COMPLAINT

(For Violation of Section 2 of the Sherman Act)

The United States of America, acting under the direction of the Attorney General of the United States, brings this civil action to obtain equitable and other relief as is appropriate against the Defendants named herein and complains and alleges as follows:

I.

JURISDICTION AND VENUE

1. This Complaint is filed and this action is instituted by the United States under Section 4 of the Sherman Act, as amended, 15 U.S.C. § 4, in order to prevent and restrain the continuing violation by Defendants, as hereinafter alleged, of

Section 2 of the Sherman Act, as amended, 15 U.S.C. § 2. This Court also has jurisdiction over this matter pursuant to 28 U.S.C. §§ 1331 and 1337.

2. Venue is proper in this district under Section 12 of the Clayton Act, 15 U.S.C. § 22, and under 28 U.S.C. § 1391 because Defendant Waste Management of Georgia, Inc., d/b/a Waste Management of Savannah, transacts business and is found within this district, and because Defendants Waste Management, Inc., and Waste Management of Louisiana, Inc., d/b/a Waste Management of Central Louisiana, consent to personal jurisdiction in this proceeding.

II.

DEFINITIONS

3. "Savannah market" means Chatham, Effingham, and Bryan Counties, Georgia.

4. "Central Louisiana market" means Rapides, Natchitoches, Avoyelles, Red River, Winn and Sabine Parishes, Louisiana.

III.

DEFENDANTS

5. Waste Management, Inc. ("WMI") is a corporation organized and existing under the laws of the State of Delaware with its principal offices in Oak Brook, Illinois. WMI is a subsidiary of WMX Technologies, Inc., and is engaged in providing solid waste hauling services throughout North America. WMI and its affiliates had total revenues of over \$5.8 billion in their 1994 fiscal year. WMI is engaged in interstate commerce and in

activities substantially affecting interstate commerce.

6. Waste Management of Georgia, Inc. ("WMG"), d/b/a Waste Management of Savannah, is a corporation organized and existing under the laws of the State of Georgia with its principal offices in Savannah, Georgia. WMG is engaged in providing solid waste hauling services in the State of Georgia and had total revenues of over \$14 million in its 1994 fiscal year. WMG is engaged in interstate commerce and in activities substantially affecting interstate commerce.

7. Waste Management of Louisiana, Inc. ("WML"), d/b/a Waste Management of Central Louisiana, is a corporation organized and existing under the laws of the State of Louisiana with its principal offices in Alexandria, Louisiana. WML is engaged in providing solid waste hauling services in the State of Louisiana and had total revenues of over \$3 million in its 1994 fiscal year. WML is engaged in interstate commerce and in activities substantially affecting interstate commerce.

IV.

TRADE AND COMMERCE

8. Solid waste hauling involves the collection of paper, food, and other solid waste from residential, commercial and industrial customers, and the transporting of that waste to a landfill or other disposal site. These services may be provided by private haulers directly to residential, commercial and industrial customers, or indirectly through municipal contracts or franchises.

9. Service to commercial customers accounts for a large percentage of total hauling revenues. Commercial customers include restaurants, large apartment complexes, retail and wholesale stores, office buildings and industrial parks. These customers typically generate a substantially larger volume of waste than do residential customers. Waste generated by commercial customers is usually collected in metal containers of two to ten cubic yards provided by their hauling firm. Two to ten cubic yard containers are called "small containers." Small containers are collected primarily by front-end load vehicles that lift the containers over the front of the truck by means of a hydraulic hoist and empty them into the storage section of the vehicle, where the waste is compacted. Service to commercial customers using 2 to 10 cubic yard containers is called "small containerized hauling service."

10. Solid waste hauling firms also provide service to residential and industrial (or "roll-off") customers. Residential customers, typically households and small apartments that generate small amounts of waste, use noncontainerized solid waste hauling service, normally by placing plastic bags or trash cans at curbside. Industrial or roll-off customers include factories and construction sites. These customers either generate non-compactible waste, such as concrete or building debris, or very large quantities of compactible waste. They deposit their waste in very large containers (usually 20-40 cubic yards) that are loaded onto a roll-off truck and are transported

individually to the disposal site where they are emptied before being returned to the customer's premises. Some roll-off customers, like shopping malls, use large, roll-off containers with compactors. This type of customer generally generates compactible waste, like cardboard, in very great quantities. It is more economical and convenient for this type of customer to use roll-off service with a compactor than to have a number of small containers picked up multiple times a week.

V.

THE RELEVANT MARKETS AND DEFENDANTS' MARKET POWER

11. The relevant product market is small containerized hauling service. There are no practical substitutes for small containerized hauling service. Small containerized hauling service customers will not generally switch to noncontainerized service in the event of a price increase, because it is too impractical and costly for them to bag and carry their volume of trash to the curb for hand pick-up. Similarly, roll-off service is much too costly and the container takes up too much space for most small containerized hauling service customers. Only customers that generate the largest volumes of compactible solid waste can economically use roll-off service, and for such customers, roll-off service is usually the only viable option.

