Subject: Comments

I am uncomfortable with the way we produce and label our food. It is poisonous to our bodies and the environment. I do not believe that corporate lobbyists should be involved in government regulations. Our standards need to be more rigorous to protect our health. Foods that use GMOs should be labeled. I understand that this would require a label on the majority of mass produced foods. It is more dangerous for us to ignore this problem. We are endangering our seeds and ourselves. Please encourage more competition in agricultural markets.

Thank you for giving me the opportunity to comment.

Sincerely,

Raquel Johnson
