Subject: Comments

Hello,

I am writing because I am concerned about the lack of competition in agricultural markets.

I think there is a total nonsense on agriculture today in the US .
Most of the food seeds are controlled by one company MOSANTO. They have really powerful lobbies that prevent any improvement in agriculture politics.

There is a "revolving door" of personnel between corporate lobbyists and government regulators. No wonder corporations aren't held to strict standard

This company use fear to sell its products to farmers in US and in the world.

This company is a nightmare , how it is possible to let only one company controlled seeds/ fertilizing/ GMO ?
Concerning environment , their products likes fertilizers / chemicals / GMO destruct the Biodiversity , pollute the water and pollute the food we eat : they are based on petroleum , so it means we, you eat oil at the end !

In addition this pollution creates so many collateral damages (Sickness/ cancers for farmers , water pollutions, kill species etc..)

It is so funny to see their commercials saying that they work to help people in the world, so hypocrit!

Even if I don't doubt that their lobby will buy some right people to prevent any change , thank you for giving me the opportunity to comment

Sincerely,

isabelle boulain
