---

I am writing because I am concerned about the lack of competition in agricultural markets. I don't trust GMO's but I have trouble finding food that isn't genetically modified. I think it's inherently dangerous to our food and farmers to patent seeds and it's harmful to our environment and health to use seeds that require chemicals. Also, it's dangerous to allow terminator genes in seeds. Having to rely on a few corporations so much to be able to produce food is frightening to me. I hope we can encourage more local production of food for our health and the health of our environment.

Thank you for giving me the opportunity to comment.

Sincerely,

Roseann Schutz
