Subject: [EXTERNAL] Profits before people medicine
Date: Thursday, August 21, 2025 11:38:34 AM

Why should the same drug companies sell drugs cheaper in other countries? Because they are allowed to steal from us in the US. There is a medicine i can take for genetic hyperlipidomia but it's \$1000 / month. I can afford it but I'd rather die than feed into this corrupt system. When my older husband dies I will move to a country in which the politicians aren't bought by corporations and where healthcare is nationalized (at least 16 countries have nationalized AND BETTER) healthcare than the US. Our politicians only care about keeping their lucrative jobs, by getting millions from their rich donors. They don't give a damn about us. When a person is sick in this country, the anxiety of the illness is accompanied by the horror of the medical bills and possibly losing your home. This is inhumane and a disgrace. I hope that this corrupted system of profits before peoples health and lives, will soon be overcome by decency

Joanne Swanson
