Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

Thank you for giving me the opportunity to comment.

I feel that our food supply is manipulated by Monsanto and their chemical practices are ruining our health and the health of the environment. It is incomprehensible that Monsanto is pressuring farmers to only grow their gm seed and not allow them to grow unchemically treated seed. No one knows the long term effects of the huge amounts of pesticides and other chemicals that are being doused on the plants and that runs into our streams and lakes.

Sincerely,
Sally Cummings
