Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. Monsanto is a giant and a monopoly and there should be legal action taken against them for other companies being swallowed up by them. Monsanto really only makes bad chemicals that harm humans and genetically modified food that if you tried to pull it from the land and consume it, you would be sick! What does that tell you? A chemical company should not be able to produce foods that anyone, even animals consume!! It's that plain and simple. Plus Monsanto is like a mob when it comes to forcing farmers to use their genetically modified seeds. Farmers don't want to use them, but if they don't use them, Monsanto takes them to court for all that they have.

Please rescue us from the Monster Monsanto and other food sources, hopefully certified organics can feed us the way we ought to be fed.

Thank you for giving me the opportunity to comment.

Sincerely,

Cheri Lattimore
