U.S. Department of Justice
Bureau of Prisons
Residential Reentry Centers Assessment

Recommendations Report

August 22, 2016
Executive Summary (1 of 2)

Project Scope

Residential Reentry Centers (RRCs), known as "halfway houses," are contracted residential facilities, which provide a structured, supervised environment that supports citizens returning to society after incarceration. RRCs play a critical role in stabilizing returning citizens as they readjust to life outside prison walls, seek employment, housing, and critical resources, and rebuild relationships with family and support networks.

The Department of Justice (DOJ) engaged Deloitte to develop a comprehensive and objective assessment of the current RRC model and identify opportunities for strategic improvement. As part of this assessment, Deloitte analyzed eight aspects of the RRC model and identified 13 actionable recommendations that can help the Bureau of Prisons (Bureau) make meaningful change that positively impacts and enhances the RRC model.

Deloitte used several research tools to gain a comprehensive understanding of the current RRC model and capture the perspective of multiple reentry stakeholders from DOJ personnel to RRC residents, external government agencies to community partners. This included 11 RRC site evaluations, an RRC Director survey of 116 RRCs, a Resident survey of 470 residents, interviews with 30+ DOJ, the Bureau, and other reentry stakeholders (e.g., US Marshals, USPO, Office of General Counsel, etc.), focus groups with 80+ RRC residents, and reviews of several data artifacts (e.g., internal reports, data sets, etc.).

Deloitte’s assessment culminated in this final report, which provides an objective, evidence-based assessment of the current RRC model, 13 recommendations to help improve the effectiveness of the RRC model, and actionable implementation plans for each recommendation.

RCC Model Assessment

The Bureau’s Residential Reentry Management Branch (RRMB) and Administrative Division manage a complex RRC model that is responsible for providing critical services for a vulnerable population. As a result of the current state assessment, Deloitte identified areas for DOJ and the Bureau to address to improve both the resident experience and RRC management processes. These areas include:

- **Inequitable access to resources:** Residents’ access to key transition resources differ, based on the RRC to which they are transferred
- **Segmented reentry management:** Returning citizens’ path to reentry is broken into a number of distinct phases (e.g., institution, RRC, home confinement, probation), which do not effectively build on each other
- **Opportunities for Partnerships:** DOJ and the Bureau are missing opportunities to take advantage of a vast national ecosystem of reentry partners to help shoulder the burden of reentry
- **Complex contracting environment:** 180 competitively procured RRCs are run by 103 separate providers using four different contract types and numerous statements of work, resulting in varying expectations and standards across the RRC network
- **Stretched resources:** The vast number of reentry personnel carry significant workloads which tends to restrict their ability to both react to administrative requests and manage the reentry process in a timely and effective manner
- **Misaligned Performance Measurements:** Evaluation of contract performance focuses on monitoring compliance with the SOW and misses an opportunity to measure direct reentry outputs and outcomes in order to better understand the effectiveness of the model
Executive Summary (2 of 2)

Recommendations for Strategic Improvement
As a result of the current state assessment, Deloitte developed 13 recommendations that provide DOJ and the Bureau with a clear and specific plan that can both have immediate impact on the RRC model and set the groundwork for long-term change. The 13 recommendations cut across three main areas:

- **Making the resident experience more effective:** Treat the first day of incarceration through the last day of probation as a single path to reentry. To do this effectively requires closer coordination between institutions, RRCs, and U.S. Probation and Pretrial Services to create a more consistent reentry experience that is reinforced at each step.

- **Making the Bureau’s model more effective:** Identify ways to create a more responsive model by building partnerships, testing new contracting and operating models, and providing the resources required to manage the model in a sustainable way.

- **Making RRCs more effective:** Create greater transparency into RRC operations and outcomes by sharing knowledge across the network and more closely tracking the outputs that matter.

Each recommendation is accompanied by an implementation plan that details the activities that DOJ, the Bureau, and other reentry stakeholders will have to complete over the short (2016), medium (2017), and long-term (2018) to make the recommendations a reality.

Immediate Changes for Consideration
In the short-term (2016), DOJ and the Bureau should focus on four recommendation aspects to increase the likelihood of immediate impact and set the foundation for the medium and long-term recommendations. These aspects include:

- **Increased Bureau Staffing Levels:** The Bureau staffing levels should increase to match current workload and support the implementation of the recommendations.

- **Nationwide Statement of Work (SOW):** With increased staffing levels, the Bureau should update and consolidate the current statements of work into a single SOW and roll it out to all RRC contractors to support a standard level of service for residents across RRCs.

- **Reduction of Subsistence Burden:** The Bureau should consider eliminating traditional subsistence payments for RRC residents to help improve the ability of residents to successfully reintegrate back to society. The repurposing or reduction of subsistence may require changes to the Bureau’s appropriations and budget.

- **Inmate Identification Support:** The Bureau and DOJ should work with stakeholders at the state and federal levels to require and incentivize inmate identification support while in institutions, which can help improve residents’ ability to access critical resources (e.g., employment, establishing bank accounts, etc.).

The information contained in this assessment provides a comprehensive picture of the RRC model from both the government and resident perspective. Taken together, the assessment recommendations represent significant change for all reentry stakeholders and a path forward for improving the road to reentry.

Overview
For more than 40 years, the Federal Bureau of Prisons (Bureau) has contracted with Residential Reentry Centers (RRCs) to provide reentry services.

1961: The Bureau established three “Pre-Release Guidance Centers” to test the halfway house model for youthful offenders – primarily operated by Federal employees.

1965: Program expanded to include adult offenders, and halfway houses became known as Community Treatment Centers (CTC).

1967: Five contract facilities established for CTCs. As the Federal program grew, so did the number of contracted CTCs.

1981: The Bureau eliminated all halfway houses operated by Federal employees and relied entirely on contract resources in response to a reduction of positions in the Federal prison system.

- Name changed to Community Corrections Centers (CCC)
- RRCs able to refuse inmates based on risk level/background - typically housed low-risk inmates with white collar crimes
- Home confinement established

Support areas included:
- Employment Assistance
- Counseling
- Financial Planning

- Name changes to Residential Reentry Centers (RRC)
- RRCs can only refuse inmates based on capacity and/or zoning ordinances, which may restrict the placement of certain types of offenders
- Residents able to reside in an RRC for up to 1 year (rather than 6 months)
- RRCs house inmates of all risk levels

Support areas include:
- Employment Assistance
- Substance Abuse Treatment
- Social Cohesion
- Financial Planning
- Connecting with Family/Friends
- Educational Advancement
- Medical/Mental Health Care
- Locating Housing

The number of federal inmates released over the past few years has increased, placing greater demand on RRCs

RRCs, otherwise known as “halfway houses,” are contracted residential facilities, which provide a structured, supervised environment that supports returning citizens in their transition back to the community as they near their release date.

The number of federal inmates released from prison has increased overall since 2007, as has the number of federal inmates sent to RRCs.

Second Chance Act signed into law

Amendment 782 could have a large impact on the number of inmates transferred to RRCs

Costs do not include medical costs

There has been greater demand for, and thus greater costs associated with, increasing RRC capacity

The Bureau of Justice Statistics assessed 43,000 inmates released in 2005 under federal community supervision for 5 years

There is no single authoritative source on federal recidivism rates, but three year rates generally fall within the 34% - 41% range. The Bureau of Justice Statistics (BJS) recently released a report noting federal community supervision recidivism rates to be 35% after 3 years of release, and 43% after 5 years of release.

*Federal supervision includes offenders directly sentenced in the federal courts to probation supervision in the community and offenders entering supervision following release from prison to serve a term of supervised release in the community

**The number of inmates transferred to RRCs may be impacted by any upcoming criminal justice reform or policies intended to reduce overcrowding in prisons

Earlier this year, the Department of Justice (DOJ) outlined five key principles that encapsulate national goals regarding reentry.

DOJ designated April 24-30, 2016 as National Reentry Week, to help raise awareness of the importance of reentry strategies that help increase public safety and support returning citizens in their transition. As part of National Reentry Week, DOJ released the Roadmap to Reentry, which identifies five evidence-based principles guiding federal efforts to improve reentry and reduce recidivism:

I. Every inmate should be provided an individualized reentry plan tailored to his or her risk of recidivism and programmatic needs.

II. Each inmate should be provided education, employment training, life skills, substance abuse, mental health, and other programs that target their criminogenic needs and maximize their likelihood of success upon release.

III. Each inmate should be provided the resources and opportunity to build and maintain family relationships, strengthening the support system available to them upon release.

IV. During transition back to the community, halfway houses and supervised release programs should ensure individualized continuity of care for returning citizens.

V. Before leaving custody, every person should be provided comprehensive reentry-related information and access to resources necessary to succeed in the community.

As laid out in the roadmap, this assessment supports DOJ in “undertaking an evaluation and assessment of the RRC experience to develop a specific plan for implementing improvements to the existing RRC model that will provide residents enhanced reentry support and reduce recidivism.”

Source: Department of Justice, Roadmap to Reentry, 2016
The Bureau plays a leading role in helping DOJ achieve its reentry goals

Reentry at the Bureau

The Federal Bureau of Prisons helps protect public safety by ensuring that federal offenders serve their sentences of imprisonment in facilities that are safe, humane, cost-efficient, and appropriately secure, and provides reentry programming to enable their successful return to the community. It is currently responsible for ~195,000 inmates in the federal corrections system. Each year, approximately 40,000 - 45,000 U.S. citizens are released* from federal prisons across the country.

The Bureau’s Reentry Services Division (RSD) furthers the agency’s mission of preparing individuals for reentry by focusing on reentry programming and community resource transition. This division consists of six branches, including:

- Residential Reentry Management
- National Reentry Affairs
- Chaplaincy Services
- Female Offenders
- Psychology Services
- Education Services

Reentry-related services are heavily supported by the Residential Reentry Management Branch (RRMB) and the Residential Reentry Contracting Section.

---

*Not all individuals released from incarceration go to RRCs – some go to probation, home confinement, etc.

**This number does not refer directly to number of releases

Sources: 1. Bureau Website; 2. Interviews with Bureau Central Office Staff

---

RRC Support Delivery

The Bureau’s residential reentry programs are delivered across a nationally-distributed group of institutions and offices, which coordinate with 180 individual competitive RRC contracts in three different sectors².

| RRM Branch | 1 |
| RRM Branch Sectors | 3 |
| Field Offices | 24 |
| Competitive RRC Contracts | 180 |
| Residents spent time in RRCs in FY2015** | 32,760 |

---

**This number does not refer directly to number of releases
The Bureau’s RRMB and Residential Reentry Contracting Section establish, facilitate, and oversee contracts for reentry-related services

The focus of this study is the 180 RRC, or Competitive RRC, contracts overseen by the Residential Reentry Management Branch and supported by a critical partnership with the Residential Reentry Contracting Section. Throughout this report, the use of “RRCs” refer to the 180 Competitive RRC Contracts.

Residential Reentry Management Branch

The RRMB establishes and oversees contracts for facilities that provide pre-release assistance, supervision, and support to federal offenders, maintains relationships with federal law enforcement partners, and serves as the liaison between the Bureau and RRCs.

The RRMB is currently responsible for 13,861 inmates in transition from institutions to the community and overseeing 546 locations nationwide covering Detention, Juvenile, and Residential Reentry Services. Within the 546 locations it oversees, it is responsible for:

- 249 separate Residential Reentry Center locations that help previously incarcerated individuals transition back into society across 180 Competitive RRC Contracts
- 36 Intergovernmental Agreements (IGA) for Work Release

Residential Reentry Contracting Section

The Residential Reentry Contracting Section is responsible for soliciting and administering awarded contracts for these Competitive RRCs.

It is currently soliciting RRC services for ~81 current RRCs and 7 new areas, including 3 Day Reporting Centers.

The Residential Reentry Contracting Section is also responsible for administering 180 Competitive RRC contracts and ~364 Intergovernmental Agreements (IGA) consisting of approximately:

- 4 IGAs for Juvenile Services
- 1 IGA for Non-Secure Juvenile Services
- 80 IGAs for Long Term Detention Services
- 11 IGAs for Jail Services
- ~196 US Marshals Service (USMS) IGAs in which the Bureau works with USMS

Note: All figures represent a point in time, as of 8/14/2016

DOJ engaged Deloitte to conduct an assessment of the current RRC model and to identify improvement opportunities that will help DOJ achieve its reentry goals.

DOJ engaged Deloitte to perform a comprehensive analysis that assessed and evaluated eight areas of the current RRC model and to identify specific recommendations for improvement:

- Intake Procedures and Reentry Planning Assessments
- RRC Program Offerings
- RRC Reentry Resources
- RRC Performance
- Best Practices and Benchmarking
- Organizational Structure
- Financial Management
- RRC Partnerships

**Deloitte’s Assessment Approach**

</table>
Deloitte developed this assessment through interviews with Bureau staff, RRC staff, and RRC residents, as well as surveys and a review of relevant documents.

Deloitte spent 13 weeks gathering information from publicly available research and data, internal Bureau documentation, survey results received from both residents and RRC Program Directors, and interviews with stakeholders such as Bureau Central Office staff, field office staff, and RRC staff and external stakeholders.

**Data Artifact Review**

- **Internal Documentation**
  - Bureau internal reports, policies, memos, data, and requirements were analyzed to better understand RRC models, contracts, and operations
- **External Research**
  - Publicly available reports, research papers, survey assessments, etc. provided ongoing context and leading practices for RRC policies and operations

*Refer to the Appendix for full list of RRC Sites"
The current state assessment divides observations into two categories: the RRC Resident Experience and RRC Management.

The RRC Resident Experience refers to areas that directly influence the resident experience on a day-to-day basis. RRC Management refers to the areas that support RRC managerial operations and functional guidance. RRC Partnerships and Best Practices are crosscutting aspects, affecting both RRC Experience and RRC Management.

**RRC Model**

**Resident Experience (p. 16)**
- Refers to aspects that directly affect residents during their time at the RRC, including:
  - Intake Procedures & Reentry Planning Assessments
  - RRC Program Offerings
  - RRC Reentry Resources

**RRC Management (p. 43)**
- Refers to aspects that influence back-office RRC issues, including:
  - Organizational Structure
  - RRC Performance
  - Financial Management

**RRC Partnerships**

**Best Practices and Benchmarking**

These cross-cutting elements impact both the resident experience (e.g., external partner that provides a specific resource for the resident) as well as internal operations (e.g., best practices related to performance measures tracked)
Current State Assessment
The first section of this document presents a current state understanding of how the RRC model operates today and how those operations impact the daily experience of RRC residents as they transition from incarceration to release.

It is divided into two parts. The first focuses on the RRC Resident Experience – referring to areas that directly influence the resident experience on a day-to-day basis – and addresses aspects of RRC intake procedures, program offerings, and reentry resources. The second section focuses on RRC Management – referring to the areas that support RRC managerial operations and function guidance – and looks at RRC performance, organizational structure, and financial management.

RRC partnerships and leading practices are addressed in both sections, as they align to both the RRC Resident Experience and RRC Management sections. Examples and clarifying content are included throughout the document as purple and green text callouts, respectively. Throughout the document, the use of “RRC” refers to the 180 competitive RRC contracts.
RRC Resident Experience

The RRC Resident Experience component includes the following Statement of Work (SOW) elements*:

- RRC Intake Procedures and Reentry Planning Assessments of Residents
- RRC Program Offerings
- RRC Reentry Resources

*Best Practices and Benchmarking and RRC Partnerships will be mentioned in both sections
The majority of RRC residents are low/minimum security, middle-aged males who have been separated from society for nearly six years.

**RRC Resident Profile**
- **87%** of residents are male.
- **19%** of residents arrive at an RRC without a GED/Diploma.
- **41** Years old on average.

**Minimum Security**
- 40% of residents come from minimum security institutions and spend an average of 133 days in an RRC or on home confinement.

**Low Security**
- 29% of residents come from low security institutions and spend an average of 128 days in an RRC or on home confinement.

**Medium Security**
- 26% of residents come from medium security institutions and spend an average of 120 days in an RRC or on home confinement.

**High Security**
- 5% of residents come from high security institutions and spend an average of 101 days in an RRC or on home confinement.

**Sentence Length**
- **5.6 yrs** Average number of years a resident spent in prison.
- **51%** of residents spend an average of 71 days in an RRC and 84 days on HC.
- **38%** of residents spend an average of 110 days in an RRC prior to being released and no days on HC.
- **2%** of inmates go directly on HC and spend an average of 97 days there.

**Range of Sentence Length (years)**
- <1: 0%
- 1 to 5: 51%
- 5 to 10: 28%
- 10+: 21%

**Of the 19% (6,296) of Residents who Revisted an RRC...**
- 78% Visited once (4,925 Residents)
- 17% Visited twice (1,074 Residents)
- 4% Visited three times (225 Residents)
- 1% Visited 4-7 times (72 Residents)

Source for all data: Deloitte RRC FY15 Data; N=32,760 residents; *Security level refers to resident; **This number represents both residents who committed a new offense as well as those who were temporarily removed from an RRC for a progressive discipline issue and transferred to a jail or Bureau institution for a short period of time, then returned to the RRC.
As early as two years prior to an inmate’s release, the institution initiates a planning process to transfer the inmate to a suitable RRC, if appropriate.

---

**Step**

**DETERMINATION:** As required by the Second Chance Act, the Bureau/Institution determines an inmate’s appropriateness for RRC transfer, length of stay at an RRC, and proposed home confinement date.

**RRM REFERRAL:** Institution case manager provides a referral packet to appropriate field office via R3M with recommended length of stay (30 day increments). The referral packet includes inmate security/risk level, recommended length of stay, home confinement eligibility date, health programming needs, etc.

**RRC RECEIPT:** RRC receives RRM inmate referral and accepts/rejects inmate (rejection is rare and based on bed capacity, boundaries, security risk, or medical capabilities).

**NOTIFICATION:** Inmate notified of RRC placement.

**UNESCORTED FURLOUGH:** Inmate self-transfers to RRC via pre-selected mode of transportation (e.g., air, rail, bus, family assistance).

