## MOTION

California recently passed Assembly Bill 32 (A.B. 32), which prohibits anyone from “operat[ing] a private detention facility within [California]” under a contract with a governmental entity made or extended after January 1, 2020, even if extensions are authorized by the contract. Cal. Penal Code §§ 9501, 9505(a). California, of course, is free to decide that it will no longer use private detention facilities for its own state prisoners and detainees. But it cannot dictate that choice for the United States, especially in a manner that discriminates against the Federal Government and its contractors.

11  
12  
13  
14  
15  
16  
17  
18

The Constitution, numerous acts of Congress, and various implementing regulations give the United States both the prerogative and the authority to house individuals in federal custody, including in private detention facilities. Exercising that authority, the Federal Government has long contracted with private detention facilities to house federal prisoners and detainees, and it intends to continue that practice for the foreseeable future in order to address serious needs for detention space in California and elsewhere. The Federal Government must be allowed to make these policy choices without interference from the several States.

19  
20  
21  
22  
23  
24  
25  
26  
27  
28

The United States therefore seeks to enjoin the enforcement of A.B. 32 against the Federal Government and its contractors. To obtain a preliminary injunction, the moving party must establish that it is “likely to succeed on the merits,” that it is “likely to suffer irreparable harm in the absence of preliminary relief,” that “the balance of equities tips in [its] favor,” and that “an injunction is in the public interest.” *CTLA v. City of Berkeley*, 928 F.3d 832, 841 (9th Cir. 2019) (quoting *Winter v. Nat. Res. Def. Council, Inc.*, 555 U.S. 7, 20 (2008)). The Court should issue a preliminary injunction because the United States satisfies these elements, and the Court should enter a permanent injunction because no facts could change that result. The U.S. Marshals Service (USMS), Immigration and Customs Enforcement (ICE), and the Bureau of

1 Prisons (BOP) all contract with private detention facilities in California to house  
2 individuals in federal custody, and all three agencies would be imminently and  
3 irreparably harmed if A.B. 32 is allowed to impede federal operations.

4 First, A.B. 32 violates the Federal Government's intergovernmental immunity  
5 because it "regulates the United States directly" by restricting the Federal  
6 Government's contracting decisions. *North Dakota v. United States*, 495 U.S. 423, 435  
7 (1990) (plurality opinion). The Supremacy Clause forbids such state regulation  
8 because "[i]t is of the very essence of supremacy, to remove all obstacles to [the  
9 Federal Government's] action within its own sphere, and so to modify every power  
10 vested in subordinate governments, as to exempt its own operations from their own  
11 influence." *McCulloch v. Maryland*, 17 U.S. 316, 427 (1819) (Marshall, C.J.). A.B. 32  
12 flouts these foundational principles.

13 Second, A.B. 32 violates intergovernmental immunity by discriminating  
14 against the United States and its contractors. California has granted itself nine  
15 exemptions to A.B. 32 for its own private detention facilities, while simultaneously  
16 providing only three exemptions that could even facially apply to the Federal  
17 Government's private detention facilities, and that in actuality do not.

18 Third, A.B. 32 is field preempted, both by multiple dominant federal interests  
19 and by an integrated scheme of federal regulation. The United States has sovereign  
20 authority to house those in its custody, including foreign nationals, and this authority  
21 implicates the Federal Government's plenary power over foreign relations and  
22 immigration. The United States also has the sovereign prerogative to control rights  
23 and obligations under its own contracts. These dominant federal interests are  
24 manifested in a pervasive scheme of federal statutes and regulations authorizing  
25 USMS, BOP, and ICE to contract for private detention facilities, precluding any  
26 concurrent state regulation in that area.

27  
28

1 Fourth, A.B. 32 is conflict preempted because it would frustrate Congress's  
2 goal in allowing USMS, BOP, and ICE to contract for private detention facilities. It  
3 would defeat Congress's purpose in mandating that BOP house federal prisoners as  
4 close to their primary residence—including their families and communities—as  
5 possible. It would thwart Congress's purpose in allowing USMS to contract for  
6 private detention facilities as a last resort when other detention options are  
7 unavailable. And it would nullify Congress's purpose in allowing ICE to rent  
8 detention facilities as a first resort before building and operating its own facilities.

9 Each of these Supremacy Clause doctrines is independently sufficient to  
10 invalidate A.B. 32. But taken together, these doctrines leave no doubt that A.B. 32  
11 is unconstitutional. And although A.B. 32's unconstitutionality alone should suffice  
12 for a preliminary injunction, its damage goes far beyond that legal injury. As a result  
13 of this unconstitutional law, the United States and the public will suffer irreparable  
14 harm, including costly out-of-state relocation of federal prisoners and detainees,  
15 frequent and costly transport of prisoners and detainees after relocation, and  
16 obstruction of federal proceedings. These injuries could cripple federal law  
17 enforcement operations in California.

18 The United States therefore moves the Court to enjoin A.B. 32 as applied to  
19 the Federal Government and its contractors. This motion is based on the following  
20 Memorandum of Points and Authorities; the Declarations of John Sheehan (Sheehan  
21 Decl.), Pamela L. Jones (Jones Decl.), Jon Gustin (Gustin Decl.), Tae D. Johnson  
22 (Johnson Decl.), and Gregory J. Archambeault (Archambeault Decl); any oral  
23 argument that may be heard; and all pleadings and papers filed in this action.  
24  
25  
26  
27  
28

## MEMORANDUM OF POINTS AND AUTHORITIES

### BACKGROUND

#### I. Federal Use of Private Detention Facilities

“[P]ublic entities enjoyed a near monopoly in the business of incarceration” for only “a relatively brief period from about the 1940s through the 1970s.” Ahmed A. White, *Rule of Law and the Limits of Sovereignty: The Private Prison in Jurisprudential Perspective*, 38 Am. Crim. L. Rev. 111, 134 (2001). At the federal level, Congress has explicitly delegated to the Executive Branch full authority over federal prisoner and detainee housing. *See* 8 U.S.C. § 1231(g)(1) (“The [Secretary of Homeland Security] shall arrange for appropriate places of detention for aliens detained pending removal or a decision on removal.”)<sup>1</sup>; 18 U.S.C. § 4001(b)(1) (“The control and management of Federal penal and correctional institutions . . . shall be vested in the Attorney General . . .”); *id.* § 4086 (“United States marshals shall provide for the safe-keeping of any person arrested, or held under authority of any enactment of Congress pending commitment to an institution.”).

And federal agencies have long exercised this authority to contract for private detention facilities. For example, BOP’s inmate population more than doubled between 1980 and 1989 due to the Sentencing Reform Act of 1984, the proliferation of mandatory minimum sentences, and other factors. Jones Decl. ¶ 6. “Beginning in the mid-1980s, to help alleviate overcrowding caused by this rapidly expanding inmate population,” BOP began contracting with private detention facilities. *Id.* USMS faced similar pressures. Due to the drastic increase of federal prisoners in the 1980s, “Deputy U.S. Marshals were transporting prisoners further distances in order to secure the necessary additional detention space.” Sheehan Decl. ¶ 10. “In

---

<sup>1</sup> Following the Homeland Security Act of 2002, many references in the INA to the “Attorney General” are now read to mean the Secretary of Homeland Security. *See* 6 U.S.C. § 557; *Clark v. Suarez Martinez*, 543 U.S. 371, 374 n.1 (2005).

1 response to this crisis, the USMS began using private detention facilities in 1990 and  
2 secured its first private detention facility in the State of California in 2000.” *Id.*

3 Together, USMS, BOP, and ICE house about 60,000 prisoners and detainees  
4 in private detention facilities nationwide. Sheehan Decl. ¶ 11 (more than 21,000  
5 USMS inmates in private detention facilities in Fiscal Year 2019); Jones Decl. ¶ 12  
6 (“Nationwide, BOP has 17,168 inmates . . . designated to private, secure facilities.”);  
7 Gustin Decl. ¶ 9 (more than 7,800 BOP inmates in Residential Reentry Centers run  
8 by federal contractors); Johnson Decl. ¶ 11 (more than 13,100 ICE detainees in  
9 private detention facilities in Fiscal Year 2019, not including more than 12,600 ICE  
10 detainees held in private detention facilities under Intergovernmental Service  
11 Agreements). In California alone, these agencies house about 7,000 prisoners and  
12 detainees in private detention facilities. Sheehan Decl. ¶ 12 (more than 1,100 USMS  
13 prisoners housed within California in private detention facilities in Fiscal Year 2019);  
14 Jones Decl. ¶ 11 (more than 1,300 BOP inmates in privately operated detention  
15 facilities); Gustin Decl. ¶ 10 (about 900 BOP inmates in Residential Reentry Centers  
16 run by federal contractors); Johnson Decl. ¶ 13 (daily average of more than 3,700  
17 ICE detainees in private detention facilities in Fiscal Year 2019). Private detention  
18 facilities account for almost 18% of housing for all federal prisoners and detainees,  
19 and almost 25% of housing for federal prisoners and detainees in California. *See*  
20 Sheehan Decl. ¶¶ 11–12; Jones Decl. ¶¶ 11–12; Johnson Decl. ¶¶ 7, 11, 13.

21 In procuring private detention facilities, the agencies generally negotiate  
22 contracts with a base period of operations (usually spanning several years) and one  
23 or more option periods that allow the United States to unilaterally extend  
24 arrangements with the contractor for a specified period. *See* 48 C.F.R. § 17.208(f)–  
25 (g); *id.* § 52.217-8; *id.* § 52.217-9; Gustin Decl. ¶ 11. When the Federal Government  
26 exercises these option provisions, the contractor is obligated to continue its services  
27 for the duration of the option period. *See* Gustin Decl. ¶ 11.

28

1           **A. USMS Contracts in California**

2           USMS, the nation’s oldest federal law enforcement agency, is part of the U.S.  
3 Department of Justice under the supervision of the Attorney General. *See* 28 U.S.C.  
4 § 561(a); Sheehan Decl. ¶ 4. It has many critical responsibilities, including providing  
5 judicial security, apprehending fugitives, and assuring the safety of government  
6 witnesses. Sheehan Decl. ¶ 4. As relevant here, USMS is also responsible for housing  
7 and transporting federal prisoners from the time of their arrest to the time of their  
8 incarceration or acquittal. *Id.* The agency receives about 250,000 federal prisoners a  
9 year, with the responsibility to house more than 62,000 prisoners daily. *Id.*

10           All of USMS’s private detention facilities in California are located in the  
11 Southern District of California. Sheehan Decl. ¶ 13. USMS currently has contracts  
12 with two privately owned and privately operated detention facilities: Otay Mesa  
13 Detention Center and Western Region Detention Facility. *Id.* These two facilities  
14 currently house almost 1,300 inmates. *Id.* ¶¶ 14–15. The agency also uses one  
15 federally owned detention facility—El Centro Service Processing Center (El Centro  
16 SPC)—that is privately operated. *Id.* ¶ 13. This facility will house more than 500  
17 inmates. *Id.* ¶ 16.

18           USMS’s Otay Mesa and El Centro contracts are currently in their base period  
19 of operations. USMS recently awarded a contract to operate the federally owned El  
20 Centro facility. *Id.* The base period for the El Centro contract will expire in  
21 December 2021, with the contract expiring in September 2028 if all options are  
22 exercised. *Id.* USMS also houses prisoners in the Otay Mesa facility under a recently  
23 awarded ICE contract. *Id.* ¶ 15. The base period for ICE’s Otay Mesa contract will  
24 expire in December 2024, with the contract expiring in December 2034 if all options  
25 are exercised. *Id.*

26           For the Western Region contract, the United States previously exercised an  
27 option period, extending this contract beyond its base period of operation. *Id.* ¶ 14.  
28

1 The current option period for the Western Region contract will expire in September  
2 2021, with the contract expiring in September 2027 if all options are exercised. *Id.*  
3 Because USMS only pursues private detention facilities when no other available space  
4 exists, all option years are typically exercised. *Id.* ¶ 17.

5 USMS anticipates housing up to 1,800 inmates in these three Southern District  
6 of California facilities, accounting for almost 50% of USMS’s inmates in that district  
7 and nearly 30% of USMS’s inmates in California. *Id.* ¶¶ 19–20. Based on current  
8 prosecutorial trends, the detention population in California is projected to increase  
9 by about 25% by Fiscal Year 2023. *Id.* ¶ 18. USMS is currently maximizing all  
10 available facilities in California, as well as surrounding States, in order to meet the  
11 overwhelming need for detention space in California. *Id.*

#### 12 **B. BOP Contracts in California**

13 Like USMS, BOP is part of the U.S. Department of Justice under the  
14 supervision of the Attorney General. *See* 18 U.S.C. § 4041. BOP is responsible for  
15 confining federal inmates “in the controlled environments of prisons and  
16 community-based facilities that are safe, humane, cost-efficient, and appropriately  
17 secure.” Jones Decl. ¶ 5. Residential Reentry Centers (commonly called halfway  
18 houses) are one type of community-based facility used by BOP. Gustin Decl. ¶ 6.  
19 These Residential Reentry Centers—none of which is operated by BOP—provide  
20 “inmates with a safe, structured, supervised environment, as well as employment  
21 counseling, job placement, financial management assistance, drug and alcohol testing  
22 and counseling, and other programs and services as they transition back to the  
23 community.”<sup>2</sup> Gustin Decl. ¶¶ 6–7.

24 BOP uses one federally owned and privately operated detention facility in  
25 California, Taft Correctional Institution (Taft CI), which houses about 1,400 inmates.  
26

---

27 <sup>2</sup> Reentry Centers also supervise inmates on home confinement. *See* Gustin  
28 Decl. ¶¶ 6, 12–22.

1 Jones Decl. ¶¶ 9, 13. This contract will expire in March 2020. *Id.* ¶ 14. Although  
2 BOP previously considered not renewing the Taft CI contract due to infrastructure  
3 issues, BOP is currently awaiting the report from a feasibility study to determine if  
4 the facility could remain operational while repairs are made. *Id.* If Taft CI can remain  
5 operational, then BOP may seek to extend its current contract or award a new one.  
6 *Id.* BOP does not currently have plans to contract for other private prisons in  
7 California, but it is evaluating its needs and may pursue contracting for such facilities  
8 in the future. *Id.* ¶ 15.

9 BOP also has contracts with ten privately owned and privately operated  
10 Residential Reentry Centers throughout the State that house and supervise about 900  
11 BOP inmates. Gustin Decl. ¶¶ 10, 12. These Reentry Centers are located as follows:  
12 one in Riverside, one in Oakland, one in San Francisco, one in San Diego, one in  
13 Garden Grove, one in El Monte, one in Brawley, one in Van Nuys, and two in Los  
14 Angeles. *Id.* ¶¶ 12–22. The current periods for these contracts will expire in:  
15 September 2020 for the Riverside facility; February 2021 for the Oakland facility<sup>3</sup>;  
16 March 2020 for the San Francisco facility; May 2020 for the San Diego facility;  
17 August 2020 for the Garden Grove facility; September 2020 for the El Monte facility;  
18 September 2020 for the Brawley facility; September 2020 for the Van Nuys facility;  
19 and September 2020 and November 2020 for the Los Angeles facilities. *Id.* If all  
20 options are exercised, the contracts will expire in: September 2029 for the Riverside  
21 facility; January 2030 for the Oakland facility; March 2021 for the San Francisco  
22 facility; May 2021 for the San Diego facility; August 2024 for the Garden Grove  
23 facility; September 2029 for the El Monte facility; September 2029 for the Brawley  
24

---

25  
26 <sup>3</sup> Although BOP's current contract with the Oakland Reentry Center expires in  
27 January 2020, BOP executed a new contract for this facility in December 2019. The  
28 new contract has a base period of operation from February 2020 through February  
2021, with the contract expiring in January 2030 if all options are exercised. Gustin  
Decl. ¶ 14.

1 facility; September 2029 for the Van Nuys facility; and November 2023 and  
2 September 2029 for the Los Angeles facilities. *Id.* “Given BOP’s need for Residential  
3 Reentry Centers, all option years are typically exercised.” *Id.* ¶ 11.

4 BOP also recently closed one solicitation for a Reentry Center in the Eastern  
5 District of California in October 2019, and it has one open solicitation for a Reentry  
6 Center in the San Francisco area. *Id.* ¶ 24. Based on its need for Reentry Centers,  
7 BOP intends to open another solicitation for a Reentry Center in the San Diego area.  
8 *Id.* Absent A.B. 32, BOP anticipates that these three Reentry Centers would begin  
9 operations in 2021. *Id.*

10 BOP maintains capacity in Reentry Centers for use by federal courts as an  
11 intermediate sanction during supervision or probation. *Id.* ¶ 26. This function uses  
12 about 15–20% of the total Reentry Center capacity nationwide. *Id.* Although  
13 individuals housed under this arrangement are not in BOP custody, BOP maintains  
14 available beds to meet the courts’ needs. *Id.*

15 The First Step Act of 2018 also expanded BOP’s use of Reentry Centers,  
16 authorizing extended placement in Reentry Centers for inmates who have earned  
17 time credits under the risk-and-needs-assessment system.<sup>4</sup> *See* 18 U.S.C. §§ 3621,  
18 3624(g); Gustin Decl. ¶ 25. So BOP anticipates a significant increase in the need for  
19 California Reentry Centers within the next few years. Gustin Decl. ¶ 25.

### 20 **C. ICE Contracts in California**

21 As part of the Department of Homeland Security, ICE “is charged with  
22 enforcement of more than 400 federal statutes, and its mission is to protect the  
23 United States from the cross-border crime and illegal immigration that threaten  
24 national security and public safety.” Johnson Decl. ¶ 5.

25  
26  
27 <sup>4</sup> The risk-and-needs-assessment system is a tool designed to predict the  
28 likelihood of general and violent recidivism and identify needed areas of programming  
for BOP inmates. Gustin Decl. ¶ 25.

1 ICE neither constructs nor operates its own detention facilities. *Id.* ¶ 8. Due  
2 to significant fluctuations in the number and location of aliens, it is important for  
3 ICE to maintain flexibility for its detention facilities. *Id.* Otherwise, ICE could invest  
4 heavily in its own facilities only to have them stand idle if a particular area later  
5 experiences a drastic decrease in demand for detainee housing. *Id.*

6 ICE currently houses detainees in California under four contracts with the  
7 operators of four private detention facilities: Mesa Verde ICE Processing Center  
8 (owned and operated by The GEO Group, Inc.), Adelanto ICE Processing Center  
9 (owned and operated by The GEO Group, Inc.), Imperial Regional Detention  
10 Facility (owned and operated by the Management and Training Corporation), and  
11 Otay Mesa Detention Center (owned and operated by CoreCivic). *Id.* ¶¶ 15–18. Two  
12 of those contracts—executed in December 2019—additionally provide for the future  
13 housing of ICE detainees at three other private detention facilities operated by The  
14 GEO Group. *Id.* ¶¶ 15–16.

15 The base periods for all four contracts will expire in December 2024, with the  
16 contracts expiring in December 2034 if all options are exercised. *Id.* ¶¶ 15–18. The  
17 four current facilities housed an average of about 3,700 detainees per day in Fiscal  
18 Year 2019, and the three additional facilities will provide space for an additional 2,150  
19 detainees beginning in August 2020. *Id.* ¶¶ 13, 15–16.

