Mabna Institute
Worldwide Hacking Campaign

- **Data access stolen from U.S. universities cost $3.4 billion to procure and maintain since 2013.**

- **In total, the hackers stole at least 31.5 terabytes of data, which they exfiltrated back to computers controlled outside the United States.**

- **31.5 terabytes equal more than 15 billion printed pages.**

- **Campaign also compromised 47 private sector companies, the Federal Energy Regulatory Commission, U.S. Dept. of Labor, Hawaii, Indiana, and the United Nations.**
