead'

Hot Keys (not unique to Oracle)

Scrolling and Alternate regions

Drag and Drop

Graphical Elements (Graphs, Diagrams etc.)

'T' Account, Accounting Transaction Display

Query in all forms

Add a Descriptive Flexfield and Use It

- If you practice this you can add a DFF in less than 3 minutes and show it in use. Do this in every demo, not just in the Applied Tech. Workshop.

ORACLE

Oracle Corporation, Private and Confidential

Demo Points (cont.)

Style and Technique

Understand PeopleSoft's UI looks simple

Try to keep our demo looking as simple as possible
(while explaining the value)

Show the professional users the power they get with the Oracle UI. Scare them about PeopleSoft's lack of productivity features.

Sales Reps must position Oracle's approach to the UI's from the start

Sales Reps must push for an 'overview' or introductory session to position the UI at the start of every demo

Use the 'Applications Technology Workshop'

ORACLE

Oracle Corporation, Private and Confidential

Inflexible and Costly

Every change (even the smallest) to a PeopleSoft screen is a customization which must be performed using 'PeopleTools', usually by IT staff

PeopleSoft 8 provides no flexibility outside of using PeopleTools to 'customize' panels (no folder tools, etc)

Can only tailor the COA (since Version 8). PeopleSoft is trying to add more but they still require IT to enable.

No 'Personal' customization or tailoring

Customizations are not supported

Many Customizations must be re-applied and re-tested during upgrade and patching

Adds cost and complexity to upgrades/implementations

ORACLE

Oracle Corporation, Private and Confidential

Inflexible and Costly

A word about the 'Upgrade Manager'

PeopleSoft has gone to great lengths to hide the complexity of upgrading customizations.

Firstly they created a 'Report' which just listed the customizations (you still had to manually migrate them).

Now the new 'Upgrade Manager' is a workflow based tool which shows graphically the steps needed to upgrade

But still does not address customizations!!

Don't let PeopleSoft convince your prospects that upgrades are 'one button' exercise.

ORACLE

Oracle Corporation, Private and Confidential

Configuration without customization

ORACLE[®]
-business

As well as flexibility for users, Oracle provides system level flexibility through the use of...

Key & Descriptive Flexfields

Extensions (eg. Projects)

Applications Programming Interfaces for easy integration (API's) that include data validation

JAVA Class extensions (iStore, etc)

HRMS Fast Formulas

HRMS Task Flows

Discoverer Workbooks

All fully supported and upgradeable

ORACLE[®]

Oracle Corporation, Private and Confidential

Configuration without Customization (cont.)

ORACLE
-business

Key Flexfields

PeopleSoft only offers a 'Flexible COA' (new in v8)

Oracle offers flexible keys throughout the e-business suite including the following

Oracle Assets Asset Key Flexfield

Oracle Assets Category Flexfield

Oracle Assets Location Flexfield

Oracle General Ledger Accounting Flexfield

Oracle Human Resources Grade Flexfield

Oracle Human Resources Job Flexfield

Oracle Human Resources Personal Analysis
Flexfield

Oracle Human Resources Position Flexfield

Oracle Human Resources Soft Coded Key Flexfield

Oracle Inventory Item Catalogs

Oracle Inventory Item Categories

Oracle Inventory Sales Orders

Oracle Inventory Stock Locators

Oracle Inventory System Items

Oracle Payroll Bank Details Key FlexField

Oracle Payroll Cost Allocation Flexfield

Oracle Payroll People Group Flexfield

Oracle Receivables Sales Tax Location Flexfield

Oracle Receivables Territory Flexfield

Oracle Service Oracle Service Item Flexfield

Oracle Training Administration Training Resources

ORACLE

Oracle Corporation, Private and Confidential

Configuration without customization (cont.)

ORACLE
-business

Descriptive Flexfields

Capture additional information and use that information in reports, links to external (legacy) systems, etc.

Available in more than 2000 places

Provides logic and validation functionality

No customization or coding

Fully supported and Fully Upgradeable

PeopleSoft offers nothing similar to Oracle's DFF technology

ORACLE

Oracle Corporation, Private and Confidential

The Analysts Say...

