If the company believes that the required search or any other part of the Request can be narrowed in any way that is consistent with the Department’s need for documents and information, you are encouraged to discuss such questions and possible modifications with the Department representatives identified on the last page of this Request. All modifications to this Request must be agreed to in writing by those representatives. Please provide the response to specification 1 of this Request promptly, especially in relation to the company’s electronic data systems, to facilitate discussions about limiting the required search with the Department’s representatives before you begin your search.

K. The term “sales” means net sales, *i.e.*, total sales after deducting discounts, returns, allowances, and excise taxes. “Sales” includes sales of the relevant product whether manufactured by the company itself or purchased from sources outside the company and resold by the company in the same manufactured form as purchased.

L. The term “Transaction” means [description of the transaction that is the subject of this Request].

M. All references to year refer to calendar year. Unless otherwise specified, each specification that calls for documents requires the company to submit all responsive documents that were created or received by the company after the date that is two (2) years prior to the date of the issuance of this Request. Where information, rather than documents, is requested, provide it separately for each year. Where yearly data is not yet available, provide data for the calendar year to date. If calendar year information is not available, supply the company’s fiscal year data indicating the twelve-month period covered, and provide the company’s best estimate of calendar year data.

N. Unless otherwise specified, this Request requires the production of all responsive documents and data in the possession, custody, or control of the company on the date that this Request was issued and, in certain circumstances detailed below, is deemed continuing in nature.

- (1) If the company’s compliance with this Request is completed within ninety (90) calendar days of the date of the issuance of this Request, only specification 16 of this Request shall be deemed continuing in nature. Specification 16 requires the production of all documents produced or obtained by the company up to thirty (30) calendar days prior to the date of the company’s full compliance with this Request, except for documents that must be translated into English, for which the date is forty-five (45) calendar days prior to the date of the company’s full compliance with this Request.
- (2) If the company’s compliance with this Request is completed more than ninety (90) calendar days after the date of the issuance of this Request, the

entire Request shall be deemed continuing in nature so as to require production of all responsive documents produced or obtained by the company up to thirty (30) calendar days prior to the date of the company's full compliance with this Request, except for documents that must be translated into English, for which the date is forty-five (45) calendar days prior to the date of the company's full compliance with this Request.

- O. The response to this Request shall be submitted in the following manner:
- (1) Documents produced shall be complete and, unless privileged, unredacted, submitted as found in the company's files (*e.g.*, documents that in their original condition were stapled, clipped, or otherwise fastened together, or maintained in separate file folders, shall be produced in such form). Documents submitted shall be produced in the order in which they appear in the company's files and shall not be shuffled or otherwise rearranged.
 - (2) The company may submit photocopies (with color photocopies where necessary to interpret the document) in lieu of original hard-copy documents, provided that such copies are accompanied by an affidavit of an officer of the company stating that the copies are true, correct, and complete copies of the original documents.
 - (3) Those documents written in a language other than English must be translated into English; submit the foreign language document, with the English translation attached thereto.
 - (4) Unless otherwise requested by a Department representative, electronic documents (*e.g.*, e-mail) and data shall be produced in electronic form only. Electronic documents and data shall be produced in a format that allows the Department to access and use them, together with instructions and all other materials necessary to use or interpret the data, including record layouts and data dictionaries. For data submitted electronically, submit a description of the data's source. For documents and data submitted electronically, each electronic media device must be labeled so as to identify the contents of that media device. For electronic media containing electronic documents, the label must state which custodian's documents are contained on the device and the document control numbers of those documents.
 - (5) Mark each page of each document submitted – whether in hard-copy or electronic format – with corporate identification and consecutive document control numbers. Place all documents produced in hard-copy format in file folders. Mark each file folder with the company's corporate identification, the name of the person whose documents are in the folder and how the original file was labeled. If the company submits hard copies

of electronic documents that have been printed from a common electronic source, such as a central e-mail or document server or a backup disk, such documents must be submitted in file folders that are marked with (a) a description of the enclosed documents' electronic source (*e.g.*, "Documents from Backup Tape No. 3 for E-mail Server XYZ, 3/1/06 - 3/31/06"); and (b) the name of each natural person whose electronic documents are contained in that file folder.

- (6) In lieu of searching backup tapes or other media that are not reasonably accessible, but that may contain information responsive to this Request, the company may elect to identify and preserve for the duration of the Department's investigation a select subset of such backup and other media, such subset to be approved in writing by Department representatives. In the event that Department representatives determine in their sole discretion that a search of the select subset of backup tapes is necessary, they shall so inform the company, which will be required to conduct a review of the subset and produce any responsive information contained therein.
- (7) Hard-copy documents shall be submitted in sturdy boxes not larger than 1.5 cubic feet. Number each box and mark each box with corporate identification and the name(s) of the person(s) whose files are contained in that box.
- (8) Provide a master list showing: (a) the name of each person from whom responsive documents are submitted; and (b) the corresponding consecutive document control number(s) used to identify that person's documents. If the master list exists in electronic form, provide the master list both as a printed hard copy and in electronic form (provided the master list can be produced in a format that allows the Department to use it). The Department representatives will provide a sample master list upon request.

P. Before you prepare documents or information for production in electronic form (for example, before you attempt to copy, for your response to this Request, documents or information from an electronically stored source onto a disk or other electronic storage medium), you must contact a Department representative to arrange a meeting or conference call with the company's personnel who are familiar with the electronic files in which the documents or information are stored, to explain to Department representatives the manner in which the documents or information are stored, and the types of information that are available on the electronic source. Department representatives must approve the format and production method for electronic data in advance of the submission by the company of its response to this Request. Electronic productions shall be scanned for and free of viruses. The Division will return any infected media for replacement, which may affect the timing of the Company's compliance with this Request.

