---

I am writing because I am concerned about the lack of competition in agricultural markets.

If I am what I eat and I continue to have only genetically altered food available to me then I am a hybridized human. Dont allow that to happen. When man tries to tinker with nature to make something 'better' history shows we only screw things up in the long run. Please stop big business from manipulating consumers under the guise of 'feeding the world' its only about the dollar and bottom line profit to them not the greater good for all people.

Thank you for giving me the opportunity to comment.

Sincerely,

Margaret Saavedra