---

**Timing**

**18 months prior to release**

This often happens in conjunction with the determination 18 months prior to release, but is required at least 60 days prior to recommended RRC transfer date. In some instances (e.g., clemency recipients) institutions may not be able to make a referral until closer to the transfer date.

**Decision within one week of RRM referral**

At time of RRC acceptance

---

**TRANSFER DATE SET:** Bureau/Institution determines inmate’s RRC transfer date.

**Timing is pre-determined by the Bureau, based on mode of transportation. In some instances, the Bureau provides transportation directly (e.g., if medical conditions warrant it).**

---

**Legend**

- **Inmate**
- **RRC**
- **Bureau**

Some states use Assessment and Treatment Centers as a primary step following institution release where inmates are assessed on personal needs and risks prior to moving to a RRC facility.

---

Sources: Bureau Memo, Revised Guidance for RRC Placements, 06-24-2010; Interviews with Bureau Central Office Staff; Deloitte 2016 RRC Site Visits
Inmates may be assigned to one of a diverse network of 249 locations nationwide, contracted through 180 competitive RRC contracts nationwide.

103 different organizations provide RRC services

66% of RRCs are managed by non-profit organizations

41% of RRCs are large (>76 beds)

33% of RRCs are mid-sized (40-75 beds)

26%* of RRCs are small (<40 beds)

3.5 Average RRCs contracts per state

570 Average RRC residents per state at one time

4 States have state-wide utilization rates above 100%

24 States have state-wide utilization rates below 75%

*3% of RRCs could not be identified. Current Rates as of June 13, 2016. N=32,760 residents

**Utilization rate is number of occupied beds divided by total beds

***Dots represent RRC contracts, not the 249 locations

Sources: Deloitte RRC FY15 Data; HC Census Report; Interviews with Bureau Central Office Staff

These RRC locations may be far from inmates’ release locations for a variety of reasons, including availability, zoning restrictions, and/or preference.

Average Distance RRC Residents are from Home (miles)

Residents in the western sector are often furthest from home while residing in an RRC.

Average Distance RRC Residents are from Home by Sector (miles)

- Central: 38.1
- West: 48.6
- East: 37.2

Average Distance RRC Residents are from Home by Region (miles)

- West: 45.7
- Southeast: 47.5
- South Central: 49.9
- Northeast: 28.3
- North Central: 39.9
- Mid-Atlantic: 36.3

Percent of RRC Residents within each Distance from Home Category (miles)

- <25: 38%
- 25-50: 31%
- 50-75: 12%
- 75-100: 6%
- 100-125: 5%
- 125-150: 3%
- 150-175: 2%
- 175-200: 1%
- >200: 3%

RRC locations where residents are more than 75 miles to their homes. They may be located farther from their homes for a variety of reasons, including:

- Limited bed space at closer RRC
- No RRC closer to home location
- Zoning restrictions based on offense type
- Personal preference for living in an RRC over Home Confinement

Residents at these locations may require additional support in terms of employment and/or transportation.

Source: Bureau data, "iaddress-summary-extract" as of August 8, 2016

Bureau Residential Reentry Center Assessment
The first 30 days of a resident’s stay at an RRC are critical for developing a reentry plan and securing employment.
Case managers work with residents to develop IPPs, which outline an approach for addressing residents’ needs

The IPP is a “roadmap” for residents that is developed by an RRC case manager in conjunction with the resident. Resident programming and resources are identified based on a risk assessment and interview with the case manager. Residents’ IPPs are typically developed within ten days of their arrival at an RRC.

**Common RRC IPP Components**

- **Arrival Assessment.** Foundational information including name, release date, physical, and mental health status
- **Employment.** Identification of short- and long-term goals of achieving employment as well as ancillary activities (e.g., obtaining state ID, skills development courses, trade licenses)
- **Family Relationship.** Family/friend interactions as well as time at home to re-establish ties (set by frequency or target duration for a given period). Parenting and relationship goals are included for those with children or in a committed relationship, respectively
- **Substance Abuse.** Participation in all substance abuse testing throughout placement. Conducting necessary Narcotics/Alcoholics Anonymous counseling sessions
- **Home confinement / Release Status.** Establishment of home confinement/release date and planned address with working land line
- **Acknowledgement.** Plan acknowledgment and commitment signed by resident, RRC case manager, and USPO

Some IPP forms allow free-flow text that allow case managers to provide significant information on needs, risks, and goals as well as relevant programming for achievement. Other forms are basic templates that provide little space for in-depth documentation of residents’ needs

The Bureau created a standardized IPP in the May 2015 SOW for RRCs

Sources: Bureau SOW May 2015; Interviews with Bureau Central Office Staff; RRC Individual Program Plan Forms from Deloitte 2016 RRC Site Visits

Bureau Residential Reentry Center Assessment

Copyright © 2016 Deloitte Development LLC. All rights reserved.
Based on residents’ IPPs, the RRC identifies the appropriate program component in which to place residents

The 2015 SOW directs RRCs to place residents in one of three components, or levels of restriction of community access. Residents should have access to similar program resources regardless of component and move between components, based upon demonstrated level of responsibility, supervision needs, and restrictions based on the resident’s sentence.

- **Community Corrections**
  - Most restrictive
  - Residents are restricted to RRC, except for employment, participation in religious activities, approved recreation, program needs, community programs, and emergency situations
  - Program Review Team (PRT) determines when resident is ready to move to pre-release component; however, facilities director makes final decision based on PRT feedback and IPP information

- **Pre Release**
  - Residents have more access to the community and family members through weekend and evening passes
  - Residents must develop a daily detailed itinerary that is scheduled in advance and approved by RRC staff
  - Itinerary must include travel routes, destinations, and time frames

- **home confinement**
  - Least restrictive component
  - The Bureau expects the majority of RRC residents to transition to home confinement upon eligibility date
  - Individuals on home confinement must stay at home if they are not participating in approved activities, programming requirements, or employment

*Resident may be given increased privileges within a component as they demonstrate increased levels of responsibility (e.g., resident in the pre-release component may not be ready to immediately receive a weekend pass but rather may begin with evening or day passes and then graduate to weekend passes)*

*Low-risk inmates (i.e., those serving a sentence at a camp) can go straight to home confinement and may have a stopover at an RRC to determine any necessary programming*

Sources: Bureau SOW May 2015; Deloitte 2016 RRC Site Visits

Bureau Residential Reentry Center Assessment

Copyright © 2016 Deloitte Development LLC. All rights reserved.
RRCs are required to address the primary needs of residents by providing access to specific programs outlined in the Statement of Work (SOW)

For the purposes of this study, programming entails in-person services made available to residents at RRCs.* Generally, programming includes interaction between a resident and an RRC staff member, volunteer, or community partner.

### SOW-Required Programming

**Financial Responsibility Program**

*Continuation of Bureau’s “Inmate Financial Responsibility Program” that develops budget and financial planning to meet future obligations*

**Recreation Program**

*May include table games, television viewing, and exercising*

**Employment Assistance Program**

*Support to find viable employment; must provide transportation or public transportation vouchers*

**Cognitive Behavioral Program (CBP)**

*Follows “Cognitive Behavioral Program Group Protocol, Criminal Thinking” model*

**Community Treatment Services (CTS)**

*Outside providers of drug use, mental health, and sex offender treatment*

---

*SOW Programs Administered by RRC  SOW Programs Administered by External Provider*

---

* Recreation is considered programming in institutions, but is more loosely defined in RRCs

Source: Bureau SOW May 2015
While all RRCs must meet the minimum standards defined in the SOW, some exceed the requirements, creating an inconsistent experience for residents.

While each RRC visited appears to meet the minimum programming requirements laid out by the SOW, some RRCs go “above and beyond” delivering services. Examples witnessed are located on either end of the spectrum below.

RRC residents reported participating in fewer program offerings while at RRCs than during their time in institutions

Deloitte administered a survey to 470 residents at the 11 sites assessment locations to learn more about their experience at RRCs. The survey results should be recognized as providing insight into residents’ perceptions of the RRC experience; RRC residents have a greater amount of discretionary time than they did in institutions, which may account for some of the difference. Additionally, some residents may not recognize support they receive (e.g., from employment placement specialists) as formal programs.

Some residents were recent arrivals to the RRCs and may not have used the programming available.

Note: Low participation in RRC programming was self-reported by residents in Deloitte’s 2016 Resident Survey
Sources: Deloitte 2016 RRC Site Visits; Deloitte 2016 Resident Survey (n=470)
RRC directors report consistent offering frequency of programs, but residents report using certain programs more frequently

Deloitte administered a second survey to 118 RRC directors, who reported the programming and resources they offer, as well as challenges and opportunities faced in supporting residents. While all directors reported offering SOW required programming, residents reported using two of those programs – employment assistance and life skills – far more than the others.

Sources: Deloitte 2016 Resident Survey (n=470); Deloitte 2016 RRC Program Director Survey (n=72)
RRC directors largely believe programs required are important to successful reentry and residents believe these programs prepare them for release.

The RRC director and RRC resident surveys measured the perceived importance of different programs in preparing residents for reentry. The two groups' survey results mirrored each other in terms of the order of relative importance of each of the programs.

While not required by the RRC SOW, Deloitte’s resident survey asked about these other programs associated with resident needs.

Sources: Deloitte 2016 Resident Survey (n=260-287, depending on program); Deloitte 2016 RRC Program Director Survey (n=103-106, depending on program)
While residents and RRC directors agree that employment programming is important, residents would like to see a greater emphasis on skills training.

Residents:
- "I want to own my own business. I need to build entrepreneurship skills."
- "It's hard enough to get a job as a felon—but not having my identification is another barrier."
- "I already took the same classes while I was in prison. It would be nice to have advanced courses at the RRC."
- "Some of them like the RRC classes so much that they'll keep attending after they finish a course."

RRC Directors:
- "I wish we had better vocational training. I want to get my CDL and work for a trucking company."
- "We should have computer training classes to give us advanced technology skills."
- "We should have a mandatory minimum time at RRCs so they can have time for meaningful programming."
- "We can provide programming all day long, but [resident] willingness is a part of that."
- "We have to ask ourselves: what are we not providing and can we even help them if they can’t verbalize what they need to be successful?"
- "If I could change anything it would be employment—the institution tells them about false hope of being able to get a job. Certain states are not helpful if you’re a felon."
- "If the Bureau gave us better skillsets before we got to the RRC, we would have better job opportunities."

Similar to programming, RRC locations visited vary in the quality and frequency of resources provided to residents

While each RRC visited appears to meet the minimum programming requirements laid out by the SOW, some RRCs go “above and beyond” in delivering services, creating inconsistencies in the overall resident experience. Examples witnessed are located on either end of the spectrum below.

<table>
<thead>
<tr>
<th>Service</th>
<th>Just Meets Requirements</th>
<th>Exceeds Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Transportation</strong></td>
<td>▪ Residents face severe barriers to public transportation access (e.g., walking 1 mile to and from bus station, then spending two plus hours on public transport)</td>
<td>▪ RRC staff drive residents to central areas</td>
</tr>
<tr>
<td></td>
<td>▪ RRC lobbied the city to place a bus stop outside the RRC facility</td>
<td>▪ RRC lobbied the city to place a bus stop outside the RRC facility</td>
</tr>
<tr>
<td><strong>Technology</strong></td>
<td>▪ Residents have specific times when they can access one of three computers with no internet access or printers</td>
<td>▪ RRC has large onsite computer lab available to residents from 10am-8pm</td>
</tr>
<tr>
<td><strong>Job Fairs</strong></td>
<td>▪ RRCs refer residents to community job fairs, held at non-profits or community / state colleges</td>
<td>▪ One RRC organized a “Reentry Employment Conference”, with over 200 partners, to hire ex-offenders</td>
</tr>
<tr>
<td><strong>Telephone Services</strong></td>
<td>▪ Residents are allowed to use two phones provided by the RRC</td>
<td>▪ Residents are allowed to use personal cell phones (with no camera and internet functionality)</td>
</tr>
<tr>
<td><strong>Laundry</strong></td>
<td>▪ Residents travel to laundry facilities up to one mile away via public transportation (using two hour time limit passes)</td>
<td>▪ RRCs have in-house laundry facilities, including free use of detergent and ironing equipment</td>
</tr>
<tr>
<td><strong>Provisions</strong></td>
<td>▪ Resident provided with one set of clean linens and one towel</td>
<td>▪ Residents provided basic hygiene kit and access to onsite “closet” for set of clothing</td>
</tr>
<tr>
<td><strong>Food and Shelter</strong></td>
<td>▪ RRCs use external caterers for food, providing residents with boxed meals</td>
<td>▪ Onsite cooks provide food with guidance from nutrition consultant and have access to juice, fresh fruit, and microwaves</td>
</tr>
<tr>
<td></td>
<td>▪ Residents have alternate meal times (because RRC lacks large group space for dinner)</td>
<td>▪ RRCs build new facilities from the ground up that cater to the resident lifestyle</td>
</tr>
</tbody>
</table>
While at RRCs, residents report increased use of identification and transportation assistance, affordable housing, and technology to support reentry.

- More residents indicated a need for employment help than any other resource; 50% of residents surveyed find job training prepared them for release
- Access to technology was a commonly identified need among residents, and less than 40% of residents surveyed find that technology access at RRCs prepares them for release
- Housing help is one of the most common resident needs, and under 20% find that the housing help offered at the RRC prepares them for release
- Healthcare is one of the most common resident needs, and 41% find that medical treatment access at RRCs prepares them for release

67% of RRC Program Directors indicated that appropriately aligning programs and resources to residents’ needs as what most defines success for their organization

Source: Deloitte 2016 Resident Survey (n=470); Deloitte 2016 RRC Program Director Survey (n=84)
Residents must seek employment; however, they can face numerous constraints that limit their ability to meet their employment goals

**Requirements and Constraints**

**Initial Resource**
Many residents cannot start the job search upon arrival at an RRC because they lack a state ID, medication, appropriate clothing, and/or clear mental state post-incarceration. This delays their ability to take advantage of immediately available employment opportunities. (79% of residents report having an ID – of those, 47% stated that the RRC assisted them with this process).

**Knowledge of all Employment**
While some residents transition to RRCs in their hometowns or familiar communities, many others live further away and are unaware of the job opportunities and/or the location of job opportunities within the vicinity of the RRC.

**Location**
Though RRCs must be located within one mile of public transportation, many job opportunities are not readily accessible by public transit, therefore requiring commutes of 1-2 hours each way, depending on their vicinity to RRCs.

**Criminal Background**
Some employers may not select residents for positions based on their criminal records.

**Accountability**
While some employers will hire previously incarcerated individuals, many do not want to deal with the accountability check-ins from the RRC (e.g., in-person visits, phone calls twice a day, etc.).

Source: Deloitte 2016 RRC Site Visits; Bureau SOW May 2015; Deloitte 2016 Resident Survey; Pennsylvania Department of Corrections Community Corrections website – [www.cor.pa.gov](http://www.cor.pa.gov)
In order to secure employment, residents are required to present two forms of personnel identification to complete employment documentation. Because many returning citizens are not allowed to have passports, most residents are required to have two forms of personal documentation to complete the mandatory I-9 form.

Residents must have two forms of identification, which are often dependent on one another to obtain. Some ex-felons are not allowed to retain passports. No Bureau-specific ID reference included.
Many residents do not have personal documents upon arrival to the RRC and face challenges associated with requirements, costs, and time in obtaining them.

Residents require public documents such as birth certificates, Social Security cards, and state-issued identification cards for a variety of reasons, including securing employment, accessing healthcare, using public resources (e.g., library), gaining privileges within some RRCs (e.g., weekend passes), completing housing applications, opening bank accounts, etc.

**Requirements and Costs.** The process of securing personal documentation has interdependencies. For instance, residents must pay fees to obtain a birth certificate, but cannot get a job without an ID, which they cannot get without a birth certificate.

**Lost IDs.** Residents and RRC staff alike say institutions sometimes lose documentation during the incarceration period, delaying the reentry process and requiring duplicative effort.

“I paid for and got my birth certificate in prison and kept asking my Case Manager to make sure it was in my file. But when I got to the RRC, they didn’t have it. I have no money so my family has to get a new one for me.”

— RRC resident

**Timing.** While RRC staff assist residents in procuring these documents, the process may take 15 days to 6 months for a resident to obtain while at the RRC, depending on where the resident is from and what documents he/she already has.

<table>
<thead>
<tr>

Lost IDs. Residents and RRC staff alike say institutions sometimes lose documentation during the incarceration period, delaying the reentry process and requiring duplicative effort.

“I paid for and got my birth certificate in prison and kept asking my Case Manager to make sure it was in my file. But when I got to the RRC, they didn’t have it. I have no money so my family has to get a new one for me.”

— RRC resident

**100%** of RRCs visited cite securing personal documentation as a major burden/challenge area.

*Processing timelines vary from state to state; sample provided (Virginia). Costs vary by state; sample ranges provided.

**Sources:** 1. Deloitte 2016 RRC Site Visits; 2. Deloitte 2016 RRC Director Survey 3. SSA website; 4. State DMV websites; 5. Deloitte 2016 Resident Survey (n=470)
Once employed, most residents are required to pay subsistence; RRM, RRC staff, and residents largely feel that subsistence fees are too high

RRC residents are required to pay a subsistence fee of 25% of their gross income, in order to help defray costs. RRCs collect subsistence directly from residents via money order within 48 hours of a resident receiving a paycheck. The Bureau then reduces its payments to RRCs by the amount of subsistence collected.

On August 3, 2016, the Bureau announced that individuals on home confinement would no longer be required to pay subsistence.

“"The money the Bureau gets compared to what we have to [process] is minimal. I’m talking thousands of pages in paper work every month.”"  
  
  RRM

“It’s a good tool to teach residents how to be responsible, but a better alternative to subsistence would be a mandatory savings plan for the resident.”

Employment Placement Specialist

“I’d rather [the Bureau] put that into savings instead. It’s like we are free labor.”

