**CR** No. **15 0426**

v.

) VIOLATION: 15 U.S.C. § 1  
) Price Fixing

NEC TOKIN CORPORATION,

Defendant.

INFORMATION

The United States of America, acting through its attorneys, charges:

I. DESCRIPTION OF THE OFFENSE

1. NEC TOKIN CORPORATION ("defendant" or "NEC TOKIN") is made a defendant on the charge stated below.

1           2.       From at least as early as September 1997 and continuing until in or about January  
 2       2014, coconspirators of the defendant entered into and engaged in a combination and conspiracy  
 3       to suppress and eliminate competition by fixing prices and rigging bids of certain electrolytic  
 4       capacitors in the United States and elsewhere. The combination and conspiracy engaged in by  
 5       the defendant and its coconspirators was in unreasonable restraint of interstate and foreign trade  
 6       and commerce in violation of Section 1 of the Sherman Act (15 U.S.C. § 1).

7           3.       The defendant knowingly joined and participated in the charged conspiracy from  
 8       at least as early as April 2002 until in or about December 2013.

9           4.       The charged combination and conspiracy consisted of a continuing agreement,  
 10       understanding, and concert of action among the defendant and coconspirators, the substantial  
 11       terms of which were to fix prices and rig bids of certain electrolytic capacitors.

12  
 13                                   II.     BACKGROUND

14           5.       Capacitors, also known as condensers, are a fundamental component of electrical  
 15       circuits and are used primarily to store and regulate electrical current. Electrolytic capacitors,  
 16       including aluminum and tantalum types, are a major sub-category of capacitors. Electrolytic  
 17       capacitors are ubiquitous and are found in many products that use electricity, run on a battery, or  
 18       plug into a socket. Desktop and notebook computers, flat-screen televisions, DVD players,  
 19       video and still digital cameras, gaming systems, car engine and airbag systems, home appliances,  
 20       office equipment, and motherboards and other printed circuit boards are some of the products  
 21       that contain electrolytic capacitors.

22  
 23                                   III.   DEFENDANT AND COCONSPIRATORS

24           6.       During the time period identified in paragraph 2, NEC TOKIN, a corporation  
 25       organized and existing under the laws of Japan, manufactured tantalum electrolytic capacitors  
 26       sold in the United States and elsewhere.

27       //

28       //

1           7.       During the time period identified in paragraph 2, NEC TOKIN's coconspirators  
2 included business organizations that manufactured electrolytic capacitors sold in the United  
3 States and elsewhere.

4           8.       Various business organizations and individuals, not made defendants in this  
5 Information, participated as coconspirators in the offense charged in this Information and  
6 performed acts and made statements in furtherance of it.

7           9.       Whenever in this Information reference is made to any act, deed, or transaction of  
8 a business organization, the allegation means that the business organization engaged in the act,  
9 deed, or transaction by or through its officers, directors, employees, agents, or other  
10 representatives, or by or through the officers, directors, employees, agents, or other  
11 representatives of its majority-owned and -controlled subsidiaries, while they were actively  
12 engaged in the management, direction, control, or transaction of its business or affairs.

13  
14                           IV.     MEANS AND METHODS OF THE CONSPIRACY

15           10.     For the purpose of forming and carrying out the charged combination and  
16 conspiracy, the defendant and coconspirators did those things that they combined and conspired  
17 to do, including, among other things:

18                   a)     participated at times in meetings, conversations, and communications with  
19 each other in China, Germany, Japan, Singapore, Taiwan, the United States, and  
20 elsewhere to discuss prices and bids of certain electrolytic capacitors;

21                   b)     agreed during various meetings, conversations, and communications to  
22 fix, increase, maintain, and stabilize prices and rig bids of certain electrolytic capacitors;

23                   c)     negotiated prices, submitted bids, and issued price announcements for  
24 certain electrolytic capacitors in accordance with the agreements reached;

25                   d)     sold, distributed, and accepted payments for electrolytic capacitors at  
26 collusive, noncompetitive prices and bids in accordance with the agreements reached;

27                   e)     collected, exchanged, monitored, and discussed information on prices,  
28 bids, sales, supply, demand, shipping, and the production of electrolytic capacitors for the

1 purpose of reaching agreements on prices and bids and monitoring and enforcing  
2 adherence to the agreements reached;

3 f) authorized, ordered, and consented to the participation of subordinate  
4 employees in the conspiracy; and

5 g) took steps to conceal the conspiracy and conspiratorial meetings,  
6 conversations, and communications through various means, such as using code names to  
7 refer to coconspirators, limiting and discouraging retention and distribution of documents  
8 reflecting conspiratorial contacts, and providing misleading justifications for prices and  
9 bids provided to customers to cover up their collusive conduct.

10 These means and methods of the conspiracy all involved electrolytic capacitors sold to customers  
11 located within the United States and elsewhere, including to customers that manufactured and/or  
12 sold in the United States under major United States and other brands significant quantities of  
13 electronic goods containing electrolytic capacitors, such as computers, televisions, and gaming  
14 systems.

## 15 16 V. TRADE AND COMMERCE

17 11. During the time period identified in paragraph 2, NEC TOKIN and its  
18 coconspirators manufactured electrolytic capacitors in Japan, Thailand, China, the United States,  
19 and elsewhere and sold them in the United States or for delivery to the United States. The  
20 charged combination and conspiracy involved trade or commerce within the United States and  
21 U.S. import trade or commerce in electrolytic capacitors.

22 12. During the time period identified in paragraph 2, NEC TOKIN and its  
23 coconspirators also sold foreign-manufactured electrolytic capacitors outside the United States  
24 for incorporation into other products, including computers, televisions, and gaming systems, that  
25 were sold in or for delivery to the United States. The charged combination and conspiracy had a  
26 direct, substantial, and reasonably foreseeable effect on trade or commerce within the United  
27 States or U.S. import trade or commerce in these electrolytic capacitor-containing products, and  
28 that effect, in part, gives rise to this charge.

1           13.     During the time period identified in paragraph 2, NEC TOKIN and its  
2 coconspirators sold and shipped substantial quantities of electrolytic capacitors in a continuous  
3 and uninterrupted flow of interstate and U.S. import trade or commerce from the United States  
4 and foreign countries to customers located in various states in the United States, including states  
5 other than where the electrolytic capacitors were manufactured. In addition, substantial  
6 quantities of equipment and supplies necessary for the manufacture, sale, and distribution of  
7 electrolytic capacitors, as well as substantial payments for such electrolytic capacitors sold by  
8 NEC TOKIN and its coconspirators, traveled in interstate and U.S. import trade or commerce.  
9 During the time period identified in paragraph 2, the business activities of NEC TOKIN and its  
10 coconspirators that are the subject of this Information were within the flow of, and substantially  
11 affected, interstate and U.S. import trade or commerce. During the time period identified in  
12 paragraph 2, the charged combination and conspiracy had a substantial and intended effect in the  
13 United States, including on trade or commerce within the United States and U.S. import trade or  
14 commerce in electrolytic capacitors and products containing electrolytic capacitors.

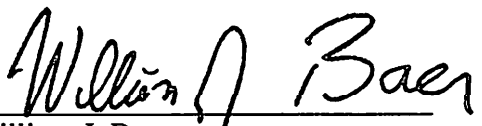

15  
16                                   VI.     JURISDICTION AND VENUE

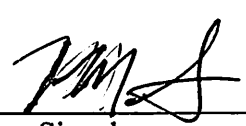

17           14.     The combination and conspiracy charged in this Information was carried out, in  
18 part, in the Northern District of California, and continued within the five years preceding the  
19 return of this Information.
