Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. I believe it is wrong to have one major corporation (Monsanto-who controls the majority of seeds in the US) in control of our food supply. If Monsanto had its way, all of our food would be genetically engineered. I have read enough proof that GE foods are so very dangerous that I do not want Monsanto involved with the food I eat. I want to be able to choose what food I eat and to know where it came from. The current lack of competition is making that choice very difficult.

Thank you for giving me the opportunity to comment.

Sincerely,

David Lloyd