Resident

Field Office Actions

- RRM are able to waive or reduce subsistence fees, based on their discretion
- The EPS at one RRC has her residents immediately apply for subsistence waivers, even prior to secure employment, given their high-risk status

Savings Plans

- A Case Manager at one RRC visited requires residents to save 10% of their net paychecks if they receive a waiver or reduction for subsistence fees

<table>
<thead>
<tr>
<th>Subsistence Percent</th>
<th>Savings Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reduced 15%</td>
<td>10%</td>
</tr>
<tr>
<td>Normal 25%</td>
<td></td>
</tr>
</tbody>
</table>

Resident Expectations

- Most residents do not realize that subsistence fees are Congressionally-mandated and collected by the Bureau
- Most residents tend to believe the RRC is “double hitting” in terms of money per head, creating resentment towards the RRC and subsistence

Source: Deloitte 2016 RRC Site Visits

In addition to subsistence, many residents face financial obligations that leave little leftover for additional expenses, needs, and savings.

Sample Financial Obligation for a Resident (2 weeks)

- **Gross income based on sample salary of $9.50/hour for 40 hours/week**
- **Subsistence fee of 25% of gross pay**
- **$25 monthly fee**
- **Residents with children have child support payments, on average $280/month**
- **Residents who use public transportation may have pass costs of $5/day**

RRC residents are ineligible for healthcare coverage under the Affordable Care Act; however, treatment costs are typically reimbursed by the Bureau.

Because residents are not eligible for healthcare coverage while residing at RRCs, the Bureau covers all healthcare costs. RRCs seek approval from the Bureau to cover resident medical costs, and are also required to provide residents with information on applying for health insurance upon release.

Institution

If an inmate is in need of significant medical care, the Bureau has an incentive to transfer an inmate directly to home confinement, rather than an RRC, as healthcare costs can be covered under the ACA.

Standardizing Access

The Bureau is soliciting a BPA to provide easier healthcare access for RRC residents nationally.

Release from Sentence

RRCs are required to provide residents with information on applying for health insurance under the ACA.

1. The Bureau does not mandate that the RRC assist residents with the application process.
2. The RRC must establish a formal release plan for the resident, inclusive of medication needs and follow up appointments.
3. Residents must sign a document indicating ACA intentions prior to release from RRC.

*Current process will be replaced by the BPA once the solicitation process is complete.

Source: Interviews with Bureau Central Office Staff; Deloitte 2016 RRC Site Visits; Bureau SOW May 2015
As their home confinement or release date approaches, residents without family often face challenges with housing affordability and accessibility.

RRC staff report that approximately 20% of residents have no family support to turn to for housing when they are released from an RRC. These residents often find a place of their own, or sometimes release to a homeless shelter.

Affordability constraints
- Residents often have limited savings when leaving an RRC
- Though the Department of Housing and Urban Development (HUD) offers public housing guidance, residents do not seem to be fully aware of policy. Additionally, wait lists for housing makes it difficult to secure housing upon release from an RRC

Accessibility constraints
- Residents with violent backgrounds or sex offender status face limited housing opportunities
- Public housing options and locations often exclude previously incarcerated individuals with violent backgrounds

Ohio offers permanent support housing to residents with a high risk of homelessness upon release.

Assimilating back into society challenges residents to rekindle relationships, forge new bonds and networks, and participate in community life and development

Though RRCs provide guidance in helping residents navigate across and assimilate back to society, residents themselves must re-learn how to engage with family and support networks, adapt to a different environment (e.g., technological updates), and re-establish themselves to be contributing members of society.

Assimilating to a new or “like new” community
Some residents depend on RRCs to help them navigate activities such as taking public transportation and using new technology.

“The first time I went to [the grocery store], I was overwhelmed. I didn’t know how to use self-check out and felt like everyone was staring.”
- Resident

64% of residents felt getting enough time with family was one of the hardest things about their RRC experience*

Engaging with family
Many residents indicate a family member as being the single most important person that helped them during their time at an RRC. Regular engagement with their family members is an important factor in their successful reentry*

“I am going to live with my parents and they are not financially stable. As their son, I will need to support them.”
- Resident

Giving back to society
Several residents indicated their desire to integrate back into society as law-abiding citizens; however, their status as an ex-offenders attaches a stigma to them that can prevent them from achieving that objective.

39% of residents felt reconnecting with their social networks was one of the hardest things about their RRC experience*

Establishing stability
Joining faith communities helps some residents feel connected to society; others crave mentors and companionship through informal networks.

*In some instances, it may not be appropriate for residents to engage with family and/or social networks, if that family includes former felons (which would be a violation of probation) or were involved in activity that led to the criminal charges that resulted in the resident’s incarceration.

</table>
RRC Management

The RRC Management dimension includes the following Statement of Work (SOW) elements*:

- RRC Performance
- Organizational Structure
- Financial Management

*Best Practices and Benchmarking and RRC Partnerships will be mentioned in both sections
The RCC model is an expansive one, tasked with solving a complex challenge in the face of numerous external pressures and constraints.
Effective management and oversight of reentry goals requires coordination and collaboration across several Bureau divisions, 24 RRM offices, and 180 RRCs.

**Central Office**

- **Industries, Education & Vocational Training Division**
- **Office of the General Counsel**
- **Information, Policy & Public Affairs Division**
- **Administrative Division**
- **Correctional Programs Division**
- **Reentry Services Division**
- **National Institute of Corrections**
- **Health Services Division**
- **Program Review Division**
- **Human Resource Management Division**

**Office of General Counsel**

Provides legal support, which takes the form of reviewing claims and supporting any litigation, evaluating legal risk to agency, addressing legal issues surrounding siting, completing zoning paper work, handling religious accommodations, managing commercial law with correctional staff, and providing general legal guidance.

**Correctional Programs Division**

Responsible for the referral, case management and programming aspects. Crucial for providing information about a resident’s time in an institution.

**Health Services Division**

Responsible for conveying the current medical conditions and treatment an inmate has while in the institution. RRM Health Specialists take over when inmate becomes an RRC resident.

**Administration Division: Residential Reentry Contracting Section**

Responsible for soliciting and administering approximately 180 competitively awarded contracts for RRCs and 364 intergovernmental agreements.

**Residential Reentry Management: Psychology Services**

Provides oversight of 546 Residential Reentry Centers, Detention Centers, and Juvenile Facilities to better prepare residents for leading law-abiding lives as citizens in the community. Works with community-based treatment providers for residents in RRCs and on home confinement via the Psychology Services Branch.

**Western Sector**

- On average, each field office
  - Has 6 staff
  - Manages 278 residents per RRS

Sample RRC Facility

- RRC Director
- Assistant Director, Programs
- Employment Placement Specialist
- Case Manager
- Social Services Coordinator
- Admin Assistant
- Monitor

Notes: 1. Interview analysis demonstrates that Residential Reentry Specialists and Contract Oversight Specialists are now performing the work of Administrative Assistants and Legal Instrument Examiners; 2. Analysis based on Bureau Nationwide Average Chart (amended); 3. Some RRC Directors report corporate office as well (e.g., Dismas Charities Regional VP); 4. Based on Bureau Procurement Division Organizational Charts
Field office staff consist of a Residential Reentry Manager as well as multiple Contract Oversight and Residential Reentry Specialists.

<table>
<thead>
<tr>
<th>Key Stakeholder</th>
<th>Primary Responsibilities</th>
</tr>
</thead>
</table>
| **Residential Reentry Manager (RRM)**  | • Assumes full responsibility for all duties and functions related to the RRMB in his/her assigned judicial district(s)  
• Serves as the Bureau’s liaison with all criminal justice agencies in his/her territory (e.g., USMS, USPO, RRCs, institutions)  
• Develops new residential resources and inspects contracts and program elements to ensure compliance  
• Develops and monitors jail facilities for persons serving short sentences, and state correctional and private facilities for juveniles and adults serving long sentences  
• Provides guidance on changes and operational requirements to contract residential staff  
• Serves as an information resource for inquiries from offenders, their support networks, news media, and other parties |
| **Contract Oversight Specialist (COS)**| • Responsible for all duties and functions related to the operations and programs of RRCs and contract confinement/detention facilities within the specific RRC district  
• Serves as the Bureau’s field representative, particularly in partnerships with US Courts, USPO, US Marshals Service, and the US Attorney’s Office  
• Performs preliminary site inspections for potential contractors  
• Responsible for contract oversight on a systemic basis |
| **Residential Reentry Specialist (RRS)**| • Responsible for all duties and functions related to case work activities for sentenced adults and adjudicated juveniles housed in non-federal facilities  
• Serves as a liaison with other criminal justice agencies (e.g., United States Courts, USPO, USMS, and the US Attorney’s Office)  
• Completes and submits all RRC referrals – ensures referrals are complete, accurate, and given to appropriate contractors  
• Provides technical assistance to state/county correctional facilities, private contractors, and Bureau institutions in case management matters  
• Monitors and updates the “Daily Movement Log” in SENTRY and ensures SENTRY accuracy  
• Serves as a professional advisor to other RRM office staff and contractors  
• Oversees contract performance as related to reentry responsibilities, and informs the RRM when performance is inadequate |

*Analysis based on Bureau Nationwide Average Chart (amended)
Sources: Interviews with Bureau Central Office and field office Staff; Deloitte 2016 RRC Site Visits; Position Description Cover Sheets for RRS, RRM, and COS

RRM and COS are the same grade on the general schedule

Target workload for COS is 6 contracts; Actual workload is 8.25 contracts*

Target Workload for RRS is 180-200 inmates; Actual workload is 278 inmates*
Field offices handle large numbers of resident cases and contracts with RRCs, often with little support, as demand for reentry services has increased.

RRMs, Residential Reentry Specialists, and Contract Oversight Specialists take on the responsibilities of multiple roles and handle large cases and/or contracts. Offices are typically understaffed, placing heavy workloads on staff and increasing turnover. This is especially problematic given the increase in demand for bed capacity at RRCs, and may also place more pressure on acquisition staff at Central Office as well.

While the demand for RRC beds has increased over the past few years, the number of staff supporting this increase has not.

Sources: RRMB Nationwide Averages document provided by the Bureau; Interviews with Bureau Central Office staff and RRM; Deloitte 2016 RRC Site Visits
RRC staff cover multiple roles across various subjects and are often stretched thin in terms of workloads and expertise.

RRC staff wear **multiple hats**, working long hours to better serve resident needs and potentially requiring **additional expertise** to fulfill responsibilities.

Staff with a **variety of background expertise, maturity, and subject matter expertise** may improve the overall RRC atmosphere and experience for residents.

Sources: Interviews with field office staff; Deloitte 2016 RRC Site Visits; Deloitte 2016 RRC Director Survey (n=91)

Average staff turnover rate as reported by RRC Program Directors: 22%
The Bureau requires specific staff numbers based on RRC capacity and utilization; however, this often does not align with actual RRC utilization numbers.

The current SOW indicates minimum staff required for RRCs with major, moderate, and minor use contracts. However, the average max capacity is more than double that major contract type, and RRCs may be left to determine for themselves optimal staff to resident ratios.

Notes: 1. Fed Scope and USAjobs.gov job postings and descriptions; 2. Indicates Key Staff; Required backgrounds as indicated in the Bureau SOW May 2015
RRC staff interact differently with the various Bureau stakeholder groups, based on the level of evaluation and/or information exchange necessary.

1. Program Review Division (PRD) reviews an RRM Office’s compliance with policy
   - PRD evaluates Field Offices every 18-36 months on performance across Program Review Guidelines

2. Field Office:
   - Receives request for inmate placement from institution through email or postal mail
   - Uploads pre-release information into R3M and submits package to applicable RRCs for acceptance
   - Receives RRC notification for inmate acceptance/rejection via R3M and notifies Institution with transfer information

3. RRC facility responds to resident placement request via R3M
   - RRM provides RRC with ongoing assistance and resident disciplinary action

4. RRM evaluates RRC facilities via (1) Pre-Occupancy Visit, (1) Full Monitoring Visit, (3) Unannounced Interim Monitoring Visits, and Ongoing Remote Monitoring

*Policies that need to be updated and/or created include: RRC Utilization and Transfer Procedures, Community Corrections Manual, Community Corrections Mission and Responsibilities, Contract Staff Integrity, RRMB Fiscal Management, RRM Management of Contractual Resources, RRM Trainee and Reference Guide, RRMB Inmate Case Management. A Joint Policy Committee will negotiate these policies for the RRMB.*

RRMB has identified eight policies that should be updated (5) or created (3) in order for this process to be effective*

*Policies that need to be updated and/or created include: RRC Utilization and Transfer Procedures, Community Corrections Manual, Community Corrections Mission and Responsibilities, Contract Staff Integrity, RRMB Fiscal Management, RRM Management of Contractual Resources, RRM Trainee and Reference Guide, RRMB Inmate Case Management. A Joint Policy Committee will negotiate these policies for the RRMB.*
The Bureau uses either a performance-based or compliance-based contract to manage RRCs

### Performance-based contracts

Contracts used by the Bureau that allow the contractor to provide details on how the Bureau’s specified outcomes will be achieved. Once a contract is awarded, RRCs are monitored to ensure they are complying with the process they laid out. The traditional contract length for these contracts has been ten years. Option years are guaranteed, if an RRC receives a satisfactory performance evaluation.

#### Contract types

<table>
<thead>
<tr>
<th>IDIQs</th>
<th>A Performance Work Statement (PWS) is agreed upon between the Bureau and RRC. The RRM then evaluates RRC performance against the PWS and the contractor’s technical proposal.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requirements</td>
<td></td>
</tr>
</tbody>
</table>

### Compliance-based contracts

Bureau solicitations include a Statement of Work (SOW), which details how the Bureau expects the contractor to perform the work. Once a contract is awarded, the Bureau monitors RRCs for compliance with the SOW. The use of a largely standardized SOW helps make it easier for the Bureau to make necessary changes to how RRCs do their work compared to performance-based contracts, in which each contractor has a different approach and changes would need to be determined on an individual basis. Although not guaranteed, options are typically exercised, but at the discretion of the government.

#### Contract types

<table>
<thead>
<tr>
<th>IDIQs</th>
<th>The Bureau develops specific guidance on how RRCs should work, outlined in an SOW, and holds RRCs accountable for compliance with the SOW, as well as contractor’s technical proposal.</th>
</tr>

<td>Firm-Fixed Price</td>
<td></td>
</tr>
</tbody>
</table>

Source: Interview with Bureau Field Office Staff
Within each contract model there are various contract types, including IDIQ, Requirements, and Firm Fixed Price

<table>
<thead>
<tr>
<th>Description</th>
<th>IDIQ (69)</th>
<th>Requirements (108)</th>
<th>Firm Fixed Price (3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contracting vehicle providing <strong>guaranteed minimums and estimated maximums</strong> of residents</td>
<td>Contracting vehicle detailing the specific programs and activities the Bureau instructs the RRC to execute for contract.</td>
<td><strong>New contracting vehicle</strong> the Bureau is using for RRC solicitations. Approximately <strong>70 FFP solicitations are in the pipeline over next 12 months</strong> and the Bureau expects increases in home confinement.</td>
<td></td>
</tr>
<tr>
<td><strong>Duration</strong></td>
<td><strong>Performance Based:</strong> 10 years</td>
<td><strong>Compliance Based:</strong> 5 years (1 base year, 4 option years)</td>
<td>N/A</td>
</tr>
<tr>
<td><strong>Pricing</strong>*</td>
<td>Average per diem for RRC: $95.78</td>
<td>Average per diem for RRC: $93.28</td>
<td>Average per diem for RRC: $84.00***</td>
</tr>
<tr>
<td></td>
<td>Home confinement: $45.05</td>
<td>Home confinement: $43.20</td>
<td>Home confinement: $42.00***</td>
</tr>
<tr>
<td><strong>RRC Payment</strong></td>
<td>Model provides contractors a <strong>guaranteed minimum of inmates</strong> and a projected maximum. Even if minimum inmate number isn’t met, the Bureau pays the difference.</td>
<td>There is <strong>no guaranteed minimum</strong>, but the Bureau is required to send inmates releasing to a specific area to designated RRCs in that area</td>
<td>RRCs are paid a <strong>fixed price</strong>, no matter how many residents are in beds or on home confinement (as long as they are under the contractual ceiling)</td>
</tr>
<tr>
<td><strong>How RRC activity is identified</strong></td>
<td><strong>Performance Based:</strong> RRCs propose their approach for providing services. Upon contract award, RRC performance measured against the PWS and contractor’s technical approach</td>
<td>N/A</td>
<td>N/A</td>
</tr>
<tr>
<td></td>
<td><strong>Compliance Based:</strong> The Bureau details all requirements in a standardized SOW, against which RRC performance is measured, in addition to the contractor’s technical approach. There are a number of active SOWs, but all new contracts use the version dated May 2015.</td>
<td><strong>Both</strong></td>
<td><strong>Both</strong></td>
</tr>
<tr>
<td><strong>Risk</strong></td>
<td>RRC assumed risk associated with not having a guaranteed maximum (and therefore maximum revenue). However, risk is partially mitigated through Bureau-guaranteed minimums. In 2016, there was only a single instance of the Bureau not filling the guaranteed minimum number of beds.</td>
<td>RRC assumes risk associated with the potential for a reduced supply of inmates. Their risk is partially mitigated through the requirement that the Bureau send all inmates in a specific area to that RRC.</td>
<td>RRC assumes minimal risk, as they are guaranteed a fixed price. The Bureau must forecast accurately, or take on the financial risk of paying for empty beds.</td>
</tr>
<tr>
<td><strong>Flexibility</strong></td>
<td>The Bureau has the ability to move inmates between facilities and guarantee minimum amount of inmates. Serves as a market signal for more RRCs to compete for bids as they can financially project solvency / profitability based on intake numbers.</td>
<td>Bureau flexibility is limited by requirement to send all inmates releasing to a specific area to the designated RRC.</td>
<td>The Bureau must modify a contract, in order to refer inmates beyond the maximum number specified in the contract.</td>
</tr>
</tbody>
</table>

RRC capacity will be an important factor as the Bureau awards new contracts

While available capacity varies across states and sectors, net bed supply, or the amount of beds available compared to expected demand, is primarily negative, indicating a shortage of bed space across the country.

