US Department of Justice

Dear US Department of Justice:

Monsanto is clearly one of the biggest corporate criminals in history, and is having a highly negative impact on me through its gobbling up seed companies to control seeds in this country. it will be the destruction of organic seeds and small seed companies. What it is doing to the Indian farmers is legendarily criminal, although it has probably paid off the insanely corrupt Indian politicians to get away with it. The attack on the American Farmer by monitering its genes is bully capitalism at its worst, not to mention the Frankenfoods it is forcing on the American Diet, which is likely to have major consequences on healthcare costs. Monsanto is clearly the biggest corporate criminal in business now, and should be stopped!

Sincerely,

Lee E. Davis