12. The relevant geographic markets are the Savannah market and the Central Louisiana market. Solid waste hauling services are generally provided in very localized areas. Route density (a large number of customers that are close together) is important

for small containerized solid waste hauling firms to be profitable. In addition, it is not economically efficient for heavy trash hauling equipment to travel long distances without collecting significant amounts of waste, making it impractical for a hauler to serve major metropolitan areas from a distant base. Haulers, therefore, generally establish garages and related facilities within each major local area served.

13. Defendant WMG has market power in small containerized service in the Savannah market. WMG has maintained a very high market share since at least 1991--consistently in excess of 60 percent.

14. Defendant WML has market power in small containerized hauling service in the Central Louisiana market. WML has maintained a very high market share since at least 1988--consistently in excess of 60 percent.

15. Substantial barriers to entry and to expansion exist in the Savannah and in the Central Louisiana markets. A new entrant or small incumbent cannot compete effectively until it obtains (1) minimum efficient scale; (2) enough customers efficiently to use its trucks; and (3) route density sufficient to operate profitably in the relevant geographic markets. Until those barriers are overcome, the new entrant or small incumbent will have higher operating costs than Defendants in the relevant geographic markets, may not operate at a profit, and will be unable effectively to constrain pricing by Defendants in those markets.

16. Defendant WMG in the Savannah market and Defendant WML in the Central Louisiana market have entered into written contracts with the vast majority of their existing small container customers in those markets. Many of these contracts contain terms that, when taken together in the relevant markets where Defendants have market power, make it more difficult and costly for customers to switch to a competitor of Defendants and allow Defendants to bid to retain customers approached by a competitor. These contracts enhance and maintain Defendants' market power in the relevant markets by significantly raising the cost and time required by a new entrant or small incumbent firm to build its customer base and obtain efficient scale and route density. Therefore, Defendants' use and enforcement of these contracts in the Savannah and Central Louisiana markets raise entry barriers in those markets. Those contract terms are:

a. a provision giving Defendants the right to collect and dispose of all the customers' solid waste and recyclables;

b. an initial term of three years;

c. a renewal term of three years that automatically renews unless the customer sends Defendants a written notice of cancellation by certified mail more than 60 days from the end of the initial or renewal term;

d. a term that requires a customer that terminates the contract at any other time to pay Defendants, as liquidated damages, its most recent monthly charge times six (if the remaining term is six or more months) or its most recent monthly

charge times the number of months remaining under the contract (if the remaining term is less than six months); and

e. a "right to compete" clause that requires the customer to give Defendants notice of any offer by or to another solid waste hauling firm or requires the customer to give Defendants a reasonable opportunity to respond to such an offer for any period not covered by the contract.

17. The appearance and format of the contracts enhances Defendants' ability to use the contracts to maintain their market power in the Savannah and Central Louisiana markets because the provisions that make it difficult for a customer to switch to a competing hauler are not obvious to the customer.

VI.

VIOLATION ALLEGED

18. Defendants have attempted to monopolize the aforesaid trade and commerce in small containerized solid waste hauling service in the Savannah and Central Louisiana relevant geographic markets, respectively, in violation of Section 2 of the Sherman Act.

19. Pursuant to and in effectuation of the aforesaid attempts to monopolize, Defendants, acting with specific intent, used and enforced contracts containing restrictive provisions to exclude and constrain competition and to maintain and enhance their market power in small containerized solid waste hauling service in the Savannah and Central Louisiana markets.

20. The aforesaid violations have had, among other things, the following effects: In the context of Defendants' large market shares and market power, Defendants' use and enforcement of long-term customer contracts in the relevant markets has had anticompetitive and exclusionary effects. The contracts enabled Defendants significantly to increase the barriers to entry facing new entrants and barriers to expansion facing small incumbents into small containerized solid waste hauling service in the Savannah and Central Louisiana markets. These contract terms make it difficult for entrants and small incumbents to achieve efficient scale, a sufficient customer base, and the route density necessary effectively to constrain Defendants' pricing in those relevant markets. Defendants' market power in the Savannah and Central Louisiana markets is maintained and enhanced by their use and enforcement of these contracts. As a result, there is a dangerous probability that Defendants will achieve monopoly power in the relevant markets.

21. The violations alleged in this complaint are continuing and will continue unless the relief hereinafter prayed for is granted.

VII.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff prays,

1. That the Court adjudge and decree that WMI and WMG have attempted to monopolize the interstate trade and commerce in the market for small containerized solid waste hauling service in the Savannah market in violation of Section 2 of the Sherman Act.

2. That the Court adjudge and decree that WMI and WML have attempted to monopolize the interstate trade and commerce in the market for small containerized solid waste hauling service in the Central Louisiana market in violation of Section 2 of the Sherman Act.

3. That Defendants and all persons, firms and corporations acting on their behalf and under their direction or control be permanently enjoined from engaging in, carrying out, renewing or attempting to engage, carry out or renew, any contracts, agreements, practices, or understandings in violation of the Sherman Act.

4. That Plaintiff have such other relief that the Court may consider necessary or appropriate to restore competitive conditions in the markets affected by Defendants' unlawful conduct.

5. That the Plaintiff recover the costs of this action.
