US Department of Justice

Dear US Department of Justice:

Thank you for the opportunity to submit comments in advance of the Department of Justice's workshops on "Agriculture and Antitrust Enforcement Issues in Our 21st Century Economy."

As a food justice activist, I am particularly concerned about Monsanto's control over the seed supply.

Whereas I agree completely with the text from the start of this mass email campaign, i thought I could just keep it simple for you. Because I'm sure you already understand the negative circumstances of your product, and for you perhaps it is only business.

Bottom line is your products are bad for the planet and bad for community. We will see to it that your operation be extinct immediately. We meaning those of us in solidarity that standing against the rape of our natural resources and harmful manipulation of our neighbors.

If you knew anything about genetic diversity there would be no argument.

P>S your website is creepy, feeding the planet?

Sincerely,

BriAnne Alyce Hutchinson