Q. If the company or its agent uses or intends to use software or technology to identify or eliminate potentially responsive documents and information produced in response to this Request, including but not limited to search terms, predictive coding, near-deduplication, deduplication, and email threading, the company must provide a detailed description of the method(s) used to conduct all or any part of the search. If search terms will be used, in whole or in part, to identify documents and information that are responsive to this Request, provide the following: (1) a list of the proposed search terms; (2) a word dictionary or tally list of all the terms that appear in the collection and the frequency with which the terms appear in the collection (both the total number of appearances and the number of documents in which each word appears); (3) a glossary of industry and company terminology (including any code words related to the Transaction); (4) a description of the search methodology (including the planned use of stem searches and combination (or Boolean) searches); and (5) a description of the applications that will be used to execute the search. The Department strongly recommends that the company provide these items prior to conducting its collection of potentially responsive information and consult with the Department to avoid omissions that would cause the company's response to be deemed deficient.

R. Any documents that are withheld in whole or in part from production based on a claim of privilege shall be assigned document control numbers (with unique consecutive numbers for each page of each document); for purposes of this instruction, each attachment to a document shall be treated as a separate document and separately logged, if withheld, and cross referenced, if produced. The company shall also provide a statement of the claim of privilege and all facts relied upon in support of the decision to withhold each document, in the form of a log that conforms with the requirements set forth below. The company is encouraged to propose categorical limitations to exclude certain classes of privileged documents from its log.

- (1) For each document identified on the company's privilege log, state:
 - a. the document's control numbers;
 - b. all authors of the document;
 - c. all addressees of the document;
 - d. all recipients of the document or of any copies of the document, to the extent not included among the document's addressees;
 - e. the date of the document;
 - f. a description of the subject matter of the document;
 - g. the nature or type of the privilege that the company is asserting for the document (*e.g.*, "attorney-client privilege");
 - h. the specification(s) of this Request to which the document is

responsive;

- i. the document control number(s) of any attachments to the document, regardless of whether any privilege is being asserted for such attachment(s); and
- j. whether the document has been produced in redacted form.

(2) The company's privilege log shall also conform with all of the following requirements:

- a. Provide a separate legend containing the full name, title(s), and employer or company affiliation of each author, addressee, and recipient identified on the company's privilege log.
- b. All attorneys acting in a legal capacity with respect to the withheld document or communication, and only such attorneys, shall be identified on the privilege log with an asterisk.
- c. The description of the subject matter of each document shall describe the nature of the document in a manner that, though not revealing information that is itself privileged, provides sufficiently detailed information to enable the Department to assess the applicability of the privilege claimed.
- d. For each document withheld under a claim that it constitutes or contains attorney work product, also state whether the company asserts that the document was prepared in anticipation of litigation or for trial and, if so, identify the anticipated litigation or trial upon which the assertion is based.
- e. Produce all nonprivileged portions of any responsive document (including nonprivileged or redactable attachments) for which a claim of privilege is asserted, except where the only nonprivileged information in the document has already been produced. Note where any redactions in the document have been made.
- f. The privilege log shall be produced in both hard-copy and electronic form, the electronic form of which shall be both searchable and sortable.
- g. Documents sent solely between counsel for the company, including in-house counsel acting solely in a legal capacity, and documents authored by the company's outside counsel that were not directly or indirectly furnished to any third party, such as

internal law firm memoranda, may be omitted from the privilege log. However, any attachments to such documents must be included on the privilege log (if a privilege is applicable to such materials), unless such attachments are addressed and sent solely to counsel.

S. If the company is unable to answer any question fully, supply such information as is available. Explain why such answer is incomplete, the efforts made by the company to obtain the information, and the source from which the complete answer may be obtained. If books and records that provide accurate answers are not available, enter best estimates and describe how the estimates were derived, including the sources or bases of such estimates. Estimated data should be followed by the notation "est." If there is no reasonable way for the company to make an estimate, provide an explanation.

T. If documents responsive to a particular specification no longer exist for reasons other than the ordinary course of business or the implementation of the company's document retention policy, state the circumstances under which they were lost or destroyed, describe the documents to the fullest extent possible, state the specification(s) to which they are responsive, and identify persons having knowledge of the content of such documents.

U. In order for the company's response to this Request to be complete, the attached certification form must be executed by the official supervising compliance with this Request, notarized, and submitted along with the responsive materials.

Any questions you have relating to the scope or meaning of anything in this Request or suggestions for possible modifications thereto should be directed to (appropriate staff) at (telephone number). The response to the Request shall be addressed to the attention of Ms. (**staff person**) and delivered between 8:30 a.m. and 5:00 p.m. on any business day to (address). If you wish to submit your response by United States mail, please call one of the staff listed above for mailing instructions.

CERTIFICATION

As required by § 803.6 of the implementing rules for the Hart-Scott-Rodino Antitrust Improvements Act of 1976, this response to the Request for Additional Information and Documentary Material, together with any and all appendices and attachments thereto, was prepared and assembled under my supervision in accordance with instructions issued by the Department of Justice. Subject to the recognition that, where so indicated, reasonable estimates have been made because books and records do not provide the required information, the information is, to the best of my knowledge, true, correct, and complete in accordance with the statute and rules.

Where copies rather than original documents have been submitted, the copies are true, correct, and complete. If the Department uses such copies in any court or administrative proceeding, the company will not object based on the Department not offering the original document.
