II. Summary of Impacted Collection

Section 1320.8(d), Title 5, Code of Federal Regulations (CFR), requires PHMSA to provide interested members of the public and affected entities an opportunity to comment on information collection and recordkeeping requests. This notice identifies the proposed information collection request that PHMSA will forward to OMB for approval.

The following information is provided for this information collection: (1) Title of the information collection; (2) OMB control number; (3) Current expiration date; (4) Type of request; (5) Abstract of the information collection activity; (6) Description of affected public; (7) Estimate of total annual reporting and recordkeeping burden; and (8) Frequency of collection.

PHMSA will request an emergency approval for this information collection. Upon receiving the requested six-month emergency approval by OMB, DOT will follow the normal PRA procedures to obtain extended approval for this proposed information collection.

PHMSA requests comments on the following information:

Title: Natural Gas Distribution Infrastructure Safety and Modernization Grant Program.

OMB Control Number: Will request from OMB.

Current Expiration Date: TBD.

Type of Request: Emergency approval of an information collection.

Abstract: This information collection covers the collection of applicant data from municipalities and community-owned utilities that are interested in applying to receive funds from the “Natural Gas Distribution Infrastructure Safety and Modernization Grant Program.” Solicitation for grants under the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program is voluntary. No eligible entity is required to apply. To be eligible, however, municipalities and community-owned utilities must meet all the requirements set forth in the law. Therefore, DOT must collect certain information from applicants to determine eligibility and evaluate applications. DOT must also verify the accuracy of grant requests from approved applicants, in accordance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, and other laws and regulations governing Federal financial assistance programs, including (but not limited to) the Anti-Deficiency Act, the Federal Funding Accountability and Transparency Act (FFATA), the Payment Integrity Information Act of 2019, and 2 CFR part 200, among others.

This information collection also covers the collection of data from grant recipients. PHMSA expects to receive approximately 100 applications from potential grantees. PHMSA estimates that it will take the 100 applicants approximately 65 hours to complete and submit the forms required to complete the application process for an annual burden of 6,500 hours. PHMSA estimates that 100 grant recipients will spend 5 hours, annually, submitting post-award reports for an annual burden of 500 hours. Therefore, PHMSA estimates that there will be a total of 200 responses (100 applicants + 100 grant recipients) for an aggregate total annual burden for the information collection of 7,000 hours (6,500 hours for applications + 500 hours for post-award reports).

Affected Public: Municipality and Community-owned Utilities.

Annual Burden: Estimated number of responses: 200. Estimated annual burden hours: 7,000.

Frequency of Collection: One-time application, grant reports no more than quarterly, to be followed by disbursement requests and closeout.

Comments are invited on:
(a) The need for this information collection for the proper performance of the functions of the Agency, including whether the information will have practical utility;
(b) The accuracy of the Agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
(c) Ways to enhance the quality, utility, and clarity of the information to be collected;
(d) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques; and
(e) Additional information that would be appropriate to collect to inform the reduction in risk to people, property, and the environment due to excavation damages.