“[Oracle’s user interface approach]...allows companies to address the needs of both kinds of user communities. It allows casual and walk-up users to access an application using an HTML only browser, and allows power users to turbo-charge their application environment to address their more demanding work environments.” Marty Gruhn, Summit Strategies, Inc. Internet Applications: Look Before You Leap, March 2002.

“[PSFT] Our initial impression was that many casual-user Web pages were very similar to the core user components and therefore were less than intuitive for someone with no prior PeopleSoft experience.” Giga, PeopleSoft Vendor Assessment, September 2002 – Paul Hammerman

ORACLE

Oracle Corporation, Private and Confidential

Single Data Model

Oracle's e-business suite utilizes an open, single data model (and database) for all product families. PeopleSoft requires three separate data models (and databases) and recommends a fourth database for reporting.

ORACLE

Oracle Corporation, Private and Confidential

Multiple Databases

PeopleSoft requires three separate databases and recommends a fourth database for reporting

- No single source of the truth
- Great amount of redundancy
- High Maintenance cost
- Complex to integrate
- Poor performance
- Requires messaging applications to synchronize RDBMS's

ORACLE

Nightmare to Maintain and Support

Production

Test

Test 2

Backup

ORACLE

Oracle Corporation, Private and Confidential

Single Data Model

ORACLE
-business-

Oracle Applications Uses a Single Data model
for the entire suite.

One 'Source of the Truth'

Faster Performance

No duplication of data

Lower maintenance costs

Easier integration to external
systems

'Real Time' reporting

ORACLE

Oracle Corporation, Private and Confidential

The Analysts Say...

"Important to the Oracle value proposition is Oracle's architecture for these applications, which is based on a common repository. This removes data reconciliation problems and blurs the lines between back and front office. Accordingly, this takes integration issues off the plate" IDC: Worldwide HRMS/Payroll, Project Management, and Maintenance Management Applications Suppliers — Competitive Analysis, 2002: What Keeps Them Independent of ERP? -Dennis Byron

As an ERP II vendor, Oracle offers end-to-end ERP applications sharing the same code base on a unified architecture and single data model. Integration of the core Financials applications among themselves is a benefit, as well as integration and data sharing between Oracle Financials applications and Oracle's Ebusiness suite of SCM, CRM, Manufacturing, Projects and HR applications. For example, a customer account created in Order Capture is the same customer account used in Oracle Receivables. If a customer configures and orders a product through an online ordering function in CRM, a ship date is confirmed, inventory stock is evaluated to ensure adequate supply, price is determined, an invoice is delivered and payment is accepted by Receivables. Gartner: Oracle Financial Management Applications Nov 2003 - Daniel Stang, Gerald Arcuri

ORACLE

Oracle Corporation, Private and Confidential

Demo Points

This is more of a conceptual point but there are examples you can point out including...

- Add a new employee and show that employee immediately available as a project resource

- Enter an order into the iStore and flow that order into the Order Management and Receivables system

- Try to set PeopleSoft up by telling your prospects to ask PeopleSoft to demo these flows or others which cross product families

ORACLE™

Oracle Corporation, Private and Confidential

Daily Business Intelligence

Oracle has a comprehensive, integrated, single vendor solution to provide relevant business information to all users.

PeopleSoft uses a poorly thought out collection of third party products and replicated data.

ORACLE[®]

Oracle Corporation, Private and Confidential

Business Intelligence

PeopleSoft has a collection of third parties on top of a complex data warehouse (Called 'CPM')

Suggests a separate RDBMS for Reporting

Requires complex, time consuming data summarization and aggregation into a data warehouse

Multiple Vendors

- PeopleSoft
- Cognos
- Crystal Reports
- Brio
- IBM/Lotus (Notes)
- Microsoft

Support and maintenance Nightmares

Portlets require 'Analytics' = Data Warehouse!

Daily Business Intelligence

ORACLE
-business

Oracle provides a comprehensive selection of solutions sitting on top of a single integrated data mode.

No Data Replication

Pre-Built data aggregation and Single database reduces Total Cost of Ownership (TCO)

Makes use of 9i Materialized Views

Timely, Accurate Data

Pre-Built Pages with 'Racks' of Portlets for each business Role (i.e. CFO, Operations, HRMS etc.)

Parameter Driven (YTD, Month over Month, etc.)

The Analysts Say...

