v.

STATE OF ALASKA

#### ON BILL OF COMPLAINT

# MEMORANDUM IN SUPPORT OF JOINT MOTION FOR ENTRY OF DECREE

1. This motion arises in this original action between the United States of America and the State of Alaska involving submerged lands in the Chukchi and Beaufort Seas. On June 18, 1979, the Court granted the United States leave to file a bill of complaint setting out a dispute over the rights of the United States and Alaska to offer lands in the Beaufort Sea for mineral leasing. 442 U.S. 937. The Court appointed J. Keith Mann as a Special Master to direct subsequent proceedings and to submit such reports as he deemed appropriate. 444 U.S. 1065 (1980). The Court later referred to the Master the State of Alaska's motion for leave to file a counterclaim seeking a decree quieting its title to coastal submerged lands within two federal reservations, the National Petroleum Reserve-Alaska and the Arctic National Wildlife Range (now known as the Arctic National Wildlife Refuge). 445 U.S. 914 (1980).

The parties subsequently filed a Joint Statement of Questions Presented and Contentions of the Parties, setting forth an agreed formulation of the issues presented by the pleadings and brief statements of the parties' respective positions. Two Supplements to the Joint Statement were later filed, adding issues to the case without the formality of an amended complaint or counterclaim. As a result, 15 specific issues were placed before the Master.

From 1980 through 1986, the Master conducted extensive hearings and received briefs from the parties. On the basis of those hearings and briefs, he prepared a 565-page report resolving the 15 specific issues. On May 20, 1996, the Court received and ordered filed the Report of the Special Master. 517 U.S. 1207. The Court also directed the parties to file any exceptions. *Ibid.* Alaska filed exceptions challenging the Master's recommendations respecting: (1) the appropriate method for determining baselines in the vicinity of barrier islands along the Arctic Coast; (2) the insular status of an offshore formation known as Dinkum Sands; and (3) ownership of submerged lands within the National Petroleum Reserve-Alaska. The United States filed an exception challenging the Master's recommendation respecting ownership of submerged lands within the Arctic National Wildlife Refuge. This Court overruled Alaska's exceptions, sustained the United States' exception, and directed the parties to prepare and submit an appropriate decree, consistent with the Court's decision, for the Court's consideration. 521 U.S. 1 (1997).

2. The parties have prepared the attached Decree to effectuate the Court's decision. The Decree consists of seven paragraphs, which are summarized below.

A. Paragraph A grants Alaska's motion for leave to file a counterclaim respecting the coastal boundaries of the National Petroleum Reserve-Alaska and the Arctic National Wildlife Refuge. As noted above, Alaska filed that motion at the outset of this litigation, and the Court referred the matter to the Special Master. 445 U.S. 914 (1980). The Master concluded that the motion should be granted (Report 5-7, 503), and he provided a recommended resolution of the counterclaim (id. at 343-499, 504-505), which the Court accepted in part and rejected in part (521 U.S. at 32-61). The Court's decision implicitly endorsed the Master's recommendation that the Court should exercise jurisdiction over the counterclaim. Paragraph A of the Decree correspondingly makes clear that the Court has granted Alaska leave to file that pleading.

B. Paragraph B establishes a federal-state boundary, fixed in location, marking the seaward extent of Alaska's grant of submerged lands along Alaska's northern coast, for purposes of the Submerged Lands Act, 43 U.S.C. 1301 et seq. As a general matter, the Submerged Lands Act grants to each State coastal submerged lands within the limits of the State's seaward boundary, which, in the case of Alaska, extends to a line three geographic miles distant from its coast line. See 43 U.S.C. 1311, 1312. The United States and Alaska disagreed over the appropriate methods for determining Alaska's coast line along the Beaufort Sea. See Report of the Special Master 509-511 (Joint Statement of Questions Presented). The Master recommended a resolution of the controverted issues along this coast line. Id. at 503-505 (Summary of Recommendations).

This Court adopted the Master's recommendation, overruling Alaska's exceptions respecting the appropri-

ate treatment of fringing islands, 521 U.S. at 7-22, and of an offshore feature known as Dinkum Sands, *id.* at 22-32. Neither party excepted to the Master's recommendations on other issues concerning this portion of the coastline, at Harrison Bay and the Arco pier. The United States and Alaska have relied on the Court's decision and the Master's unchallenged recommendations, as well as uncontroverted baseline determination principles, to determine Alaska's offshore seaward boundary. The boundary line is described by the coordinates set out in Exhibit A of the Decree.<sup>1</sup>

Paragraph B makes clear that, apart from the exceptions described therein, the boundary line set out in Exhibit A establishes the offshore federal-state boundary for purposes of the Submerged Lands Act. That boundary line has particular importance in determining the respective rights of the United States and Alaska in leasing submerged lands for mineral development. The parties recognize that, under normal circumstances, changes in the physical features comprising the coast line would alter the location of the offshore boundary.

