

Register his final order determining the aggregate production quota for the basic class of controlled substance.”

The statutory timeframe applicable to actions taken under 21 U.S.C. 826(h) was enacted by Congress after DEA established its regulations in 21 CFR 1303.13. DEA has determined that it is not possible to increase the APQ within the Congressionally-mandated 30-day period while also complying with the procedures that DEA previously had

laid out in 21 CFR 1303.13. Therefore, the Administrator has determined that, in order to comply with the 30-day timeframe in 21 U.S.C. 826(h), this final order must be published without opportunity for comment and made effective immediately.

Determination of 2023 Adjusted Methylphenidate (for Sale) Aggregate Production Quota

In determining the adjustment of the 2023 methylphenidate (for sale)

aggregate production quota, DEA has taken into consideration the factors set forth in 21 CFR 1303.13(b) in accordance with 21 U.S.C. 826(a) as well as 826(h). Based on all of the above, the Administrator is adjusting the 2023 aggregate production quota for methylphenidate (for sale).

The Administrator hereby adjusts the 2023 APQ for the following schedule II-controlled substance expressed in grams of anhydrous acid or base, as follows:

Controlled substance	Current APQ (g)	Adjusted APQ (g)
Schedule II		
Methylphenidate (for sale)	41,800,000	53,283,000

The APQ for all other schedule I and II controlled substances included in the 2023 established APQ remain at this time as previously established.