*Net bed supply = total supply of beds – expected demand for beds. The total supply of beds in each state is multiplied by the average number of residents that will occupy a given bed throughout a year.

Source: Release State for Projected Releases, HC Census Report
The pre-award process begins 18-months prior to a current contract’s expiration and requires coordination between RRMB and the Contracting Section.

<table>
<thead>
<tr>
<th>Questionnaire and RCA</th>
<th>18-Months prior to a current contract’s expiration, the Contract Oversight Specialist (COS) completes a questionnaire that reflects the needs of a given area. Eventually, the results of this questionnaire are used to complete a Request for Contract Action (RCA).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Define the Need</td>
<td>COS defines the need by looking at 12 months of data and information. Generally, there is a 10% increase given to bed space for new contracts and estimated home confinement need is 50% of in-house capacity. Defining the need includes location, male to female ratio, home confinement radius and more.</td>
</tr>
<tr>
<td>CO Posts on Fed BizOpps</td>
<td>The Contracting Officer (CO) receives the RCA from RRMB and verifies for accuracy. If soliciting for a new geographic area, a Request for Information or Sources Sought is placed on FedBizOpps website. Later, the CO posts a full solicitation notice along with a compliance matrix, Statement of Work (SOW), Environmental Checklist, Performance Summary Table, Sample Letters, and more. Solicitations are generally posted for 60 days.</td>
</tr>
<tr>
<td>Receive proposals</td>
<td>CO receives proposals and begins to review to ensure they are in accordance with solicitation provisions. Proposals are then sent back to RRMB for technical review.</td>
</tr>
<tr>
<td>Technical Evaluation</td>
<td>After a solicitation has closed, the CO forwards the proposals to the Residential Reentry Specialists (RRS). Then a preliminary site inspection and technical evaluation panel is scheduled. The panel, which includes two RRSs and the COS, will read each technical proposal, compare it to the requirements of the SOW and Compliance Matrix, and rate the technical proposal.</td>
</tr>
<tr>
<td>Prepare and Make Award</td>
<td>The CO prepares the contract for award and then awards the contract to the organization with the best value to the government. At this point, the CO works closely with RRMB to ensure that pre-occupancy inspection is completed and that there are no issues prior to issuing the Notice to Proceed.</td>
</tr>
</tbody>
</table>

Siting is a major challenge RRC contractors face; this challenge can adversely impact competitiveness and resident access to quality programs and resources. In some instances, siting difficulties preclude all, or all but one, offerors from submitting competitive proposals to operate an RRC. Since logistical expertise may drive contractor bids, RRC contractors who understand how to navigate through challenges such as zoning restrictions may not be the best providers of RRC services to residents.

Challenges associated with RRC location and site selection process:

- **Zoning Restrictions.** Many city building zoning restrictions prevent RRCs in locations close or central to resources needed by residents.
- **Limited Community Support.** Even within legal zoning areas, RRCs may face communities that have a “Not in My Backyard” sentiment towards RRCs and the residents they support.
- **High Barriers to Providing Reentry Services.** Requiring bidders to provide facilities proves to be a competitive advantage for those bidders who can more easily navigate the zoning and siting process but who might not be the best providers of reentry services.

These challenges may limit RRCs to locations that may not provide residents with adequate access to quality:

- **Transportation.** Residents are often dependent on public transportation, and may not have access to jobs and/or other services based on distance and accessibility from the RRC.
- **Post RRC Housing.** Residents with no family support often face difficulties in locating housing upon release from the RRC.
- **Employment Opportunities.** Because of their reliance on public transportation and distance form the RRC, residents may not be able to access certain employment opportunities.
Once a contract is awarded, RRM monitors contract performance beginning before the first resident arrives and continuing throughout the life of the contract.

**Review Process**

1. **RRM conducts an annual and announced “full monitoring” visit of RRC facility.** RRCs must develop plans for addressing any identified issues.

2. **Depending on facility size, RRM staff conduct up to three unannounced “interim monitoring” visits at each RRC annually.** RRCs must develop plans for addressing any identified issues, known as deficiencies.

3. **At the end of each contract year,** RRC performance is recorded in the Contractor Performance Assessment System (CPARS), which is available to approved federal employees. The Bureau can determine whether or not to exercise the next option after each contract period. Performance-based contracts are guaranteed to have option years exercised, if they demonstrate satisfactory performance.

**Report Observations***

- **Review completion.** Field office staff do not seem to have a consistent way of completing full and/or interim monitoring reports. Some use free flow text with deficiencies embedded either within the text or at the end, some use an outlined approach.

- **Qualitative in nature.** Reviews were highly qualitative. The standard metric observed across most RRCs was for resident employment rates. Some referred to staff turnover rates, but did not include a specific number.

- **Strengths included.** Reports included nods to strengths and leading practices around home confinement measures, low staff turnover, community partnerships, etc. It could be beneficial to share these practices across RRCs and/or RRM to enhance the resident experience, particularly if they fall under the same contractor.

- **Few trends in deficiencies reported.** There were few overlapping deficiency commonalities across the reports assessed. While two deficiencies around subsistence and sanitation did overlap, the specifications around the deficiencies varied across RRCs.

---

*As found in reading Full and Interim Monitoring Reports from RRC sites visited (list in appendix)*
Many external organizations can affect the Bureau’s ability to meet reentry goals through policies and programs; these organizations fall into four main roles

<table>
<thead>
<tr>
<th>Partner Role</th>
<th>Description of Role</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Advocacy/Policy Making</td>
<td>- Sets policies and standards that impact RRCs&lt;br&gt;- Lobbies for funding and attention to issues impacting returning citizens&lt;br&gt;- Provides insights from research to inform criminal justice policy&lt;br&gt;- Spans national, state, local sectors</td>
</tr>
<tr>
<td>2 Resource Creation</td>
<td>- Develops, leads, and connects cross-sector partnerships and collaborations&lt;br&gt;- Funds program implementations and analyzes program performance to aggregate effective practices&lt;br&gt;- Analyzes and translates research, and disseminates for public consumption&lt;br&gt;- Spans national, state, local sectors</td>
</tr>
<tr>
<td>3 Direct Service Access</td>
<td>- Interacts directly with residents to meet their resource and service-related needs&lt;br&gt;- Amplifies existing services at RRCs to further support and connect returning citizen to sustainable resources&lt;br&gt;- Provides expertise based on specific skillset or knowledge base&lt;br&gt;- Spans state and local sectors</td>
</tr>
<tr>
<td>4 Support/Companionship</td>
<td>- Supports and encourages returning citizen throughout the process of reintegration&lt;br&gt;- Offers meaningful opportunities for community integration through volunteer and/or paid work&lt;br&gt;- Spans state and local sectors</td>
</tr>
</tbody>
</table>
Partners in the national and regional ecosystem largely fall into advocacy/policy setting and resource creation roles.

The enabling environment of governance and policy change that spans the national landscape.

Services, resources and supports delivered and/or developed for RRC residents.

---

Example Partnership – FIRC

Established in 2011, the Federal Interagency Reentry Council (FIRC) has had several accomplishments:

- Created a centralized website for Federal Reentry Services
- Established new government positions to support and institutionalize reentry efforts
- Enacted policy changes that help reduce post-prison barriers to employment, housing, education, and healthcare
- Reached more than 100,000 justice-involved Veterans through direct outreach in prisons, jails, and criminal courts

Sources: 1. DOJ, Roadmap to Reentry Homepage; 2. FIRC, Housing Snapshot; 3. FIRC, Federal Benefits Coordination Snapshot; 4. FIRC, Veterans Snapshot
The Bureau primarily interacts with five government partners in the national/regional reentry ecosystem

Varying levels of partnership and coordination exists between USPO, the Bureau, and RRCs

Interviews with USPO the US Probation Chiefs Advisory Group indicate that there may be greater opportunities to collaborate. Two specific examples include:

**Inmate Evaluation**

According to the Guide to Judiciary Policies and Procedures, the Post Conviction Risk Assessment instrument (PCRA) has shown to be a strong predictor of recidivism for all federal offenders. Officers should administer the PCRA while in an RRC or on location monitoring.

**Inmate Accountability**

A 2015 US Probation Chiefs Advisory Group (CAG) survey indicated CAG could handle as many as 1,000 additional Federal Location Monitoring (FLM) cases.

---

**RRC Level**

RRCs and USPO exhibited varying levels of engagement across the 11 sites evaluated and other regions interviewed. Engagement ranged from limited interaction to close and consistent coordination.

**Minimum Interaction**

- USPO receives **minimal documentation** from RRC upon resident release
- USPO asks RRC for contact/family information when a released resident violates parole
- RRC does not provide residents with access to programming run by USPO

**Maximum Interaction**

- USPO connects with RRCs every week to discuss residents
- USPO, RRCs, and sometimes judges come together for **monthly video conferences** with institutions to prepare for the transfer of inmates
- RRC and USPO collaborate on programming opportunities

---

In the local/RRC ecosystem, RRC staff work alongside community partners to collaboratively provide programs and services designed to drive resident success.

RRCs use a mix of internal, public, and private resources in the surrounding ecosystem to coordinate and enhance reentry programming.

Source: Deloitte 2016 RRC Site Visits
RRCs form partnerships with several types of organizations in the local community to support reentry, particularly in promoting job readiness.

### Types of Community Partnerships

<table>
<thead>
<tr>
<th>% of RRC Directors Indicating Partner</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-Profit Organization</td>
</tr>
<tr>
<td>Federal Agency</td>
</tr>
<tr>
<td>State/Local Agency</td>
</tr>
<tr>
<td>Community College</td>

<tr>
<td>Faith-Based Organization</td>
</tr>
<tr>
<td>Other</td>
</tr>
<tr>
<td>Private Corporation</td>
</tr>
<tr>
<td>Local School System</td>
</tr>
</tbody>
</table>

*Few of the sample RRCs visited had private sector representation on their community relations board.*

RRCs must have a Community Relations Board to educate the local community about the RRC mission, and to garner community support.

- Local Law Enforcement
- Medical Services Provider
- Local Fire Department
- RRC Director
- Civic Representation
- Nonprofit Partner
- Private Sector Partner

One RRC visited has created an additional Reentry Council with the local U.S. Attorney that recently hosted 200 partners at a Reentry Employment Conference.

### Examples of Job-Focused Services Provided by Community-Based Partners for Residents

- Offers counselors as intermediaries between clients, trainers, and employers
- Provides career coaching, training, education, and online learning
- Offers 100-hour employment skills training course
- Provides workforce training and job placement services
- Offers intensive supervision, CBT, and soft-skills training
- Provides workforce evaluation, career counseling and job placement services
- Offers job readiness classes, training, and certifications
- Offers general employment and training services
- Provides job-skills training in warehousing and food service

Leveraging partners to provide programming relieves RRCs of some demands for providing services in house, but maintaining effective partners can be hard.

What are some of the different ways RRCs perform partnerships?

1. Staff have existing relationships with organizations from prior employment, graduate studies, or personal networks.
2. Staff collaborate with other government entities that tell them about new partnership opportunities.
3. Residents inform the RRC of partners they are already working with and those partners may become formally linked.
4. Former residents now work for partner organizations and continue to reach out to the RRC to support current residents.
5. Organization engages RRC and offers to provide services or programming.

What does it mean to have an effective partnership?

- Service Provided: In-House, External Partner, Subcontractor
- Food & Shelter: ✓
- Employment Assistance: ✓
- Recreation: ✓
- Cognitive Behavioral Program: ✓
- Community Treatment Services: ✓
- Medical Treatment: ✓

Source: Deloitte 2016 RRC Site Visits; Deloitte 2016 RRC Program Director Survey (n=116)

Establishing and maintaining an effective partnership requires more than simply identifying the partner.

- Formal linkage agreements between RRCs and providers can facilitate resident access to services and resources.
- Resident qualifications may not meet standards or time required for program participation.
- Inconvenient RRC proximity to services presents transportation dependencies.
- Few feedback mechanisms exist to link resident, partner, and the RRC to resident goals, progress, and outputs of partner-run programs and resources.
- Some RRC Directors demonstrate more proactive partnership facilitation than others.

"We have to make sure the partner is willing to answer the phone so we can verify resident location."
"There is only time for referrals, not establishment of meaningful partnerships."
"RRC staff have little time for regular communication with partner."

## RRC Management: Overall Findings and Implications

<table>
<thead>
<tr>
<th>Findings</th>
<th>Potential Implications</th>
</tr>
</thead>
<tbody>
<tr>
<td>- RRCs operate in a <strong>highly complex environment</strong> and face numerous external pressures and constraints</td>
<td>- The complex mission and scope can <strong>impact competition and create challenges</strong> (e.g. siting), leading to cost pressures and potential quality issues in some cases</td>
</tr>
<tr>
<td>- Effective management of the RRC model takes <strong>coordination from several different bureau divisions</strong></td>
<td>- This resource-intensive model <strong>involves constant communication and coordination</strong>, which is critical to the success of the model</td>
</tr>
<tr>
<td>- <strong>Field offices have heavy workloads</strong>, in terms of contracts managed per COS and inmates managed per RRS</td>
<td>- Already heavy workloads will make it difficult to continue to <strong>manage the forecasted increase in demand</strong></td>
</tr>
<tr>
<td>- The Bureau uses <strong>different contract models</strong> and contract types to manage RRCs</td>
<td>- These different models create <strong>variability in terms of workload, risk, and performance requirements</strong>, adding to complexities of managing the RRC model</td>
</tr>
<tr>
<td>- RRM surveillance performance throughout the life of the contract, but key themes aren’t <strong>shared across sectors</strong></td>
<td>- Sharing information across sectors could lead to opportunities to <strong>spread leading practices</strong> across the RRCs</td>
</tr>
<tr>
<td>- Case managers interact with residents on a weekly, sometimes daily basis, but the SOW does not list qualification requirements for this position</td>
<td>- <strong>Residents receive different levels of support</strong> in finding jobs, securing housing, or receiving other programs and services necessary to help them transition</td>
</tr>
<tr>
<td>- The Bureau <strong>coordinates with multiple governmental agencies</strong> that offer reentry and accountability services, but this information often does not reach RRCs</td>
<td>- RRCs are sometimes <strong>unaware of coordination efforts and policy changes</strong> created at the national partnership level, and thus some residents do not take advantage of eligible opportunities or programs</td>
</tr>
<tr>
<td>- RRCs typically partner with and manage relationships with <strong>numerous external community-based partners</strong> with little Bureau involvement</td>
<td>- The Bureau has an opportunity to <strong>increase visibility</strong> in the type and/or partnerships RRCs use that interact with residents</td>
</tr>
</tbody>
</table>
In summary, RRC residents highlighted four primary needs while at an RRC: employment; housing; medical care; and, community interaction.

We asked RRC residents directly about their needs (through surveys and focus groups) to supplement documented major criminogenic needs in developing a list of primary RRC resident needs.

Primary Resident Needs

**Employment**
Focus on gaining long-term employment in order to cover pre-existing financial obligations and maintain financial security and independence.

Gainful employment may reduce the risk of an individual reoffending in order to address financial hardships.

**Housing**
Focus on the need for a stable, well-maintained place of residence that provides a supportive environment and reduces the daily stress of finding a place to reside.

Acquiring a stable and affordable place may relieve stress and allow an individual to focus attention on other priorities.

**Medical Care**
Focus on addressing any medical needs as well as dependence on and problems with alcohol and drugs.

Access to medical care and substance abuse treatment may increase the ability to meet other needs and prevent relapse into substance abuse and anti-social behavior.

**Community Interaction**
Focus on inter-personal behavior such as interactions with the community, family, and peer groups, as well as general capabilities of functioning adequately in the community.

Access to a supportive network may instill pro-social values and reduce anti-social behavior.
The Bureau should consider conducting additional analyses to identify potential reentry model improvements

Deloitte’s assessment covered eight RRC model components as outlined in the SOW. The Bureau should consider conducting further research in the following areas to supplement this work.

<table>
<thead>
<tr>
<th>Future Analysis</th>

Recommendations Overview
Recommendations

The second section presents Deloitte's recommendations that could help improve the resident experience, operating model, and overall RRC performance. There are 13 recommendations for consideration that are broken into specific sub-recommendations to facilitate implementation plans. Together, these 13 recommendations are designed to help improve the reentry model—improving transition points, better providing resources, and improving resident preparedness for reentry.

The first four of these recommendations aim to improve the resident experience by better providing resident identification, improving continuity of care, standardizing the resident experience across RRCs, and alleviating the burden of subsistence.

Recommendations five through nine aim to improve the Bureau's operating model by better positioning RRMIs, utilizing alternative paths to reentry, piloting alternative operating models, more actively supporting siting of new RRCs, and more efficiently managing partnerships.

The final four recommendations aim to make RRCs themselves more effective by better integrating technologies, improving the case manager role, improving information sharing, and better measuring and managing performance.
The RRC model provides a community-based opportunity for returning citizens to transition back to society in a structured way. While the assessment of the model reflects the challenge of reentry as a whole, there are likely opportunities to improve it to better support returning citizens. These recommendations focus on investment opportunities for improvements, rather than cost savings opportunities for the Bureau.

### Current State Observations

- **Inequitable access to resources**: Residents’ access to key transition resources differ, based on the RRC to which they are transferred and, in some cases, based on their employment status.
- **Segmented reentry management**: While reentry begins on day one of incarceration, returning citizens’ path to reentry is broken into a number of distinct phases (e.g., institution, RRC, HC, probation), which do not effectively build on each other.
- **Opportunities for Partnerships**: DOJ and the Bureau are missing opportunities to take advantage of a vast national ecosystem of reentry partners to help shoulder the burden of reentry.
- **Complex contracting environment**: 180 competitively procured RRCs are run by 103 separate providers using four different contracts types and numerous statements of work, resulting in varying expectations and standards.
- **Stretched resources**: From Central Office through field offices to the RRCs, the vast number of reentry personnel carry significant workloads which restrict their ability to both react to administrative requests and manage the reentry process in a timely and effective manner.
- **Misaligned Performance Measurements**: Evaluation of contract performance focuses on monitoring compliance with the SOW and may miss an opportunity to measure direct reentry outputs and outcomes in order to better understand the effectiveness.