¹ The boundary line coordinates set out in Exhibit A are based on the North American Datum 1983 (NAD 83), which is a standard reference system for describing with precision locations on the surface of the Earth and is often used for delineating boundaries. (NAD 83 is equivalent to the World Geodetic System 1984 (WGS 84)). Alaska also employs the earlier North American Datum 1927 (NAD 27) for various purposes. Exhibit A therefore provides boundary line coordinates for that reference system as well. The NAD 83 coordinates are based on actual surveys, while the NAD 27 coordinates are derived by converting the NAD 83 coordinates through the use of a computer program known as CORPSCON 4.11. To the extent that any discrepancy is found between the NAD 83 coordinates and the NAD 27 coordinates, the NAD 83 coordinates provide the authoritative boundary line for purposes of the Decree.

See, e.g., United States v. Alaska, 521 U.S. at 31 (describing ambulatory boundaries). To provide greater certainty for mineral leasing and other purposes, the United States and Alaska have agreed, pursuant to Section 2(b) of the Submerged Lands Act, 43 U.S.C. 1301(b), that the boundary set out in Exhibit A shall remain fixed by the designated coordinates despite future changes in the coast line.<sup>2</sup>

In the course of preparing Exhibit A, the United States and Alaska determined that the issues resolved in this case would enable them to fix a continuous federal-state boundary from the United States-Canada border to Point Hope, in the Chukchi Sea. The parties have therefore agreed to extend the boundary to Point Hope, which encompasses the entire northern coast of Alaska.

C. Paragraph C addresses issues pertaining to mineral lease administration and the distribution of lease revenues that are currently held in escrow accounts. While this litigation was underway, the United States and Alaska wished to engage in mineral leasing activities. They therefore entered into agreements under

<sup>&</sup>lt;sup>2</sup> The Court and the United States have followed the practice of fixing offshore federal-state boundaries in other cases arising within this Court's original jurisdiction. See *United States* v. *Louisiana (Texas Boundary Case)*, 119 S. Ct. 313 (1998) (United States-Texas boundary); *United States* v. *Louisiana (Alabama and Mississippi Boundary Case)*, 507 U.S. 7 (1993) (Alabama coast line); *Mississippi* v. *United States*, 498 U.S. 16 (1990) (stipulated baseline in the vicinity of Chandeleur Sound); *United States* v. *Louisiana (Alabama and Mississippi Boundary Case)*, 498 U.S. 9 (1990) (Mississippi coast line in the vicinity of Mississippi Sound); *United States* v. *Louisiana (Louisiana Boundary Case)* 452 U.S. 726 (1981) (United States-Louisiana boundary); *United States* v. *Louisiana (Louisiana Boundary Case)*, 422 U.S. 13 (1975) (Louisiana coast line).

Section 7 of the Outer Continental Shelf Lands Act, 43 U.S.C. 1336, and Alaska Stat. §§ 38.05.020 and 38.05.137 (Michie 1998), which provide procedures for mineral leasing of submerged lands in areas in which federal or state ownership of those lands is in dispute. Under the terms of those so-called "Section 7 Agreements," lease revenues are held in income-producing escrow accounts for distribution based on the outcome of the litigation. The Section 7 Agreements resolve most of the administration and accounting issues that arise from past issuance of oil and gas leases in disputed areas. Paragraph C(1) of the Decree accordingly directs that the Section 7 Agreements shall control those matters and additionally answers certain issues that the Section 7 Agreements do not resolve.

Paragraph C(1)(a) addresses the typical situation in which an existing or former lease was properly identified as within a disputed area and was therefore subject to a Section 7 Agreement. In that situation, the terms of the Section 7 Agreement will resolve all questions of lease administration and the distribution of escrowed revenues. Paragraph C(1)(a) provides that the escrowed funds, which are held in the form of short-term, interest-bearing securities, shall be distributed to the appropriate party within 180 days of entry of the Decree.

