Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. AND I am concerned about the risky way in which agricultural chemicals are being carelessly applied to crops with terrible ramifications for the environment, our shared water supply, and our long-term food security.

Monsanto Corporation is an example of a company that may be doing enormous damage to the environment with its Roundup Ready seeds and its formulations of pesticides. Monsanto should not have the license to endanger our food security for years to come. Please rein in companies like Monsanto! We all depend on food for our existence, and we deserve to have food that is grown by farmers who are free to use methods and seeds that are best for the environment and our food security now and for future generations.

Thank you for giving me the opportunity to comment.

Sincerely,

Emily Moore