## 20 **II. Assembly Bill 32**

21 In December 2018, when A.B. 32 was originally introduced in the California  
22 legislature, it prohibited only the California Department of Corrections and  
23 Rehabilitation from entering into a new contract, or renewing an existing contract,  
24 with a “private, for-profit prison facility located in or outside [California] to provide  
25 housing for state prison inmates.” A.B. 32, 2019–20 Cal. Leg., Reg. Sess. (Cal. 2018);  
26 *see* Cal. Penal Code § 5003.1(a). Similar to laws in other States, the bill restricted only  
27 *California itself* from contracting with “private, for-profit prison” facilities. *See* Iowa  
28

1 Code § 904.119; 730 Ill. Comp. Stat. 140/3; N.Y. Correction Law §§ 2, 121. In May  
2 2019, A.B. 32 was amended to add an exception for “facilit[ies] that [are] privately  
3 owned, but [are] leased and operated by the department,” A.B. 32, 2019–20 Cal. Leg.,  
4 Reg. Sess. (Cal. 2019); Cal. Penal Code § 5003.1(d). This addition was presumably  
5 intended to exclude the California City Correctional Center—the only facility  
6 matching that description—from A.B. 32’s ambit.<sup>5</sup> Later, A.B. 32 was amended again  
7 to add an exception to allow the Department of Corrections and Rehabilitation “to  
8 comply with the requirements of any court-ordered population cap.” Cal. Penal  
9 Code § 5003.1(e).

10 It was not until June 2019, six months after introduction of A.B. 32, that the  
11 bill was revised to restrict *civil* detention facilities, notably including the Federal  
12 Government’s immigration-related detention facilities. *See* A.B. 32, 2019–20 Cal.  
13 Leg., Reg. Sess. (Cal. 2019). This was purposeful. *See* Senate Judiciary Committee,  
14 A.B. 32, 2019–20 Cal. Leg., Reg. Sess. (Cal. 2019) (noting that the amendment  
15 “expands the scope of the bill to . . . includ[e] facilities used for immigration  
16 detention” and that “[i]t’s clearly not enough to focus our legislation solely on  
17 criminal detention facilities”). California’s Senate Judiciary Committee even provided  
18 a five-page legal analysis, explaining that “[t]he Federal Government will likely  
19 challenge AB 32 by arguing that AB 32 is preempted by federal immigration law” and  
20 “that AB 32 violates the Intergovernmental Immunity Doctrine.” *Id.* And when  
21 Governor Newsom signed A.B. 32 into law, he touted the enactment as “phas[ing]

22  
23  
24  
25 <sup>5</sup> *See* California Department of Corrections and Rehabilitation, California City  
26 Correctional Center, <https://www.cdcr.ca.gov/facility-locator/cac/> (last visited  
27 February 5, 2020) (stating that the California City Correctional Center “is owned by  
28 CoreCivic, leased, staffed and operated under the authority of the California  
Department of Corrections and Rehabilitation”).

1 out the use of all private, for-profit prisons, including both prisons and immigration  
2 detention facilities, in California.”<sup>6</sup>

3 At the same time it expanded A.B. 32 to reach the United States’ civil  
4 immigration-related facilities, California also added various exceptions that removed  
5 its *own* private, civil detention facilities from A.B. 32’s prohibition on private  
6 detention. *See* A.B. 32, 2019–20 Cal. Leg., Reg. Sess. (Cal. 2019). Five of these  
7 exceptions apply only to California’s own contracts and are facially inapplicable to  
8 the Federal Government’s contracts: an exception for facilities “providing  
9 rehabilitative, counseling, treatment, mental health, educational, or medical services  
10 to a juvenile that is under the jurisdiction of the juvenile court pursuant to [California  
11 law]”; an exception for facilities “providing evaluation or treatment services to a  
12 person who has been detained, or is subject to an order of commitment by a court,  
13 pursuant to [California law]”; an exception for “residential care facilit[ies] licensed  
14 pursuant to [California law]”; an exception for facilities “used for the quarantine or  
15 isolation of persons for public health reasons pursuant to [California law]”; and an  
16 exception for facilities “used for the temporary detention of a person detained or  
17 arrested by a merchant, private security guard, or other private person pursuant to  
18 [California law].” Cal. Penal Code § 9502(a)–(b), (d), (f)–(g).

19 Only three exceptions conceivably apply to contracts of both California *and* the  
20 Federal Government: an exception for facilities “providing educational, vocational,  
21 medical, or other ancillary services to an inmate in the custody of, and under the  
22 direct supervision of, the Department of Corrections and Rehabilitation or a county  
23 sheriff or other law enforcement agency”; an exception for school facilities “used for  
24 the disciplinary detention of a pupil”; and an exception for “any privately owned  
25

---

26 <sup>6</sup> *See* Office of the Governor, *Governor Newsom Signs AB 32 to Halt Private, For-*  
27 *Profit Prisons and Immigration Detention Facilities in California*,  
28 <https://www.gov.ca.gov/2019/10/11/governor-newsom-signs-ab-32-to-halt-private-for-profit-prisons-and-immigration-detention-facilities-in-california/>.

1 property or facility that is leased and operated by the Department of Corrections and  
2 Rehabilitation or a county sheriff or other law enforcement agency.” Cal. Penal Code  
3 § 9502(c), (e); § 9503.

4 Absent an enumerated exception, A.B. 32 prohibits *anyone* from “operat[ing] a  
5 private detention facility within [California]” under a contract made or extended after  
6 January 1, 2020, even if extensions are authorized by the contract.<sup>7</sup> *Id.* §§ 9501,  
7 9505(a). The law broadly defines “detention facility” as “any facility in which persons  
8 are incarcerated or otherwise involuntarily confined for purposes of execution of a  
9 punitive sentence imposed by a court or detention pending a trial, hearing, or other  
10 judicial or administrative proceeding.” *Id.* § 9500(a). And it defines “private  
11 detention facility” as a “detention facility that is operated by a private,  
12 nongovernmental, for-profit entity, and operating pursuant to a contract or  
13 agreement with a governmental entity.” *Id.* § 9500(b). These broad definitions sweep  
14 in both the Federal Government’s civil immigration-related detention facilities *and*  
15 the private detention facilities used by USMS and BOP to house federal prisoners.

## 16 LEGAL STANDARDS

17 To obtain a preliminary injunction, the moving party must establish that it is  
18 “likely to succeed on the merits,” that it is “likely to suffer irreparable harm in the  
19 absence of preliminary relief,” that “the balance of equities tips in [its] favor,”  
20 and that “an injunction is in the public interest.” *CTLA*, 928 F.3d at 841 (quoting  
21 *Winter*, 555 U.S. at 20). Generally, where the United States has demonstrated a  
22 likelihood of success on the merits of a Supremacy Clause claim, the other factors  
23 similarly favor an injunction. *See, e.g. Valle del Sol Inc. v. Whiting*, 732 F.3d 1006, 1029  
24 (9th Cir. 2013); *United States v. Arizona*, 641 F.3d 339, 366 (9th Cir. 2011), *aff’d in part*,  
25 *rev’d in part*, 567 U.S. 387 (2012).

26  
27 <sup>7</sup> For purposes of this motion, the United States assumes, but does not concede,  
28 that option periods are considered extensions within the meaning of A.B. 32.

## ARGUMENT

### I. THE UNITED STATES IS LIKELY TO SUCCEED ON THE MERITS

#### A. A.B. 32 Violates Intergovernmental Immunity by Regulating the United States' Contracts and Operations.

By attempting to eliminate one category of contracts (and contractors) for the Federal Government, California has violated the Supremacy Clause. Under the doctrine of intergovernmental immunity, “activities of the Federal Government are free from regulation by any state.” *Mayo v. United States*, 319 U.S. 441, 445 (1943); *Arizona v. Bowsher*, 935 F.2d 332, 334 (D.C. Cir. 1991) (“[T]he states may not directly regulate the Federal Government’s operations or property.”). This foundational principle means that California cannot regulate, much less abolish, the United States’ contracts for private detention facilities.

As the Supreme Court explained long ago, “[t]he sovereignty of a state extends to everything which exists by its own authority, or is introduced by its permission,” but it does not “extend to those means which are employed by congress to carry into execution powers conferred on that body by the people of the United States[.]” *McCulloch*, 17 U.S. at 429. That is why the Supreme Court has, for centuries, distinguished between *property* of the Federal Government’s contractors—which States may regulate on equal terms as other property—and *operations* of the Federal Government and its contractors—which States cannot regulate at all.<sup>8</sup> *Weston v. City Council of Charleston*, 27 U.S. 449, 469 (1829) (Marshall, C.J.) (holding that although “property acquired by [the bank of the United States] in a state was supposed to be placed in the same condition with property acquired by an individual,” a “tax on government stock is thought by this Court to be a tax on the contract . . . and

---

<sup>8</sup> Although many intergovernmental-immunity cases concern state taxation, “the principles of the intergovernmental tax immunity doctrine apply to the general intergovernmental immunity doctrine.” *United States v. California*, 921 F.3d 865, 883 (9th Cir. 2019).

1 consequently to be repugnant to the constitution”); *Osborn v. Bank of U.S.*, 22 U.S.  
2 738, 866–67 (1824) (Marshall, C.J.) (“It is true, that the property of the contractor  
3 may be taxed, as the property of other citizens; and so may the local property of the  
4 Bank. But we do not admit that the act of purchasing, or of conveying the articles  
5 purchased, can be under State control.”).<sup>9</sup>

6 This well-settled principle has been consistently applied to invalidate state laws  
7 that impose requirements on federal contractors.<sup>10</sup> In *Leslie Miller, Inc. v. Arkansas*,  
8 352 U.S. 187, 189–90 (1956) (per curiam), and *Gartrell Construction Inc. v. Aubry*, 940  
9 F.2d 437, 441 (9th Cir. 1991), States sought to prevent the Federal Government from  
10 entering into agreements with its chosen contractors until the States’ own licensing  
11 standards were satisfied. The Supreme Court and the Ninth Circuit, respectively,  
12 struck down these state laws because they “evinced [S]tates’ active frustration of the  
13 Federal Government’s ability to discharge its operations.” *United States v. California*,  
14 921 F.3d 865, 885 (9th Cir. 2019).<sup>11</sup> Similarly, in *Boeing Co. v. Movassaghi*, 768 F.3d  
15

---

16 <sup>9</sup> See also *United States v. Fresno Cty.*, 429 U.S. 452, 462 (1977) (canvassing prior  
17 cases and explaining that “a State may, in effect, raise revenues on the basis of property  
18 owned by the United States” if the property “is being used by a private citizen or  
19 corporation” and the tax is nondiscriminatory); *James v. Dravo Contracting Co.*, 302 U.S.  
20 134, 155 (1937) (quoting *Union Pac. R. Co. v. Peniston*, 85 U.S. 5, 41 (1873)) (explaining  
21 that “so long as [a federal contractor’s] contract and its execution are not interfered  
22 with,” “[h]ow much he may be taxed by, or what duties he may be obliged to perform  
23 towards[] his State is of no consequence to the [federal] government”); *Union Pac. R.  
24 Co. v. Peniston*, 85 U.S. 36–37 (1873) (recognizing the “distinction, so clearly drawn in  
25 the earlier [Supreme Court] decisions, between a tax on the property of a governmental  
26 agent, and a tax upon the action of such agent,” and explaining that “[a] tax upon their  
27 operations is a direct obstruction to the exercise of Federal powers”).

28 <sup>10</sup> As the Ninth Circuit has observed, “[f]or purposes of intergovernmental  
immunity, federal contractors are treated the same as the Federal Government itself.”  
*California*, 921 F.3d at 882 n.7 (citations omitted); see *North Dakota v. United States*, 495  
U.S. 423, 438 (1990) (plurality opinion) (“[A] regulation imposed on one who deals  
with the Government has as much potential to obstruct governmental functions as a  
regulation imposed on the Government itself.”).

<sup>11</sup> See also *Augustine v. Dep’t of Veterans Affairs*, 429 F.3d 1334, 1340 (Fed. Cir.  
2005) (holding that “California has no authority to require that attorneys practicing  
before the [Merits Systems Protection] Board obtain a state license or to regulate the  
award of fees for work before federal agencies”); *United States v. Virginia*, 139 F.3d 984,

1 832 (9th Cir. 2014), California attempted to impose more stringent environmental-  
2 cleanup standards on a federal contractor than those imposed on the contractor by  
3 the federal Department of Energy. *Id.* at 834–37. The Ninth Circuit rejected the  
4 State’s effort, holding that California violated intergovernmental immunity by  
5 “overrid[ing] federal decisions as to necessary decontamination measures” and  
6 “regulat[ing] not only the federal contractor but the effective terms of federal  
7 contract itself.” *Id.* at 840; *see also California*, 921 F.3d at 880 (noting that  
8 intergovernmental immunity is implicated when state laws “directly or indirectly  
9 affect[] the operation of a federal program or contract”).

10 A.B. 32 goes much further than the state laws invalidated in those cases. Rather  
11 than placing certain requirements on the United States’ chosen contractors, A.B. 32  
12 bans the United States’ chosen contractors *altogether*; it prevents the Federal  
13 Government from employing private companies to house federal prisoners and  
14 detainees when its current contracts expire. But if a State cannot enforce “license  
15 requirements [that] would give the State’s licensing board a virtual power of review  
16 over the federal determination,” *Leslie Miller*, 352 U.S. at 190, or “mandate[] the ways  
17 in which [a federal contractor] renders services that the Federal Government hired  
18 [the contractor] to perform,” *Boeing*, 768 F.3d at 840, then California certainly cannot  
19 surpass those measures and eradicate federal contractors altogether.

20 A.B. 32’s constitutional infirmity is most obvious when the United States *owns*  
21 a detention facility and contracts with a private company to *operate* the facility, as with  
22 El Centro SPC and Taft CI. *See* Sheehan Decl. ¶ 13; Jones Decl. ¶ 13. A.B. 32 bars  
23 even this arrangement. *See* Cal. Penal Code § 9500(b) (defining “Private detention  
24

25 \_\_\_\_\_  
26 987–88 (4th Cir. 1998) (holding that the Virginia Criminal Justice Services Board could  
27 not require private investigators under contract with the FBI to obtain state private  
28 investigator licenses); *Taylor v. United States*, 821 F.2d 1428, 1431–32 (9th Cir. 1987)  
(noting that California could not require an army hospital or its health care providers  
to be licensed under state law).

1 facility” as “a detention facility that is *operated* by a private, nongovernmental, for-  
2 profit entity” (emphasis added); *id.* § 9503 (exempting “*privately owned* property . . .  
3 that is *leased and operated*” by a law enforcement agency (emphasis added)). But the  
4 United States has constitutional control of its own property. U.S. Const., art. IV, § 3,  
5 cl. 2 (“Congress shall have the Power to dispose of and make all needful Rules and  
6 Regulations respecting . . . Property belonging to the United States.”). So it is  
7 difficult to imagine a more straightforward violation of the Constitution than a State  
8 attempting to dictate allowable personnel and activities in federally owned facilities.  
9 *Goodyear Atomic Corp. v. Miller*, 486 U.S. 174, 181 (1988) (“[A] federally owned facility  
10 performing a federal function is shielded from direct state regulation, even though  
11 the federal function is carried out by a private contractor, unless Congress clearly  
12 authorizes such regulation.”).

13 It makes no difference that A.B. 32 does not expressly mention the Federal  
14 Government. *See United States v. California*, 2018 WL 5780003, at \*4 (E.D. Cal. Nov.  
15 1, 2018) (explaining that a state law “may not expressly name the Federal  
16 Government as its intended object of regulation, but that does not mean the law does  
17 not directly regulate the United States”). Nor does it matter that California restricts  
18 both its own ability to contract with private detention facilities and the United States’  
19 ability to do so. Indeed, “no matter how reasonable, or how universal and  
20 undiscriminating, the State’s inability to interfere [with federal operations] has been  
21 regarded as established since [1819].”<sup>12</sup> *Johnson v. Maryland*, 254 U.S. 51, 55–56 (1920)  
22 (Holmes, J.) (citing *McCulloch*, 17 U.S. 316). “[E]ven the most unquestionable and  
23 most universally applicable of state laws . . . will not be allowed to control the  
24  
25

26  
27 <sup>12</sup> As explained below, A.B. 32 is far from “universal and undiscriminating” and  
28 it also violates intergovernmental immunity by discriminating against the United States  
and its contractors.

1 conduct of” individuals “acting under and in pursuance of the laws of the United  
2 States.” *Id.* at 56–57.

3 If States could regulate—or outright ban—certain contracts with the United  
4 States, the Federal Government would grind to a halt. Chief Justice Marshall  
5 recognized, and dismissed, this notion almost two centuries ago:

6 Can a contractor for supplying a military post with provisions,  
7 be restrained from making purchases within any State, or from  
8 transporting the provisions to the place at which the troops were  
9 stationed? or could he be fined or taxed for doing so? We have  
not yet heard these questions answered in the affirmative.

10 *Osborn*, 22 U.S. at 867. Modern examples only further demonstrate this absurdity.  
11 Could a State thwart Department of Defense contracts (and national security) by  
12 prohibiting any person from manufacturing fighter jets, missiles, and submarines  
13 under a contract with the Federal Government? Could a State hamper contracts (and  
14 critical research) of the Environmental Protection Agency and the Department of  
15 Health and Human Services by forbidding any person from operating a research  
16 laboratory under a contract with the Federal Government? Surely not. Federal  
17 powers “are given by the people of the United States, to a government whose laws,  
18 made in pursuance of the constitution, are declared to be supreme,” and “the people  
19 of a single state cannot confer a sovereignty which will extend over them.” *McCulloch*,  
20 17 U.S. at 429.

21 A.B. 32 contravenes bedrock principles of our constitutional system. California  
22 can freely decide that it will no longer use private detention facilities for its own  
23 prisoners and detainees. But it cannot unilaterally apply its policy preference to the  
24 United States because “a concurrent power in the [S]tates” to regulate federal  
25 operations “would bring back all the evils and embarrassments, which the uniform  
26 rule of the [C]onstitution was designed to remedy.” 2 J. Story, COMMENTARIES ON  
27 THE CONSTITUTION § 1099 (3d ed. 1858).

28

1           **B. A.B. 32 Violates Intergovernmental Immunity by Discriminating**  
2           **Against the Federal Government and its Contractors.**

3           A.B. 32 also violates intergovernmental immunity because it discriminates  
4 against the United States and its contractors. State laws are invalid if they  
5 “discriminate against the Federal Government or those with whom it deals.”  
6 *California*, 921 F.3d at 878 (citations and alterations omitted) (quoting *Boeing*, 768 F.3d  
7 at 839). This “nondiscrimination rule prevents states from meddling with Federal  
8 Government activities indirectly by singling out for regulation those who deal with  
9 the government.” *In re Nat’l Sec. Agency Telecomm. Records Litig.*, 633 F. Supp. 2d 892,  
10 903 (N.D. Cal. 2007). Intergovernmental immunity is therefore violated when a State  
11 “treats someone else better than it treats” the United States or its contractors.  
12 *Washington v. United States*, 460 U.S. at 544–45. With A.B. 32, California has done  
13 exactly that.

14           Most prominently, California carved out an exception in A.B. 32 that allows  
15 the State to “renew or extend a contract with a private, for-profit prison facility to  
16 provide housing for state prison inmates in order to comply with the requirements  
17 of any court-ordered population cap.” Cal. Penal Code § 5003.1(e). But no  
18 comparable exception exists for the Federal Government to cope with overcrowding  
19 in *its* facilities under a court order or otherwise. This presents a serious problem, as  
20 A.B. 32 may cause overcrowding in federal facilities both in California and  
21 neighboring States. Sheehan Decl. ¶ 22; Jones Decl. ¶ 19; Archambeault ¶ 14. So by  
22 allowing only itself—not the Federal Government—to combat overcrowding by  
23 contracting with private detention facilities, California has plainly “treat[ed] someone  
24 else better than it treats” the United States and its contractors. *Washington*, 460 U.S.  
25 at 544–45.