### Recommendations

- **Treat the first day of incarceration through the last day of probation as a single path to reentry**. This involves closer coordination between institutions, RRCs, and USPO to be able to create a more consistent reentry experience that is reinforced at each step.
- **Identify ways to create a more responsive model by building partnerships, testing new contracting and operating models, and providing the resources required to manage the model in a sustainable way.**
- **Help create greater transparency into RRC operations and outcomes by sharing knowledge across the network and more closely tracking the outputs that matter.**
Recommendations Executive Summary (2 of 2)

Making the resident experience more effective

1. Institutions should work with eligible inmates to secure identification documentation and submit applications for public benefits prior to RRC transfer
2. To help improve continuity of information and care, reentry stakeholders (i.e., institutions, RRCs, USPO) should share tools, information, and processes that follow an inmate / resident throughout the justice system
3. Update language and requirements in the SOW to help reduce inconsistencies in the resident experience and provide equitable levels of access to programs and resources across RRCs
4. Alleviate the burden of subsistence for all RRC residents, including those on home confinement

Making the Bureau’s model more effective

5. Better position the Bureau to effectively manage and monitor contracts by increasing RRM grade, reviewing workloads, and improving staff collaboration
6. Identify and implement readiness measures to inform decisions at each transition point in the reentry process
7. Pilot new RRC contracting and operating models to test the feasibility of government owned/leased and/or operated RRCs
8. The Federal government should consider playing a greater role in initial zoning and siting to help increase RRC competition
9. Manage formal Federal and state-level agreements to facilitate better access to key transitional services and provide guidance to help standardize local level partnerships

Making RRCs more effective

10. Integrate technologies that are able to reduce workload and costs by negotiating nationwide technology contracts
11. Develop standards for the RRC Case Manager role and provide additional trainings for RRC staff
12. Develop methods for sharing information among RRC providers to address common reentry challenges and issues
13. Develop reentry performance measures to monitor RRC performance and develop a centralized dashboard to improve visibility and support decision-making
Inconsistent experiences that residents face at key transition points and at RRCs impact their ability and motivation to successfully reenter their communities.

Note: The RRC experience can vary for residents dramatically, depending on the RRC to which they are assigned. This sample resident journey identifies frequently heard experiences, but does not represent the experience associated with all institutions, RRCs, or Probation Officers. This journey map is available in 11” x 17”.
This inconsistency is the result of an expansive RRC model tasked with solving a complex challenge in the face of numerous external pressures and constraints.

RRCs currently face a large number of external pressures and constraints in providing programs and services to residents. The contracted RRCs navigate these challenges differently based on location, contract, and relationships with other stakeholder groups, adding to the inconsistent experiences residents have across all RRCs.

**Pressures**
- Legislation
- Community / Access Challenges
- Zoning
- Limited Time at RRCs
- Budget Constraints

**RRC Model Scope**
- Education Access
- Employment Assistance
- Case Management
- Food / Shelter
- Medical Treatment
- Housing Assistance
- Leisure Time Management
- Public ID and Benefits Assistance

**Approximately 249 RRC locations**

**Institution**
- Approximately 122 institutions

**Constraints**
- Medical Reimbursement
- Staff Workload
- Litigation
- Overcrowding
- Accounting / Invoicing
- Monitoring and Compliance
- Budget Constraints

**Approximately 180 RRC contracts**
- 4 different contract types

**Approximately 4 different Statements of Work (SOW)**

**Serves all 94 federal judicial districts**
There are opportunities to increase consistency across RRCs and throughout the reentry process to better support residents in successful reentry.

Note: This journey represents an illustrative vision for the future state, focused on a resident who has a primary goal of obtaining a job. This journey map is available in 11" x 17"
Recommendations Detail
Institutions should work with eligible inmates to secure identification documentation and submit applications for public benefits prior to RRC transfer

One of the main objectives of community reentry is to secure a job. However, to become employed, residents need to have the proper identification. RRCs regularly assist residents in obtaining personal documentation, but progress can be delayed when residents lack funds to cover processing and application fees. While the RRC can assist residents with this process in the short term, in the long term the Bureau should explore the possibility of requiring institutions to secure documents for inmates prior to RRC transfer.

Nearly $19M is estimated to be spent annually housing residents in an RRC who are unable to find work because of lack of identification. To more efficiently use RRC time, the Bureau should provide both financial and logistical support to residents in need of obtaining personnel documentation.

Residents need to have at least two forms of documentation to fill out an I-9 form to begin a job

- SS Card
- ID Card
- Birth Certificate

I-9 form

Employment

Helping residents secure employment was one of the most important success factors noted by RRC Directors surveyed

Paying for State IDs of residents who need it may have annual cost implications of $579-772K*. Paying for birth certificates may have cost implications of $154-385K.*

Short Term Recommendations

1. **Work with DHS** to have the Bureau ID included on list B of acceptable documents on I-9 form. This should be a short term plan to assist residents in securing employment, but should not replace ongoing efforts

2. Create or update Bureau policy where the Bureau would formally help residents needing to obtain personal documentation and benefits. Evaluate both institutions and RRCs on their ability to assist residents prior to transfer and/or release

3. **Engage with Federal and state agencies** to facilitate the documentation process

Long Term Recommendation

The Bureau should explore the possibility of requiring that institutions work with inmates to secure documents for residents prior to transfer to the RRC. This would help better prepare residents for securing employment upon arrival at the RRC.

*Processing timelines vary from state to state; sample provided (Virginia). Costs vary by state; sample ranges provided.
*Notes: To calculate estimated cost, multiplied number of inmates in FY15 (32,760) by percent of inmates who don’t have or needed help attaining an ID or a birth certificate in an RRC from survey. These numbers were multiplied by the pricing of ID/Birth Certificate found on slide 36.

Virtually all of the RRC Directors interviewed expressed their frustration that new arriving residents lacked proper identification

Sources: 1. Deloitte 2016 RRC Director Survey 2. State DMV websites; 3. Deloitte 2016 Resident Survey (n=470)
Reentry stakeholders should share tools, information, and processes that can be tailored for a specific inmate/resident as they progress through the justice system.

Reentry planning is a process that begins at arrest and continues to release from a sentence. To efficiently provide continuous care, all reentry stakeholders should share critical information on inmates. Access to assessed risk and associated needs from criminal justice stakeholders (e.g., institutions, USPO) can provide inputs to an RRCs’ resident program planning. These inputs will supplement the RRCs’ risk and needs assessments, providing caseworkers with a better ability to measure progress towards reentry readiness and to refine programs accordingly.

### Reentry Planning

Risks and associated needs should serve as inputs into the reentry planning process. As such, the Bureau and DOJ should work with reentry stakeholders to develop and institute a common way to discuss risk and associated needs. This could be achieved through administering a common risk assessment at key points during incarceration (e.g., each time often an individual is transferred) or, at a minimum, ensuring that the assessments used at each step result in common identifiable needs that are shared with downstream stakeholders as individuals move closer to release. To support this, the Bureau should ensure that RRCs use a common risk/needs assessment that is found to be acceptable and statistically accepted.

With needs identified, the Bureau should ensure those needs feed a reentry planning tool that follows an individual starting at day one at an institution and all the way through probation.

RRCs currently have a tool for this in the form of the Individualized Program Plan (IPP); however, there is an opportunity to update the IPP. The IPP should be a standardized form that is consistent across RRCs and should focus primarily on planning that addresses an individual’s major reentry needs.

### Communications

The Bureau should require the timely sharing of information by institutions with key stakeholders prior to an inmate’s transfer to an RRC, including information about an inmates prior identified risks, needs, and reentry plans.

Institutions should provide RRCs with the most updated information on inmates prior to transfer and should provide any updated information up until the transfer day.

Institutions should set expectations with transferring inmates and answer questions about the destination RRC prior to transfer.

Institutions should contact identified family and friends of an inmate to also set expectations for this phase of incarceration and to address any questions.

Source: Department of Justice, Roadmap to Reentry, 2016
An updated and standardized IPP should serve as a reentry planning tool that follows an inmate through the justice system.

The Bureau is currently standardizing use of IPPs across RRCs. This IPP should be also be used by USPO and Federal institutions. A common IPP would create a narrative of offender history, needs, goals, and associated programming.

**IPP Form Update Recommendations**

1. Expand the form to align to the risk factors from risk assessment tool so that needs and progress against those needs can be tied back to identified criminogenic and reentry risks.

2. Capture information in the IPP through both free flow text and checklists to communicate an offender’s narrative across stakeholder groups more effectively.

---

Inmate Insight Program currently in place at Allenwood.

Inconsistency of information transfer and reporting disrupts continuity of care for offender and often causes program irregularities.

Source: Bureau SOW May 2015
Reentry stakeholders should use a common case management system capable of sharing information; leverage ongoing efforts to improve interoperability

One common case management tool can help improve interoperability between reentry stakeholders. The Bureau should explore creating or expanding a current tool (e.g., R3M, a current web-based tool that streamlines the resident referral process) to serve as its common case management system. The current USDS project may identify opportunities to improve interoperability across the criminal justice system.

R3M Illustrative Use Case Scenarios

1. **Transfer Process.** At pre-determined date prior to transfer, R3M alerts Case Manager to review an inmate’s IPP. As part of the process, information (e.g., IPP, risk assessment) is uploaded so that it can be accessed by relevant stakeholders.

2. **Resources.** R3M can alert Case Manager of key resources (e.g., State ID, Birth Certificate) that remain outstanding for an inmate.

3. **Program Alerts.** Institution Case Managers track programs taken by an inmate so that RRC Case Managers can understand future-resident programming needs.

4. **Family Visitation.** Institution-approved visitation lists can be provided to RRCs to expedite visitation approval process once at an RRC.

5. **USPO.** USPO can view offender programming, disciplinary profile, etc. from institution to RRC prior to jurisdictional transfer.

6. **Interoperability.** Criminal justice systems (e.g., SENTRY, NCIC, JABS/JDIS, IAFIS) can share data to facilitate offender continuity of care and track key milestones.

---

**USDS Interoperability Project**

**Problem.** Lack of system interoperability of offender data amongst government stakeholders impedes ability for a coherent continuity of care throughout justice system.

**Impact.** Poor data and information sharing obscures ability for federal agencies to target resources towards effective reentry.

**Solution.** USDS is creating an “information highway” solution to help increase interagency and inter-system data accuracy and information-sharing to inform better decisions on programming, training, and resource allocation.

Standardization and interoperability of data shared across public safety, criminal justice, and national security government stakeholders may improve the ability of institutions, probation officers, and RRC case managers to transition offenders from incarceration to reentry.
2 | The Bureau should develop a formal “transfer checklist” that is used to standardize the transfer and orientation process from an institution to an RRC

The RRC Transfer Checklist should serve as an internal document that the institution Case Manager is responsible for filling out to document that all preparatory tasks and communications have been completed prior to an inmate’s transfer to an RRC.

Residents cite family support as being important for their reentry to the community. When appropriate, RRCs can involve family members into the transfer and orientation process.

Prior to Transfer to the RRC:
- Inmate’s family receives documentation/resources regarding the RRC experience and expectations, ways to support their family member, etc.
- List of approved visitors “travels” with the inmate from institution to RRC to facilitate family accessibility (based on resident consent)

Following Inmate’s Arrival to the RRC:
- Based on pre-determined visiting standards, the resident’s family is able to visit the RRC and be a part of the orientation process within one week of resident arrival to the RRC

Source: State of New Jersey Department of Corrections website – www.state.nj.us/corrections/pages/index.shtml

New Jersey’s Department of Corrections website has clear details about each of its reentry contractors

DOJ’s recently developed “Reentering Your Community: A Handbook” starts to provide inmates with reentry information

One resident commented on not being able to contact her mother upon release from the institution to RRC, thus delaying her home confinement date
Update language and requirements in the SOW to help reduce inconsistencies in the resident experience and provide more equitable access to resources

The RRC SOW dictates the standards that RRCs must follow in providing services to residents; however, there are several versions of the SOW that have differing standards. There is an opportunity for the Bureau to standardize SOW language across key reentry areas.

<table>
<thead>
<tr>
<th><strong>Suggested SOW Language</strong></th>
<th><strong>High Level Action Items</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Technology</strong></td>
<td></td>
</tr>
</tbody>
</table>
| The contractor should provide access to computer/internet technology to assist residents with employment and reconnecting with communities via electronic mail. Access to these resources should be sufficient to pursue opportunities and correspond with potential employers without limitation and/or hindrance. | ▪ Write in a specific resident to computer ratio into the next SOW, similar to laundry and toilet facility ratios.  
▪ Assist residents in creating an email account or reactivating old e-mail accounts. |
| **Phone Services**        |                             |
| The contractor must provide access to cellphones, including smartphones, at no or minimal cost to residents. The contractor must allow residents access to their cell phones 24 hours a day (with exceptions based on security needs, such as sex offenders). | ▪ Identify and negotiate with different phone and service providers nationwide to procure a low cost contract option for RRCs.  
▪ Identify applications for blocking camera and/or internet usage, and for monitoring phone usage overall. |
| **Transportation**        |                             |
| The contractor must provide access to public transportation within one mile of the RRC. The contractor must fund all transportation for unemployed or low-wage residents and those not seeking employment because of disability. | ▪ Require RRCs to provide residents with more guidance such as community maps and travel resources (e.g., bus routes, etc.).  
▪ Reduce the allowable distance between an RRC and access to public transportation or require RRCs to provide van services. |
| **Laundry**               |                             |
| The contractor must provide for the use of irons/ironing boards on site for residents to improve personal appearance for job interviews. | ▪ The Bureau should identify an appropriate resident to iron/ironing table ratio, similar to shower and toilet ratios, to better prepare residents for job interviews.  
▪ Also explore providing basic hygiene kits (e.g., shampoo) upon arrival. |
| **Visiting Access**       |                             |
| The contractor shall allow visitors within the first week of a resident’s arrival to the RRC. The contractor shall allow multiple opportunities for the resident to visit with family on a weekly basis, and should not limit the amount of visitors permitted on the approved visitor list. | ▪ Identify the level of access residents should have to their family and friends. This may involve including a family member during a resident’s orientation at an RRC.  
▪ Grant leisure/day/weekend passes based on a standard scale used by all RRCs (potentially dependent on requirements met, behavior, etc.). |
| **House Rules**           |                             |
| The Bureau should require the submission of proposed house rules in the Request for Proposals. | ▪ Develop a list of standards and criteria for evaluating house rules across all RRCs to help promote consistency. |

Some RRCs use smartphones and facial recognition applications. Some even provide residents with smartphones pre-loaded with relevant phone numbers upon arrival to the RRC.
4 | Alleviate the burden of subsistence for all RRC residents, including those individuals on home confinement*

RRC residents are required to pay a subsistence fee equal to 25% of their gross pay to offset the costs of confinement. Subsistence consumes a significant portion of residents’ income and may prevent them from covering other financial obligations that support reentry (e.g., transportation, savings account). The Bureau should consider altering the current subsistence model to better support resident reentry.

The Bureau should identify an alternative model for subsistence fees, as current issues include:

- Lack of consistency in sanctioning residents who do not pay fees consistently
- Financial burden on residents who typically earn minimum wage
- Disincentive for residents to obtain employment
- Administrative burden for field offices and Central Office staff

Potential alternative models suggested during RRC location visits include:

1. 25% of net paycheck
2. 10% of net paycheck required to be placed in savings account
3. Flat fee per month based on income level
4. Automatic waivers for certain income thresholds
5. Use subsistence fees to cover resident resource costs

**Short Term Recommendations**
- Develop thresholds for subsistence reductions and waivers for specific income levels and/or expense requirements (e.g., child support, restitution)
- Provide clear guidance on subsistence reductions and waivers to RRCs and RRMs
- Help improve speed of reduction/waiver application process by reducing layers involved in approval process
- Keep consistent track of subsistence fees collected per RRC and resident

**Long Term Recommendations**
- Work to understand overall impact of subsistence collection on reentry
- Identify administrative burden involved with subsistence fee collection
- Determine potential for elimination, or substitution of an alternative models (for instance, subsistence fees covers resident resource costs such as cell phones, ID application fees, security deposits, etc.
- The Bureau should continue to work on eliminating subsistence payments for residents under home confinement*

Bureau leadership estimates that subsistence represents ~$30M of revenue. To fully assess the financial impact of removing subsistence, the Bureau would need to do an analysis of RRC invoices

*DOJ announced the elimination of subsistence for individuals on home confinement on August 3, 2016
Source: Interviews with Bureau Central Office Staff
Better position the Bureau to effectively manage and monitor contracts by increasing RRM grade, reviewing workloads, and improving staff collaboration

The Bureau’s transition from a region to sector model resulted in several instances in an increased workload and reduction in staff. As a result, the Bureau should provide additional incentives and support structures to more efficiently support its staff. This involves grades aligned to roles and responsibilities, collaboration opportunities, clear career progression opportunities, and greater resources commensurate with workloads.

1. The Bureau should **conduct a workload analysis of the field offices and/or revise as needed.**

   - Current average workloads (Contracts and Residents) are based on overall nation-wide averages, rather than target workloads.
   - **Providing greater workload support may:**
     - Reduce Turnover
     - Improve Managerial Oversight
     - Improve Connectivity to Bureau Central Office
     - Increase quality in Monitoring Reports
     - Improve 1:1 care provided to residents

   **High-level Action Items:**
   - Identify the **current workloads (contract and residents)** handled by field office staff
   - Develop **recommended workload targets** for field offices
   - **Adjust staffing levels** to meet workload targets

2. The Bureau should map the RRM position to a higher GS-grade.

   - Provides **greater incentive to move up** into this position so that more personnel are interested in the RRM role
   - Aligns managerial workload to an **appropriate salary level**

3. The Bureau should **continue to identify collaborative opportunities to involve the RRM and field office staff** to work more closely with the Central Office.

