Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. I notice that I get less and less information about what is in products I buy - even tho I buy mostly at farmer's markets - what I do buy at stores is unreliable.

How did we get to the point where 1 company, Monsanto, controls the majority of seeds in the U.S. and is a threat to farmers????
Ugly

Time for the U.S. government to defend and protect the farmers without whom none of us would survive and to further protect consumers from the greedy manufacturers of products which many people are eating - none of which is REAL food or healthy for any of us.

Stop protecting agribusiness and start protecting the health of the citizens of this nation - enuf of corn products and unhealthy meats and raising of livestock in unhealthy conditions which only cause illness and pollution everywhere. Do your jobs. Protect and defend the people, not the corporate greed who could care less about the health of the people.

Thank you for giving me the opportunity to comment.

Sincerely,

sheila goldmacher
