To Whom it May Concern,

There is no one more predatory than Amazon.com. It doesn't matter how cheaply consumers can buy books, if you have effectively wiped out the industry that vets and produces those books. As an author of four mysteries, I can tell you this is an incredibly hard business that favors the already published big names. The only variety of literature is introduced by book and mortar bookstores, where consumers come in and browse. Amazon is DESTROYING the publishing business. It's devastating to authors. If you destroy publishing, you destroy the vetting of quality writing. You will be left with unedited, unveiled, self-published novels and ten to twenty big name authors.

Amazon is the monopolist here. A very dangerous monopolist.

Sincerely,

Jan Brogan
