---

As an American citizen and taxpayer I am extremely concerned about the lack of competition in agricultural markets.

Just one company, Monsanto, controls the majority of seeds in the US, and regularly threatens farmers who don't buy its seeds.

There is not good labeling telling me where my food is grown, what chemicals are on it, and if it's genetically modified.

There is a "revolving door" of personnel between corporate lobbyists and government regulators. No wonder corporations aren't held to strict standards.

Prices are rising at the supermarket, but farmers are struggling -- and big food companies have made record profits this year.

Food is grown and raised in ways that are terrible for the environment, with methods that pollute the water, poison the soil, and threaten our long-term food security.

Please take steps to deal with these urgent problems!

Sincerely,

Dr. Mha Atma S Khalsa
