Subject: Comments

I am writing because I am concerned about the lack of competition in agricultural markets. I have known for a very long time of the atrocities of Monsanto. Genetically modified food and seeds controlled by mainly Monsanto is threatening our long-term food security. We need to change the way our food is grown so that our environment is safer for us and our children. We need to stop poisoning our soil and the environment.

Thank you for giving me the opportunity to comment.

Sincerely,

Edith A. Martin