“PeopleSoft’s challenge is to overcome the lack of geographic diversity...” IDC: Worldwide HRMS/Payroll, Project Management, and Maintenance Management Applications Suppliers — Competitive Analysis, 2002: What Keeps Them Independent of ERP? -Dennis Byron

PeopleSoft, however, does not have a prevalent global presence matching SAP and Oracle. Gartner: Oracle Financial Management Applications Nov 2003 - Daniel Stang, Gerald Arcuri

Oracle financial applications provide multinational support, including local regulatory requirements for 44 different countries, and they provide single-byte, multibyte and bidirectional character sets. In addition to features specific to Japan, Taiwan and Korea, other enhancements support business practices in countries across the Americas, Europe, Africa, the Middle East and Asia/Pacific. Gartner: Oracle Financial Management Applications Nov 2002 - Daniel Stang, Gerald Arcuri

ORACLE

Oracle Corporation, Private and Confidential

Demo Points

Many of these points are not best demo'd or will be too complex for the USA audience. However we have some good points to show.

Multi-Lingual (use the shared ADS UTF8 instance to show multiple languages)

Demo the 'T' accounts in every Financials demo (the accountants will love this feature!!!)

A Multi-Currency example in the 'T' accounts demos well.

Many examples of Global Demo's available on ADSWeb 'Demo Docs'. Look under the various country areas 'France', 'Germany', etc.

ORACLE

Oracle Corporation, Private and Confidential

Lower Total Cost of Ownership (TCO)

Through the use of Rapid Install, iSetup, Flexibility without Customization, Single Data Model and Business Flow Accelerators Oracle is driving down total cost of ownership for our customers.

ORACLE

Oracle Corporation, Private and Confidential

Lower TCO, no chance

PeopleSoft has a poor story in this area.

PeopleSoft's product forces a tremendous number of customizations and high (real) cost of implementation/Upgrade.

PeopleSoft has no wizard based quick setup tool (similar to Oracle's new iSetup)

PeopleSoft's 'Accelerated Enterprise' solution is for product based point solutions and has no time frames.

High cost of maintaining multiple RDBMS's for multiple installs.

Beware, PeopleSoft will provide canned ROI studies.

ORACLE

Oracle Corporation, Private and Confidential

Lower TCO through...

ORACLE
-business

Oracle provides a number of tools to reduce total cost of ownership. Work with Implementation team to provide a compelling implementation offering.

Rapid Installation (the 1 hour install)

iSetup provides a wizard based configuration tool for the core products (being expanded)

Configuration without customization (see earlier slides)

Single Instance to maintain (see earlier slides)

Work through ROI exercises with your customer

New Business Flow Accelerators

- Fixed Price, Fixed Scope Implementations
- Provides complete business flows across product families
- See <http://www.oracle.com/consulting/offerings/ebs/>

ORACLE

Oracle Corporation, Private and Confidential

The Analysts Say...

"The [Oracle] consulting staff is no longer focused on finding long-term engagements. Their focus is now on getting the customer up and running as fast as possible" - Hurwitz Group Inc., Hurwitz BalancedView Bulletin.

ORACLE

Oracle Corporation, Private and Confidential

Use of the RDBMS

Because Oracle runs only on Oracle, we take advantage of all of the powerful features of the Oracle RDBMS. PeopleSoft cannot do this as they support multiple RDBMS's

ORACLE

Oracle Corporation, Private and Confidential

Use of the RDBMS

PeopleSoft can only use the 'Lowest Common Denominator' of RDBMS' features across all RDBMS's they support.

PeopleSoft does this with a Single Codeset (it would be far too expensive and difficult to code to multiple RDBMS's) so

- No Stored Procedures/Triggers
- No RDBMS level security features
- Very limited 'Row Level Locking'
- Proprietary Data Dictionary and Security Layers

PeopleSoft say's this approach give flexibility to 'swap out' your RDBMS without having to change Applications

ORACLE

Oracle Corporation, Private and Confidential

Use of the RDBMS (cont.)

ORACLE
-business

The eBusiness Suite takes advantage of the advanced features of the Oracle RDBMS to deliver outstanding performance and scalability

Row level locking

Use of 'Stored Procedures'

Use of 'Database Triggers'

Use of the Cost Based Optimizer (CBO)

RAC and 9iAS Features

Materialized Views

Intensive use of the RDBMS data dictionary

ORACLE

Oracle Corporation, Private and Confidential

Use of the RDBMS (cont.)

what...the results

Because PeopleSoft does not use 'Row Level Locking' they must use 'Table Level Locking' throughout the applications.