26           California’s discrimination does not stop with criminal detention. During the  
27 legislative process, California simultaneously expanded A.B. 32 to prohibit *all* private  
28

1 detention facilities—including those under contract with the United States—while  
2 exempting the State’s own private, civil detention facilities from A.B. 32’s  
3 prohibition. *See* A.B. 32, 2019–20 Cal. Leg., Reg. Sess. (Cal. 2019). In doing so,  
4 California added five exceptions that apply to its own contracts but are facially  
5 inapplicable to the Federal Government’s contracts: facilities “providing  
6 rehabilitative, counseling, treatment, mental health, educational, or medical services  
7 to a juvenile that is under the jurisdiction of the juvenile court pursuant to [California  
8 law]”; facilities “providing evaluation or treatment services to a person who has been  
9 detained, or is subject to an order of commitment by a court, pursuant to [California  
10 law]”; “residential care facilit[ies] licensed pursuant to [California law]”; facilities  
11 “used for the quarantine or isolation of persons for public health reasons pursuant  
12 to [California law]”; and facilities “used for the temporary detention of a person  
13 detained or arrested by a merchant, private security guard, or other private person  
14 pursuant to [California law].” Cal. Penal Code § 9502(a)–(b), (d), (f)–(g). Only three  
15 exceptions potentially apply to contracts of both the United States *and* California:  
16 facilities “providing educational, vocational, medical, or other ancillary services to an  
17 inmate in the custody of, and under the direct supervision of, the Department of  
18 Corrections and Rehabilitation or a county sheriff or other law enforcement agency”;  
19 school facilities “used for the disciplinary detention of a pupil”; and “any privately  
20 owned property or facility that is leased and operated by the Department of  
21 Corrections and Rehabilitation or a county sheriff or other law enforcement agency.”  
22 *Id.* § 9502(c), (e); § 9503.

23 Of the nine exceptions in A.B. 32, California can (and likely will) use all nine to  
24 continue contracting with private detention facilities, while the Federal Government  
25 can conceivably apply only three. This alone should invalidate A.B. 32. *Washington*,  
26 460 U.S. at 544–45 (explaining that a State violates intergovernmental immunity  
27  
28

1 when it “treats someone else better than it treats” the United States or its  
2 contractors).

3 And of the three exceptions that might conceivably apply to the United States’  
4 contracts, the Federal Government cannot currently use any of them. The Federal  
5 Government does not contract, and has never contracted, with “school facilit[ies]  
6 used for the disciplinary detention of a pupil” in California. Cal. Penal Code  
7 § 9502(e); Sheehan Decl. ¶ 30; Jones Decl. ¶ 9; Johnson Decl. ¶ 19. Nor does any  
8 federal law enforcement agency “lease[] and operate[]” a detention facility in  
9 California that is “privately owned.” Cal. Penal Code § 9503; Sheehan ¶ 30; Jones  
10 Decl. ¶ 9; Johnson Decl. ¶ 19. In fact, the only facility in the State that would  
11 currently meet this exception is the California City Correctional Center, which is  
12 owned by a private company and conveniently “leased and operated” by the  
13 California Department of Corrections and Rehabilitation.<sup>13</sup>

14 The Federal Government also does not contract for facilities in California  
15 “providing educational, vocational, medical, or other ancillary services to an inmate  
16 in the custody of, and under the direct supervision of” a federal “law enforcement  
17 agency.” Cal. Penal Code § 9502(c); Sheehan Decl. ¶ 30; Johnson Decl. ¶ 19. The  
18 Reentry Centers used by BOP come closest to meeting this exception. But although  
19 the Reentry Centers provide employment counseling, job placement, financial  
20 management assistance, and other programs to inmates nearing release, they are not  
21 exempted from A.B. 32, because inmates in Reentry Centers are not “in the custody  
22 of, and under the direct supervision of” BOP. Gustin Decl. ¶ 7 (“Residential Reentry  
23  
24

---

25 <sup>13</sup> See California Department of Corrections and Rehabilitation, California City  
26 Correctional Center, <https://www.cdcr.ca.gov/facility-locator/cac/> (last visited  
27 February 5, 2020) (stating that the California City Correctional Center “is owned by  
28 CoreCivic, leased, staffed and operated under the authority of the California  
Department of Corrections and Rehabilitation”).

1 Centers are staffed and managed by contractor employees.”). The only facilities in  
2 the State that would seemingly meet this exception are in California’s Alternative  
3 Custody Program (roughly equivalent to the Reentry Centers used by BOP), which  
4 are directly operated by the California Department of Corrections and  
5 Rehabilitation.<sup>14</sup>

6 The result is a statutory scheme where nearly all of California’s contracts for  
7 private, civil detention facilities (and its contracts for private prisons needed to  
8 address overcrowding) are permitted, while the Federal Government’s contracts for  
9 private detention facilities are not. Intergovernmental immunity precludes this result.  
10 *See North Dakota*, 495 U.S. at 438 (citing *Washington*, 460 U.S. at 544–45).

11 **C. A.B. 32 is Field Preempted.**

12 A.B. 32 is field preempted because Congress has occupied the field of  
13 contracting for federal prisoner and detainee housing. Field preemption occurs  
14 where “Congress, acting within its proper authority, has determined” that a field  
15 “must be regulated by its exclusive governance.” *Arizona v. United States*, 567 U.S.  
16 387, 399 (2012); *Knox v. Brnovich*, 907 F.3d 1167, 1174 (9th Cir. 2018). Congress’s  
17 “intent to displace state law altogether can be inferred” from a “federal interest so  
18 dominant that the federal system will be assumed to preclude enforcement of state  
19 laws on the same subject,” or where there is “a framework of regulation so pervasive  
20 that Congress left no room for the States to supplement it.” *Arizona*, 567 U.S. at 399  
21 (citations omitted); *Valle del Sol Inc.*, 732 F.3d at 1022. Both iterations of field  
22 preemption are satisfied here.

23  
24  
25  
26 <sup>14</sup> *See* California Department of Corrections and Rehabilitation, Alternative  
27 Custody Program, <https://www.cdcr.ca.gov/adult-operations/acp/> (last visited  
28 February 5, 2020) (“ACP participants remain under the jurisdiction of the California  
Department of Corrections and Rehabilitation (CDCR) and are supervised by parole  
agents while in the community.”).

1                   **1. Multiple dominant federal interests preclude state**  
2                   **regulation of contracts for federal prisoner and detainee**  
3                   **housing.**

4                   At least three dominant federal interests preclude A.B. 32: (1) the Federal  
5                   Government’s prerogative to provide for those in its custody, (2) the federal power  
6                   over foreign relations and immigration, and (3) the United States’ authority to control  
7                   rights and obligations under its contracts.

8                   Most straightforwardly, federal prisoners and detainees are held by the United  
9                   States only because they have violated (or may have violated) federal law, so the  
10                  Federal Government has both the unquestionable power and the unflinching  
11                  obligation to house those in its custody. *See* 18 U.S.C. § 4001(a) (“No citizen shall  
12                  be imprisoned or otherwise detained by the United States except pursuant to an Act  
13                  of Congress.”); *id.* § 4086 (“United States marshals shall provide for the safe-keeping  
14                  of any person arrested, or held under authority of any enactment of Congress  
15                  pending commitment to an institution.”); *United States v. Comstock*, 560 U.S. 126, 137  
16                  (2010) (explaining that Congress “possesses broad authority” to “criminalize  
17                  conduct,” to “imprison individuals who engage in that conduct,” and to “enact laws  
18                  governing prisons and prisoners”). Congress has not only recognized this  
19                  responsibility, but has explicitly delegated it to the Executive Branch. *See* 8 U.S.C.  
20                  § 1231(g)(1); 18 U.S.C. §§ 3621(b), 4001(b)(1), 4086. Allowing States to regulate in  
21                  this field would impermissibly encroach on the United States’ sovereign prerogative  
22                  to house *its own* prisoners and detainees—here, by nullifying the Executive Branch’s  
23                  decision to use a congressionally authorized housing option.

24                  This is particularly troubling because the Federal Government maintains  
25                  custody of its own citizens as well as foreign nationals, implicating the United States’  
26                  foreign-relations and immigration powers. “The federal power to determine  
27                  immigration policy is well settled. Immigration policy can affect trade, investment,  
28                  tourism, and diplomatic relations for the entire Nation, as well as the perceptions and

1 expectations of aliens in this country who seek the full protection of its laws.”  
2 *Arizona*, 567 U.S. at 395. The Supreme Court has described it as “fundamental” that  
3 “foreign countries concerned about the *status, safety, and security* of their nationals in  
4 the United States must be able to confer and communicate on this subject with one  
5 national sovereign, not the 50 separate States.” *Id.* (emphasis added). The Federal  
6 Government can neither adequately control the safety and security of aliens in its  
7 custody, nor communicate effectively with foreign countries as “one national  
8 sovereign,” if States like California are allowed to dictate how and where the United  
9 States may house such individuals.

10 Indeed, this would contravene the Supreme Court’s repeated admonition that  
11 “the regulation of aliens is so intimately blended and intertwined with responsibilities  
12 of the national government that where it acts, and the [S]tate also acts on the same  
13 subject,” the state law must give way. *Hines v. Davidowitz*, 312 U.S. 52, 62 (1941); *see*  
14 *Arizona*, 567 U.S. at 401 (concluding that the Federal Government “has occupied  
15 the field of alien registration”); *Hillsborough Cty., Fla. v. Automated Med. Labs., Inc.*, 471  
16 U.S. 707, 719 (1985) (recognizing “the dominance of the federal interest” in  
17 immigration and foreign affairs as the paradigmatic example of field preemption);  
18 *Takahashi v. Fish & Game Comm’n*, 334 U.S. 410, 419 (1948) (acknowledging that  
19 States “can neither add to nor take from the conditions lawfully imposed by Congress  
20 upon admission, naturalization *and residence* of aliens in the United States or the several  
21 states” (emphasis added)). This dominant federal interest applies doubly to A.B. 32  
22 because the United States is not merely regulating foreign nationals on American soil,  
23 but is regulating the detention of aliens in federal custody—a vital part of the  
24 deportation process. *See Demore v. Kim*, 538 U.S. 510, 523 (2003) (explaining that  
25 Congress’s “considerable authority over immigration matters” includes the “power  
26 to detain aliens in connection with removal”).  
27  
28

1           A.B. 32 also interferes with (in fact, eliminates) the United States’ sovereign  
2 authority to control obligations to and rights of the United States under its contracts  
3 for federal prisoner and detainee housing. As “an incident to the general right of  
4 sovereignty,” the United States has inherent authority to “enter into contracts not  
5 prohibited by law[] and appropriate to the just exercise of [its] powers.” *United States*  
6 *v. Tingey*, 30 U.S. 115, 128 (1831). The Supreme Court has unequivocally held that  
7 “obligations to and rights of the United States under its contracts are governed  
8 exclusively by federal law,” because they involve “uniquely federal interests.” *Boyle v.*  
9 *United Techs. Corp.*, 487 U.S. 500, 504 (1988); *Perkins v. Lukens Steel Co.*, 310 U.S. 113,  
10 127 (1940) (“[T]he Government enjoys the unrestricted power to . . . determine those  
11 with whom it will deal, and to fix the terms and conditions upon which it will make  
12 needed purchases.”); *see also Buckman Co. v. Plaintiffs’ Legal Comm.*, 531 U.S. 341, 347  
13 (2001) (“[T]he relationship between a federal agency and the entity it regulates is  
14 inherently federal in character because the relationship originates from, is governed  
15 by, and terminates according to federal law.”). And where, as here, “the federal  
16 interest requires a uniform rule, the entire body of state law applicable to the area”  
17 should be preempted. *Boyle*, 487 U.S. at 507–08; *see, e.g., Clearfield Tr. Co. v. United*  
18 *States*, 318 U.S. 363, 366 (1943) (rights and obligations of the United States with  
19 respect to commercial paper must be governed by uniform federal rule). Were it  
20 otherwise, States like California could supplement or eliminate contractual terms  
21 negotiated between the national sovereign and a federal contractor executing  
22 sovereign prerogatives.

23           Individually or combined, these dominant federal interests preempt the field of  
24 contracts for federal prisoner and detainee housing.

25  
26  
27  
28

1                   **2. Congress enacted a framework of regulation so pervasive**  
2                   **as to preclude state regulation of contracts for federal**  
3                   **prisoner and detainee housing.**

4           A.B. 32 is also field preempted because there is “a framework of regulation so  
5 pervasive that Congress left no room for the States to supplement it.” *Arizona*, 567  
6 U.S. at 399. This framework precludes state regulation of contracts for federal  
7 prisoner and detainee housing.

8           To begin, Congress has explicitly delegated to the Executive Branch full  
9 authority over federal prisoner and detainee housing. *See* 8 U.S.C. § 1231(g)(1) (“The  
10 [Secretary of Homeland Security] shall arrange for appropriate places of detention  
11 for aliens detained pending removal or a decision on removal.”); 18 U.S.C.  
12 § 4001(b)(1) (“The control and management of Federal penal and correctional  
13 institutions . . . shall be vested in the Attorney General . . . .”); *id.* § 3621(b) (“The  
14 Bureau of Prisons shall designate the place of the prisoner’s imprisonment.”); *id.*  
15 § 4086 (“United States marshals shall provide for the safe-keeping of any person  
16 arrested, or held under authority of any enactment of Congress pending commitment  
17 to an institution.”); 28 C.F.R. § 0.111(k) (delegating to USMS responsibility for the  
18 “[s]ustention of custody of Federal prisoners from the time of their arrest . . . until  
19 the prisoner is” ordered to serve a sentence, released from custody, or “returned to  
20 the custody of the U.S. Parole Commission or the [BOP]”). And expenses for federal  
21 detention are paid out of the U.S. Treasury. 18 U.S.C. §§ 4007, 4008, 4009.

22           Congress also contemplated the custody of federal prisoners and detainees in  
23 facilities not operated by the Federal Government, and it provided a pervasive  
24 framework for doing so. The Attorney General is congressionally authorized to use  
25 his “reasonable discretion” to carry out “the activities of the Department of Justice”  
26 through “any means, including . . . through contracts, grants, or cooperative  
27 agreements with non-Federal parties.” 28 U.S.C. § 530C(a)(4); *see also id.* § 530C(b)(7).  
28 And in “support of United States prisoners in non-Federal institutions,” Congress

1 specifically authorized the Attorney General to fund USMS custody of individuals  
2 “under agreements with State or local units of government or contracts with private  
3 entities.” 18 U.S.C. § 4013(a). USMS may therefore “designate districts that need  
4 additional support from private detention entities” based on its consideration of “the  
5 number of Federal detainees in the district” and “the availability of appropriate  
6 Federal, State, and local government detention facilities.” 18 U.S.C. § 4013(c)(1); 28  
7 C.F.R. § 0.111(o) (giving USMS the authority to acquire “adequate and suitable  
8 detention space . . . to support prisoners under the custody of the U.S. Marshal who  
9 are not housed in Federal facilities”).

10 Similarly, Congress not only codified the Executive Branch’s broad authority  
11 to detain aliens under various circumstances, *see* 8 U.S.C. §§ 1226, 1231; *see also id.*  
12 §§ 1222, 1225, 1226a, but Congress also “placed the responsibility of determining  
13 where aliens are detained within the discretion of the” Secretary of Homeland  
14 Security, *Comm. of Cent. Am. Refugees v. INS*, 795 F.2d 1434, 1440 (9th Cir. 1986); 8  
15 U.S.C. § 1231(g)(1). And the Secretary of Homeland Security is congressionally  
16 authorized to provide appropriate detention facilities for detainees, including by  
17 renting “facilities adapted or suitably located for detention” and by entering  
18 cooperative agreements with States and localities. 8 U.S.C. §§ 1103(a)(11)(B),  
19 1231(g)(1). The Secretary of Homeland Security may also “acquire, build, remodel,  
20 repair, and operate facilities . . . necessary for detention,” but must first “consider the  
21 availability for purchase or lease of any existing prison, jail, detention center, or other  
22 comparable facility suitable for such use.” *Id.* § 1231(g)(1)–(2).

23 Congress also gave BOP the authority to “designate the place of . . .  
24 imprisonment” for persons sentenced to incarceration. 18 U.S.C. §§ 3621, 4042.  
25 And BOP “may designate” as a place of confinement “any available penal or  
26 correctional facility that meets minimum standards of health and habitability  
27 established by the Bureau [of Prisons], whether maintained by the Federal  
28

1 Government or otherwise.” *Id.* § 3621(b); 28 C.F.R. § 500.1(c) (defining “inmate” to  
2 mean “all persons in the custody of the Federal Bureau of Prisons or Bureau contract  
3 facilities”). This plain language “gives BOP open-ended authority to place federal  
4 prisoners in ‘any available penal or correctional facility’ that meets minimum  
5 standards of health and habitability without regard to what entity operates the  
6 prison.” Statutory Authority to Contract with the Private Sector for Secure Facilities,  
7 16 Op. O.L.C. 65, 67 (1992); *see* 28 U.S.C. § 530C(a)(4) (“[T]he activities of the  
8 Department of Justice . . . may, in the reasonable discretion of the Attorney General,  
9 be carried out through any means, including . . . through contracts, grants, or  
10 cooperative agreements with non-Federal parties.”); *see also* 18 U.S.C. § 4002  
11 (allowing contracts with “any State, Territory, or political subdivision thereof”). In  
12 making such determinations, Congress directed BOP to consider numerous factors,  
13 such as “bed availability,” the “prisoner’s security designation,” the “prisoner’s  
14 programmatic needs,” the “prisoner’s mental and medical health needs,” the  
15 “resources of the facility contemplated,” and most importantly, “the prisoner’s  
16 primary residence.” *Id.* § 3621(b).

17 Congress has also expressly directed that BOP “shall, to the extent practicable,”  
18 ensure that a federal prisoner “serving a term of imprisonment spends a portion of  
19 the final months of that term (not to exceed 12 months), under conditions that will  
20 afford that prisoner a reasonable opportunity to adjust to and prepare for the reentry  
21 of that prisoner into the community.” *Id.* § 3624(c).<sup>15</sup> BOP has long used privately  
22

---

23 <sup>15</sup> Many other statutes and regulations also contemplate housing individuals in  
24 federal custody outside of federal facilities. *See, e.g.*, 18 U.S.C. § 3142(i) (providing for  
25 “confinement in a corrections facility separate, to the extent practicable, from persons  
26 awaiting or serving sentences or being held in custody pending appeal”); *id.*  
27 § 3563(b)(10)–(11) (allowing prisoners to reside in “a community corrections facility  
28 (including a facility maintained or under contract to the Bureau of Prisons) for all or  
part of the term of probation”); 18 U.S.C. §§ 4241–47 (providing for civil commitment  
of persons for examinations of competency, restoration of competency, and insanity);

1 contracted Reentry Centers to comply with this statutory directive, which was even  
2 further expanded by the First Step Act of 2018, authorizing extended placement in  
3 Reentry Centers for inmates who earned time credits under the risk-and-needs-  
4 assessment system. *See* 18 U.S.C. §§ 3621, 3624(g); Gustin Decl. ¶¶ 6, 25.

