Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets.

Recent documentaries hammer home the ways in which Monsanto will ultimately destroy the health of people consuming products from its seeds. It is the most horrific situation of my lifetime since the Holocaust, and more insidious because few consumers are paying attention. I urge you to steer Monsanto back into a direction that does not implant seeds with pesticides, punish organic farmers on plots neighboring farms using Monsanto products... you know the ills. Please either shut down Monsanto or make the company responsible for fostering, not destroying, healthy food.

Thank you for giving me the opportunity to comment.

Sincerely,

Susan Drake
