Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. I am not interested in eating or feeding my family genetically modified food. At present, Monsanto controls most of the seeds on the market. Since they are a huge proponent of genetically modifying seeds, this means nearly all the seeds and therefore food, has been tampered with. I just want my food to be 'real' and 'clean' as God intended.

Thank you for giving me the opportunity to comment.

Sincerely,

Anndria Ciabattoni
