Subject: Re: CCBN - update 

FYI - Both CCBN and StreetFusion have taken off the call and are editing it. I asked that they call me when they are able to make it available again.

CCBN's partners, who also play the call, do not refresh their systems as often as CCBN. Therefore it was still available on Earthlink, Lycos until 1pm CDT and will not come off of Yahoo, Motley Fool and WSJ until 2:45 CDT. I have asked that CCBN look into a solution to stop it from playing on those sites asap.

Will keep you posted. Thanks.

Street Fusion has been contacted as well. They are both calling me when they have completed the edit. I will let you know when I hear from them.
Christina has called Premiere conferencing.
