Subject: Agribusiness Investigation

Hello,

As a citizen gardener, I am deeply troubled by the GMO industry's effect on biodiversity. The science experiment that the world is being subjected to by Monsanto and others is absolutely frightening. The radical infusion of GMO seeds into our world's delicate ecological system is totally irresponsible. Please keep the food system working by limiting the input of such potentially lethal variables into it.

Thank you,

Joy Watts
Citizen of Albuquerque, NM 87102