Paragraph C(1)(b) addresses the situation in which an existing or former lease was not believed to include disputed lands on the date of lease issuance—and therefore was not made the subject of a Section 7 Agreement—but is now found to be intersected by the fixed federal-state boundary set out in Exhibit A. That situation can arise because the United States and Alaska identified potentially disputed leases on the basis of the surveys in existence at the time of the lease

offering. The United States and Alaska developed the fixed federal-state boundary set out in Exhibit A on the basis of subsequent surveys that identified previously overlooked physical features and revealed post-lease changes in the coast line. Hence, leases that were formerly believed to be undisputed may be intersected by the fixed federal-state boundary. Paragraph C(1)(b) provides that leases existing on the date of the Decree and not covered by Section 7 Agreements, but intersected by the fixed federal-state boundary, shall continue to be administered by the original lessor, who shall have the exclusive right to all past and future revenues from the lease. Following the expiration, relinquishment, or termination of the lease, future mineral leasing rights within the area that was leased shall be determined solely in accordance with the fixed federal-state boundary as described in Paragraph B of the Decree. Paragraph C(1)(b) also makes clear that, if a lease presenting this problem has expired before the date of the Decree, it shall not be affected by the fixing of the federal-state boundary and the original lessor shall retain the past revenues.

Paragraph C(1)(c) addresses the situation in which an existing or former lease was recognized as in dispute—and was therefore the subject of a Section 7 Agreement—but is also affected in an unexpected way by the fixed federal-state boundary. That situation, like the situation described in Paragraph C(1)(b), can arise because the fixed federal-state boundary is based on post-lease surveys and can intersect the lease in ways that the parties had not anticipated when they entered into the Section 7 Agreement. Paragraph C(1)(c) provides that, in that situation, an existing lease shall be administered, and escrowed funds shall be distributed, in accordance with the provisions of the

Section 7 Agreement. Following the expiration, relinquishment, or termination of the lease, future mineral leasing rights within the area that was leased shall be determined solely in accordance with the fixed federal-state boundary as described in Paragraph B of the Decree. Paragraph C(1)(c) also provides, like Paragraph C(1)(b), that former leases that expired before the date of the Decree shall not be affected by the fixing of the federal-state boundary. The revenues will be distributed in accordance with the applicable Section 7 Agreement, and future mineral leasing rights will be determined in accordance with Paragraph B.

Paragraph C(2) makes clear that the Decree is intended to address only the inter-sovereign dispute that was the subject of this original action. The Decree does not change the existing rights or obligations of the United States or the State of Alaska with respect to lessees or third parties, including rights or obligations arising from mineral production agreements.

D. Paragraph D describes the coastal boundary of the National Petroleum Reserve-Alaska in accordance with the Court's decision. Paragraph D specifically makes clear that the coastal boundary is a continuous line, as described in Executive Order No. 3739-A (Feb. 27, 1923), that extends across the entrances of small lagoons, including Peard Bay, Wainwright Inlet, the Kuk River, Kugrua Bay and River, and other small bays and river estuaries. Under the Court's decision, the submerged lands lying landward of the coastal boundary are part of the Reserve. See 521 U.S. at 32-46.

E. Paragraph E describes the coastal boundary of the Arctic National Wildlife Refuge in accordance with the Court's decision. Paragraph E specifically makes clear that the coastal boundary is a continuous line, as described in Public Land Order No. 2214, 25 Fed. Reg. 12,598 (1960), that extends across the entrances of lagoons such that all offshore bars, reefs, and islands, and lagoons that separate them from the mainland, are part of the Refuge. Under the Court's decision, the submerged lands lying landward of the coastal boundary are part of the Refuge. See 521 U.S. at 46-61.

F. Paragraph F addresses the resolution of any future disputes respecting the coastal boundaries of the National Petroleum Reserve-Alaska and the Arctic National Wildlife Refuge. As Paragraph F recognizes, those coastal boundaries are ambulatory and will therefore change if, for example, the coast line erodes or accretes. Experience has shown that the coastal features in this area are dynamic, and the coastal boundaries are therefore likely to change over time. Paragraph F anticipates that such changes will occur and makes clear that the United States and Alaska may resolve any consequent disputes through negotiation, through alternative means of dispute resolution (such as consensual mediation), or through invocation of this Court's retained jurisdiction in accordance with Paragraph G, described below. Paragraph F recognizes that the United States and Alaska may find it desirable to submit agreements resolving coastal boundary disputes to this Court for inclusion as supplements to the Decree.

G. Paragraph G recognizes that the Court retains jurisdiction to entertain further proceedings to supplement, modify, or enforce the Decree. See 521 U.S. at 62. The Court has routinely followed that practice in other original actions. See, e.g., United States v. California, 432 U.S. 40 (1977) (Second Supplemental Decree).

3. The proposed Decree properly effectuates this Court's decision in *United States* v. *Alaska*, *supra*. For the foregoing reasons, the Court should enter the proposed Decree.

Respectfully submitted.

