To whom it may concern.

I feel the decrees should be maintained in part. By this I mean, Film studios, distributors, etc. should not be allowed to compete with theatres, set prices, etc as was set 70 years ago. Some overhaul may be made, but not the critical points that protect the theatres.

I am from a State, Vermont, with at present no large chains. Population is very small. I own and operate two small theatres in two small towns and operate 7 screens, with seating from 120 to 40 seats per screen. Quick releasing of films already is hurting and if studios etc are given the green light, we probably would not be in business very long.

Thank you,