5 Undergirding this pervasive framework governing federal prisoner and  
6 detainee housing is another pervasive framework: the Executive Branch’s uniform  
7 regulations governing federal agencies’ procurement. Congress established the  
8 Office of Federal Procurement Policy within the Office of Management and Budget  
9 to “promote economy, efficiency, and effectiveness in the procurement of property  
10 and services by the [E]xecutive [B]ranch.” 41 U.S.C. § 1101(b). Under this authority,  
11 the Executive Branch has promulgated more than 2000 pages<sup>16</sup> of uniform policies  
12 and procedures governing acquisition by all federal agencies, spanning everything  
13 from contractor qualifications and acquisition planning to contract financing and  
14 contract provisions. *See* 48 C.F.R. § 1.101. These regulations explicitly provide for  
15 contractual provisions—called “Option[s] to Extend Services” and “Option[s] to  
16 Extend Term of Contract”—that allow the United States to unilaterally extend  
17 arrangements with its contractors for a specified period. *See id.* § 17.208(f)–(g); *id.*  
18 § 52.217-8; *id.* § 52.217-9. If these provisions are included in the negotiated contract,  
19 the federal contractor is obligated to continue its services when the Federal  
20 Government exercises these provisions. *See id.* Nearly all USMS, BOP, and ICE  
21  
22

23 \_\_\_\_\_  
24 *id.* § 4248 (providing for civil commitment of sexually dangerous persons); *id.* § 5039  
25 (“Whenever possible, the Attorney General shall commit a juvenile to a foster home  
26 or community-based facility located in or near his home community.”); 28 C.F.R.  
27 § 523.13 (contemplating good-time credit for inmates in “a Federal or contract  
28 Community Corrections Center”).

26 <sup>16</sup> *See* General Services Administration, Federal Acquisition Regulation,  
27 <https://www.acquisition.gov/sites/default/files/current/far/pdf/FAR.pdf>.

1 contracts at issue contain one, or both, of these option provisions. *See* Sheehan Decl.  
2 ¶¶ 14–16; Gustin Decl. ¶¶ 12–22; Johnson Decl. ¶¶ 15–18.

3 These comprehensive statutory and regulatory regimes cover the field of  
4 contracting for federal prisoner and detainee housing by “provid[ing] a full set of  
5 standards” for USMS, BOP, and ICE.<sup>17</sup> *Arizona*, 567 U.S. at 401. Congress struck a  
6 “careful balance” governing contracts for private detention facilities by allowing the  
7 Executive Branch to contract for these facilities after considering enumerated  
8 statutory factors. *See id.* at 400 (noting field preemption where Congress has struck  
9 a “careful balance”); *see, e.g.*, 8 U.S.C. § 1231(g)(1)–(2); 18 U.S.C.  
10 §§ 3621(b), 4013(c)(1). And the universally applicable contracting regulations were  
11 “designed as a harmonious whole,” *Arizona*, 567 U.S. at 401, to determine the  
12 appropriate provisions for Executive Branch contracts, including option provisions  
13 that allow the United States to unilaterally extend arrangements with its contractors  
14 for a specified period. *See* 48 C.F.R. § 1.101 (“The Federal Acquisition Regulations  
15 System is established for the codification and publication of uniform policies and  
16 procedures for acquisition by all executive agencies.”); *id.* § 17.208(f)–(g); *id.* § 52.217-  
17 8; *id.* § 52.217-9. The “full set of standards,” *Arizona*, 567 U.S. at 401, and delegation  
18 of authority to federal agencies only reinforce Congress’s determination that the  
19 Executive Branch, not any individual State, is responsible for weighing the  
20 enumerated factors and contracting for federal prisoner and detainee housing. *See*  
21 *United States v. Alabama*, 691 F.3d 1269, 1287 (11th Cir. 2012) (finding a state law  
22 preempted because, among other reasons, it “undermines the intent of Congress to  
23 confer discretion on the Executive Branch in matters concerning immigration”).

24  
25  
26 <sup>17</sup> “In determining field preemption, federal regulations have no less pre-  
27 emptive effect than federal statutes.” *Nat’l Fed’n of the Blind v. United Airlines Inc.*, 813  
28 F.3d 718, 733 (9th Cir. 2016) (alterations omitted) (quoting *Fid. Fed. Sav. & Loan Ass’n*  
*v. de la Cuesta*, 458 U.S. 141, 153 (1982)).

1 In fact, courts have found that state laws are not preempted specifically because  
2 those laws did *not* intrude on the Federal Government’s ability to contract for federal  
3 prisoner and detainee housing. In *Geo Group, Inc. v. City of Tacoma*, for example, the  
4 court found that a state zoning ordinance limiting modifications or expansions of  
5 ICE detention facilities was not field preempted because it did “not impact the  
6 Attorney General’s ability to rent ‘facilities adapted or suitably located for detention,’  
7 [under 8 U.S.C. §] 1231(g).” *Geo Group, Inc. v. City of Tacoma*, 2019 WL 5963112, at  
8 \*7 (W.D. Wash. Nov. 13, 2019).<sup>18</sup> Here, in stark contrast, A.B. 32’s very purpose is  
9 to interfere with the Federal Government’s ability to house its prisoners and  
10 detainees by “requir[ing] that federal detention decisions conform to state law.”  
11 *California*, 921 F.3d at 885–86; see Senate Judiciary Committee, A.B. 32, 2019–20 Cal.  
12 Leg., Reg. Sess. (Cal. 2019) (explaining that A.B. 32 was expanded to “includ[e]  
13 facilities used for immigration detention”).

14 If A.B. 32 were valid, “every State could give itself independent authority to”  
15 eliminate federal contracts for prisoner and detainee housing, “diminishing the  
16 [United States’] control over enforcement and detracting from the integrated scheme  
17 of regulation created by Congress.” See *Arizona*, 567 U.S. at 401–02 (alterations  
18 omitted) (quoting *Wis. Dep’t of Ind. v. Gould Inc.*, 475 U.S. 282, 288–289 (1986)).  
19 Because there is “a framework of regulation so pervasive that Congress left no room  
20 for the States to supplement it,” federal law “makes a single sovereign responsible  
21 for” contracting with private entities to house federal prisoners and detainees. *Id.* at  
22 399, 401. A.B. 32 is therefore field preempted.

23  
24  
25  
26 <sup>18</sup> Similarly, in *United States v. California*, the Ninth Circuit upheld a state law  
27 imposing inspection requirements on immigration detention facilities because it did  
28 not “regulate whether or where an immigration detainee may be confined [or] require  
that federal detention decisions conform to state law.” *California*, 921 F.3d at 885–86.

1           **D. A.B. 32 is Conflict Preempted.**

2           For similar reasons, A.B. 32 is also conflict preempted. This type of  
3           preemption prohibits state laws that make “compliance with both federal and state  
4           regulations [ ] a physical impossibility” or that “stand[] as an obstacle to the  
5           accomplishment and execution of the full purposes and objectives of Congress.”  
6           *CTIA*, 928 F.3d at 849 (citations omitted). A.B. 32 violates these prohibitions.

7           As explained above, Congress delegated the Executive Branch full authority to  
8           house federal prisoners and detainees. *See* 8 U.S.C. § 1231(g)(1); 18 U.S.C. §§ 3621(b),  
9           4001(b)(1), 4086. And it directed federal agencies to consider various factors in  
10          exercising their discretion to contract for private detention facilities. *See, e.g.*, 8 U.S.C.  
11          § 1231(g)(2); 18 U.S.C. §§ 3621(b), 4013(c)(1). But with A.B. 32, California seeks to  
12          eliminate congressionally authorized contracts for private detention facilities and  
13          jettison the Executive Branch’s congressionally delegated discretion. *See* Cal. Penal  
14          Code §§ 9501, 9505(a).

15          This defeats the purpose of Congress’s pervasive statutory framework. As the  
16          Ninth Circuit has explained, “[w]hen Congress charges an agency with balancing  
17          competing objectives, it intends the agency to use its reasoned judgment to weigh the  
18          relevant considerations and determine how best to prioritize those objectives.”  
19          *CTIA*, 928 F.3d at 849. “Allowing a state law to impose a different standard”—or,  
20          worse, obviating the need for congressionally prescribed balancing by eliminating an  
21          option altogether—violates the Supremacy Clause. *CTIA*, 928 F.3d at 849 (quoting  
22          *Farina v. Nokia Inc.*, 625 F.3d 97, 123 (3d Cir. 2010)); *see Arizona*, 567 U.S. at 406  
23          (noting that “a conflict in technique can be fully as disruptive to the system Congress  
24          erected as conflict in overt policy” (alterations and quotation omitted)); *Crosby v. Nat’l*  
25          *Foreign Trade Council*, 530 U.S. 363, 376–77 (2000) (finding preempted a state law that  
26          “impos[ed] a different, state system” that “undermines the President’s intended  
27          statutory authority”).  
28

1 In making designations of confinement under 18 U.S.C. § 3621(b), for example,  
2 Congress directed BOP to consider numerous factors, such as “bed availability,” the  
3 “prisoner’s security designation,” the “prisoner’s programmatic needs,” the  
4 “prisoner’s mental and medical health needs,” and “the resources of the facility  
5 contemplated.” But the key consideration identified by Congress for housing federal  
6 prisoners is “the prisoner’s primary residence.” *Id.* In no uncertain terms, Congress  
7 ordered that BOP shall “place the prisoner in a facility as close as practicable to the  
8 prisoner’s primary residence, and to the extent practicable, in a facility within 500  
9 driving miles of that residence,” and shall “transfer prisoners to facilities that are  
10 closer to the prisoner’s primary residence even if the prisoner is already in a facility  
11 within 500 driving miles of that residence.” *Id.*

12 But A.B. 32 would force BOP to relocate about 1,300 inmates from Taft CI (if  
13 BOP determines Taft CI could otherwise remain operational), and about 900 inmates  
14 from California Reentry Centers, to other BOP facilities or Reentry Centers outside  
15 California. Jones Decl. ¶¶ 11, 16–18; Gustin Decl. ¶¶ 27–29. This would defeat  
16 Congress’s express purpose in housing prisoners as close to their primary  
17 residence—including their families and communities—as possible. That is especially  
18 harmful for inmates in Reentry Centers. Congress explicitly directed that BOP “shall,  
19 to the extent practicable,” ensure that a federal prisoner “serving a term of  
20 imprisonment spends a portion of the final months of that term (not to exceed 12  
21 months), under conditions that will afford that prisoner a reasonable opportunity to  
22 adjust to and prepare for the reentry of that prisoner into the community.” 18 U.S.C.  
23 § 3624(c); *see id.* § 3563(b)(10)–(11). If BOP were forced to relocate inmates to other  
24 BOP facilities, the inmates would be unable to create the community ties necessary  
25 to support their successful reentry into society, frustrating Congress’s objective to  
26 facilitate the opposite. Gustin Decl. ¶ 29.

27  
28

1           A.B. 32 poses similar obstacles to accomplishing USMS’s and ICE’s statutory  
2 objectives. USMS is congressionally authorized to “designate districts that need  
3 additional support from private detention entities” based on its consideration of “the  
4 number of Federal detainees in the district” and “the availability of appropriate  
5 Federal, State, and local government detention facilities.” 18 U.S.C. § 4013(c)(1).  
6 Because USMS is unable to obtain space in state and local facilities in California and  
7 has maximized all available space in nearby BOP facilities, A.B. 32 would force USMS  
8 to relocate nearly 50% of its inmates in the Southern District of California and nearly  
9 30% of its California inmates to facilities outside California. Sheehan Decl. ¶ 20. So  
10 California will have nullified Congress’s purpose in allowing USMS to contract for  
11 private detention facilities as a last resort when other options are unavailable.

12           California will also have nullified Congress’s purpose in allowing ICE to rent  
13 “facilities adapted or suitably located for detention” as a first resort before  
14 “acquir[ing], build[ing], remodel[ing], repair[ing], and operat[ing] facilities . . .  
15 necessary for detention.” 8 U.S.C. § 1231(g)(1)–(2). This congressional decision  
16 makes sense because it is important for ICE to maintain flexibility due to significant  
17 fluctuations in the number and location of aliens. Johnson Decl. ¶ 8. Otherwise,  
18 ICE could invest heavily in its own facilities only to have them stand idle if an area  
19 later experiences a significant decrease in demand for detainee housing. *Id.* ¶¶ 8, 21.  
20 Unfortunately, ICE has no access (or very limited access) to housing capacity in  
21 California prisons, so detainees—both current detainees at the time of contract  
22 expiration and future detainees—would need to be relocated outside California to  
23 neighboring States, placing an enormous strain on ICE operations. Johnson Decl.  
24 ¶ 22; Archambeault Decl. ¶¶ 8–13.

25           California’s obstruction of congressional objectives is perhaps best illustrated  
26 by A.B. 32’s prohibition on extending any contracts for private detention facilities,  
27 even when extensions are “authorized by th[ose] contract[s].” Cal. Penal Code.  
28

1 § 9505(a). Federal regulations specifically authorize option provisions that allow the  
2 United States to unilaterally extend arrangements with its contractors for a specified  
3 period.<sup>19</sup> See 48 C.F.R. § 17.208(f)–(g); *id.* § 52.217-8; *id.* § 52.217-9. These option  
4 provisions are pre-negotiated and specified as terms of the awarded contract,  
5 meaning that the contractor is bound to perform during the “option period” if  
6 exercised by the Federal Government. See *id.*; Gustin Decl. ¶ 11. So it would be  
7 impossible for federal contractors providing private detention services to comply  
8 with both their obligations under the pre-negotiated contract (authorized by federal  
9 law) and California’s attempt to ban contract extensions.

10 These effects are especially alarming because Congress did not legislate against  
11 the backdrop of the States’ “historic police powers” when it authorized contracts  
12 with private detention facilities. See *Arizona*, 567 U.S. at 400 (alterations omitted)  
13 (“In preemption analysis, courts should assume that the historic police powers of the  
14 States are not superseded unless that was the clear and manifest purpose of  
15 Congress.” (quotations and citations omitted)). To the contrary, the United States  
16 “enjoys the unrestricted power to . . . determine those with whom it will deal, and to  
17 fix the terms and conditions upon which it will make needed purchases,” *Perkins*, 310  
18 U.S. at 127, so “obligations to and rights of the United States under its contracts are  
19 governed exclusively by federal law,” *Boyle*, 487 U.S. at 504; see also *Buckman Co.*, 531  
20 U.S. at 347 (“[T]he relationship between a federal agency and the entity it regulates  
21 is inherently federal in character because the relationship originates from, is governed  
22 by, and terminates according to federal law.”). Put differently, it is not the United  
23 States usurping state prerogatives, but California intruding on an area of “uniquely  
24 federal interests.” *Boyle*, 487 U.S. at 504.

---

25  
26  
27 <sup>19</sup> The United States assumes for purposes of this motion that option periods  
28 are considered extensions within the meaning of A.B. 32.

1 That is why “[c]ourts have consistently held that any state law that impedes the  
2 Federal Government’s ability to contract . . . [is] preempted.” *Student Loan Servicing*  
3 *All. v. District of Columbia*, 351 F. Supp. 3d 26, 62 (D.D.C. 2018); *see Sperry v. Florida*,  
4 373 U.S. 379, 385 (1963) (“A State may not enforce licensing requirements which . .  
5 . impose upon the performance of activity sanctioned by federal license additional  
6 conditions not contemplated by Congress.”); *Leslie Miller*, 352 U.S. at 190  
7 (“Subjecting a federal contractor to the Arkansas contractor license requirements  
8 would . . . frustrate the expressed federal policy of selecting the lowest responsible  
9 bidder.”); *United States v. Virginia*, 139 F.3d 984, 987–88 (4th Cir. 1998) (holding that  
10 the Virginia Criminal Justice Services Board could not require private investigators  
11 under contract with the FBI to obtain state private investigator licenses); *Gartrell*  
12 *Const. Inc. v. Aubry*, 940 F.2d 437, 441 (9th Cir. 1991) (holding that “California may  
13 not exercise a power of review by requiring [a federal contractor] to obtain state  
14 licenses” because “[t]o hold otherwise would interfere with federal government  
15 functions and would frustrate the federal policy of selecting the lowest responsible  
16 bidder”). Because California has frustrated Congress’s full purposes and objectives  
17 in allowing the Executive Branch to contract for private detention facilities, this  
18 Court should likewise hold A.B. 32 conflict preempted.

## 19 **II. THE UNITED STATES’ IRREPARABLE HARM AND THE PUBLIC** 20 **INTEREST FAVOR AN INJUNCTION FOR THE FEDERAL** 21 **GOVERNMENT AND ITS CONTRACTORS**

22 Because the United States will suffer irreparable harm if A.B. 32 is applied to  
23 the Federal Government’s operations and contracts, the public interest favors a  
24 preliminary injunction. *Cf. Nken v. Holder*, 556 U.S. 418, 435 (2009) (stating that  
25 “harm to the opposing party” and “the public interest” “merge when the  
26 Government is the opposing party” because the Government represents the public  
27 interest). As the Supreme Court and Ninth Circuit have explained, irreparable harm  
28 necessarily results from the enforcement of a preempted state law. *See New Orleans*

1 *Pub. Serv., Inc. v. Council of New Orleans*, 491 U.S. 350, 366-67 (1989) (noting that  
2 irreparable injury may be established “by a showing that the challenged state statute  
3 is flagrantly and patently violative of . . . the express constitutional prescription of the  
4 Supremacy Clause”); *Valle del Sol*, 732 F.3d at 1029 (finding irreparable harm where  
5 Supremacy Clause violated); *Arizona*, 641 F.3d at 366 (same). The unconstitutionality  
6 of A.B. 32 alone therefore suffices to establish irreparable harm.

7 But A.B. 32’s damage goes far beyond that legal injury. As a result of this  
8 unconstitutional law, the United States and the public will suffer three principal  
9 harms: (1) costly relocation of prisoners and detainees and attendant consequences,  
10 (2) frequent and costly transport of prisoners and detainees, and (3) obstruction of  
11 federal proceedings. These injuries could cripple federal law enforcement operations  
12 in California.

13 First, prisoners and detainees in current facilities would have to be relocated at  
14 great cost to the Federal Government. USMS would need to relocate nearly 50% of  
15 its inmates in the Southern District of California and nearly 30% of its inmates in  
16 California as a whole. Sheehan Decl. ¶ 20. Because USMS is unable to obtain space  
17 in state and local facilities in California and has maximized all available space in  
18 nearby BOP facilities, its prisoners would likely have to be housed outside California.  
19 *Id.* ¶ 21. These relocations would cost significant taxpayer dollars. *Id.* Similarly, ICE  
20 has no access (or very limited access) to housing capacity in California prisons, so all  
21 current detainees would need to be relocated outside California to neighboring States.  
22 Johnson Decl. ¶ 22; Archambeault Decl. ¶ 8. Likewise, A.B. 32 would require  
23 relocation of about 1,300 inmates from Taft CI (if BOP determines Taft CI could  
24 otherwise remain operational), and about 900 inmates from California Reentry  
25 Centers, to other BOP facilities or Reentry Centers outside California. Jones Decl.  
26 ¶¶ 17–18; Gustin Decl. ¶¶ 28–29.

27  
28

1           Apart from these harms to the Federal Government, such relocation would  
2 also injure the public by isolating prisoners and detainees from their families, who  
3 are usually located in California and may lack resources to visit them. Sheehan Decl.  
4 ¶ 23; Jones Decl. ¶ 19; Gustin Decl. ¶ 29; Archambeault Decl. ¶ 14. Relocation could  
5 also force federal agencies to share detention facilities in close proximity to  
6 California, potentially causing overcrowding. Sheehan Decl. ¶ 22; Jones Decl. ¶ 19;  
7 Archambeault Decl. ¶ 14. That overcrowding, in turn, would place an even greater  
8 strain on federal operations and increase the danger to federal contractors'  
9 personnel.<sup>20</sup> Johnson Decl. ¶ 22.