   - **Increase use of forums** for field offices to submit ideas, opportunities for improvement, etc.
   - **Launch additional channels to incorporate field office ideas** opportunities for improvement, etc. into Bureau policies and RRC requirements
   - Create **working groups to involve staff in contract updates or award/solicitation decisions to acknowledge importance of their perspective and experience**

*Based on interviews with Central Office Staff*
6 | The Bureau should identify readiness measures to inform decisions at each transition point in the reentry process

DOJ's Office of the Inspector General (OIG) is currently conducting an audit of the Bureau's policy for placing inmates in RRCs, as well as the number of eligible inmates transferred to RRCs, from RRCs to home confinement, and directly from institutions to home confinement. The Bureau can use those results, combined with a strategic approach of inmate needs and demand forecasting, to help maximize its capacity to support reentry by strategically using all available paths for inmates nearing reentry.

The effectiveness of such an approach requires a focus on readiness and need, rather than a sole focus on capacity. To support this, the Bureau should develop a methodology to determine a resident's readiness for each post-institution step, which considers:

- Resident needs (e.g., identification, benefits, transportation, housing, financial stability, access to resources, mental state)
- Resident preferences (e.g., burdensome accountability checks, unwillingness to pay subsistence on HC*)
- Policy requirements (e.g., family environment, family criminal background, proof of landline)

Source: Interviews with Bureau Central Office Staff

*Residents who went direct to home confinement may be underrepresented in survey of resident preferences
The Bureau should pilot new RRC contracting and operating models to test the feasibility of government owned / leased and/or operated RRCs

The RRC model is made up of 180 competitive contracts across 249 locations. The Bureau maybe able to reduce the complexity of the model by piloting different operating models and contract structures.

<table>
<thead>
<tr>
<th>Description and Purpose of Pilot</th>
<th>Status Quo</th>
<th>Bureau Officials In House (Bureau In-House)</th>
<th>Government Owned / Leased Contractor Operated (GOCO)</th>
<th>Government Owned / Leased Government Operated (GOGO)</th>

<td>The Bureau would be able to better evaluate home confinement readiness</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Relatively quick implementation</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Correctional Services Canada, the Canadian Federal Agency responsible for reentry, finances and operates 16 reentry facilities for high risk cases**

Based on the operating model selected, the Bureau should define the key objectives of the pilot and implementation steps needed to be successful.

An important element of defining the key objectives is completing a cost estimate. An initial estimate indicates that the GOCO model may be more cost efficient.

### Potential Risks

Note: Status quo is for per-diem based model, not firm fixed price. Assumes facility of 46 in-house beds, 11 home confinement spots, based on averages across all RRCs in study. Per diem rate is blended rate by weighted average by number of residents at a given per diem rate. Assumes 100% occupancy in all cases. Real estate pricing based on housing price per square foot and blended to be weighted by regional distribution.

---

89 Bureau Residential Reentry Center Assessment  
Copyright © 2016 Deloitte Development LLC. All rights reserved.
The Bureau should explore using one national umbrella contract for major contractors with each individual RRC facility as a separate task order. Shifting a large number of contracts to one larger umbrella contract can expand the service delivery of higher quality RRC providers while potentially reducing the administrative burden over the long term, as well as potentially reducing per diem rates due to economies of scale.

To focus contractors on reentry services and to help reduce risk of over paying for under-utilized contracts, the Bureau should consider structuring each task order as a blend of firm fixed price payments and per diem payments.

**Firm Fixed Price Payments**
- Fixed costs and operational costs unassociated with reentry services will be paid for on a firm fixed price monthly fee. The benefits of this approach could include:
  - The Bureau maintains existing network of RRCs by guaranteeing a certain level of payment
  - RRC’s financial risk associated with fixed assets is reduced
  - Reduces financial administration of capital

**Per Diem Payments**
- Reentry services will be paid for on a per diem basis for services to each resident on: employment, housing, transitional services, and other variable costs. The benefits of this approach could include:
  - The Bureau does not overpay for under-utilized contracts
  - Contractor maintains incentive to serve more residents

The blended payment structure could effectively exist independently of an umbrella contract as separate CLINs on one RRC services contract.

The Bureau should release an RFI to contractors to better understand the potential effectiveness, price structure, challenges, and level of interest for a national umbrella contract. Elements to consider include:

**Effectiveness.** The RFI should ask respondents on the potential effectiveness of the umbrella alternative, the firm fixed price and per diem combined alternative, and the potential combination of both aforementioned alternatives.

**Price Structure.** The RFI should inquire as to how much of an RRC’s per diem is allocated to fixed costs and how much is allocated to variable cost or profitability.

**Challenges.** The RFI should request information about potential challenges to expect in the implementation of the umbrella alternative, the firm fixed price and per diem combined alternative, and the potential combination of both aforementioned alternatives.

**Level of interest.** The RFI should gain an understanding of the level of interest potential parties have with the umbrella alternative, the firm fixed price and per diem combined alternative, and the potential combination of both aforementioned alternatives.

Whichever contract or operating model the Bureau ultimately selects, Bureau staffing levels (e.g., field offices, procurement, etc.) would need to be evaluated and adjusted accordingly.
Regardless of the model, the federal government should play a greater role in initial zoning and siting to help increase RRC competition

The Bureau should focus primarily on areas where there is high demand for bed space, but limited supply, and in which siting/zoning has proven to be a challenge. The Bureau should select these areas to pilot a new zoning and siting approach, and to increase Bureau engagement in the pre-solicitation phase.

Description
When looking to expand the network of RRCs, the Bureau should reserve the rights to facilities before selecting a contractor.

Potential Benefit to the Bureau
If the government acquires facilities prior to selecting a contractor, contractors can no longer gain competitive advantage in the award process from siting.

Description
After the facilities have been selected, the Bureau should then select a contractor to operate an RRC out of those facilities.

Potential Benefit to the Bureau
Prior facility procurement will allow the Bureau to select contractors based primarily on reentry services.

Description
The Bureau should either require the contractor to pay rent or reduce per diem payments if the facility remains Government Owned / Leased.

Potential Benefit to the Bureau
By maintaining ownership, the Bureau will possess a network of zoning approved lands without being tied to a specific contractor.

Intergovernmental agreements with federal agencies (e.g., General Services Administration) and state governments should be explored to help increase the capacity of the Bureau and DOJ in providing initial zoning and siting assistance in addition to seeking private sector subject matter advisors

In upcoming solicitations, the Bureau should play a more proactive role in working with and educating communities about the overall goals and missions of RRCs

Interviews with both field office staff and Central Office staff indicate that the biggest barriers to create additional RRCs are zoning and siting
The Bureau, in partnership with DOJ, should explore addressing facilities and location challenges through options that can improve the competitive award process.

Facilities and location challenges often present barriers to entry for new RRC contracts and reduce the competitiveness of the RRC model. Facilities' challenges relate to the specific site and facility within which an RRC operates, while location challenges are broader and related to the quality of a community’s environment for reentry. These potential solutions would involve executive support, interagency cooperation, and consideration of other community priorities, but hold potential for addressing both sets of challenges, resulting in greater competition and improved service delivery.

### Facilities Challenges Addressed:

<table>
<thead>
<tr>
<th>Solution</th>
<th>Description and Initial Steps</th>
<th>Capital Required*</th>
</tr>
</thead>
</table>
| Government Reserve Rights to Facilities | 1. Reserve rights to facilities through acquisition, lease, use of GSA buildings, etc.  
2. Select a contractor to deliver RRC services out of the reserved facilities  
3. Lease the facilities back to the contractor                                      | High              |
| Public Private Partnerships to Acquire Facilities | 1. Use Public Private Partnerships (PPPs) with local real estate groups and developers to reserve rights to facilities prior to selecting an RRC provider to operate out of the reserved facilities  
2. Local partner acquires land and zoning approval in exchange for the Bureau’s guarantee of a tenant (RRC providers)  
3. PPPs would give the Bureau control of facilities, without being tied to a given RRC provider; the Bureau would be able to utilize the partner’s local network and political connections to get approved zoning | None              |

### Location Challenges to be Addressed:

<table>
<thead>
<tr>
<th>Solution</th>
<th>Description and Initial Steps</th>
<th>Capital Required*</th>
</tr>
</thead>
</table>
| Success Based Community Grants | 1. Provide success-based community grants to local governments and municipalities who have proven to better deliver key reentry outputs to the community  
2. The Bureau would only deliver funds to communities after results are delivered (similar to pay for success model) | High              |
| Portfolio Grants       | 1. Similar to HUD’s Choice Neighborhoods Grants, the Bureau should develop competitively awarded grants to non-governmental organizations & localities for improving an environment for reentry  
2. Grants funded in partnership with federal agencies such as DOL, DOT, HUD  
3. Grants would not be tied to outcome-based payments                            | High              |

*Capital required refers to the amount of government funds needed to execute the given alternative.
9 | The Bureau, in close coordination with the DOJ, should use the momentum of today’s interagency reform movement to help reduce policy barriers to reentry

Some RRC residents already have challenges accessing local resources due to transportation challenges or inconsistent pass policies. By improving local resource accessibly and level of awareness of federal policy/programs, the Bureau can address these challenges.

To support RRCs in meeting key reentry needs, DOJ should support the Bureau in formulating relationships by brokering formal MOUs and implementing immediate policy changes regarding key identification documents.

Beyond MOUs, the Bureau should evaluate current levels of information dissemination and create RRC-level strategic guidance, tools, and materials.

- The Bureau should evaluate how well materials such as Reentry Mythbusters are reaching regional and local contacts and determine general RRC staff awareness of federal programs (e.g., Health Care for Reentry Veterans).
- The Bureau should provide strategic guidance, tools, and materials for RRCs/RRMs on how to better partner with federal, regional, state, and local organizations; using the MOUs as leverage with local affiliates is one tool.
  - For example, the Bureau should work with local departments of motor vehicles and state health insurance exchanges to provide on-site enrollment and registration.
- The Bureau should also add in significant language to RRC solicitations to drive desired behavior regarding partnerships.

Source: DOJ, Establishing the White House Legal and Interagency Roundtable
The Bureau should standardize some aspects of partnership facilitation at the local level with a focus on transparency and consistency across RRCs.

1. The Bureau should require RRCs to maintain **private sector representation** on their Community Relations Boards to better equip RRCs to engage with the business community.

2. To help increase visibility into an RRC’s partner network, the Bureau should capture **partner names and descriptions** during interim and full monitoring visits. Some Field Office staff currently gather this information during Full and Interim Monitoring Reviews.

3. The Bureau has an opportunity to leverage **national organizations and facilitate** partnerships for RRCs to offer specific services outside their core operations, without a formal contracting process.

The Bureau should create a set of standardized toolkit of resources for RRCs to use when soliciting local business partnerships to join their Community Relations Board.

- Start an “Adopt an RRC” program and create associated materials to explain the function of RRCs to business groups interested in a structured approach to supporting residents.

<table>
<thead>
<tr>
<th>Employment &amp; Exposure</th>
<th>Mentoring</th>
<th>Workshops</th>
<th>Financial Support</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Fair chance hiring</td>
<td>• Coaching through reentry</td>
<td>• Financial literacy</td>
<td>• Technology donations</td>
</tr>
<tr>
<td>• Career panels/ job fairs</td>
<td>• Partnering with nonprofits</td>
<td>• Soft skills</td>
<td>• In-kind services</td>
</tr>
</tbody>
</table>

The Bureau should lead introductions between RRC leadership and national partners that provide a high-value service for residents. Potential partners could enhance current RRC offerings, especially in the following areas:

- **Parenting and family reunification resources** (e.g., parenting classes, familial counseling partners)
- **Community-based support groups** (e.g., Alcoholics Anonymous, Narcotics Anonymous)
- **Vocational training** (e.g., apprenticeship programs, internship programs, skill development training)
- **Educational opportunities** (e.g., GED, CDL certification)
Partnerships could be used to expand and enhance programming associated with family circumstances and housing.
The Bureau should help RRCs integrate technologies that are able to reduce workload and costs by negotiating nationwide technology contracts

RRCs use a range of electronic monitoring devices and GPS tracking devices to keep better accountability of residents, particularly higher-risk residents. These RRCs use different products from different vendors with different contract rates and vastly different capabilities. The Bureau may be able to negotiate one bulk rate with one vendor to procure lower cost technology devices for monitoring residents – purchased and owned by the Bureau.

Ranges from $2-$10/resident/week

1. The Bureau should determine which device type to use based on factors such as cost, quality, and overall experience for the resident (in terms of noticeability, etc.), noting exceptions based on geographic coverage limitations and different security needs per resident.

2. The Bureau could also leverage partnerships with agencies such as USPO and US Marshals to help increase purchasing power and to reduce the cost even further.

3. Leveraging the 30,000+ inmates that transition through RRCs, the Bureau may be able to negotiate one specific rate and product with one - two providers (software and device) used at all RRCs. This would reduce variations in devices used, costs paid by the Bureau, and provider software services as well.

Sources: Corporate websites for electronic monitoring and GPS tracking solutions
11 | The Bureau should develop standards for the RRC Case Manager role and provide additional trainings for RRC staff

Case Managers are responsible for developing and monitoring progress against resident reentry plans. Next to family and friends, residents identified Case Managers as the most important person to them during the reentry process. Because Case Managers fill such a critical role, they should be properly equipped to serve that role.

The Bureau should establish minimum requirements for background experiences and monitoring for the Case Manager role since Case Managers interact with each Resident on a weekly basis and are pivotal in checking overall progress and release readiness.

<table>
<thead>
<tr>
<th>Minimum Case Manager Requirements (Sample)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Education and Certification</strong></td>
</tr>
<tr>
<td>▪ Masters Degree in Social Work, Human Services, Criminal Justice, or other related field</td>
</tr>
<tr>
<td>▪ Licensure or certification in a state at the independent practice level</td>
</tr>
<tr>
<td><strong>Experience</strong></td>
</tr>
<tr>
<td>▪ 3 years experience in human services, corrections, or community-based services</td>
</tr>
<tr>
<td>▪ Experience in institution or correctional environment is a plus</td>
</tr>
<tr>
<td><strong>Soft Skills</strong></td>
</tr>
<tr>
<td>▪ Ability to interact with individuals adjusting to the community after being incarcerated for 1-30+ years</td>
</tr>
<tr>
<td>▪ Sensitivity in response time, resident mental state, etc.</td>
</tr>
</tbody>
</table>

The Bureau should update the trainings and resources available for all RRC staff, particularly in terms of refresher courses and Bureau conferences, based on policy and information needs.

_Sample trainings and resources:_

- Specific training providing corrections context and reentry goals for staff with no corrections experience to better manage the transition
- Specific training around policy changes, such as ACA or HUD policies
- Forums or conferences for RRC staff to share best practices and lessons learned, based on questions posed by RRC staff in advance

Many case managers requested more applicable training and resources to help “weed through” multiple policy changes, in addition to what is already provided.

Source: usa.gov
Develop methods for sharing information among RRC providers to address common reentry challenges and issues

In addressing issues, RRCs rely on personal experience and Bureau staff, but cannot currently leverage the RRC network effectively to identify solutions. There are several opportunities to support the sharing of information across RRCs in a way that protects proprietary information, but supports all RRC contractors in providing effective residential reentry services.

The Bureau should develop a clearinghouse for reentry-related information, Bureau guidance, and FAQs that are updated to reflect real-time issues faced by RRC staff.

An online forum would provide an opportunity for RRCs to share leading practices and approaches from the field, supplementing Bureau-provided resources.

Updated Bureau Policy on ACA

The Bureau will now require all RRC staff to inform residents of their right to sign up for health insurance under the Affordable Care Act (ACA). RRCs must provide residents assistance (logistically and otherwise) in completing the application prior to release. Residents will need to sign a document indicating awareness of ACA.

Currently Trending Topics for RRC Staff

Topic: Has anyone looked into job readiness programming curriculum? My residents need more assistance with basic interview guidance, resume creation, etc.

17 responses:

We are developing our own curriculum as something we used previously was not that effective... we needed a new one

We typically work with community partners for assistance in this space

Our Employment Specialist has over 20 years of HR experience. He is great at working with the clients prior to an interview, and then bringing through a mock interview if they get that...

Illustrative Concept

One Director thought the convenience of an online clearinghouse would mean she could verify escape status policy at 2AM without needing to ask questions over the phone.
Develop reentry performance measures to monitor RRC performance and develop a centralized dashboard to help improve visibility and support decision-making

The Bureau manages several reports to measure the compliance of RRCs to the SOW. By developing a centralized database and gradually changing the current evaluation approach from compliance-based to one that measures resident outcomes across specific performance measurements, the Bureau will be able to assess outputs and their impacts on improving reentry and reducing recidivism.

Collecting the data needed for this improvement will require investment, but if used effectively can provide visibility into RRC performance that impacts residents and could impact recidivism. This database could be shared by all stakeholders, including the RSD, RRMB, and Field Offices.

For effective implementation of the monitoring system the Bureau would need to…

Document a process for how the information from these performance measures will be used by stakeholders and inform decisions.

Create one database across all departments and contractors that reduce data inconsistencies and collects common data elements needed for measures.

Develop tracking system and standard operating procedures used consistently across RRCs.

Define new verification measures for validating the reported performance by RRCs.

Structure pilots with RRCs and adapt contracting structures.

In the longer term these performance measures would likely create the opportunity to...

1. Develop benchmarks for expected performance by contractors.
2. Based on benchmarks, develop contract incentives, if appropriate.
3. Increase understanding of factors that influence recidivism.
4. Create partnerships across Department of Justice and other US agencies to automate tracking and measure effectiveness of efforts.

Stakeholders use different reports and data for various purposes. These reports may be inconsistent based on specific data ranges and/or data definitions. One database would help reduce inconsistencies and provide greater clarity across documents.
The Bureau should consistently monitor two types of performance measures across all RRCs.

### Reentry Service Measures

**Description**

Key reentry measures provide data that is one step closer to measuring the impact of RRCs on reducing recidivism and can be used over time by Central Office to make decisions.