- When Payroll is being run, many HRMS functions are unavailable to users
- When Payables 'Payment Run' is being created 'AP Invoices' cannot be entered

Numerous examples of 'Deadlocking' being reported by PeopleSoft customers

PeopleSoft Data Dictionary gets 'out of sync' with the real Data Dictionary = corruption!

ORACLE

Oracle Corporation, Private and Confidential

Performance & Scalability

Oracle crushes PeopleSoft in the area of performance

AR Benchmark (Oracle 10 times as fast!)

- Oracle Imported, Calculated Tax, Recognized Revenue and transferred to GL approx 275,000 invoice lines per 1 hour (2.2 million in the full benchmark)
- PeopleSoft approx 25,000 per hour

GL Benchmark (Oracle 3 times as fast)

- Oracle (42 Million GL lines per hour)
- PSFT (15 million GL lines per hour)
(on a machine with nearly 4 times the memory and)

ORACLE

Oracle Corporation, Private and Confidential

Performance Examples

Oracle

- 42 million GL Lines / Hour
- Sun Hardware
 - 28 processor
 - 26 GB's of Memory
- Oracle Database
- 2/4 Process steps
 - Validate and Post
 - Two easiest steps

20 million GL Lines / Hour

- 4/4 Process Steps
 - Load and Import
 - Two hardest steps
 - Validate and Post
 - Two easiest steps

PeopleSoft

- 15 million GL Line / Hour
- IBM Hardware
 - 24 processor
 - 96 GB's of Memory
- Oracle Database
- 2/4 Process steps
 - Validate and Post
 - Two easiest steps

Financials specific areas of advantage which you can use to proactively attack PeopleSoft

Oracle's Strong Financials Customer Base

Property Management

Revenue and Receivables Solution

Trading Community Architecture (TCA)

Wireless Financials

ORACLE

Oracle Corporation, Private and Confidential

Financials Customer Base

Oracle has a strong Financials customer base

Oracle has 13,000+ Total Applications customers (and more than 90% use our Financials Applications) approx. 12,000

PeopleSoft has 4500 total Customers and 2,500 Financials customers

- (GIGA: PeopleSoft Takes a New Approach to EPP, Oct 2002, Penny Gillespie and GIGA: Enterprise Application Vendor Assessment: PeopleSoft, Sep 2002, Paul Hammerman)

ORACLE

Oracle Corporation, Private and Confidential

Oracle Property Manager

Almost every business manages real estate or facilities of some sort. Only Oracle delivers a comprehensive solution. PeopleSoft offers no product to assist their customers in this area.

ORACLE[®]

Oracle Corporation, Private and Confidential

Oracle Property Manager

ORACLE
-business

Real estate management is relevant to any prospect who owns, leases or sublets facilities.

Supports both tenant and landlord functions

Automates rent payments and billings as well as other charges

Make lease administration/space administration an issue

Sell the integration and benefit of visibility to key lease dates

ORACLE

Oracle Corporation, Private and Confidential

Oracle Property Manager

**PeopleSoft has no real estate
management or property
manager equivalent.**

Exploit it!!

ORACLE

Oracle Corporation, Private and Confidential

Demo Points

PeopleSoft has no offering in this area the Oracle Property Manager product should be demo'd. ADS provides numerous demo scripts for Property Manager on the ADS, 'DemoDocs' website

- Financials / Property Manager

Check out the product web site for more information

ORACLE

Oracle Corporation, Private and Confidential

Revenue and receivables solutions

ORACLE
-business

This solution footprint covers Collections, Receivables, iReceivables, iPayment, Billing, Revenue Accounting, Customers Online and Credit Management*.

