---

I am writing because I am concerned about the lack of competition in agricultural markets, and the lack of inspections and controls. A few companies like Monsanto control our entire food system. They are not interested in the health of Americans. They are interested only in profits.

This has got to stop! I avoid everything I can that Monsanto has anything to do with. But with misleading labeling, companies operating under various names, and out and out lies, it is impossible to stay away from Monsanto and the other conglomerates that control our food system -- and apply undue influence on our politicians.

Please do something to protect our food system and with it our health and our planet.

Thank you for giving me the opportunity to comment.

Sincerely,

Sherry Law
