Monsanto is one of the biggest criminal corporations to ever grace the face of planet Earth. Not only have they systematically eliminated agricultural competition with their nefarious and often illegal business practices, but they are destroying the very basis of life and the food chain on the planet with their GMO (genetically modified) foods. The introduction of GMO foods and the numerous pesticides and fertilizers to our environment pose a threat to both humans as well as ALL living beings that inhabit the Earth. Organic farming practices have shown to be both safer for humanity and the environment but also provide a higher yield and does not damage the soil for future crops. Monsanto is intentionally attempting to create disease and illness in order to bring to fruition plans to reduce the world's population by so-called "elite" within our world government's. It is the job of the Dept. of Justice to prosecute companies like Monsanto for crimes against humanity and to prevent companies like Monsanto from doing any more harm to the people of the United States and the world. To do otherwise would not only make the DOJ complicit in the crimes of Monsanto, it would make you guilty of Misprision of Felony and traitors to the Constitution.

Aloha
