Mr. Clyde Norton
Colfax Creosoting Company
Post Office Box 231
Pineville, Louisiana 71360

Dear Mr. Norton:

Re: Closure Permit LAD008184616

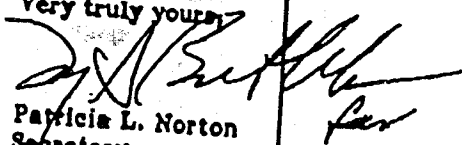

Please find attached your closure permit for the Process Water Pond area to include the One Acre Pond and the Two Smaller Ponds.

We ask that you contact Mr. Tom Patterson of this office as soon as possible of your intended construction start date.

Your cooperation during our review and processing of the closure plan is greatly appreciated.

If you have any questions concerning this matter please contact Vince Sagnibene at (504) 342-4685.

Very truly yours,

Patricia L. Norton
Secretary

RE: Colfax Creosoting Company (LAD 008184616)
Closure Status, Acceptance of Closure Certification

Dear Mr. Norton,

The Louisiana Department of Environmental Quality-Hazardous Waste Division (LDEQ-HWD) is in receipt of your closure certification dated October 23, 1985, for the Process Water Pond, One Acre Pond and the Two Smaller Ponds.

This Department has reviewed your certification and concurs that you have closed the surface impoundments in accordance with your closure plan of October 1, 1985. Since this closure requires post closure care, you must submit within thirty (30) days upon receipt of this letter an updated post-closure plan.

Your patience and cooperation during the processing of this information is appreciated. If you have any questions concerning this matter, please contact Bill Greenwich or Jeff Meyers at (504) 342-4885.

Sincerely,

John Koury

Colfax Creos. Co.
Closure Plan
July 26, 1985

A diagram of the treating cylinders and tank locations is shown in Figure 2 in Attachment 2.

CLOSURE PLAN PROCEDURES:

Colfax Creosoting Company shall keep this written closure plan at the facility. This plan identifies the steps necessary to completely close the process water pond area.

The company shall remove free water from the ponds as required by pumping the water with an existing pump and line to the City of Pineville sewer system. This system shall be kept in operation as long as possible so that rainwater may be handled by the same method. When the second small pond is removed from service, rainwater shall be handled in the working area by an existing portable pump and line. The water shall be pumped into a company tank truck and hauled to the wood preserving plant. The water will be discharged into the process water system for preservative recovery and treated water discharge. The site shall be dewatered as appropriate.

The company shall continue to remove quantities of usable sludge from the impoundments as feasible. The material shall be hauled to the recovery system at the wood preserving plant.

The company has contracted with Marine Shell Processors, Inc., a recycling facility at Morgan City, Louisiana. The contractor shall excavate the sludge and contaminated soil from the facility and transport the material to the plant in Morgan City. All transportation shall be handled by approved haulers using appropriate manifests for each load.

When removal is completed, local uncontaminated select material shall be used as fill to within contours shown on Drawing CCC-7. The select fill material shall be compacted and graded evenly over the site and two feet of clay shall be spread and compacted over the material to match the contours shown in Drawing CCC-7. The clay and select material shall be obtained from on site and compacted in six inch lifts.

One foot of top soil shall be added to the top of the clay. The area will be fertilized and planted with grass seed to the specifications of the local county agricultural agent.
