US Department of Justice

Dear US Department of Justice:

Thank you for the opportunity to submit comments in advance of the Department of Justice's workshops on "Agriculture and Antitrust Enforcement Issues in Our 21st Century Economy."

As an organic consumer, I am particularly concerned about Monsanto's control over the seed supply. Our future depends upon having seeds available to all, and seeds that do not fuck with humanity.

Wake up and smell the roses - the ones that aren't GMO's smell a lot better. Please think about the futures of your own families, think about the the seventh generation down the line - what serves them best? There is evidence that GMO's are dangerous to our futures. What do you want for your children's children?

Sincerely,

Susan Earle
