---

I'm writing because I'm concerned about the food my family eats. It is no longer possible to determine where the food comes from, whether it is genetically modified, or under what circumstances it has been grown. Since members of my family have severe reactions to some chemicals, I would very much appreciate either more regulation or, preferably, more competition among food suppliers.

I know that individual farmers are having a hard time financially, but corporations are thriving. This is not right.

Anything you can do to help will be greatly appreciated.

Thank you for giving me the opportunity to comment.

Sincerely,

Linda Joy Yow