**Recommended Measures**

- **Benefits**: Percentage of residents with benefits
- **Post-Housing**: Percentage of residents released to a known housing that is not a homeless shelter
- **ID Cards**: Percentage of residents with State issued ID cards or drivers licenses
- **ID Cards Time to File**: Average length of time for residents to file for ID Cards
- **Counseling Treatment**: Percentage of residents with recommended counseling on release papers that receive treatment
- **In-Jobs**: Percentage of employed residents
- **Job Quality**: Index that is taken prior to release that includes proximity of job to housing location and cost of living-adjusted salary
- **Family Access**: If available and appropriate, percentage of time resident family is involved in reentry programming (orientation, case management, etc.)

### Operational Measures

**Description**

Tracking measures provide field offices with increased visibility across RRCs into financial management and general operations.

**Recommended Measures**

- **Bed Capacity**: Total number of beds in a facility
- **Utilization Rate**: Percentage use of beds over set time period
- **Length of Stay**: Average length of stay for residents
- **Deficiencies**: Number of monitoring deficiencies
- **Per Diem**: Total per diem allocated
- **Medical Care**: Total medical care costs
- **Subsistence Fees**: Total subsistence fees collected

Current data sources, including R3M, SENTRY, and CPARS can be used as a starting point for tracking these measures.

Sources: Bureau-provided monitoring reports (e.g., R3M, SENTRY); R3M Training
The reentry service measures can be tracked in a centralized dashboard that monitors across sector, field offices, and RRCs through drill down capabilities. This first view of the dashboard shows measures across all sectors and field offices.
The dashboard should create drilldown functionality that allows the user to view information by sector and RRM field offices within the sector.

The dashboard provides drill down capability by selecting the sector of focus and only the field offices in that sector are in the table.

The dashboard should also have functionality that allows a user to view associated RRCs by field office. Based on field office selection, associated RRCs and measures by RRC appear in the table.
A similar dashboard can be used to monitor tracking measures and aid in decision-making across field offices. The dashboard can be built with similar drill down capabilities to the Reentry Service Measures Dashboard.
Proposed recommendations have the potential to directly benefit the overall reentry model and programs and services provided to residents.

<table>
<thead>
<tr>
<th>Recommendation</th>
<th>Anticipated Benefit</th>

<tr>
<td>10. If there was one nation-wide contract for EM/GPS usage…</td>
<td>…The Bureau might experience costs savings and enhancements to overall resident accountability</td>
</tr>
<tr>
<td>11. If the Bureau established minimum requirements for RRC case managers…</td>
<td>…Residents could benefit from working with more experienced staff prior to release</td>
</tr>
<tr>
<td>12. If RRCs had methods for sharing information to address common reentry challenges and issues…</td>
<td>…RRC staff would be able to receive more applicable training and support</td>
</tr>
<tr>
<td>13. If the Bureau had specific performance measures for RRC performance in a centralized dashboard…</td>
<td>…The Bureau would be able to better measure performance, especially regarding reentry services, across all RRCs to inform decision-making</td>
</tr>
</tbody>
</table>
Implementation Plan
Implementation Plan

The last section identifies key action items for the Bureau to consider implementing during 2016 (short-term), next year (medium-term), and 2018 (longer-term) to make the 13 recommendations identified in the prior section a reality.

The implementation plans will lay out specific actions that the Bureau can begin working towards. Each action item identifies dependencies as well as key stakeholders that should be involved ranging from DOJ, to Central Office, to institutions, to other reentry stakeholders. The recommendations identified in this report will involve support and coordination from DOJ and the Bureau as well as collaboration across federal and state governments.

Pursuing these recommendations effectively will require expanding Bureau staffing resources as well as funding for key cost drivers such as reduced subsistence revenue, potential increases in per-diem payments and more. In all likelihood, the Bureau will require additional funding or the reallocation of existing funds to be able to meet these ends.
Deloitte developed a three-year implementation plan, with specific milestones that can be accomplished each year; seven can be completed in 2016.

Key Implementation Milestones

<table>
<thead>
<tr>
<th>Recommendation</th>
<th>2016</th>
<th>2017</th>
<th>2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Institutions should work with eligible inmates to secure identification documentation and submit applications for public benefits prior to RRC transfer</td>
<td>(Q2) ID is accepted valid verification type on I9 form</td>
<td>(Q2) ID strategy rolled-out</td>
<td>(Q2) ID procurement added to inmate transfer checklist</td>
</tr>
<tr>
<td>2. To improve continuity of information and care, reentry stakeholders (i.e., Institutions, RRCs, USPO) should share tools, information, and processes that follow an inmate/resident throughout the justice system</td>
<td>(Q4) Link between R3M and Insight established</td>
<td>(Q4) Link between R3M and USPO and Marshalls systems established</td>
<td>(Q4) Mandatory transfer checklist established for Institutions</td>
</tr>
<tr>
<td>3. Update language and requirements in the SOW to help reduce inconsistencies in the resident experience and provide equitable levels of access to programs and resources across RRCs</td>
<td>(Q2) Launch new SOW language to RRCs</td>
<td>(Q4) Contract changes made to at least 80% of contractor RRCs</td>
<td></td>
</tr>
<tr>
<td>4. Alleviate the burden of subsistence for all RRC residents</td>
<td>RRCs and RRMIs have and use guidelines for subsistence waivers</td>
<td>(Q2) Subsistence fees eliminated</td>
<td></td>
</tr>
<tr>
<td>5. Better position the Bureau to successfully manage and monitor contracts by increasing RRM grade, reducing workloads, and improving staff collaboration</td>
<td>(Q2) Hire staff and fill vacant positions</td>
<td>(Q2) RRM grades increased</td>
<td></td>
</tr>
<tr>
<td>6. Identify readiness measures to inform decisions at each transition point in the reentry process</td>
<td>(Q1) Inmate readiness criteria established and launched</td>
<td>(Q1) Increased PLM use with USPO</td>
<td></td>
</tr>
<tr>
<td>7. Pilot new RRC contracting and operating models to test the feasibility of government owned and/or operated RRCs</td>
<td>Approval for GOG/GOCO pilot received</td>
<td>(Q4) RFI on national umbrella approach released</td>
<td>(Q4) Open pilot GOG/GOCO RRCs</td>
</tr>
<tr>
<td>8. The Federal government should play a greater role in initial zoning and siting to help increase RRC competition</td>
<td>Contact established with HUD, DOL, and DOT</td>
<td>(Q2) National database on zoning issues created with HUD</td>
<td></td>
</tr>
<tr>
<td>9. Manage formal Federal and state-level agreements to facilitate better access to key transitional services and provide guidance to help standardize local level partnerships</td>
<td>SSA MOU Finalized</td>
<td>(Q2) RRC partnership database created</td>
<td></td>
</tr>
<tr>
<td>10. Integrate technologies that reduce workload and costs by negotiating nationwide technology contracts</td>
<td>RFI for EMGPS bid solicitations released</td>
<td></td>
<td></td>
</tr>
<tr>
<td>11. Develop minimum standards for the RRC Case Manager role and provide additional trainings for RRC staff</td>
<td>RRCs have updated minimum requirements for Case Managers</td>
<td>(Q2) New RRC training curriculum launched</td>
<td></td>
</tr>
<tr>
<td>12. Develop methods for sharing information to address common reentry challenges and issues</td>
<td>(Q1) Clearinghouse for RRCs added to R3M</td>
<td></td>
<td></td>
</tr>
<tr>
<td>13. Develop reentry performance measures to monitor RRC performance and develop a centralized dashboard to improve visibility and support decision-making</td>
<td>(Q2) Additional data fields added to PLM for tracking metrics</td>
<td>(Q4) Dashboard prototype created</td>
<td></td>
</tr>
</tbody>
</table>

| 1   | Work with DHS to have the Bureau ID included on list B of acceptable documents on I9 form | ▪ DOJ  
▪ DHS  
▪ USCIS | ▪ CIS agreeing to request to include Bureau ID on I9 form |
| 2   | Create or update Bureau policy where the Bureau would more formally help residents needing to obtain personnel documentation and benefits | ▪ DOJ  
▪ SSA  
▪ States  
▪ Central Office Contracting Section  
▪ Institutions  
▪ RRCs  
▪ Union | ▪ Budget increase approval to cover additional personnel documentation costs  
▪ Staffing support to estimate/validate number of residents in need of assistance  
▪ Bureau communication identifying residents who may need additional resources |
| 3   | Engage with Federal and State agencies to facilitate the documentation process | ▪ White House  
▪ U.S. Attorneys and Courts  
▪ USPO  
▪ SSA  
▪ States  
▪ Inmate Families | ▪ Federal and State agency willingness and bandwidth to support  
▪ Staffing support to get documents in order for all existing inmates  
▪ Training/Communications for State and Federal agencies |
1 | Institutions should work with eligible inmates to secure identification documentation and submit applications for public benefits prior to RRC transfer

<table>
<thead>
<tr>
<th>Action Items</th>
<th>2016</th>
<th>2017</th>
<th>2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Determine identification requirements for critical inmate reentry needs (e.g., employment, opening a bank account, etc.)</td>
<td>🟢</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Meet with DHS to clarify I9 list B #2 requirement to determine required Bureau ID updates for meeting critical reentry needs (short-term resolution)</td>
<td></td>
<td>🟠</td>
<td></td>
</tr>
<tr>
<td>Develop strategic communications plan to provide policy guidance around I9 update to accept Bureau ID for List B #2</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Validate the number of current inmates/residents that need permanent identification documents and/or benefits to estimate costs to the Bureau (data sources may include ISDS and/or Insight)</td>
<td>🟢</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| Conduct an analysis at the state level to determine identification/benefits costs and potential for discounted rates; identify states where legislative change may be needed to reduce costs to inmates | | 🟡 | 🟠
| Estimate the increase in administrative workload of Bureau staff and associated costs to inform request for additional budget funds or reallocation of existing funds | | | 🟢
| Work with the union to draft and update new policy for institutions outlining the identification/benefits application reimbursement policy for inmates | 🟡 | 🟡 | 🟠
| Work with union to update incentive structures for institutions in assisting residents to obtain documentation and/or apply for benefits and incorporate measures into all Bureau staff PWPs | 🟡 | 🟡 | 🟠
| Rollout institution reimbursement and incentive policy changes; define exceptions process for cases where inmates cannot obtain documents or apply for benefits prior to the transfer | 🟡 | 🟡 | 🟠
| Add document obtainment and benefits applications to transfer checklist and/or pre-release plan at the RRC | | 🟡 | 🟠
| Work with the U.S. Attorneys and Courts to obtain documents for inmates who are currently under BOP jurisdiction | 🟡 | 🟡 | 🟠
| Work with DOJ and U.S. Attorneys and Courts to develop a process where personal documentation is included with the pre-sentencing investigation report when inmates are transferred to BOP custody | 🟡 | 🟡 | 🟠
| Evaluate the current strategy for working with states to accept the Bureau ID (along with a valid birth certificate) as adequate documentation for acquiring a state-level Real ID | | 🟡 | 🟠
| Roll out Real ID strategy, focusing on larger states (e.g., Texas, Florida, New York, etc.) to have greatest potential impact on inmate population | | | 🟠

Key Milestone

Key Milestone
2 | Reentry stakeholders should share tools, information, and processes that follow an inmate/resident throughout the justice system

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. An updated and standardized IPP should serve as a reentry planning tool that follows an inmate through the justice system</td>
<td>RRCs, USPO, Sentencing Commission, Institutions</td>
<td>Contract extension with R3M providers; coordination with CIO</td>
</tr>
<tr>
<td>2. Use a common case management system capable of sharing information across reentry stakeholders</td>
<td>OIT, RRCs, USDS</td>
<td>USDS interoperability system</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Method to communicate strategy to all internal and external stakeholders</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Agreement across reentry stakeholders to support a common IPP</td>
</tr>
<tr>
<td>3. Develop a formal “transfer checklist” that is used to standardize transfer and orientation process from an institution to an RRC</td>
<td>Institutions, RRCs, OIT, Inmate families</td>
<td>Staffing support for IT updates and development</td>
</tr>
</tbody>

*Additional SOW changes in recommendation #9, #10, and #11

*Key Milestone*
### 4 | Alleviate the burden of subsistence for all RRC residents

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Improve the process of subsistence reduction and/or waiver applications and approvals</td>
<td>▪ RRMsn</td>
<td>▪ Bureau-accepted thresholds for subsistence requirements and/or waivers</td>
</tr>
<tr>
<td></td>
<td>▪ Sector Management</td>
<td></td>
</tr>
<tr>
<td></td>
<td>▪ RRCs (Case Managers, Directors, Controllers)</td>
<td></td>
</tr>
<tr>
<td>2 Implement alternative subsistence option models (or eliminate completely) and the feasibility of each</td>
<td>▪ Office of General Counsel</td>
<td>▪ Bureau approval to change the subsistence policy</td>
</tr>
<tr>
<td></td>
<td>▪ Office of Legislative Affairs</td>
<td></td>
</tr>
<tr>
<td></td>
<td>▪ DOJ</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Action Items</th>
<th>2016</th>
<th>2017</th>
<th>2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>❑ Update current policy and guidance on subsistence reductions and waivers by interviewing RRMsn and RRCs on current practices</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>❑ Define average approval time for subsistence waivers and/or reductions – identify optimal approval time based on RRM and RRC feedback and communicate guidance and timing to the field</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>❑ Update language in SOW to reflect change in policy</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>❑ Quantify the administrative burden (e.g., RRC and RRM processing time, etc.) involved with subsistence fee collection</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>❑ Move subsistence approval and tracking process to an online IT system, potentially integrated to R3M</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>❑ Identify alternative models for subsistence fees (including elimination) and validity of each (see slide 80)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>❑ Work with RRMsn, RRCs, and OGC to identify benefits and risks associated with alternative models</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>❑ Communicate overall impact of subsistence on residents’ reentry preparation and on administrative processes; present business case for eliminating subsistence</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>❑ Update language in SOW and policy guidance to reflect change and present opportunity for contract renegotiation (due to reduced RRC administrative burden)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Key Milestone

Better position the Bureau to effectively manage and monitor contracts by increasing RRM grade, reviewing workloads, and improving staff collaboration

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Conduct a workload analysis of the field offices and/or revise as needed</td>
<td>RRM, Field Offices, Human Resource Management Division, Contracting Section</td>
<td>Agreed upon workloads (contract and residents) across Central Office</td>
</tr>
<tr>
<td>2. Map the RRM position to a higher GS-grade</td>
<td>Human Resource Management Division</td>
<td>Approved budget increases to accommodate increased pay grade</td>
</tr>
<tr>
<td>3. Identify greater collaborative opportunities to involve the RRM and field office staff to work more closely with the Central Office</td>
<td>RRM, Field Offices, Information Technology Specialist</td>
<td>Technological capabilities to enhance portal platform for idea submission</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Field Office Staff interest to participate in Central Office task force</td>
</tr>
</tbody>
</table>

**Action Items**

1. Conduct an assessment of current workloads (contract and residents) handled by the Contracting Section and field office; determine appropriate target workloads
2. Adjust staffing levels based on workload analysis and agreed upon targets
3. Seek approval to increase field office manager grade (from DOJ) and request additional funds, as needed; updated RRM to appropriate grade
4. Better define career paths for RRM
5. Create a strategic communications plan to make sure staff has clear guidance on opportunities to communicate with Central Office
6. Include staff from all levels and areas (RRM, Sector) to be included in Central Office decisions and/or policy changes
7. Establish opportunities for the staff at all levels to be included in providing input into decisions and policy changes

**Key Milestone**

- **Bureau Residential Reentry Center Assessment**

Identify readiness measures to inform decisions at each transition point in the reentry process

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Develop specific criteria on optimal location based on inmate criminogenic needs and/or profile</td>
<td>Institutions, USPO, Office of Inspector General, Sentencing Commission</td>
<td>Outcome of OIG Study, Bureau decisions on priority use of RRCs</td>
</tr>
<tr>
<td>2 Provide resources and implementation plan for alternative options, begin implementing alternative paths</td>
<td>Institutions, USPO, Sentencing Commission</td>
<td>Number of preventative factors associated with inmate/resident movement</td>
</tr>
</tbody>
</table>
## Identify readiness measures to inform decisions at each transition point in the reentry process

<table>
<thead>
<tr>
<th>Action Items</th>
<th>2016</th>
<th>2017</th>
<th>2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Define goals for how best to utilize reentry resources (e.g., RRCs should serve more residents for less time vs. higher need residents for a greater amount of time)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Coordinate with OIG review audit on policies and placement of residents into RRCs/home confinement</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Develop process for identifying preferred path for a given resident as well as readiness to transition to that path; process should target both institution unit teams as well as RRC staff and Field Offices</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Develop curriculum &amp; guidance for institution unit teams, RRCs, and field offices; develop communications plan for implementing readiness-focused process</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Determine impacts to current SOWs/contracts resulting from increased number of HC residents additional reporting, etc.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Implement communications plan, trainings, and guidance for readiness based process</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Implement readiness-focused process and begin using to dictate transition decisions</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Evaluate the use of the readiness based process’s effectiveness on resources and reentrants</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Begin identifying preventative factors to going to direct to HC (no land line, no approved home, delay in sight evaluation) and other paths, and develop mitigation plans</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Implement mitigation plans for preventative factors for affected population, based on feedback from RRM and RRC staff</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Work with USPO to identify capacity and funding for wider Bureau use of FLM and formalize agreement</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Continue using USPO FLM spots</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Explore opportunities and potential mechanisms for direct Bureau supervision of home confinement</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>For population without preventative factors, begin implementing preferred path immediately after identified</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>As preventative factors are mitigated, begin sending identified residents to alternative paths</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Key Milestone

- Work with USPO to identify capacity and funding for wider Bureau use of FLM and formalize agreement
7 | Pilot new RRC contracting and operating models to test the feasibility of government owned / leased and/or operated RRCs

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
</table>
| 1 Study and evaluate pilot alternatives | - Office of Legislative Affairs  
- Administrative Division |  |
| 2 Implement pilot RRCs | - RRM  
- Unions  
- Office of General Counsel | - Congressional statutes around use of Bureau revenue  
- Funding for pilot and associated evaluation management costs |
| 3 Explore alternative contracting strategies | - Administrative Division  
- Office of General Counsel | - Staffing to validate and/or implement model |
## Pilot new RRC contracting and operating models to test the feasibility of government owned / leased and/or operated RRCs

