Thank you for the opportunity to comment.

Our Nation faces an unprecedented challenge with the current and impending decline of the world supply of oil, which is soon to take another plunge.

We urgently need to re-localize, diversify and make resilient and MORE sustainable our vital food supply.

It's time to educate more young farmers in sustainable and organic farming, and to give incentives for locally-based, resilient, energy secure and diverse food production.

Please see www.oildepletion.wordpress.com.

Also, we must immediately unlock the hold of seed control by the large corporation Monsanto.

Sincerely,

Phyllis Sladek