10           A.B. 32's forced relocations also would hinder BOP's ability to provide  
11 community placement for offenders. Reentry Centers provide reentry services to  
12 inmates by assisting them in obtaining a suitable residence in the community to which  
13 they will be released, structured programs, job placement, and counseling. Gustin  
14 Decl. ¶ 6. If BOP were forced to relocate inmates to other BOP facilities or Reentry  
15 Centers outside California, inmates would be unable to make the community ties  
16 needed in order to support their reentry efforts, potentially increasing the recidivism  
17 of released offenders. *Id.* ¶ 29.

18           Second, A.B. 32 would require frequent and costly transport of prisoners and  
19 detainees by USMS and ICE. USMS's prisoner population is mainly pretrial.  
20 Sheehan Decl. ¶ 24. So inmates (including those with serious charges) would have  
21

---

22  
23           <sup>20</sup> A.B. 32 may also cause tension with ICE's other obligations under existing  
24 court orders and settlements. *See, e.g., Gonzalez v. Sessions*, 325 F.R.D. 616 (N.D. Cal.  
25 Jun. 5, 2018); *Franco-Gonzalez v. Holder*, 2013 WL 8115423 (C.D. Cal. 2013). For  
26 example, the permanent injunction issued in *Orantes-Hernandez v. Meese*, 685 F. Supp.  
27 1488 (C.D. Cal. 1988), prohibits ICE from transferring unrepresented Salvadorian  
28 nationals from their district of apprehension for at least seven days. Archambeault  
Decl. ¶ 16. If ICE's contractors are forced to comply with A.B. 32, ICE would have  
no place to house removable Salvadorian nationals for the time period required in the  
*Orantes* injunction. *Id.*

1 to be frequently transported to and from California to meet the demands of the  
2 Judiciary, defense attorneys, and any pretrial or probationary requirements. *Id.* This  
3 increase in transportation would not only require a dramatic increase in coordination  
4 with the Justice Prisoner and Alien Transportation System,<sup>21</sup> as well as state and local  
5 transportation resources, but would significantly increase USMS's cost per inmate.  
6 *Id.* For ICE, any aliens apprehended in California—more than 44,000 in Fiscal Year  
7 2019—would need to be transported to out-of-state facilities. Johnson Decl. ¶ 22.  
8 This would require ICE to transfer detainees daily, using costly air and ground  
9 transportation. Archambeault Decl. ¶¶ 9–12. Ground transportation would be  
10 problematic because ICE would be forced to renegotiate its transportation contracts  
11 and/or divert a large percentage of ICE personnel to transportation duties. *Id.* ¶¶ 10,  
12 12. Air transportation would also be problematic because daily transport to and from  
13 California would place an enormous strain on ICE Air Operations (IAO) and require  
14 significantly more trips than IAO currently runs. *Id.* ¶¶ 11–12. Both options would  
15 be extremely costly and burdensome, and would increase the risk to public safety.  
16 *See id.* ¶¶ 10, 12.

17 The drastic increase in USMS and ICE transportation would also heighten  
18 security concerns for inmates, federal personnel, and the public. Frequent  
19 transportation of prisoners and detainees increases the amount of time these  
20 individuals are outside the heightened security of a detention facility. Sheehan Decl.  
21 ¶ 25; Archambeault Decl. ¶ 13. And because this frequent transportation may be  
22 regularly scheduled, individuals could gain additional opportunities to gather  
23 intelligence on USMS and ICE operations, thus increasing the chances of an  
24 adversarial encounter during transport. Sheehan Decl. ¶ 25; Archambeault Decl.  
25

---

26 <sup>21</sup> Managed by USMS, the Justice Prisoner and Alien Transportation System is  
27 one of the largest transporters of prisoners in the world, handling about 715 requests  
28 every day to move prisoners between judicial districts, correctional institutions, and  
foreign countries. Sheehan Decl. ¶ 24.

1 ¶ 13. Prisoners and detainees with medical or mobility concerns may be further  
2 adversely affected by frequent travel. Sheehan Decl. ¶ 25; Archambeault Decl. ¶ 13.

3 Third, federal proceedings would be delayed and impaired by A.B. 32. For  
4 pretrial prisoners in USMS custody outside California, A.B. 32 would cause lengthy  
5 delays in judicial proceedings. Sheehan Decl. ¶ 27. USMS estimates that  
6 transportation coordination would require about three to four weeks' advance notice  
7 in order to move prisoners in and out of the judicial districts in California. *Id.* Out-  
8 of-state detention by ICE—and detainees' concomitant lack of access to their  
9 families—would also slow immigration proceedings. Archambeault Decl. ¶ 15.  
10 Generally, an alien uses his or her family members to gather information needed in a  
11 removal proceeding. *Id.* Because A.B. 32 would force aliens to be housed outside  
12 California (likely at great distances from their families), detainees' ability to collect  
13 evidence in a timely fashion could be affected. *Id.* And when evidence is not  
14 collected in a timely fashion, immigration bond hearings and removal proceedings  
15 may be delayed. *Id.*

16 Importantly, these effects would be felt immediately. BOP has ten contracts  
17 expiring in 2020, two of which expire (for purposes of A.B. 32) at the end of March  
18 2020. Jones Decl. ¶ 14 (Taft CI); Gustin Decl. ¶ 13 (Taylor Street Center). So if  
19 BOP's contractors were forced to comply with A.B. 32, BOP would have to start  
20 preparations to relocate affected inmates right away and “stop designating inmates  
21 to California Residential Reentry Centers.” Jones Decl. ¶ 20; Gustin Decl. ¶ 30.

22 Similarly, if USMS's contractors are forced to comply with A.B. 32, USMS  
23 would need to “begin discussions with the affected courts in order to coordinate  
24 possible housing scenarios for federal prisoners.” Sheehan Decl. ¶ 28. At that point,  
25 USMS would most likely need to “begin a competitive solicitation for new private  
26 contracts in other States to replace the lost capacity in California,” which would  
27 require “a lead time of approximately one year,” plus “at least three months after the  
28

1 contract award to hire and train staff to operate the facility.” *Id.* USMS would also  
2 need to begin operational and logistical coordination to either (a) continue taking  
3 prisoners to facilities with expiring contracts and later transfer all prisoners as the  
4 expiration date approaches; or (b) discontinue prisoner intake at facilities with  
5 expiring contracts—especially the Western Region and El Centro SPC contracts  
6 expiring (for purposes of A.B. 32) in 2021—thus diminishing the population at those  
7 facilities through natural attrition. *Id.* ¶ 29. “While both choices would be costly and  
8 burdensome, the latter could imminently cause deleterious effects on federal  
9 operations.” *Id.*

10 ICE faces similar issues. If ICE’s contractors are forced to comply with  
11 A.B. 32, ICE would need to begin planning for a lack of detention space in California  
12 long before its contracts expire. Johnson Decl. ¶ 27. Like USMS, ICE would  
13 ultimately need to begin a competitive solicitation for new private contracts in other  
14 States to replace the lost capacity in California, which “typically takes 9 to 12 months  
15 from the beginning of preparation for ICE to award a contract,” plus “at least three  
16 months after the contract award” for the contractor “to hire and train staff to operate  
17 the facility.” *Id.* If new construction is required as part of this process, it could take  
18 nearly three years before ICE is able to gain access to detention space at the new  
19 detention facilities. *Id.*

20 These serious harms do not even contemplate that, if A.B. 32 is allowed to  
21 impede federal operations, other States could be emboldened to impose similar  
22 restraints. *See Rowe v. N.H. Motor Transp. Ass’n*, 552 U.S. 364, 373 (2008) (noting that  
23 allowing a State to set a requirement that conflicts with federal law “would allow  
24 other States to do the same”). This could in turn create a “patchwork” system of  
25 laws, *id.*, severely undermining both the United States’ ability to provide for those in  
26 its custody and the “‘integrated scheme of regulation’ created by Congress,” *Arizona*,

27  
28

1 567 U.S. at 400 (quoting *Gould*, 475 U.S. at 289); *see also id.* at 395 (characterizing  
2 immigration as the province of “the national sovereign, not the 50 separate States”).

### 3 **III. THE BALANCE OF THE EQUITIES FAVORS THE UNITED** 4 **STATES**

5 In contrast to the irreparable harm suffered by the United States and the public,  
6 California has no legitimate interest in thwarting the Federal Government’s contracts.  
7 *See Cal. Pharmacists Ass’n v. Maxwell–Jolly*, 563 F.3d 847, 852–53 (9th Cir. 2009)  
8 (explaining that “it would not be equitable or in the public’s interest to allow the  
9 state . . . to violate the requirements of federal law” when “there are no adequate  
10 remedies available” because “[i]n such circumstances, the interest of preserving the  
11 Supremacy Clause is paramount”). So California “cannot suffer harm from an  
12 injunction that merely ends an unlawful practice.” *Rodriguez v. Robbins*, 715 F.3d 1127,  
13 1145 (9th Cir. 2013). In any event, California would not be harmed by an injunction.

14 For starters, California is free to implement A.B. 32 for itself and its localities,  
15 as originally intended, before the legislature purposefully (and unlawfully) expanded  
16 A.B. 32 to impede the Federal Government’s operations. *See* Senate Judiciary  
17 Committee, A.B. 32, 2019–20 Cal. Leg., Reg. Sess. (Cal. 2019) (noting that  
18 amendment “expands the scope of the bill to . . . includ[e] facilities used for  
19 immigration detention” and that “[i]t’s clearly not enough to focus our legislation  
20 solely on criminal detention facilities”). California may prohibit private detention  
21 facilities for those in its own custody, but it has no lawful interest in imposing that  
22 choice on the United States.

23 And the Federal Government’s continued operation of private detention  
24 facilities should be no problem for California because private detention facilities will  
25 be operating in California anyway. As discussed above, A.B. 32 exempts whole  
26 swaths of California’s own private detention facilities from its reach. *See* Argument  
27 Section I.B., *supra*. So California may have private detention facilities within its  
28

1 borders indefinitely. But even absent an exemption, A.B. 32 would not impact  
2 existing contracts (notwithstanding any contract extensions). Cal. Penal Code  
3 §§ 9501, 9505(a). The gradual phasing out of non-exempt private detention facilities  
4 pales in comparison to the irreparable, and imminent, harm to the United States and  
5 the public. *See* Argument Section II., *supra*.

6 **IV. THE COURT SHOULD AWARD A FINAL JUDGMENT AND**  
7 **PERMANENT INJUNCTION**

8 For the reasons explained above, the United States is entitled to a preliminary  
9 injunction barring enforcement of A.B. 32. But because “[n]o facts which might be  
10 adduced at a trial w[ould] change this result,” the Court should also enter a final  
11 judgment awarding a permanent injunction and declaratory relief. *Baby Tam & Co. v.*  
12 *City of Las Vegas*, 154 F.3d 1097, 1102 (9th Cir. 1998), *abrogated on other grounds Dream*  
13 *Palace v. Cty. of Maricopa*, 384 F.3d 990, 1002 (9th Cir. 2004).

14 **CONCLUSION**

15 For the reasons explained above, the Court should preliminarily enjoin A.B. 32  
16 as it applies to the Federal Government and its contractors. And because there are  
17 no genuine disputes of material fact, the Court should also convert its preliminary  
18 injunction into a permanent injunction and enter final judgment.

 14 **SOUTHERN DISTRICT OF CALIFORNIA**

Case No. 3:20-cv-00154-JLS-WVG

15 UNITED STATES OF AMERICA,

16  
17 Plaintiff,

18 v.

19  
 20 GAVIN NEWSOM, in his Official  
 21 Capacity as Governor of California;  
 22 XAVIER BECERRA, in his Official  
 23 Capacity as Attorney General of  
 24 California; THE STATE OF  
 25 CALIFORNIA,

26 Defendants.

**DECLARATION OF JOHN  
 SHEEHAN IN SUPPORT OF  
 PRELIMINARY AND  
 PERMANENT INJUNCTION**

[Motion; Memorandum in Support;  
 Declarations of John Sheehan, Pamela  
 L. Jones, Jon Gustin, Tae D. Johnson,  
 and Gregory J. Archambeault]

Hearing Date: April 23, 2020  
 Hearing Time: 1:30 p.m.  
 Courtroom: 4D

26  
27  
28

1 I, JOHN SHEEHAN, declare the following under 28 U.S.C. § 1746, and state  
2 that under penalty of perjury that the following is true and correct to the best of my  
3 knowledge and belief:

4 **I. Personal Background**

5 1. I am the Assistant Director, Prisoner Operations Division, United States  
6 Marshals Service (USMS).

7 2. The Prisoner Operations Division establishes national strategies and  
8 programs that provide for the prisoner processing, housing, transportation, and care  
9 of federal prisoners in a safe, secure, and cost effective manner. As Assistant Director,  
10 I lead the Prisoner Operations Division by providing primary oversight of all detention  
11 management matters pertaining to the housing of federal prisoners remanded into  
12 USMS custody, including secure lodging and transportation, conditions of  
13 confinement, and prisoner medical care.

14 3. I began working for USMS in 1998 when I was sworn in as a Deputy  
15 United States Marshal for the Eastern District of New York. In 2004, I was promoted  
16 to Supervisory Deputy United States Marshal and assigned to oversee operations in  
17 the Eastern District of New York. In 2010, I was promoted to Assistant Chief  
18 Inspector at USMS Headquarters to lead the Threat Management Center within the  
19 USMS' Judicial Security Division. In 2012, I was promoted to Chief Inspector to  
20 oversee the USMS Office of Professional Responsibility's Compliance Review  
21 Program. In March 2017, I was selected to be the Deputy Assistant Director for  
22 Operations within the USMS' Prisoner Operations Division. In February 2019, I was  
23 selected as the Acting Assistant Director for the Prisoner Operations Division, and I  
24 was permanently selected as the Assistant Director in January 2020.

25 **II. USMS Detention Practices**

26 4. The USMS is the nation's oldest federal law enforcement agency with  
27 multiple missions: providing judicial security, apprehending fugitives and non-  
28

1 compliant sex offenders, seizing and managing assets acquired through illegal means,  
2 assuring the safety of endangered government witnesses and their families, and  
3 securing and transporting prisoners remanded to our custody from the time of their  
4 arrest to incarceration or acquittal. The USMS receives approximately 250,000 federal  
5 prisoners a year, with the responsibility of housing over 62,000 prisoners daily.

6 5. The USMS does not own or operate any of its own detention facilities.  
7 Owning and operating its own facilities would require financial and personnel  
8 resources far beyond what the USMS is currently afforded. Instead, Congress has  
9 given the USMS the statutory authority to enter into inter- and intra-governmental  
10 agreements and private contracts for housing of prisoners.

11 6. Currently the Federal Bureau of Prisons (BOP) is the agency within the  
12 Department of Justice that is designated and budgeted for housing federal prisoners.  
13 As a result, the USMS must use space allocated to the USMS within BOP operated  
14 facilities, partner with state and local governments using Intergovernmental  
15 Agreements, or contract directly with private detention facilities, in that order. In other  
16 words, contracting directly with private detention facilities is a last resort for USMS  
17 when other options are unavailable.

18 7. Nationwide in Fiscal Year 2019, the USMS provided for the housing,  
19 subsistence, medical care, and transportation for an average daily population of 61,789  
20 prisoners throughout 94 districts.

21 8. Per an agreement between the BOP and the USMS, the BOP provides  
22 the USMS a bedspace allocation in certain BOP facilities. The most recent allocation  
23 agreement in April of 2019 provided 10,804 beds, plus a non-permanent offering of  
24 an additional 1,042 beds. These beds are spread across 28 facilities in 17 different  
25 states. The USMS seeks to fill as many of these beds as is operationally feasible given  
26 the prisoner populations in the vicinity of the facilities. In Fiscal Year 2019, the USMS  
27 housed approximately 17% of its prisoners in BOP facilities.

28

1           9.     In order to meet a large part of its remaining need, the USMS has  
2 historically used relationships with state and local law enforcement, which created a  
3 partnership whereby detention space was provided by those entities. The USMS has  
4 approximately 1,200 Intergovernmental Agreements with state and local governments  
5 (approximately 700 actively used at any given time) to house approximately 66% of all  
6 USMS prisoners. Intergovernmental Agreements are established on an “as available”  
7 basis, and the capacity offered to the USMS can be largely dependent on changes to  
8 local detention needs, laws, and other circumstances.

9           10.    The Attorney General is authorized to fund USMS custody of individuals  
10 “under agreements with State or local units of government or contracts with private  
11 entities.” 18 U.S.C. § 4013(a). Therefore, the USMS may “designate districts that need  
12 additional support from private detention entities.” 18 U.S.C. § 4013(c); 28 C.F.R.  
13 §0.111(k); 28 C.F.R. §0.111(o). When the USMS is unable to meet its local detention  
14 space needs by other means, it exercises this authority and seeks contractual  
15 arrangements with private vendors. In the 1980s, the “war on drugs” began to  
16 significantly impact the prisoner population and available bedspace. Deputy U.S.  
17 Marshals were transporting prisoners further distances in order to secure the necessary  
18 additional detention space. In response to this crisis, the USMS began using private  
19 detention facilities in 1990 and secured its first private detention facility in the State of  
20 California in 2000.

21           11.    In Fiscal Year 2019, the USMS held 13 contracts nationwide with private  
22 detention facilities, housing a total of 10,403 prisoners. This represents approximately  
23 17% of the USMS’ Fiscal Year 2019 nationwide average daily population of 61,489.  
24 Through Intergovernmental Agreements with state and local governments, the USMS  
25 currently utilizes 29 private detention facilities to house an additional 10,681 prisoners.  
26 This represents an additional 17% of the USMS population. In total, the USMS houses  
27 approximately 34% of its entire detention population in private detention facilities.  
28

1           **III.       USMS Detention in California**

2           12.     In Fiscal Year 2019, USMS districts in California had custody of an  
3 average daily population of 5,050 prisoners. Of that number, 1,109 prisoners were  
4 housed within California in private detention facilities under direct contract with  
5 USMS, equating to approximately 22% of the USMS' California prisoner population.  
6 Another 438 USMS prisoners were housed outside the State due to unavailability of  
7 additional detention space in California.

8           13.     USMS currently houses prisoners in California under two contracts with  
9 privately owned and privately operated detention facilities—Western Region  
10 Detention Facility and Otay Mesa Detention Center—and one contract with a federally  
11 owned and privately operated detention facility—El Centro Service Processing Center.  
12 All three facilities are in the San Diego area and, together, have the capacity to house  
13 over 1,800 prisoners. These private detention facilities in the Southern District of  
14 California account for almost 50% of USMS's prisoners in that district and nearly 30%  
15 of USMS's prisoners in California as a whole.

16           14.     The Western Region Detention Facility provides the USMS with  
17 bedspace for 450 prisoners at a fixed monthly rate. The USMS may also utilize an  
18 additional 275 beds at the contract per diem rate. The current USMS population at  
19 the facility is in excess of 700 prisoners. The base period of this contract operated  
20 from November 14, 2017 to September 30, 2019, with four two-year option periods  
21 that may be exercised by USMS to maintain services at this facility until the contract  
22 expires on September 30, 2027. The current option period expires on September 30,  
23 2021.

