Program Improvements

JABS Operations.....

The \$14,479,000 for JABS will sustain the operation of JABS, including hardware and software maintenance, security upgrades, and system modifications to improve operating performance, leverage technology advances, and comply with new laws, legislation, and/or policies. In addition, the request will support the extension of JABS to additional sites. In FY 2002, this funding was available from the Department's Working Capital Fund Unobligated Balances (WCF/UBT); however, for FY 2003 WCF/UBT balances are intended for other programs.

IDENT/IAFIS Operations.....

The \$9,000,000 for IDENT/IAFIS will provide for the initial deployment of an integrated system in a live environment and the collection of data needed to guide future development and deployment. Existing IDENT/IAFIS sites will be upgraded and the deployment will be extended to another ten sites. The upgraded capacity will represent the first phase of system integration, as the user will initiate a single transaction that results in searches of IDENT and IAFIS. In FY 2002, this funding was available from the Department's WCF/UBT; however, for FY 2003 WCF/UBT balances are intended for other programs.
