I am writing because I am concerned about the lack of competition in agricultural markets.

The giant agri-businesses are polluting our water and soil, in addition to maintaining a horribly unhealthy, unethical facilities. The overcrowded conditions and improper food (the practice is out of control - they feed other animal parts to the animals - this is sick and dysfunctional and their bodies are not evolved to handle it - nor should they be) and hormones which are unnatural/unhealthy, and antibiotics which are ruining our human ability to fight disease, etc. etc. etc.

Further, Giant businesses are destroying smaller businesses which are ruining main street which is killing our country. Enough already!

Restore and return our agriculture to sane practices that have been around for thousands of years.