Improve cash flow and working capital

Decrease DSO (Days Sales Outstanding)

Improve customer relationships and service

Increase process efficiencies

Provide higher quality customer data

ORACLE

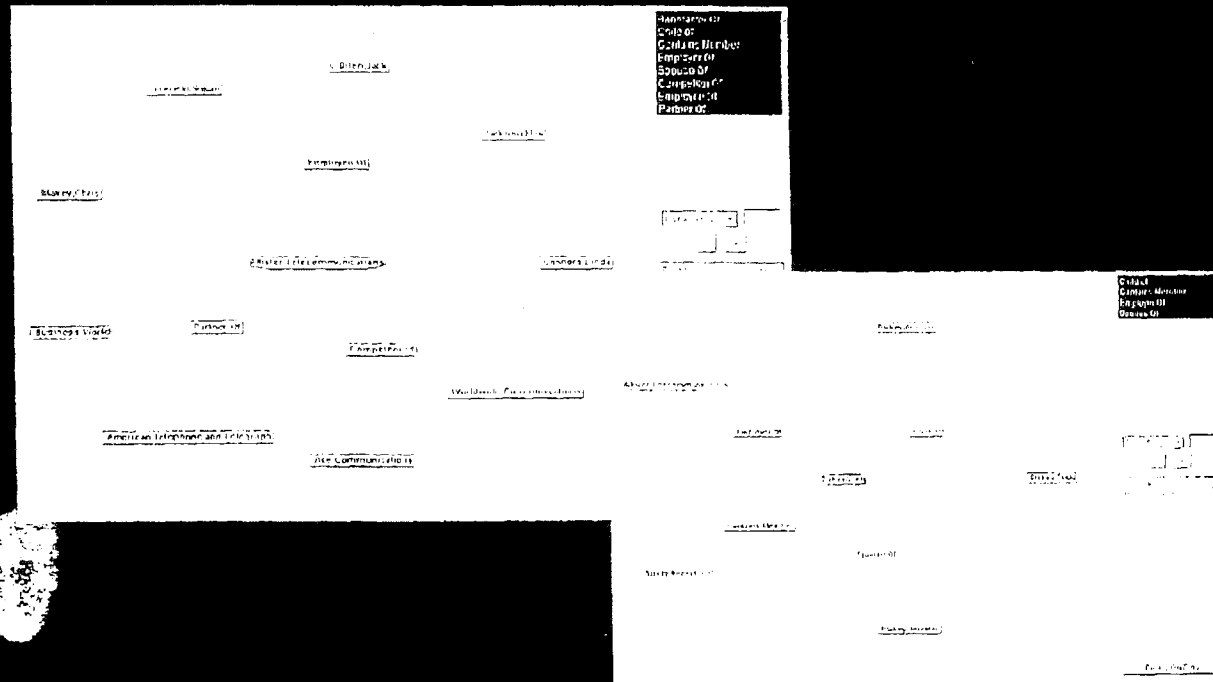

Oracle Corporation, Private and Confidential

HIGHLY CONFIDENTIAL

Revenue and receivables solutions

ORACLE
-business

Review visual representations of your trading partners through Oracle Customers Online

Oracle Corporation, Private and Confidential

ORLITF0045464

Revenue and receivables solutions

PeopleSoft has no Credit Management solution

PeopleSoft has no Collections product and provides only the most basic functions through Receivables.

PeopleSoft has no Customers Online product

No D&B integration

Customer/Sales information is spread across multiple databases (Financials, CRM, Reporting) leading to inconsistent reporting and poor decisions.

ORACLE

Oracle Corporation, Private and Confidential

The Analysts Say...

“Politics aside, the product [Oracle Customers Online] addresses many of the issues that enterprises face in providing high-quality customer access across the organization.” The Gartner Group, OCO Data Quality and a Single View of the Customer, B. Wood, Oct 2002

In discussions with Meta Oracle has been told that we are 18 – 24 months ahead of PeopleSoft on Collections and Credit Management solutions.

ORACLE

Oracle Corporation, Private and Confidential

Demo Points

Some great demo opportunities here full demo scripts on including...

iReceivables

- include credit card payment and dispute functionality
- Include Dun and Bradstreet Integration

Wireless Accounts

Collections

Customers Online

- Include 'Visual Map'

ORACLE

Oracle Corporation, Private and Confidential

Trading Community Architecture (TCA)

The Oracle e-Business Suite approach to an integrated trading community architecture is unique and valuable. For all prospect's, especially those with a complex network of customers and suppliers the TCA solution is a true differentiator. PeopleSoft has nothing similar to the TCA approach.