24           15.     The USMS uses bedspace in the Otay Mesa Detention Facility under an  
25 Immigration and Customs Enforcement (ICE) contract. The Otay Mesa Detention  
26 Facility provides the USMS with bedspace for 350 prisoners at a fixed monthly  
27 rate. The USMS may also utilize approximately 250 additional beds at the contract per  
28

1 diem rate. The current USMS population at the facility is in excess of 500  
2 prisoners. The base period of ICE's contract operates from December 20, 2019 to  
3 December 19, 2024, with two five-year option periods that may be exercised to  
4 maintain services at this facility until the contract expires on December 19, 2034.

5 16. The El Centro Service Processing Center provides the USMS with  
6 bedspace for 250 prisoners at a fixed monthly rate. The USMS may also utilize an  
7 additional 262 beds at the contract per diem rate. The base period of this contract  
8 operates from December 23, 2019 to December 22, 2021, with three two-year option  
9 periods and a nine-month option period that may be exercised by USMS to maintain  
10 services at this facility until the contract expires on September 25, 2028. Although this  
11 contract was only recently awarded (and therefore USMS does not yet house any  
12 prisoners at El Centro), USMS has started to plan for the transfer of prisoners there.

13 17. Because USMS only pursues private detention facilities when no other  
14 available space exists, all option years are typically exercised.

15 18. Based upon current prosecutorial trends, the USMS' detention  
16 population in the four California judicial districts is projected to increase by  
17 approximately 25%, to around 6,300 in Fiscal Year 2023. The USMS is currently  
18 maximizing all available bedspace in California, as well as in surrounding districts, in  
19 order to meet the overwhelming bedspace need for the districts in California. And the  
20 USMS will need to contract with private detention facilities in order to meet this  
21 anticipated detention population increase.

22 **IV. A.B. 32's Impact on USMS Operations**

23 19. The USMS currently houses nearly 1,300 prisoners in California under  
24 direct contracts to operate private detention facilities. With the additional capacity  
25 from the recently awarded El Centro contract, the USMS will have a total available  
26 capacity for approximately 1,800 prisoners.

27  
28

1           20. If A.B. 32 is enforced against the federal government and its contractors,  
2 USMS prisoner operations in California, especially in the Southern District of  
3 California, would be crippled. USMS would need to relocate nearly 50% of its  
4 prisoners in the Southern District of California and nearly 30% of its California  
5 prisoners when its contracts expire. These relocations pose significant harm to the  
6 USMS' prisoner-management mission.

7           21. Because USMS has maximized all available space in nearby BOP facilities,  
8 and is unable to obtain space in state and local facilities in California, its prisoners  
9 would need to be housed outside California. Such relocations would cost significant  
10 taxpayer dollars, and require USMS to compete for extremely limited detention space  
11 with other agencies, including ICE, due to A.B. 32.

12           22. This relocation would cause a ripple effect into other districts  
13 neighboring California, as detention space would be shared to accommodate displaced  
14 California prisoners. And those detention facilities could potentially experience  
15 overcrowding due to USMS' need to house prisoners in proximity to California's  
16 districts.

17           23. Relocation would also cause prisoners to be isolated from their families,  
18 who are usually located in California and may lack resources to visit the prisoner.

19           24. As USMS's prisoner population is generally pretrial, prisoners (some with  
20 very serious charges) must be frequently transported back and forth to California to  
21 meet the demands of the judiciary, defense attorneys, and any pretrial or probationary  
22 requirements. This increase in transportation would require a dramatic increase in  
23 coordination with the already-taxed Justice Prisoner and Alien Transportation System,  
24 as well as state and local transportation resources. Managed by USMS, the Justice  
25 Prisoner and Alien Transportation System is already one of the largest transporters of  
26 prisoners in the world, handling about 715 requests every day to move prisoners  
27  
28

1 between judicial districts, correctional institutions, and foreign countries. This  
2 constant transportation would also significantly increase USMS's cost per prisoner.

3 25. Additionally, the drastic increase in transportation for prisoners would  
4 heighten security and safety risks for prisoners, USMS personnel, and the public.  
5 Frequent, scheduled, movements of prisoners increase the amount of time prisoners  
6 are outside the heightened security of a detention facility. Such transportation also  
7 allows the public additional opportunities to gather intelligence on USMS operations  
8 and significantly increases adversarial opportunities during transport. And prisoners  
9 with medical or mobility concerns may be adversely affected by frequent travel.

10 26. USMS will also be competing for transportation with, for example, BOP,  
11 who would otherwise be using these transportation resources to transport sentenced  
12 prisoners to their designated BOP facility. This may delay prisoners from exiting  
13 USMS custody, concomitantly increase the number of prisoners in USMS custody, and  
14 further increase USMS's housing, medical, and funding needs.

15 27. Due to relocation and transportation from outside the State, A.B. 32  
16 would also cause lengthy delays in judicial proceedings. Housing prisoners outside of  
17 their judicial district significantly decreases the ability of courts to properly interact  
18 with prisoners as they move through the judicial process. Transportation coordination  
19 would require approximately three to four weeks advance notice in order to move  
20 prisoners in and out of judicial districts in California for court proceedings.

21 28. Importantly, these effects could be felt imminently. If the USMS is  
22 forced to comply with A.B. 32, it would need to begin discussions with the affected  
23 courts in order to coordinate possible housing scenarios for federal prisoners. At that  
24 point, the USMS would need to identify out-of-state facilities with available capacity  
25 or, most likely, begin a competitive solicitation for new private contracts in other States  
26 to replace the lost capacity in California. An open solicitation of this nature would  
27 require a lead time of approximately one year after the USMS and judiciary have  
28

1 coordinated the least disruptive operational scenario. The new vendor would also  
2 require at least three months after the contract award to hire and train staff to operate  
3 the facility.

4 29. Further, the USMS would need to begin operational and logistical  
5 coordination to either (a) continue taking prisoners to facilities with expiring contracts  
6 and later transfer all prisoners as the expiration date approaches; or (b) discontinue  
7 prisoner intake at facilities with expiring contracts—especially the Western Region and  
8 El Centro contracts expiring (for purposes of A.B. 32) in 2021—thus diminishing the  
9 population at those facilities through natural attrition. While both choices would be  
10 costly and burdensome, the latter could imminently cause deleterious effects on federal  
11 operations.

12 30. None of the facilities that the USMS currently uses, or could use, in  
13 California meet the exceptions listed in A.B. 32 that could potentially apply to its  
14 facilities. The USMS does not contract, nor has it ever contracted with “school  
15 facilit[ies] used for the disciplinary detention of a pupil” in California. And the USMS  
16 does not “lease[] and operate[]” a detention facility in California that is “privately  
17 owned.” Nor does the USMS contract for facilities in California “providing  
18 educational, vocational, medical, or other ancillary services to an inmate in the custody  
19 of, and under the direct supervision of” a federal “law enforcement agency.”

Case No. 3:20-cv-00154-JLS-WVG

**DECLARATION OF PAMELA L.  
 JONES IN SUPPORT OF  
 PRELIMINARY AND  
 PERMANENT INJUNCTION**

[Motion; Memorandum in Support;  
 Declarations of John Sheehan, Pamela  
 L. Jones, Jon Gustin, Tae D. Johnson,  
 and Gregory J. Archambeault]

Hearing Date: April 23, 2020

Hearing Time: 1:30 p.m.

Courtroom: 4D

26  
27  
28

1 I, PAMELA JONES, declare the following under 28 U.S.C. § 1746, and state  
2 that under penalty of perjury the following is true and correct to the best of my  
3 knowledge and belief:

4 **I. Personal Background**

5 1. I am a citizen of the United States. I am currently employed by the  
6 Federal Bureau of Prisons (BOP) of the United States Department of Justice, as the  
7 Administrator of the BOP's Privatization Management Branch (PMB) in Central  
8 Office, located in Washington, D.C.

9 2. PMB has overall responsibility for the administration of BOP's privately  
10 operated secure correctional facility contracts (as distinguished from contracts for  
11 non-secure adult correctional facilities like Residential Reentry Centers, which are the  
12 responsibility of a separate branch within BOP). As the Administrator of PMB, I  
13 oversee all of BOP's activities regarding contract management and operation of  
14 BOP's private secure facilities and I am responsible for the planning, coordinating,  
15 monitoring, and evaluating privatization efforts within the BOP. I also review  
16 contract monitoring (both from onsite BOP staff and from BOP's centralized  
17 Program Review Division) to determine BOP's recommended action. I possess  
18 thorough knowledge of the regulations that govern the control of both BOP and  
19 private institution operations and security.

20 3. I began working for the BOP in July 1991 and assumed my current  
21 position in December 2015. Before becoming the Administrator of PMB, I served  
22 as a Privatization Field Administrator in PMB from March 2014 through December  
23 2015. In this role I provided managerial supervision of BOP's oversight activities for  
24 six BOP-contracted adult correctional facilities to ensure safe and secure  
25 environments and appropriate management and treatment of federal inmates. I  
26 served as an advisor on matters of policy, programs, and operations, to ensure sound  
27 correctional practice and contract compliance. From May 2012 through March 2014  
28

1 I worked as a Senior Secure Institution Manager for the BOP at one of BOP's  
2 contract facilities in Texas. In this position I coordinated all BOP-related activities  
3 to ensure contract compliance at the facility and provided administrative direction to  
4 other on-site BOP staff.

5 4. Prior to May 2012, I held other positions within the BOP, including Unit  
6 Manager at the Federal Correctional Complex in Forrest City, Arkansas (May 2010  
7 to May 2012); Intelligence Analyst, BOP Counterterrorism Unit (2006 to 2010);  
8 Intelligence Research Specialist, Federal Correctional Institution, Memphis,  
9 Tennessee (2003 to 2006); Special Investigative Technician, FCI Memphis (1994 to  
10 2003); and Correctional Officer, FPC Millington (1991 to 1994).

## 11 **II. BOP Detention Practices**

12 5. BOP protects society by confining inmates in the controlled  
13 environments of prisons and community-based facilities that are safe, humane, cost-  
14 efficient, and appropriately secure. BOP-operated facilities are assigned one of five  
15 security levels (minimum, low, medium, high, and administrative) and inmates are  
16 designated to an appropriate facility based on the level of security and supervision  
17 they require as well as their programming needs.

18 6. Between 1980 and 1989, BOP's inmate population more than doubled  
19 (from 24,000 to almost 58,000) due to various factors, including the passage of the  
20 Sentencing Reform Act of 1984 and enactment of several mandatory minimum  
21 federal sentencing provisions. Beginning in the mid-1980s, to help alleviate  
22 overcrowding caused by this rapidly expanding inmate population that exceeded  
23 available space in government-owned facilities, BOP began placing certain low-  
24 security inmates (such as sentenced criminal aliens) in contract facilities.

25 7. The benefit of contract facilities is that they can be activated relatively  
26 quickly or contracts can be cancelled in response to shifting population pressures.  
27 BOP has found that contracting with the private sector provides an effective means  
28

1 of managing low security, specialized populations, and accommodating inmates'  
2 reentry needs.

3 **III. BOP's Use of Private Secure Facilities Nationwide**

4 8. In 1997, partially in response to a congressional mandate to privatize the  
5 management and operation of the only government-owned and contractor-operated  
6 facility (Taft Correctional Institution), BOP created the Privatization Management  
7 Branch to administer BOP's contracts with the private sector. Since 1997, when  
8 BOP had contracts for the operation of only two private, secure facilities, BOP's use  
9 of private facilities has increased.

10 9. Currently, BOP contracts with the private sector for the operation of  
11 twelve secure facilities. At all of these facilities, except Taft CI in California, the  
12 contractor owns the physical premises and provides care and custody of the inmate  
13 population. At Taft CI, the government owns the facility while a private company—  
14 the Management and Training Corporation (MTC)—operates it. BOP does not  
15 contract, and has never contracted, with “school facilit[ies] used for the disciplinary  
16 detention of a pupil” in California. Additionally, BOP does not “lease[] and  
17 operate[]” any detention facility in California that is “privately owned.”

18 10. The majority of inmates designated to private secure detention facilities  
19 are sentenced criminal aliens with 90 months or fewer remaining to serve on their  
20 sentences who will be deported upon completion of their sentence.

21 11. BOP has a current national inmate population of 175,269 inmates. Of  
22 this population, 16,077 inmates (approximately 9.3 percent) are located in California.  
23 This California inmate population includes:

- 24 a. 13,945 inmates confined in 12 BOP-operated facilities, including  
25 inmates confined to federal prison camps connected to these facilities  
26 but that are not counted as stand-alone facilities themselves; and  
27  
28

1           b. 1,307 inmates confined at Taft CI, including both the main institution  
2           (1,056 inmates) and satellite prison camp (251 inmates).

3           12. Nationwide, BOP has 17,168 inmates (approximately 9.7% of BOP's  
4 total inmate population) designated to private, secure facilities.

5           **IV. BOP's Use of Private Secure Facilities in California**

6           13. Taft CI, located in Taft, California, is owned by the federal government  
7 and operated under a contract between BOP and MTC. Taft CI includes a low  
8 security correctional institution and a minimum security prison camp. The  
9 population in the low security facility consists of low security adult male inmates,  
10 primarily criminal aliens (non-U.S. citizens) with 90 months or less remaining to serve  
11 on their sentences. The population in the minimum security prison camp is an adult  
12 male population consisting of U.S. citizens.

13           14. The contract between BOP and MTC currently provides for MTC to  
14 operate the facility until March 31, 2020. Although BOP considered ceasing  
15 operations at Taft CI due to infrastructure issues, BOP has commissioned a study  
16 (and is awaiting its results) to examine the feasibility of making repairs to the Taft CI  
17 while inmates remain present and the facility remains operational. If Taft CI can  
18 remain operational, then BOP may seek to extend its current contract or award a new  
19 one.

20           15. BOP does not have any immediate plans for new contracts for private  
21 secure detention facilities in California but could pursue such contracts in the future,  
22 as BOP continually reassess its needs.

23           16. If BOP cannot contract with the private sector for the continued  
24 operation of Taft CI, BOP would be forced to stop accepting any new inmates at the  
25 facility and would transfer all of the inmates currently designated there.

26           17. BOP would re-designate many of the Taft CI inmates to other privately  
27 operated facilities outside of California. There is no single facility that could absorb  
28

1 the entire Taft CI inmate population, so multiple transfers would likely be necessary.  
2 It is possible that some inmates, particularly those at the Taft CI satellite prison camp,  
3 would be re-designated to BOP-operated facilities in California, contingent on  
4 available space and security needs.

5 18. Relocating the more than 1,000 affected Taft CI inmates via bus or airlift  
6 through the Justice Prisoner and Alien Transportation System would come at a  
7 significant cost to the BOP. Although some inmates may be eligible for unescorted  
8 furlough transfers rather than transport via secure bus movement or airlift, payment  
9 of those inmates' transportation costs via commercial carrier are still the BOP's  
10 responsibility.

11 19. This mass re-designation could also result in some inmates being  
12 designated to facilities farther from their families and release communities. BOP is  
13 required by statute (18 U.S.C. § 3621(b)) to designate inmates to a facility as close as  
14 practicable to the inmate's primary residence, and to the extent practicable within 500  
15 driving miles of that residence. The loss of an available facility in California makes  
16 it more difficult for BOP to comply with this statutory mandate, and could lead to  
17 overcrowding at other facilities, as well as the weakening of inmates' ties with their  
18 families.

19 20. Importantly, these effects will be felt imminently. If BOP is forced to  
20 comply with A.B. 32, it must relocate Taft CI prisoners by March 31, 2020 (when the  
21 current contract expires), even if BOP determines that Taft CI could otherwise  
22 remain operational. This would imminently cause deleterious effects on federal  
23 operations, as explained above.

24 21. BOP does not control the size of its inmate population, and contracting  
25 with the private sector provides the BOP with necessary flexibility in managing its  
26 inmate population. BOP already operates twelve secure institutions in California.  
27 Building and activating any additional institutions would require many years of site  
28

1 assessment, planning, Congressional appropriations, staff hiring, and activation  
2 before the institutions would be ready to receive inmates.

Case No. 3:20-cv-00154-JLS-WVG

**DECLARATION OF JON  
 GUSTIN IN SUPPORT OF  
 PRELIMINARY AND  
 PERMANENT INJUNCTION**

[Motion; Memorandum in Support;  
 Declarations of John Sheehan, Pamela  
 L. Jones, Jon Gustin, Tae D. Johnson,  
 and Gregory J. Archambeault]

Hearing Date: April 23, 2020

Hearing Time: 1:30 p.m.

Courtroom: 4D

1 I, JON GUSTIN, declare the following under 28 U.S.C. § 1746, and state that  
2 under penalty of perjury the following is true and correct to the best of my knowledge  
3 and belief:

4 **I. Personal Background**

5 1. I am a citizen of the United States. I am currently employed by the  
6 Federal Bureau of Prisons (BOP) of the United States Department of Justice, as the  
7 Administrator of the BOP's Residential Reentry Management Branch (RRMB) in  
8 Central Office, located in Washington, D.C.

9 2. The Residential Reentry Management Branch develops and administers  
10 contracts for community-based programs, including Residential Reentry Centers and  
11 home confinement. As the Administrator of RRMB, I am responsible for the  
12 execution of BOP's residential reentry management priorities nationwide. I provide  
13 leadership and management oversight of the three Sector Management Teams  
14 (Eastern, Central, and Western) and 24 field office Managers in the development and  
15 administration of BOP's residential reentry centers, juvenile and adult boarding  
16 facilities, and non-residential home detention programs. I am responsible for the  
17 development and implementation of national policy for RRMB, providing technical  
18 assistance to managers at all levels within the BOP in interpretation and coordination  
19 of community-based correctional activities. I also provide guidance and direction in  
20 the operations of programs and services that are provided through intergovernmental  
21 agreements at the federal, state, county, and city levels, and through contracts with  
22 private entities.

23 3. I began working for the BOP in October 1997 as a Correctional Officer  
24 at the Federal Detention Center in SeaTac, Washington, and was promoted to  
25 positions of increasing responsibility before assuming my current position in June  
26 2015. Immediately prior to becoming the Administrator of RRMB, I worked as a  
27 Privatization Field Administrator for the BOP's Privatization Management Branch  
28

1 for one year, from June 2014 to June 2015. As a Privatization Field Administrator I  
2 provided oversight and guidance to BOP on-site staff at several of BOP's private  
3 contract facilities and was responsible for the overall monitoring of the operations  
4 of those private contract facilities within my geographic area of responsibility.

5 4. From May 2011 to June 2014 I served as the Assistant Administrator for  
6 the Residential Reentry Management Branch. I also previously served as a Program  
7 Review Examiner for BOP's Program Review Division (September 2006 to August  
8 2009). In this position I performed program reviews (BOP internal audits) of BOP's  
9 residential reentry offices. I have also worked as a Correctional Programs Specialist  
10 in two of BOP's residential reentry field offices: Minneapolis (September 2006 to  
11 August 2009) and Seattle (March 2002 through September 2006). In this position I  
12 assisted in the administration of BOP's contracts for community-based programs  
13 within limited geographic areas and served as a liaison between BOP and various  
14 governmental agencies (federal, state, and local), courts, and other non-governmental  
15 entities.

16 5. In total I have over 18 years of experience in the Management and  
17 Oversight of contract facilities to include Private Correctional Facilities, Residential  
18 Reentry Centers, Home Confinement, Contract jails, prisons and juvenile detention  
19 facilities.