Bruce M. Botelho Attorney General State of Alaska SETH P. WAXMAN Solicitor General

JUNE 2000

### In the Supreme Court of the United States

No. 84, Original

UNITED STATES OF AMERICA, PLAINTIFF

v.

STATE OF ALASKA

#### ON BILL OF COMPLAINT

#### PROPOSED DECREE

On June 18, 1979, the Court granted the United States leave to file a bill of complaint setting out a dispute over the rights of the United States and the State of Alaska to offer lands in the Beaufort Sea for mineral leasing. 442 U.S. 937. The Court appointed a Special Master to direct subsequent proceedings and to submit such reports as he deemed appropriate. 444 U.S. 1065 (1980). The Court later referred to the Master the State of Alaska's motion for leave to file a counterclaim seeking a decree quieting its title to coastal submerged lands within two federal reservations, the National Petroleum Reserve-Alaska and the Arctic National Wildlife Range (now known as the Arctic National Wildlife Refuge). 445 U.S. 914 (1980).

From 1980 through 1986, the Master oversaw extensive hearings and briefing. On May 20, 1996, the Court received and ordered filed the Special Master's Report. 517 U.S. 1207. On June 19, 1997, this Court overruled

Alaska's exceptions, sustained the United States' exception, and directed the parties to prepare and submit an appropriate decree, consistent with the Court's decision, for the Court's consideration. 521 U.S. 1 (1997). The parties have prepared a proposed decree and have recommended its entry by the Court.

Accordingly,

IT IS ORDERED, ADJUDGED, AND DECREED:

#### A. Alaska's Motion for Leave to File a Counterclaim

The motion of the State of Alaska for leave to file a counterclaim is granted.

# B. The Federal-State Boundary Marking the Seaward Extent of the State of Alaska's Submerged Lands Act Grant

1. Except as provided in Paragraph C below, as against the State of Alaska and all persons claiming under it, the United States has exclusive rights to explore the area lying seaward of the line described in Exhibit A hereof and to exploit the natural resources of said area. The State of Alaska is not entitled to any interest in such lands, minerals, and resources, except as may be provided by Section 8(g) of the Outer Continental Shelf Lands Act, 43 U.S.C. § 1337(g), and Paragraph C of this Decree. The State of Alaska, its privies, assigns, lessees, and other persons claiming under it are hereby enjoined from interfering with the rights of the United States in such lands, minerals, and resources.

- 2. Except as provided in Paragraph C below and except within the boundaries of the National Petroleum Reserve-Alaska and the Arctic National Wildlife Refuge, and subject to the exceptions set out in Section 5 of the Submerged Lands Act, 43 U.S.C. § 1313, as against the United States and all persons claiming under it, the State of Alaska has exclusive rights to explore the area lying shoreward of the line described in Exhibit A hereof and to exploit the natural resources of said area. The United States is not entitled to any interest in such lands, minerals, and resources except as may be provided by Paragraph C of this Decree. The United States, its privies, assigns, lessees, and other persons claiming under it are hereby enjoined from interfering with the rights of the State of Alaska in such lands, minerals, and resources.
- 3. The boundary described in Exhibit A shall remain fixed for purposes of the Submerged Lands Act.

## C. Distribution of Revenues in Escrow and Administration of Leases

- 1. The United States and the State of Alaska shall resolve accounting and administration issues arising from the past issuance of offshore oil and gas leases in disputed areas based on the following principles:
  - a. Existing and Former Leases That Are Subject to Section 7 Agreements. During the course of this litigation, the United States and the State of Alaska entered into agreements under Section 7 of the Outer Continental Shelf Lands Act, 43 U.S.C. 1336, and Alaska Stat. §§ 38.05.020 and 38.05.137, to allow mineral leasing of submerged lands in disputed areas. Under the terms of those "Section 7 Agreements," lease revenues are held in income-

producing escrow accounts for distribution based on the outcome of the litigation. No later than 180 days after entry of this Decree, the funds held in escrow accounts shall be distributed in accordance with the distribution provisions contained in the Section 7 Agreements. The United States and the State of Alaska shall carry out all applicable provisions and terms of the Section 7 Agreements and shall administer the leases in accordance with the provisions therein.

b. Existing and Former Leases That Are Affected by the Fixed Federal-State Boundary Described in Exhibit A. The United States and the State of Alaska have issued mineral leases in offshore areas that were not in dispute on the date of lease issuance and are therefore not subject to Section 7 Agreements. Those leases may be intersected, however, by the fixed federal-state boundary described in Exhibit A, which is based upon surveys conducted after the lease dates. Leases existing on the date of this Decree and not covered by Section 7 Agreements, but intersected by the fixed federal-state boundary described in Exhibit A, shall continue to be administered by the original lessor, who shall have the exclusive right to all past and future revenues from the lease. Following the expiration, relinquishment, or termination of such leases, the rights to explore and exploit the natural resources within the area that was leased shall be determined solely in accordance with Paragraph B of this Decree. The distribution of revenues from former leases that expired before the date of this Decree, that were not covered by Section 7 Agreements, but that would have been intersected by the

fixed federal-state boundary described in Exhibit A, shall not be affected by the fixing of the federal-state boundary.