ORACLE

Oracle Corporation, Private and Confidential

Trading Community Architecture

ORACLE
-business

Oracle provides an integrated architecture for managing the business partners or the organization.

Better visibility to customer relationships

Deliver higher levels of service to trading partners

Make better business decisions

TCA is expanding to include Employees and Suppliers in coming releases

Oracle has a great Gartner report on our OCO product available on the Financials Portal

- <http://www-apps.us.oracle.com/financials>

ORACLE

Oracle Corporation, Private and Confidential

PeopleSoft has nothing like the TCA

PeopleSoft has no TCA like concept

Customer and Employee Information not
integrated into a coherent model

Customer and Employee information spread
across multiple database instances!

ORACLE

Oracle Corporation, Private and Confidential

Demo Points

A number of specific demos here. The most important thing to get across is the concept. Full demo scripts available on

Talk the concept

- eg. Financial Services Company has many customers, each of those customers may have multiple relationships with the company (Business, Personal, Guarantor of child's/spouse's credit card etc.)

Data Quality Management (DQM)

Dun & Bradstreet Integration

Customer Visualization Demo

ORACLE

Oracle Corporation, Private and Confidential

The Analysts Say...

Reference the OCO Gartner report here.

Analyst Relations has purchased distribution rights to this Gartner report please contact [\[redacted\]](#) to obtain a copy of this report to share with your prospect

ORACLE

Oracle Corporation, Private and Confidential

Wireless Financials

Wireless functionality is crucial for the online workforce. Oracle delivers wireless applications for Expenses, Property Manager and Customer Accounts. These are truly online (wireless) applications not just 'disconnected'.

ORACLE

Oracle Corporation, Private and Confidential

Wireless Financials

ORACLE
-business-

Wireless devices and remote employees are becoming more common. Oracle delivers a wireless solution for all users.

Simple, real time transactions

More accurate financial information

Deliver better service to customers & employees

Mobile Expenses

Mobile Property Manager

Mobile Accounts (customer)

ORACLE

Oracle Corporation, Private and Confidential

Limited functionality

PeopleSoft has no wireless solution for Financials or SCM

PeopleSoft only provides 'disconnected' expenses (ie spreadsheet & Palm upload)

PeopleSoft's disconnected expenses requires 12 MB of code on the client pc

ORACLE

Oracle Corporation, Private and Confidential

Demo Points

Wireless makes a 'cool' demo and is useful to users. There are a number of places this can be shown including

Wireless Internet Expenses Demo

Wireless Accounts Demo *(11.5.8 Vision only)*

Wireless Property Manager *(11.5.8 Vision only)*

- See [Oracle.com](#) for demo scripts

ORACLE

Oracle Corporation, Private and Confidential

HIGHLY CONFIDENTIAL

To summarize...

ORACLE

Oracle Corporation, Private and Confidential

ORLITF0045477

Be Prepared....expect

Lot's of FUD

PeopleSoft Executive involvement

Good marketing and a plethora of 'White Papers' or 'Industry Studies'

Applications knowledgeable sales team

Good knowledge of Oracle

To hear a lot about 'Tree Manager' and 'Date Effectivity'

Rep's demoing early

A slick (but scripted) demo in a relaxed friendly environment

Oracle Sales will be portrayed as difficult to do business with and aggressive

ORACLE

Oracle Corporation, Private and Confidential

Sale Process Tactics

Don't lose before you start

Raise the importance of areas where Oracle has an advantage (inside and outside the Financials area)

Do 'Sales 101' right

Set the stage (try to go first)

Keep it simple

Position an 'Applied Technology Workshop'

Understand PeopleSoft's pricing

ORACLE

Oracle Corporation, Private and Confidential

Sell these differentiators hard !

Strong Financials Customer Base (12,000)

User interface designed for productivity

Open, Single Data Model

Daily Business Intelligence

Globalization

Lower TCO

Use of the Oracle RDBMS for Performance/Scalability

Property Manager

Revenue and Receivables Solutions

Trading Community Architecture

Wireless Financials

ORACLE

Oracle Corporation, Private and Confidential

HIGHLY CONFIDENTIAL

**Sales Reps must SELL these
points, Sales Consultants must
DEMO these points**

ORACLE

Oracle Corporation, Private and Confidential
