Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

I am also very concerned about the emergence of GMO and genetically modified food products. Genetic modification has not had any long range testing and assessments, and has already yielded some disturbing problems in health, allergies, property line/seed disputes, litigation, and of course the genetic splicing of pesticides into our food supply.

Thank you for giving me the opportunity to comment.

Sincerely,

Hal Anthony