### Action Items

<table>
<thead>
<tr>
<th>2016</th>
<th>2017</th>
<th>2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Define pilot strategy by selecting which pilot alternatives to pursue; develop desired outcomes and success factors as well as method to measure success</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Examine outcomes of Bureau-run sites in the 1970s to understand lessons learned from various model; examine FCI Taft to understand lessons learned from GOCO</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Begin working with OLA to identify statutory requirements for potential revenue generated from GOCO alternative; obtain congressional approval for revenue use (if needed)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Identify financing options for GOGO/GOCO</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Develop independent cost estimate for selected pilots and begin steps to implementation</td>
<td></td>
<td></td>
</tr>
<tr>
<td>If applicable, create position descriptions for Bureau staff in any “In House” or “GOGO” options</td>
<td></td>
<td></td>
</tr>
<tr>
<td>If applicable, craft budget request for GOGO personnel</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Identify ideal locations by considering high need areas as well as areas with historically limited competition; explore existing government owned / leased facilities for GOCO/GOGO alternatives</td>
<td></td>
<td>Relevant to 2018 if needed</td>
</tr>
<tr>
<td>Conduct site evaluation for GOGO/GOCO sites</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Acquire facilities for GOCO and GOGO options (via GSA or PPP; see Recommendation 8 for additional guidance)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Open pilot RRCs</td>
<td></td>
<td>Relevant to 2018 if needed</td>
</tr>
<tr>
<td>Set up mechanism to capture success factors and lessons learned</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Convene contracting and industry SMEs to explore possibilities of a national umbrella contract</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Create an RFI strategy around the national umbrella and release for response</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Conduct a cost analysis of a national umbrella contract based on feedback from RFI and make a go/no go determination</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
## The Federal government should play a greater role in initial zoning and siting to help increase RRC competition

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Take a proactive role in initial zoning and siting when expanding the network with additional RRCs</td>
<td>GSA, RRCs, HUD</td>
<td>Congressional Statutory requirements around Public Private Partnerships (PPP), Zoning officials</td>
</tr>
<tr>
<td>Explore strategy and funding for grant-making to improve resident experience in communities</td>
<td>Federal Government Partners: GSA, HUD, DOT, DOL, Municipal Housing Authorities</td>
<td>Congressional Statutory requirements around PPPs</td>
</tr>
</tbody>
</table>

### Action Items

- Identify initiative leads from Administrative Division and Reentry Services Division
- Review Bureau PPP statutes
- Begin working with GSA, Admin Division, and existing in-house experts to develop approach to acquiring facilities and capability to overcome zoning challenges
- Identify preferred approach to pilot (e.g., PPPs vs. GSA Acquisition/Lease)
- Work with GSA to identify areas with high potential success of government led effort
- Hold focus groups with former RRC bidders and current RRC contractors to understand competitive process and zoning barriers from their perspectives
- Hold forums in targeted communities to better understand zoning barriers; use forums to address issues and discomfort associated with RRCs/residents
- Work with HUD to create a national database on zoning issues
- Have exploratory talks with HUD, DOL, DOT for finding creative opportunities for grant incentives
- Create a communications plan to get public buy-in to grants program
- Hold forum with potential grant recipients to develop more effective grant
- Identify effective community/city incentives

### Key Milestone

- 2016
- 2017
- 2018
9 | Manage formal federal and state-level agreements to facilitate better access to key services and provide guidance to help standardize local level partnerships

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. (National Impact) Use the momentum of today’s interagency reform movement to reduce policy barriers to reentry</td>
<td>▪ Other Federal agencies, such as DHS, DOL, DOE, VA HUD, HHS, etc.</td>
<td>▪ Potential budget for pilot programs and funding for State IDs and/or birth certificates</td>
</tr>
<tr>
<td>2. (Local/RRC Impact) Standardize aspects of partnership facilitation at the local level with a focus on visibility and consistency across RRCs</td>
<td>▪ OIT ▪ Field Office Staff ▪ USDS ▪ Contracting Section</td>
<td>▪ Assistance to help inventory partners identified in monitoring reports ▪ Training around monitoring practices – including lists of partner organizations in reports ▪ Contracting section resources to update SOW language around Community Relations Board</td>
</tr>
</tbody>
</table>

<tbody>
<tr>
<td>1. Finalize Social Security Administration MOU</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. Develop / enhance relationships and work with federal agencies that have a direct impact on resident re-integration to society (e.g., DOL, DOE, VA)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. Evaluate how local RRC partnerships are currently communicated to and approved by the Bureau (e.g., linkage agreements, monitoring reports, etc.)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4. Create an RRC partnerships database generated from full and interim monitoring reports and data calls from RRCs</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>5. Add a requirement to new SOW for a private sector representative on the Community Relations Board (see recommendation #3)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>6. Identify leading partnerships and partnership strategies and communicate via online clearinghouse</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7. Determine potential to leverage national partnerships with organizations frequently used by RRCs locally</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
## Integrate technologies that are able to reduce workload and costs by negotiating nationwide technology contracts

<table>
<thead>
<tr>
<th>Sub</th>

| Work with RRCs to see if bids offer true savings and identify potential impact on per diem rates | | ❑ | |
| Update RRC SOW to require use of the nationwide contract by RRCs and roll out as part of larger SOW update (see recommendation #3) | ❑ | ❑ | ❑
| Create Bureau policy for RRCs to dictate procurement and use of monitoring equipment | ❑ | ❑ ❑ | ❑ ❑ |
| Measure savings (dollars, hours, and IT integration) gained from the contract | | | ❑ ❑ ❑ ❑ |

Key Milestone
### 11 | Develop minimum standards for the RRC Case Manager role and provide additional trainings for RRC staff

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Establish minimum background requirements for Case Managers</td>
<td>Contracting Section, RRM, RRC</td>
<td>Potential increase in funding due to increased Per Diem rates, Change in SOW language regarding required key staff background</td>
</tr>
<tr>
<td>Update the trainings and resources available for all RRC staff</td>
<td>OIT, RRM, RRC</td>
<td></td>
</tr>
</tbody>
</table>

#### Action Items

- **Research best-in-class case managers from other parts of the Bureau and related industries and assess RRM and RRC on attributes of effective case managers**
- **Identify minimum acceptable requirements for the case manager role**
- **Evaluate impact on per diem caused by raising requirements for case managers**
- **Update new SOW with new case manager requirements (see recommendation #3)**
- **Define case manager effectiveness measures, and appropriately track all RRC case managers on performance**
- **Ask RRM to identify areas for training RRC staff, based on observations and/or deficiencies identified in monitoring**
- **Conduct a data call to all RRC staff to identify training topics that may be helpful**
- **Conduct an inventory of current Bureau training that may be helpful for RRC staff (e.g. case managers who have little experience in corrections environment may want assistance there)**
- **Develop training curriculum to provide to RRC staff**
- **Pilot new training curriculum to select RRCs; make updates according to feedback received**
- **Explore grant opportunities to create a specific Case Manager certification and/or training for RRCs**

#### Key Milestone

- **2016**
- **2017**
- **2018**
## 12 | Develop methods for sharing information between RRCs to address common reentry challenges and issues

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Develop a clearinghouse for reentry-related information, Bureau guidance, and FAQs</td>
<td>OIT, RRM, RRC</td>
<td>Contract extension with R3M providers; coordination with CIO; Requires development of training and FAQ content to share with RRCs</td>
</tr>
<tr>
<td>2. Create an online forum to provide an opportunity for RRCs to share leading practices and approaches</td>
<td>OIT, RRC</td>
<td>Contract extension with R3M providers; coordination with CIO; Willingness of RRCs to participate</td>
</tr>
</tbody>
</table>

### Action Items

- Identify a team and/or point person to develop and/or monitor intranet site (internal or external); develop governance structure for updating, maintaining, and moderating site; add feature to R3M
- Conduct an inventory of all existing information assets to potentially include in clearinghouse; update content to R3M
- Develop and implement a communications strategy for Field Offices and RRCs
- Survey RRC Directors to identify desired information to include in clearinghouse and forum; update R3M accordingly
- Push all pertinent communication to clearinghouse to encourage use once launched / update forum regularly (at least weekly)
- Create analytics on site usage and performance to guide future development

### Key Milestone

- Bureau Residential Reentry Center Assessment
## Develop Reentry Performance Measures

Develop reentry performance measures to monitor RRC performance and develop a centralized dashboard to help improve visibility and support decision-making.

<table>
<thead>
<tr>
<th>Sub Recommendations</th>
<th>Key Stakeholders</th>
<th>Key Dependencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Improve performance management by developing a centralized dashboard and database for operational and reentry measures</td>
<td>OIT, USPO, RRCs</td>
<td>Data availability, Willingness to invest in data</td>
</tr>
</tbody>
</table>

### Action Items

- Validate data metrics to use and identify frequency in tracking them; build metrics into RRC monitoring reports and implement
- Add metrics into RRC compliance matrix and tracking mechanism
- Add technical changes (additional data fields) into R3M to improve metrics tracking
- Create communications plan to explain purpose/use of dashboard to key stakeholders
- Identify data-driven review process for using dashboard data
- Develop dashboard prototype, data collection method and technology to use, and database for one centralized hub
- Design process for re-evaluating measures - are they having the expected impact?
- Develop benchmarks for metrics in dashboard to define thresholds of success for each performance category (Field Offices, Sectors, RRCs, etc.) and communicate overview
- Regularly integrate dashboards/metrics into management conversations and develop trainings/guidance on data based decision making
- Re-evaluate measures and effectiveness as needed
- Examine opportunities to automate monitoring tools and systems

*Key Milestone*
Appendix
Observations draw upon site evaluations that represent a sample of RRCs nationwide

Deloitte and the Bureau worked together to identify a diverse sample of eleven RRCs, which are representative of the distribution of RRCs across Bureau regions, size, and contractor type (nonprofit, for-profit), while maximizing the number of beds represented by the selection.

**Selected RRCs represent diversification across:**

**Size**
- 6 Large (76+ beds)
- 3 Medium (40-75 beds)
- 2 Small (1-39 beds)

**Contractors**
- 2 Volunteers of America
- 2 GEO Group
- 2 Salvation Army
- 1 Dismas Charities

**Region**
- At least one from each of the Bureau’s six geographic regions

**Note: Bed Capacity based on Bureau internal “RRC Listing” documentation**
Criminogenic needs are factors associated with recidivism and represent important potential areas of focus for RRCs.

“Criminal behaviors and inability to reform to noncriminal activities.”

“Impulsive, adventurous pleasure-seeking, generalized trouble (multiple persons, multiple settings), restless aggressive, callous disregard for others.”

“Attitudes, values, beliefs, rationalizations, and a personal identity that is favorable to crime.”

“Association with pro-criminal others and relative isolation from anti-criminal others.”

“Problems with alcohol and/or drugs.”

“Low levels of involvement and satisfaction in anti-criminal leisure pursuits.”

“Low levels of performance and involvement and low levels of rewards and satisfactions.”

“Poor-quality relationships in combination with neutral expectations with regard to crime and pro-criminal expectations.”

1 Major criminogenic factors have the greatest impact on recidivism and minor criminogenic factors have slightly less impact on future criminal behavior.

A review of sample state reentry models shows variation across areas such as contract and contractor types, operations, and partnerships.

</thead>
<tbody>
<tr>
<td><strong>Facility Number and Type</strong></td>
<td>▪ New Jersey Department of Corrections – Office of Transitional Services</td>
<td>▪ Ohio Department of Rehabilitation and Corrections – Bureau of Community Sanctions</td>
<td>▪ Pennsylvania Department of Corrections and Rehabilitation</td>
</tr>
<tr>
<td></td>
<td>▪ 14 contracted Residential Community Release Programs (RCRP), including 2 Assessment and Treatment Centers (ATC)</td>
<td>▪ 12 contracted Halfway Houses (HWH), also includes Transitional Control for inmates released early on trial period (TC)</td>
<td>▪ 13 State-operated Community Corrections Centers (CCC)</td>
</tr>
<tr>
<td></td>
<td>▪ 9 contracted Community Residential Centers (CRC)</td>
<td>▪ 5 contracted Permanent Support Housing (PSH)</td>
<td>▪ 40 contracted Community Corrections Facilities (CCF)</td>
</tr>
<tr>
<td><strong>Typical Time Spent in Facility</strong></td>
<td>▪ HWH – 87 days</td>
<td>▪ TC – 113 days</td>
<td>▪ Up to 6 months</td>
</tr>
<tr>
<td></td>
<td>▪ CRC – 99 days</td>
<td>▪ PSH – 467 days</td>
<td></td>
</tr>
<tr>
<td><strong>Noteworthy Observations</strong></td>
<td>▪ Inmates screened by three separate entities prior to institution release to assess readiness (Institution Classification Committee, Office of Community Programs, ATC); these assessments are conducted by multiple different stakeholders (institution, DOC, ATC)</td>
<td>▪ Uses multiple options for transition services, most with shorter lengths of stays than current Bureau averages: - HWH provides the most programming and has the highest average per diem rate of $61.67 - TC provides opportunities for higher performing inmates with 180 days left in institution stay, these inmates reside in HWH and have additional monitoring and stipulations - Lower risk/need offenders reside in CRCs, which offer fewer programs - PSH is targeted towards offenders with a high risk of homelessnessness (e.g., offenders with mental illness, addictions, etc.), and have a lower average per diem rate of $37.38</td>
<td>▪ Moved 11 CCF contracts to incentive based*, pay for success models: - 3-year contracts with 2-year extension options, each based on a specific baseline recidivism rate depending on geography, inmate population, etc. - If contractor reduces baseline recidivism rate over 6 month period, it gets a 1% increase in reimbursement - If contractor does not reduce baseline recidivism rate for two straight periods (1 year), the contract is cancelled - State experienced a 16.4% reduction in recidivism within the first period across the 11 CCF contracts piloted</td>
</tr>
<tr>
<td></td>
<td>▪ Upon institution release, inmates are sent to an ATC for 60 days where they are provided with counseling and have personal needs assessed – they are then sent to the RCRP that most suits their needs</td>
<td></td>
<td>▪ Uses a Parole Violator Center to manage offenders who have committed non-violent, technical parole violations instead of sending them back to state prison</td>
</tr>
<tr>
<td></td>
<td>▪ There are specialized RCRPs (e.g., drug and/or alcohol abuse, etc.)</td>
<td>▪ There are specialized RCRPs (e.g., drug and/or alcohol abuse, etc.)</td>

The Canadian federal agency responsible for incarceration and rehabilitation of criminal offenders uses three different types of RRC facilities

Similar to the U.S. model, the Correctional Services Canada (CSC) uses Community Based Residential Facilities (CBRF) to aid in the offender re-entry process in Canada through intervention, programming and counseling, the provision of accommodations, and offender supervision. There are three different models, each varying in size, structure, offender profile, programs offered, and risk/needs of residents. Most seem to offer specialized plans (e.g., palliative care).

The Canadian re-entry process is similar to that of the US, in that the majority of re-entry facilities are contractor run. Government-run RRCs are more expensive and prone to more neighbourhood complaints; however, this could be a function of their location in urban downtown environments.

Thailand’s approach to reentry incorporates partnerships at the local community level to help monitor and rehabilitate offenders into society

Thailand shifted to the idea of “community justice” with its approach to offender reentry and rehabilitation. Community justice is based on the idea that crime in society should be dealt with by the community itself, and that the criminal justice system should promote a quality of life and safety in communities. Their Department of Probation (DOP) and Ministry of Justice (MOJ) work with community-led organizations and volunteers to support and provide effective monitoring for offenders.

<table>
<thead>
<tr>
<th>Community Justice Approach</th>
<th>Community Partnership Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thailand approaches the idea of community justice by building partnerships between the community and the State, creating justice at the grass roots level to develop sustainable communities.</td>
<td>In addition to 8 Halfway Houses housing 1,000 offenders, Thailand uses:</td>
</tr>
<tr>
<td>The private sector and community members work closely with criminal justice agencies in rehabilitating offenders and assisting in offender social reintegration.</td>
<td>Volunteer Probation Officers (VPO). Started in 1986, VPOs are community members who volunteer to work with Thailand’s DOP to provide probation services to offenders. They:</td>
</tr>
<tr>
<td></td>
<td>▪ Serve as a connection between the State and communities</td>
</tr>
<tr>
<td></td>
<td>▪ Communicate DOP information to the community</td>
</tr>
<tr>
<td></td>
<td>▪ Provide effective monitoring for offenders on community probation</td>
</tr>
<tr>
<td></td>
<td>▪ Consist of 15,141 VPOs working with the DOP</td>
</tr>
</tbody>
</table>

Volunteers in the Right and Liberty Protection. In 2005, the Rights and Liberties Protection Department at the MOJ recruited community members wanting to be involved in justice activities. These volunteers:

<table>
<thead>
<tr>
<th>Community Justice Approach</th>
<th>Community Partnership Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>▪ Educate communities on rights protection issues</td>
</tr>
<tr>
<td></td>
<td>▪ Provide counseling and conflict resolution services in the community</td>
</tr>
<tr>
<td></td>
<td>▪ Consist of 11,186 volunteers working with the MOJ</td>
</tr>
</tbody>
</table>

Community Justice Networks in Offender Rehabilitation. A concept started in 2003 focused on empowering local communities to be active in daily justice activities. This led to the creation of community justice centers (and members) which are used as hubs for community members to work with the MOJ. Initiative examples include:

<table>
<thead>
<tr>
<th>Community Justice Approach</th>
<th>Community Partnership Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>▪ Creating a rehabilitation project where offenders work with locals, community justice members, and VPOs to clean a vital canal</td>
</tr>
<tr>
<td></td>
<td>▪ Involving community justice members in offender pre-release programs to help create reintegration plans</td>
</tr>
<tr>
<td></td>
<td>▪ Consist of 815 community justice centers and 81,308 community justice members</td>
</tr>
</tbody>
</table>

Business Case Analysis Assumptions and Methodology for Recommendation 7 and Cost Estimation Tool

<table>