## 20 **II. BOP's Residential Reentry Centers**

21 6. The BOP has utilized and continues to utilize privately contracted  
22 Residential Reentry Centers to comply with its statutory mandate to facilitate inmates'  
23 reentry into the community following their terms of incarceration. *See* 18 U.S.C.  
24 § 3624(c). Residential Reentry Centers provide inmates with a safe, structured,  
25 supervised environment, as well as employment counseling, job placement, financial  
26 management assistance, drug and alcohol testing and counseling, and other programs  
27 and services as they transition back to the community. Residential Reentry Centers  
28

1 help inmates rebuild their ties to the community and supervise offenders' activities  
2 during the community reintegration phase of BOP's reentry programming.

3 7. Residential Reentry Centers are staffed and managed by contractor  
4 employees. These contract employees are responsible for the appropriate  
5 supervision of federal offenders and the orderly running of the Residential Reentry  
6 Center, in compliance with their contractual obligations and other BOP guidance.  
7 The contractor's performance is monitored by BOP staff located in one of 24  
8 Residential Reentry Management field offices throughout the United States.

### 9 **III. BOP's Use of Residential Reentry Centers Nationwide**

10 8. BOP has a current national inmate population of 175,269 inmates. BOP  
11 contracts with the private sector for the operation of more than 200 Residential  
12 Reentry Centers across the United States.

13 9. Nationwide, BOP has 7,825 inmates (approximately 4.5% of the total  
14 inmate population) designated to Residential Reentry Centers. Additionally, 2,450  
15 inmates (1.4%) are designated to home confinement, with the vast majority under  
16 the supervision of a BOP-contracted Residential Reentry Center.

### 17 **IV. BOP's Use of Residential Reentry Centers in California**

18 10. BOP currently houses 16,077 inmates (approximately 9.3% of its  
19 national inmate population) in California. This California inmate population includes  
20 728 inmates residing in Residential Reentry Centers; 97 inmates designated to home  
21 confinement under the supervision of a BOP-contracted Residential Reentry Center;  
22 and 42 inmates otherwise designated to home confinement, supervised by a United  
23 States Probation Office or a BOP-contracted day reporting center.

24 11. In soliciting and awarding contracts for Residential Reentry Centers,  
25 BOP's contracts consist of a base period of operations and one or more option  
26 periods that allow the BOP to unilaterally extend arrangements with the contractor  
27 for a specified period. When the options are exercised, the contractor is obligated to  
28

1 continue providing services during the option period. Given BOP's need for  
2 Residential Reentry Centers, all option years are typically exercised.

3 12. BOP contracts with the private sector for the operation of ten  
4 Residential Reentry Centers in California.

5 13. Taylor Street Center, operated by GEO Reentry, Inc., is located in San  
6 Francisco. The contract between BOP and GEO provides for a base year of  
7 operation (April 1, 2017, through March 31, 2018) and four option years. Currently,  
8 operations are in the third option year, which expires March 31, 2020. The final  
9 option year expires March 31, 2021. The total inmate population in this Residential  
10 Reentry Center is 110 inmates, and the total inmate population on supervised home  
11 confinement is 8 inmates. The maximum inmate population in this Residential  
12 Reentry Center provided for in the contract is 140 inmates, and the maximum inmate  
13 population on supervised home confinement provided for in the contract is 20  
14 inmates.

15 14. Oakland Street Center, operated by GEO Reentry, Inc., is located in  
16 Oakland. The contract between BOP and GEO is currently a 92-day bridge contract  
17 that provides for performance up to January 31, 2020. On November 1, 2019, BOP  
18 and GEO executed a subsequent contract with performance beginning February 1,  
19 2020, that provides for a base year of operation and nine option years. The final  
20 option year expires January 31, 2030. The total inmate population in this Residential  
21 Reentry Center is 52 inmates, and the total inmate population on supervised home  
22 confinement is 8 inmates. The maximum inmate population in this Residential  
23 Reentry Center provided for in the contract is 59 inmates, and the maximum inmate  
24 population on supervised home confinement provided for in the contract is 12  
25 inmates.

26 15. Orion Residential Reentry Center, operated by Behavioral Systems  
27 Southwest, Inc. (BSS), in Van Nuys. The contract between BOP and BSS provides  
28

1 for a base year of operation (October 1, 2019, to September 30, 2020) and nine option  
2 years. Currently, operations are in the base year. The final option year expires  
3 September 30, 2029. The total inmate population in this Residential Reentry Center  
4 is 50 inmates, and the total inmate population on supervised home confinement is  
5 15 inmates. The maximum inmate population in this Residential Reentry Center  
6 provided for in the contract is 70 inmates, and the maximum inmate population on  
7 supervised home confinement provided for in the contract is 14 inmates.<sup>1</sup>

8 16. Ocean View Residential Reentry Center, operated by Correctional  
9 Alternatives, Inc., is located in San Diego. The contract between BOP and  
10 Correctional Alternatives provides for a base year of operation (June 1, 2016 to May  
11 31, 2017) and four option years. Currently, operations are in the third option year,  
12 which expires May 31, 2020. The final option year expires May 31, 2021. The total  
13 inmate population in this Residential Reentry Center is 203 inmates, and the total  
14 inmate population on supervised home confinement is 8 inmates. The maximum  
15 inmate population in this Residential Reentry Center provided for in the contract is  
16 255 inmates, and the maximum inmate population on supervised home confinement  
17 provided for in the contract is 99 inmates.

18 17. Marvin Gardens Center, operated by GEO Reentry, Inc., in Los  
19 Angeles. The contract between BOP and GEO provides for a base year of operation  
20 (December 1, 2018, through November 30, 2019) and four option years. Currently,  
21 operations are in the first option year, which expires November 30, 2020. The final  
22 option year expires November 30, 2023. The total inmate population in this  
23 Residential Reentry Center is 63 inmates, and the total inmate population on  
24 supervised home confinement is 9 inmates. The maximum inmate population in this  
25

26  
27 <sup>1</sup> The number of BOP inmates in a Residential Reentry Center or on supervised  
28 home confinement can occasionally exceed the maximum provided for in the contract  
as inmates transition to and from institutions and home confinement.

1 Residential Reentry Center provided for in the contract is 73 inmates, and the  
2 maximum inmate population on supervised home confinement provided for in the  
3 contract is 12 inmates.

4 18. El Monte Center, operated by GEO Reentry, Inc., in El Monte. The  
5 contract between BOP and GEO provides for a base year of operation (October 1,  
6 2019, through September 30, 2020) and nine option years. Currently, operations are  
7 in the base year. The final option year expires September 30, 2029. The total inmate  
8 population in this Residential Reentry Center is 53 inmates, and there are no inmates  
9 currently on supervised home confinement. The maximum inmate population in this  
10 Residential Reentry Center provided for in the contract is 70 inmates, and the  
11 maximum inmate population on supervised home confinement provided for in the  
12 contract is 35 inmates.

13 19. Garden Grove Residential Reentry Center, operated by Working  
14 Alternatives, Inc., is located in Garden Grove. The contract between BOP and  
15 Working Alternatives provides for a base year of operation (September 1, 2019,  
16 through August 31, 2020) and four option years. Currently, operations are in the  
17 base year. The final option year expires August 31, 2024. The total inmate  
18 population in this Residential Reentry Center is 44 inmates, and the total inmate  
19 population on supervised home confinement is 15 inmates. The maximum inmate  
20 population in this Residential Reentry Center provided for in the contract is  
21 56 inmates, and the maximum inmate population on supervised home confinement  
22 provided for in the contract is 14 inmates.

23 20. Vinewood Residential Reentry Center, operated by Behavioral Systems  
24 Southwest, Inc. (BSS), in Los Angeles. The contract between BOP and BSS provides  
25 for a base year of operation (October 1, 2019, to September 30, 2020) and nine option  
26 years. Currently, operations are in the base year. The final option year expires  
27 September 30, 2029. The total inmate population in this Residential Reentry Center  
28

1 is 75 inmates, and the total inmate population on supervised home confinement is  
2 12 inmates. The maximum inmate population in this Residential Reentry Center  
3 provided for in the contract is 70 inmates, and the maximum inmate population on  
4 supervised home confinement provided for in the contract is 14 inmates.

5 21. Rubidoux Residential Reentry Center, operated by Behavioral Systems  
6 Southwest, Inc. (BSS), in Riverside. The contract between BOP and BSS provides  
7 for a base year of operation (October 1, 2019, to September 30, 2020) and nine option  
8 years. Currently, operations are in the base year. The final option year expires  
9 September 30, 2029. The total inmate population in this Residential Reentry Center  
10 is 36 inmates, and the total inmate population on supervised home confinement is  
11 21 inmates. The maximum inmate population in this Residential Reentry Center  
12 provided for in the contract is 45 inmates, and the maximum inmate population on  
13 supervised home confinement provided for in the contract is 33 inmates.

14 22. Brawley Residential Reentry Center, operated by Working Alternatives,  
15 Inc., in Brawley. The contract between BOP and Working Alternatives provides for  
16 a base year of operation (October 1, 2019, through September 30, 2020) and nine  
17 option years. Currently, operations are in the base year. The final option year expires  
18 September 30, 2029. The total inmate population in this Residential Reentry Center  
19 is 42 inmates, and there is one inmate on supervised home confinement. The  
20 maximum inmate population in this Residential Reentry Center provided for in the  
21 contract is 55 inmates, and the maximum inmate population on supervised home  
22 confinement provided for in the contract is 15 inmates.

23 23. For the foreseeable future, BOP has a continuing need for Residential  
24 Reentry Center capacity in California.

25 24. BOP currently has one open solicitation and one potential solicitation it  
26 would like to open for Residential Reentry Centers in California: one in the San  
27 Francisco area (open) and one in the San Diego area (potential solicitation in an area  
28

1 of need). Additionally, one solicitation for a Residential Reentry Center in the  
2 Eastern District of California recently closed in October 2019. These solicitations  
3 have anticipated performance dates in 2021. To the extent allowed by law, RRMB  
4 will continue to procure services when a need is identified in specific geographic  
5 areas.

6 25. The First Step Act of 2018 will expand BOP’s use of Residential Reentry  
7 Centers by authorizing extended placement in Residential Reentry Centers for  
8 inmates who will earn time credits under the risk-and-needs-assessment system,  
9 which is a tool designed to predict the likelihood of general and violent recidivism  
10 and identify areas of programming need for BOP inmates. BOP therefore anticipates  
11 a significant increase in the need for California Residential Reentry Centers over the  
12 next few years as inmates begin earning time credits.

13 26. BOP also maintains capacity in its Residential Reentry Centers for use  
14 by federal courts as an intermediate sanction during supervision or probation. This  
15 function utilizes generally 15–20% of the total Reentry Center capacity nationally.  
16 Although individuals housed under this arrangement are not in BOP custody, BOP  
17 maintains available beds to meet the courts’ needs.

18 **V. A.B. 32’s Impact on Residential Reentry Center Operations**

19 27. All of BOP’s Residential Reentry Centers in California are privately  
20 owned and operated. California Assembly Bill 32 (A.B. 32) would require BOP to  
21 re-designate all inmates assigned to California Residential Reentry Centers to other  
22 facilities or home confinement upon the expiration of BOP’s current Residential  
23 Reentry Center contracts. To the extent that the Residential Reentry Center  
24 contracts’ options are considered “extensions” under A.B. 32, these contracts will  
25 begin “expiring” in 2020.

26 28. Relocating the nearly 1,000 affected California Residential Reentry  
27 Center inmates would come at a significant cost to the BOP. The majority of  
28

1 California Residential Reentry Center inmates would be eligible for unescorted  
2 furlough transfers, rather than requiring transport via secure bus movement or airlift.  
3 Nevertheless, payment of those inmates' transportation costs via commercial carrier  
4 are still the BOP's responsibility and would likely cost hundreds of thousands of  
5 dollars.

6 29. This re-designation could also result in many inmates being housed in  
7 facilities farther from their families and release communities. BOP is required by  
8 statute (18 U.S.C. § 3621(b)) to designate inmates to a facility as close as practicable  
9 to the inmate's primary residence, and to the extent practicable within 500 driving  
10 miles of that residence. Because of AB 32, BOP will need to house inmates further  
11 from their primary residences, frustrating Congress's express statutory objective. And  
12 because California inmates could no longer serve the final portion of their sentence  
13 in a California Residential Reentry Center, they would either remain in a secure BOP-  
14 operated facility (in California or elsewhere) until the very end of their sentences, or  
15 be transferred to a Residential Reentry Center outside of California far from their  
16 release communities. These inmates would therefore miss out on the opportunity to  
17 establish connections with the community in which they will be released, find  
18 employment in that community, finish drug treatment, and experience a lesser degree  
19 of supervision on their way toward fully reentering their communities, thereby  
20 eliminating the primary, reentry-driven purposes behind BOP's use of Residential  
21 Reentry Centers. These same opportunities are not available to the same extent in  
22 BOP's secure facilities.

23 30. Importantly, these effects will be felt imminently. If BOP is forced to  
24 comply with A.B. 32, it must stop designating inmates to California Residential  
25 Reentry Centers and begin relocating inmates before the above-mentioned  
26 Residential Reentry Center contracts expire (for purposes of A.B. 32), as early as  
27 March 2020.

Case No. 3:20-cv-00154-JLS-WVG

**DECLARATION OF TAE D.  
 JOHNSON IN SUPPORT OF  
 PRELIMINARY AND  
 PERMANENT INJUNCTION**

[Motion; Memorandum in Support;  
 Declarations of John Sheehan, Pamela  
 L. Jones, Jon Gustin, Tae D. Johnson,  
 and Gregory J. Archambeault]

Hearing Date: April 23, 2020

Hearing Time: 1:30 p.m.

Courtroom: 4D

26  
27  
28

1 I, TAE D. JOHNSON, declare the following under 28 U.S.C. § 1746, and state  
2 that under penalty of perjury the following is true and correct to the best of my  
3 knowledge and belief:

4 **I. Personal Background**

5 1. I am employed by the U.S. Department of Homeland Security (DHS),  
6 U.S. Immigration and Customs Enforcement (ICE), Office of Enforcement and  
7 Removal Operations (ERO), as the Assistant Director for the Custody Management  
8 Division at ICE Headquarters in Washington, D.C. I have held this position since  
9 January 2011.

10 2. The Custody Management Division in ERO provides policy and  
11 oversight for the administrative custody of ICE's highly transient and diverse  
12 population of immigration detainees. The Custody Management Division is  
13 composed of three divisions led by three Deputy Assistant Directors under my direct  
14 supervision: (1) the Alternatives to Detention Division; (2) the Detention  
15 Management Division; and (3) the Custody Programs Division. As Assistant  
16 Director for the Custody Management Division, I am responsible for the effective  
17 and proficient performance of these three Divisions and their various units, including  
18 the oversight of compliance with ICE's detention standards and conditions of  
19 confinement at ICE detention facilities generally.

20 3. Since 1992, I have worked in various other positions within ICE and  
21 the former Immigration and Naturalization Service. Throughout my career, I have  
22 served in operational and managerial positions in ERO Field Offices as a detention  
23 and deportation officer, a supervisory detention enforcement officer, and a  
24 supervisory immigration enforcement agent. Since 2007, I have been appointed to  
25 numerous policy and planning positions within ICE Headquarters, and I have  
26 provided general oversight and guidance to ERO Field Offices, ICE leadership, and  
27 other federal agencies in the implementation and administration of various detention  
28

1 and removal statutes, regulations, policies, and programs. Specifically, I have served  
2 as a Unit Chief of the Detention Standards Compliance Unit, Chief of Staff for the  
3 Office of Detention Policy and Planning, Special Assistant to the Assistant Secretary  
4 for ICE, and Deputy Chief of Staff for the Executive Associate Director for ERO.

5 4. Due to my experience and the nature of my official duties, I am familiar  
6 with the contractual processes and detention space needs of ERO throughout the  
7 United States, including in California.

## 8 **II. ICE's Detention Practices and Facilities Nationwide**

9 5. ICE is charged with enforcement of more than 400 federal statutes, and  
10 its mission is to protect the United States from the cross-border crime and illegal  
11 immigration that threaten national security and public safety through enforcement of  
12 the federal laws governing border control, customs, trade, and immigration. To carry  
13 out this mission, ICE focuses on enforcing federal immigration laws, preventing  
14 terrorism, and combating transnational criminal threats.

15 6. As an operational program of ICE, ERO is responsible for the  
16 planning, management, and direction of broad programs relating to the supervision,  
17 detention, and removal of aliens from the United States under the U.S. immigration  
18 laws. ERO's statutory responsibilities include detention of aliens during the  
19 pendency of proceedings to determine whether they will be removed from the  
20 United States, as well as aliens subject to an administratively final removal order,  
21 pending their removal from the United States. The immigration laws also mandate  
22 detention of certain categories of aliens, including "arriving aliens" and certain  
23 categories of criminal and terrorist aliens.

24 7. The length of an individual alien's detention depends on a number of  
25 factors, including whether the alien is subject to mandatory detention under the U.S.  
26 immigration laws, the duration of any removal proceedings before the Department of  
27 Justice's Executive Office for Immigration Review, appeals before the federal courts  
28

1 of appeals, and issues regarding execution of a final removal order. ERO also  
2 transfers aliens in its custody for a number of legal and operational purposes such as  
3 attendance at immigration court hearings, to facilitate removal, provide for  
4 appropriate medical care, and transfers between facilities for other reasons. In Fiscal  
5 Year 2019, ICE housed an average daily population of 50,165 aliens nationwide.

6 8. ICE neither constructs nor operates its own immigration detention  
7 facilities. Due to significant fluctuations in the number and location of removable  
8 aliens apprehended by DHS and subject to detention, it is important for ICE to  
9 maintain flexibility with regard to its immigration detention facilities. Otherwise,  
10 ICE could invest heavily in its own facilities only to have them stand idle if a  
11 particular area later experiences a drastic decrease in demand for detainee housing.

12 9. ICE coordinates the acquisition of detention bed space for removable  
13 aliens through: (1) Service Processing Centers; (2) Contract Detention Facilities; and  
14 (3) Intergovernmental Service Agreement (IGSA) facilities (collectively, “immigration  
15 detention facilities”). Service Processing Centers are owned by ICE and staffed by a  
16 combination of federal and contract employees. Contract Detention Facilities are  
17 owned by private companies that contract directly with the government and are  
18 predominantly staffed by contract employees. Dedicated IGSA facilities can be public  
19 facilities or privately owned, and can be operated by local governments or private  
20 companies operating under contracts with local governments.

21 10. Many IGSA facilities house a very small ICE population compared to the local  
22 inmate population, while others are almost exclusively committed to housing ICE  
23 detainees. Other facilities used by ICE under various contractual arrangements  
24 include: facilities used by ICE through a contract awarded by the U.S. Marshals  
25 Service (USMS), facilities operated by the Federal Bureau of Prisons (BOP), staging  
26 facilities for transportation, holding facilities for temporary detention, and hospitals  
27  
28

1 for emergency care, among other types of facilities. ICE does not have any federally  
2 owned and operated detention facilities.

