Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. I am also concerned about the chemical use in the food markets and timber areas.

We live in the rural part of Washington State. We have more cancer per captia than most anywhere else. Fertilizers are dumped yearly and drain off into the water sources. Hormones are being added at all levels. Just this year my eight year old grandson was diagnosed with Precocious Puberty. Yes he is growing hair, and changing into the man's world at eight. He has had an implant to stop the puberty. My granddaughter has been diagnosed with Polycystic Ovarian disease. How far does it have to go. Medical expenses are hurting this military family. Yes they have coverage, no it is not all paid for. Out of pocket is extreme.

Some one needs to take a stand against all of big industries like Monsanto and the money mongers. It is killing our healthy food sources.

Thank you for giving me the opportunity to comment.

Sincerely,

Janice Wa