- c. Existing and Former Leases That Are Both Subject to Section 7 Agreements and Affected by the Fixed Federal-State Boundary Described in Exhibit A. In the event that an existing lease is subject to a Section 7 Agreement and is intersected by the fixed federal-state boundary described in Exhibit A, the funds held in escrow shall be distributed, and the lease shall be administered, in accordance with the provisions of the Section 7 Agreement. Following the expiration, relinquishment, or termination of the lease, the rights to explore and exploit the natural resources within the area that was leased shall be determined solely in accordance with Paragraph B of this Decree. The distribution of revenues from former leases that expired before the date of this Decree, that were subject to Section 7 Agreements, but that would have been intersected by the fixed federal-state boundary described in Exhibit A, shall not be affected by the fixing of the federal-state boundary.
- 2. This Decree shall not affect the rights or obligations of the United States or the State of Alaska with respect to its lessees or third parties, whether arising from the Section 7 Agreements or otherwise. This Decree shall not affect any rights or obligations arising under present or future unitization, operating, enhanced recovery, commingling, or other similar agreements between the parties or with others.

# D. The Coastal Boundary of the National Petroleum Reserve-Alaska

The coastal boundary of the National Petroleum Reserve-Alaska is a continuous line, as described in Executive Order No. 3739-A (1923), that begins at the western bank of the Colville River and follows the highest highwater mark westerly, extending across the entrances of small lagoons, including Peard Bay, Wainwright Inlet, the Kuk River, Kugrua Bay and River, and other small bays and river estuaries, and following the ocean side of barrier islands and sandspits within three miles of shore and the ocean side of the Plover Islands, to the northwestern extremity of Icy Cape, approximately 70° 21′ N., 161° 46′ W.

# E. The Coastal Boundary of the Arctic National Wildlife Refuge

The coastal boundary of the Arctic National Wildlife Refuge is a continuous line, as described in Public Land Order No. 2214, 25 Fed. Reg. 12,598 (1960), that begins at the intersection of the International Boundary line between the State of Alaska and Yukon Territory, Canada, with the line of extreme low water of the Arctic Ocean in the vicinity of Monument 1 of said International Boundary line, and follows the line of extreme low water westerly, extending across the entrances of lagoons such that all offshore bars, reefs and islands, and lagoons that separate them from the mainland, are part of the Refuge, to Brownlow Point, at approximately 70° 10′ N., 145° 51′ W.

#### F. Resolution of Disputes Respecting the Coastal Boundaries of the National Petroleum Reserve-Alaska and the Arctic National Wildlife Refuge

The coastal boundaries of the National Petroleum Reserve-Alaska and the Arctic National Wildlife Refuge are ambulatory and will therefore migrate as a result of changes in relevant physical features. The United States and the State of Alaska may resolve disputes arising from those changes through negotiation, through alternative methods of dispute resolution, or through invocation of this Court's retained jurisdiction in accordance with Paragraph G. The United States and the State of Alaska may jointly submit to this Court, for entry as a supplement to this Decree, any agreement respecting the location of the coastal boundary of the National Petroleum Reserve-Alaska or of the Arctic National Wildlife Refuge.

#### G. Retention of Jurisdiction

The Court retains jurisdiction to entertain such further proceedings, enter such orders, and issue such writs as from time to time may be determined necessary or advisable to effectuate and supplement this Decree and the rights of the respective parties. In all other respects, this Decree is final.

#### **EXHIBIT A**

#### Location of the Fixed Offshore Boundary Between the United States of America and the State of Alaska in the Chukchi and Beaufort Seas

The following line demarks the offshore federal-state boundary in the Chukchi and Beaufort Seas, from Point Hope to the United States-Canada border. The line is fixed by coordinates based on the North American Datum 1983 (NAD 83), which is equivalent to the World Geodetic System 1984 (WGS 84). For convenience, the coordinates are also set out by reference to the North American Datum 1927 (NAD 27). The NAD 83 coordinates are authoritative for purposes of this Decree. The NAD 27 coordinates are derived by conversion using the computer program CORPSCON 4.11.