3 11. ICE used about 30 dedicated (or largely dedicated) immigration  
4 detention facilities throughout the United States in Fiscal Year 2019. Of these  
5 facilities, 13 were privately operated Contract Detention Facilities that are typically  
6 privately owned, housing an average daily population of 9,387 alien detainees; five  
7 were Service Processing Centers owned by the federal government and privately  
8 operated through contractors, housing an average daily population of 3,799 alien  
9 detainees; and 14 were dedicated (or largely dedicated) IGSA's, housing an average  
10 daily population of 12,635 alien detainees.<sup>1</sup>

11 12. Ordinarily, when ICE needs private contractors or privately owned  
12 detention facilities to assist ERO in its detention of removable aliens, ERO begins by  
13 identifying a requirement (i.e., an approximate amount of detention space in a certain  
14 geographic area) and creates a written performance work statement that describes in  
15 detail the detention services ERO wants to acquire. ICE then creates a solicitation  
16 package that is publicly posted, inviting interested contractors to submit offers. ICE  
17 then evaluates the offers against the evaluation criteria that were included in the  
18 solicitation package. Based on the final evaluation, ICE awards the contract to the  
19 offeror that represents the best value to the government. It typically takes 9 to 12  
20 months from the beginning of preparation for ICE to award a contract, but this time  
21 can be longer or shorter depending on the circumstances.

22  
23  
24  
25  
26 <sup>1</sup> The remaining average daily population (approximately 24,344 alien detainees)  
27 was housed in other facilities that are not entirely dedicated to immigration detention,  
28 namely: 143 non-dedicated IGSA facilities, 121 facilities under intergovernmental  
agreements with other federal agencies, and 20 other facilities, such as BOP facilities.

1 **III. ICE's Detention Facilities and Contracts in California**

2 13. In California, ICE does not operate any detention facilities; ICE  
3 currently uses four privately owned and privately operated Contract Detention  
4 Facilities: Mesa Verde ICE Processing Center, Adelanto ICE Processing Center,  
5 Imperial Regional Detention Facility, and the Otay Mesa Detention Center. In Fiscal  
6 Year 2019, these four Contract Detention Facilities housed an average of 3,721 ICE  
7 detainees each day, but they have a total capacity of approximately 5,000 detention  
8 beds, not including the additional beds that will become available in August 2020.

9 14. Although ICE currently owns a Service Processing Center in El Centro,  
10 California, ICE has not used this facility since October 2014. ICE recently agreed to  
11 allow the USMS to use the facility upon its renovation, which USMS completed in  
12 September 2019.

13 15. The Mesa Verde ICE Processing Center is owned and operated by The  
14 GEO Group, Inc. ICE awarded a contract for detention services at this Contract  
15 Detention Facility on December 19, 2019. The contract contemplates a total period  
16 of performance by the contractor extending from December 20, 2019 to December  
17 19, 2034, with the base period of performance covering December 20, 2019 to  
18 December 19, 2024, and two subsequent five-year periods of performance that may  
19 be exercised by ICE at its option. The contract also contemplates that the contractor  
20 will provide detention services at two additional facilities, Golden State Modified  
21 Community Correctional Facility and Central Valley Modified Community  
22 Correctional Facility. The contract provides that up to 400 detention beds will be  
23 available at the Mesa Verde ICE Processing Facility. The contract further provides  
24 that up to 700 detention beds will be available at each of the Golden State Modified  
25 Community Correctional Facility and the Central Valley Modified Community  
26 Correctional Facility beginning on August 20, 2020. The detention services provided  
27 under this contract service the San Francisco area.  
28

1           16.    The Adelanto ICE Processing Center is also owned and operated by  
2 The GEO Group, Inc. ICE awarded a contract for detention services at this  
3 Contract Detention Facility on December 19, 2019. The contract contemplates a  
4 total period of performance by the contractor running from December 20, 2019 to  
5 December 19, 2034, with the base period of performance from December 20, 2019  
6 to December 19, 2024, and two subsequent five-year periods of performance that  
7 may be exercised by ICE at its option. The contract also contemplates that the  
8 contractor will provide detention services at one additional facility, Desert View  
9 Modified Community Correctional Facility. The contract provides that up to 1,940  
10 detention beds will be available at the Adelanto detention facility. The contract  
11 further provides that up to 750 detention beds will be available at the Desert View  
12 Modified Community Correctional Facility beginning on August 20, 2020. The  
13 detention services provided under this contract service the Los Angeles area.

14           17.    The Imperial Regional Detention Facility is owned and operated by the  
15 Management and Training Corporation. ICE awarded a contract for detention  
16 services at this Contract Detention Facility on December 19, 2019. The contract  
17 contemplates a total period of performance by the contractor running from  
18 December 20, 2019 to December 19, 2034, with the base period of performance  
19 from December 20, 2019 to December 19, 2024, and two subsequent five-year  
20 periods of performance that may be exercised by ICE at its option. The contract  
21 provides that up to 704 detention beds will be available at the Imperial Regional  
22 Detention Facility. The detention services provided under this contract service the  
23 San Diego area.

24           18.    The Otay Mesa Detention Center is owned and operated by CoreCivic.  
25 ICE awarded a contract for detention services at this Contract Detention Facility on  
26 December 19, 2019, which also provides that USMS may use the Otay Mesa  
27 Detention Center to house federal inmates. The contract contemplates a total period  
28

1 of performance by the contractor running from December 20, 2019 to December 19,  
2 2034, with the base period of performance from December 20, 2019 to December  
3 19, 2024, and two subsequent five-year periods of performance that may be exercised  
4 by ICE at its option. The contract provides that ICE will have up to 1,994 detention  
5 beds available in the Otay Mesa Detention Center. The detention services provided  
6 under this contract service the San Diego area.

7 19. ICE does not lease and operate any detention facility in California that  
8 is privately owned. ICE also does not contract, and has never contracted, with  
9 school facilities used for the disciplinary detention of a pupil in California. Nor does  
10 ICE contract for facilities in California providing educational, vocational, medical, or  
11 other ancillary services to an inmate in the custody of, and under the direct  
12 supervision of, ICE personnel. ICE houses only aliens subject to detention under its  
13 civil immigration detention authority in its immigration detention facilities. It does  
14 not house inmates in such facilities.

15 **IV. Assembly Bill 32's Impact on ICE Contracts**

16 20. On October 11, 2019, the Governor of California signed Assembly Bill  
17 32 (A.B. 32). Under A.B. 32, no private detention facility may be operated in  
18 California. A.B. 32 further establishes that private detention facilities operating  
19 under a valid contract with a governmental entity that was in effect before January 1,  
20 2020, such as the four contracts discussed above, may only continue operating for  
21 the duration of the contract, not to include any extensions made to or authorized by  
22 that contract. The prohibitions established by A.B. 32 will adversely impact ICE's  
23 efforts to successfully enforce federal immigration laws.

24 21. Due to A.B. 32, ICE has been impaired from strategically planning at a  
25 national level for the contracts required to ensure there is sufficient capacity in  
26 California to enforce our nation's immigration laws. Additionally, A.B. 32 prevents  
27  
28

1 ICE from quickly ramping up or down its bed-space requirements based on the  
2 actual need at any given time, costing ICE much needed flexibility in its operations.

3 22. A.B. 32's prohibition on privately operated immigration detention  
4 facilities in California will adversely affect ICE operations and could force ICE to  
5 relocate thousands of aliens to detention facilities outside of California. In Fiscal  
6 Year 2019, ICE arrested and detained 44,255 aliens in California. Without sufficient  
7 capacity in California, the transfer of thousands of aliens from California to detention  
8 facilities in other states throughout the year would strain capacity and resources in  
9 other locations. The required transfer of all such aliens from California to other  
10 states could also adversely impact conditions of detention, security for detained aliens  
11 across the United States, and create a greater strain on, and danger to, federal  
12 contractors and ICE personnel assigned to the facilities.

13 23. In addition, immigration detention facilities in other states could  
14 become overcrowded, which, in turn, would adversely impact case processing times  
15 and strain the federal resources of U.S. Citizenship and Immigration Services, the  
16 Department of Justice's Executive Office for Immigration Review, and ICE  
17 attorneys and officers assigned to adjudicate and manage these larger dockets.

18 24. Although A.B. 32 does not foreclose the *federal* operation of  
19 immigration detention facilities in California, this alternative is not a practical or legal  
20 possibility. ICE faces statutory requirements regarding the order in which it must  
21 consider detention options. *See* 8 U.S.C. § 1231(g)(2) ("Prior to initiating any project  
22 for the construction of any new detention facility for the Service,  
23 the Commissioner shall consider the availability for purchase or lease of any existing  
24 prison, jail, detention center, or other comparable facility suitable for such use.").  
25 Contracts are awarded for a specific number of detention beds because the  
26 population of detained removable aliens in the United States increases and decreases  
27 every day.

28

1           25. If ICE is unable to contract for detention space with private detention  
2 facilities, it would be forced to purchase or construct immigration detention facilities.  
3 Constructing and opening a new facility would almost certainly be more expensive  
4 and time-consuming than entering into a contract with a private company for an  
5 existing facility and staff. Requiring ICE to construct and operate its own facilities  
6 would also mean that, should capacity needs decrease prior to construction  
7 completion, ICE would then be paying for space it does not use. The potential result  
8 of such a scenario is that facilities would be constructed at taxpayer expense to  
9 accommodate for a projected demand that may never materialize due to natural  
10 migration flows or other circumstances. Those facilities could then become idle, fall  
11 into disuse, and remain vacant for an extended period. And, if the demand for  
12 detention beds later increases, ICE would likely need to invest significant taxpayer  
13 dollars to prepare these facilities for use.

14           26. Accordingly, a responsible and efficient administration of public  
15 resources and funds requires awarding contracts based on bed space needs because,  
16 when the demand for immigration detention space is reduced, or when other  
17 unforeseen factors require ICE to adjust its detention operations in a particular area,  
18 ICE can rescind a contract awarded to a Contract Detention Facility or reduce its use  
19 of beds afforded by federal contractors.

20           27. If A.B. 32 is permitted to remain in place, ICE would need to begin  
21 planning for a lack of detention space in California long before its contracts  
22 expire. ICE would likely need to begin a competitive solicitation for new private  
23 contracts in other states to replace the lost capacity in California. And, as noted  
24 above, it typically takes 9 to 12 months from the beginning of preparation for ICE to  
25 award a contract. The new vendor would also require at least three months after the  
26 contract award to hire and train staff to operate the facility. If new construction is  
27  
28

1 required as part of the solicitation, it could take nearly three years before ICE is able  
2 to gain access to the beds at the new detention facilities.

3

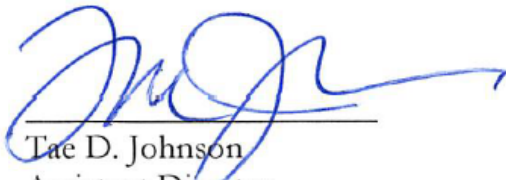

4 Executed on this 23rd day of January, 2020.

Case No. 3:20-cv-00154-JLS-WVG

**DECLARATION OF GREGORY J.  
 ARCHAMBEAULT IN SUPPORT  
 OF PRELIMINARY AND  
 PERMANENT INJUNCTION**

[Motion; Memorandum in Support;  
 Declarations of John Sheehan, Pamela  
 L. Jones, Jon Gustin, Tae D. Johnson,  
 and Gregory J. Archambeault]

Hearing Date: April 23, 2020  
 Hearing Time: 1:30 p.m.  
 Courtroom: 4D

26  
27  
28

1 I, GREGORY J. ARCHAMBEAULT, declare the following under 28 U.S.C.  
2 § 1746, and state that under penalty of perjury the following is true and correct to the  
3 best of my knowledge and belief:

4 **I. Personal Background**

5 1. I am employed by the U.S. Department of Homeland Security (DHS),  
6 U.S. Immigration and Customs Enforcement (ICE), Enforcement and Removal  
7 Operations (ERO), as the acting Assistant Director for Field Operations at ICE  
8 Headquarters in Washington D.C. I have served in this position since September  
9 2019.

10 2. ERO Field Operations provides guidance and coordination between  
11 ERO's Field Offices and their various sub-offices to ensure the efficient operation of  
12 numerous programs and initiatives through which ERO identifies, arrests, detains as  
13 appropriate, presents for prosecution, and removes aliens subject to final orders of  
14 removal. As acting Assistant Director for Field Operations, I direct and maintain  
15 oversight of 24 ERO Field Offices and their respective sub-offices, located  
16 throughout the United States, including ICE detention facilities.

17 3. Immediately prior to being appointed to my current position, I served  
18 as the Field Office Director for ERO's San Diego Field Office from February 2013  
19 to September 2019, where I was responsible for all ERO operations in San Diego  
20 and Imperial Counties of Southern California, including the supervision of numerous  
21 ERO field officers and supervisors charged with the responsibility of identifying,  
22 arresting, detaining, pursuing for prosecution, and removing aliens in violation of  
23 federal immigration statutes and regulations.

24 4. I began my federal law enforcement career with the former U.S.  
25 Immigration and Naturalization Service (INS) in 1987. Since then, I served in  
26 numerous operational and managerial positions within ICE and the former INS.  
27 Specifically, I have served as an INS Special Agent, a Regional Liaison in the INS  
28

1 Attaché Offices in Greece and India, a Supervisory Special Agent and a Resident  
2 Agent in Charge in the ICE Office of Investigations in Springfield, Illinois, a Unit  
3 Chief for ERO's Headquarters National Fugitive Operations Program, a Deputy  
4 Assistant Director for the ERO Headquarters Criminal Alien Division, and as the  
5 Assistant Director for Secure Communities and Enforcement for ERO  
6 Headquarters.

7 5. Due to my experience and the nature of my official duties, I am  
8 familiar with the operational needs of the 24 ERO Field Offices, including those  
9 located in California.

10 **II. Assembly Bill 32's Impact on ICE Operations**

11 6. ICE is legally charged with removing aliens who lack lawful immigration  
12 status or are otherwise removable from the United States under the immigration  
13 laws. Detention is an important and necessary part of immigration enforcement.  
14 Aliens who are in removal proceedings, including those with appeals pending before  
15 the Board of Immigration Appeals, are subject to detention in ICE custody, and  
16 certain categories of such aliens are subject to mandatory detention under the  
17 immigration laws. Aliens whose cases are pending before federal courts of appeals,  
18 as well as aliens with final orders of removal who are being processed for removal  
19 from the United States, are also detained in ICE custody. ICE detains aliens it  
20 apprehends, as well as aliens turned over from the custody of U.S. Customs and  
21 Border Protection.

22 7. In California, ICE has contracts with private companies that house  
23 removable aliens in privately owned and privately operated Contract Detention  
24 Facilities. ICE currently uses four Contract Detention Facilities, which have a total  
25 capacity of approximately 5,000 detention beds. The Imperial Regional Detention  
26 Facility and Otay Mesa Detention Center service the San Diego area. The Mesa  
27 Verde ICE Processing Center services the San Francisco area. And the Adelanto  
28

1 ICE Processing Center services the Los Angeles area. The contracts provide for  
2 approximately 2,150 additional detention beds, which will become available at the  
3 Desert View Modified Community Correctional Facility, the Golden State Modified  
4 Community Correctional Facility, and the Central Valley Modified Community  
5 Correctional Facility in August 2020.

6 8. Assembly Bill 32 (A.B. 32) will prohibit ICE from extending current  
7 contracts or awarding new contracts for private detention facilities in California,  
8 including for facilities currently in use when those contracts expire. And due to A.B.  
9 32's restrictions on the expansion of any future detention capacity in California, ICE  
10 will ultimately need to confront a lack of available bed space in California. As a  
11 result, ICE will not only need to relocate detainees to out-of-state facilities, but  
12 increase the number of out-of-state transfers daily since the amount of available bed  
13 space cannot be adjusted to accommodate need within California.

14 9. The transportation of aliens can only be effectuated through two  
15 avenues: ground or air transport.

16 10. Ground transport would limit detention options to the neighboring  
17 states of Arizona and Nevada, which are already experiencing a strain on their  
18 immigration detention capacity. Currently, ICE has two contracts for ground  
19 transportation that collectively cover the state of California; Las Vegas, Nevada; and  
20 Phoenix, Arizona. Furthermore, ICE would not be able to take advantage of current  
21 transportation contracts to transfer detainees to other locations because these  
22 contractors are limited to the transportation areas specified in their contracts. ICE  
23 would need to modify these contracts to include additional locations or geographic  
24 areas, and possibly alternative modes of transportation, such as air transport,  
25 resulting in increased costs and personnel for detainee transfers to out-of-state  
26 facilities. If ICE is unable to modify the contracts, and bed space cannot be secured  
27  
28

1 outside the state, ICE will be unable to continue to detain criminal aliens due to an  
2 inability to house them, increasing the risk to public safety.

3 11. Air transportation would also be problematic because aliens would need  
4 to be transferred on a daily basis from California—where they are apprehended—to  
5 out-of-state facilities where they will be detained. This increased daily transport to  
6 and from California would place an enormous strain on ICE Air Operations (IAO)  
7 and require significantly more frequent transport than IAO currently supports,  
8 causing increased costs and limits on availability of personnel to perform other  
9 operational duties.

10 12. Given the strain on ground and air transport, ICE may also be forced to  
11 utilize ICE personnel to conduct detainee transfers. Using ICE personnel to  
12 transport aliens outside of California would gravely affect ICE's daily enforcement  
13 operations because ICE would need to divert ERO staff to transportation duties,  
14 instead of administrative, arrest, detention, and removal functions. Due to ICE's  
15 finite staff and resources, diverting ICE personnel to conduct detainee transfers  
16 would likely result in fewer apprehensions of criminal aliens and therefore increase  
17 the risk to public safety.

18 13. The drastic increase in transportation would also heighten security  
19 concerns for detainees, federal personnel, and the public. Frequent transportation of  
20 detainees increases the amount of time these individuals are outside the heightened  
21 security of a detention facility. And because this frequent transportation may be  
22 regularly scheduled, the public could gain additional opportunities to gather  
23 intelligence on ICE operations, thus increasing the chances of an adversarial  
24 encounter during transport. Detainees with medical or mobility concerns may be  
25 further adversely affected by frequent travel.

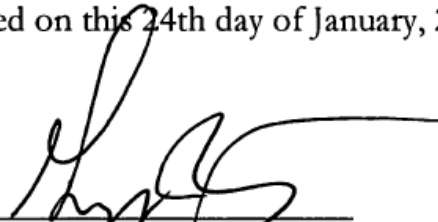

26 14. Relocation to neighboring states could also cause other harm to ICE, its  
27 detainees, and the public. ICE facilities in neighboring states could become  
28

1 overcrowded due to the influx of detainees from California. And the relocation  
2 outside California would also greatly reduce the ability of detainees, with families in  
3 California, to access their families and other visitors.

4 15. This out-of-state relocation and lack of family access for detainees with  
5 families in California would also slow immigration proceedings. Generally, an alien  
6 uses his or her family members to gather information needed in a removal  
7 proceeding. Because A.B. 32 would force aliens to be housed outside California—  
8 and possibly at great distances from their families—A.B. 32 may delay detainees’  
9 ability to gather evidence if they have family in California. And when evidence is not  
10 collected in a timely fashion, immigration bond hearings and removal proceedings  
11 may be delayed.

12 16. A.B. 32 will also pose a significant obstacle to ICE’s compliance with  
13 federal court orders that limit or foreclose ICE’s ability to transfer aliens outside of  
14 certain areas where they are originally encountered. For example, the permanent  
15 injunction issued in *Orantes-Hernandez v. Meese*, 685 F. Supp. 1488 (C.D. Cal. 1988),  
16 prohibits ICE from transferring unrepresented Salvadorian nationals from the district  
17 of their apprehension for at least seven days. If A.B. 32 is permitted to remain in place,  
18 it will result in ICE being unable to detain unrepresented Salvadoran nationals  
19 apprehended in California in the district of their apprehension for the time period  
20 required in the *Orantes* injunction.
